VOLUME 452 February 2015

WE GO WHERE THE WIND BLOWS

THE DUAL NATURE OF

— **T**ragedy and comedy, black and white, heads and tails, north and south — add to the list of opposites the Saturday and Sunday of January's Corinthian Midwinters.

Mostly sunny skies graced the Bay Area on Saturday, January 17. With a brisk 10-knot northerly blowing — more wind than was expected — all 12 divisions had downwind starts. The first start had the most wind; puffs as high as 15 were recorded, and ebb as much as 4 knots was observed at Harding Rock.

Duality being the theme of the weekend, it was fitting that the Corinthian

Yacht Club split the 98 boats into two groups, with the faster boats starting off a committee boat in the Knox racing area west of Angel Island, and the slower boats starting off the clubhouse race deck in Belvedere Cove. The two fleets would be switched on Sunday — at least that was the plan.

For the Knox divisions, the first mark was Ft. Mason, and the committee-boat end of the line was favored in the strong ebb. The Santa Cruz 50 *Hana Ho* won the Division A start, but the 1D48 *Bodacious+* quickly passed them. Everyone started on starboard, and it was pretty

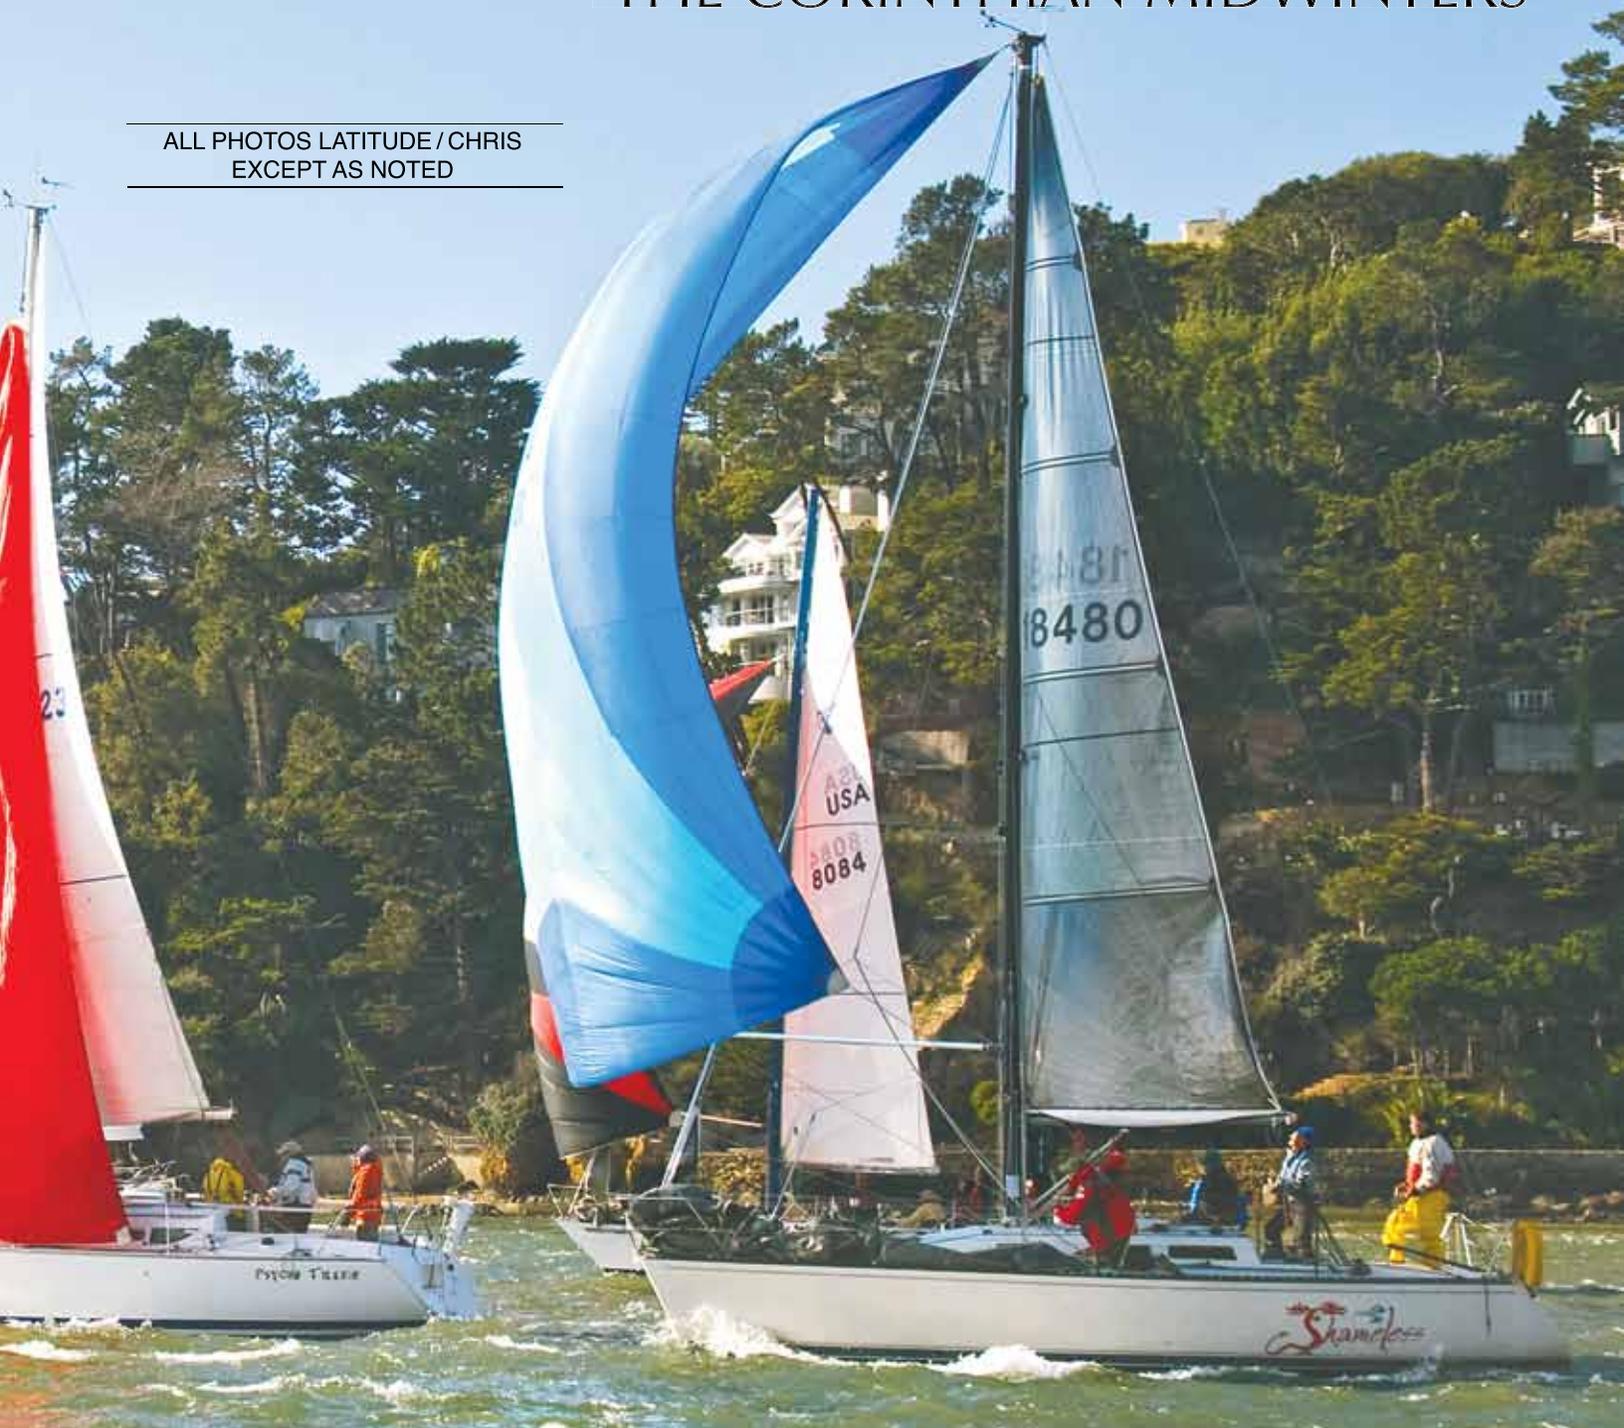

crazy with the big kites going up. Some boats had to peel off and try again. In the melée, the Farr 36 *Racer X* snagged the race committee boat's anchor rode, and the RC went into postponement.

"I know you're busy," said someone over the VHF race channel, "but you'd do us all a favor if you move the pin end a lot closer to San Francisco." Which they did, stating the obvious, "As you can see, it's a downwind start, with a big ebb," before coming out of postponement after about half an hour.

The line was long, and set 90 degrees to the wind. Everyone was reaching along

THE CORINTHIAN MIDWINTERS

ALL PHOTOS LATITUDE / CHRIS
EXCEPT AS NOTED

the line toward each other on opposite tacks. Coming from the pin end, you were on starboard and did a jibe set; from the boat end you were on port and did a bear-away set. The B start was given the same twice-around course as A, then successive fleets starting off Knox were given a single-lap course — just to Mason and back to a turning mark, then a downwind finish off the committee boat. The good breeze made for a quick race.

Although the regatta used two starting areas and sets of courses for the first time, both areas shared a VHF channel

The PHRF 4 division started at the Corinthian YC clubhouse, hoisted their spinnakers, and made a beeline for Belvedere's Peninsula Point.

and a rolling start sequence. The boats in the clubhouse area were confused when their original start times rolled around and nothing happened. They didn't realize they were in postponement too. Announcements were not being made for them on the VHF. Confusion about times and courses continued after the sequences began. Some of the Express 27s thought they might have sailed the wrong course.

Most of the clubhouse starters went to Yellow Bluff by way of Peninsula Point.

On the east shore of the point was a deep-water washing machine, and less breeze. A better strategy was to head for the middle to get in the strongest ebb and the freshest breeze. Hugging the shore of Belvedere for current relief made more sense on the way back to the clubhouse finish.

Back at the post-race raft-up at the club, we caught up with Michael Moradzadeh, who purchased the SC50 *Oaxaca* with David Ritchie in November. The boat is already registered for next year's

Pacific Cup. "She was in Monterey," said Moradzadeh. She had been raced in Santa Cruz, but stopped racing after a pretty unpleasant dismasting."

Liz Baylis stood behind Moradzadeh during the race, whispering sweet nothings in his ear. "We had an extremely pleasant group today," she said.

Seadon Wijssen sailed on Daniel Thielman's R/P 44 *Tai Kuai*. "It was good racing," observed Wijssen. *Tai Kuai* enjoyed a good battle with Buzz Blackett's

Antrim Class 40 *California Condor*. *Tai Kuai* finished the race first, but *Condor* corrected out. "The downwind start was scary because of the 3-knot ebb and the RC boat being so favored," said Wijssen. "This series has gotten a bad rap for the last few years. We were fortunate today because the wind stayed with us." Seadon thinks keelboat racing on the Bay is picking up.

Charlie Brochard from the Olson 34 *Baleineau*, which sailed in the first

division that started off the clubhouse, described an exciting rounding of Yellow Bluff. "The faster boats had two laps. We were coming in from Little Harding for our second rounding, while the smaller boats were rounding after coming in from the start, so the two groups of boats converged on the mark from different directions on opposite tacks."

A conversation-piece anchored off Angel Island, the 235-ft motor yacht *Kogo* became a windbreak for finishers already unfortunate enough to be out in the middle when she was repositioned at the mouth of the Strait.

Another conversation piece, the

THE CORINTHIAN MIDWINTERS

WWW.NORCALSAILING.COM

brand-new, shiny gray C&C 30 *Javelin*, the demo boat for Sail California, is the first of her kind on the West Coast. Dealer Pat Nolan raced her in the new Sportboat 30 division. "We were focused on the Soto 30 with Scott Easom aboard and the Synergy got by," said her sailmaker, Jeff Thorpe. "We were first to finish but we left a little on the race course," he admitted. "We're still figuring out the trim." The boat had just been delivered that Monday. "We practiced on Thursday and Friday in no wind. That's it. We're still working the bugs out, but it performed well. If we didn't make the tactical mistakes, we might have won."

This page, clockwise from top left: Fog shrouded the boats that went out on Sunday; the postponement flag came down and the abandonment flag went up; 'Oaxaca' checked out the wind before Saturday's race; Jim Snow tidied up 'Raccoon'; 'Racer X' doused her kite after snagging the RC boat's rode; kites went up at the Division A start. Center: The only competition on Sunday was of the armchair variety.

"We expected it to be a drifter," said Dave Rasmussen from the Synergy 1000 *Sapphire*. His wife Betty finished the thought: "It turned out great!"

"We had a feisty little group of five Cal 20s," said Jim Snow of *Raccoon*, which had a nice duel with Richard vonEhrenkrook's *Can O'Whoopass* in the last start. The ladies in *Just Em* tried to take advantage of it. "Richard took it going away," said Snow. "He showed his mastery going around Peninsula Point.

I'm proud of all our guys. Everyone was right there at the start." The Cals sailed the shortest course, to Yellow Bluff and back. "When the currents are like that you can be side by side and the current stops just one of you. You stop and spin." We did call it a "washing machine."

Sunday was a day of a different color — literally. Instead of sky blue, it was fog gray. With no wind and limited

THE CORINTHIAN MIDWINTERS

visibility, the race committee postponed ashore well before the first scheduled start time at noon. The would-be sailors proceeded to decimate CYC's build-your-own Bloody Mary bar. A chilly easterly piped up a couple of times, but didn't hold. "As my grandmother used to say, never trust an easterly," quipped a rueful observer.

Around 12:30, a race committee volunteer told the principal race officer, Jeff Zarwell, that the Expedition software was telling them it was about an hour from Yellow Bluff (the shortest course) back to the club in the ebb. We didn't think that was too bad. However, the second time the easterly fluttered in, it brought with it a fog that completely obscured the boats that had gone out to practice. The race committee could not have seen the start line pin, had it been set, or the sail numbers of the race boats. After much discussion among the race council members and Zarwell, the decision was made at 1:10 to abandon racing for the day.

Competition on Sunday was only enjoyed vicariously as the racers cheered

Regatta chair Allyn Schafer (left) kept the daily awards ceremony fast and fun, like the race.

for the Green Bay Packers or Seattle Seahawks in the NFC Championship game. A race to the hoist followed the final touchdown in overtime.

The Corinthian Midwinter Series concludes on February 21-22. Everyone has their fingers crossed for another

day like January 17 (though we'd guess that the race committee would prefer a different wind direction). Saturday the 21st will feature the third annual Rob Moore Memorial Regatta, affectionately nicknamed 'Robgatta'. Rob, *Latitude 38's* racing editor for 18 years, was a strong believer in competitive but fun racing at all levels on San Francisco Bay. The event has been developed to promote midwinter sailing and to raise funds for the #1 cancer killer, lung cancer.

After the race, the aforementioned Liz Baylis, 2002 Rolex Yachtswoman of the Year and an America's Cup veteran, will speak about her recent exotic racing experiences in the Middle East and Asia. Proceeds of the live and silent auctions will go to lung cancer research. A seven-night Bitter End YC Pro Am Regatta package for two is among the items on the auction block. Special awards will be given out for the best red hair, mustache, woman skipper, sailing kids, and more.

There's still time to register for Robgatta or the whole February weekend. See <http://race.cyc.org>.

"We keep boating affordable!"

CIRCUMNAVIGATORS' HOMECOMING —

There is no right or wrong way to circumnavigate our watery planet on a cruising boat. For some, the goal is to get around at a fast clip so they can check this impressive feat off on their bucket lists. Some map out a complete port-to-port schedule and do their best to stick to it. Others keep their minds and itineraries open, readjusting their

route to their Alaska homeport. And the *Baraka* crew were out there for eight years before completing their loop last summer.

As far as we know the two couples have never met, but we'll profile them together here, as they both showed up on the *Latitude 38* radar last month, and they share an affinity for traveling slow.

"Tropical Storm Alvin will become a hurricane by tomorrow. We are in deep trouble."

Randy, now 69, and Carole, 68, were among almost 50 crews that we interviewed in March 2013 at our Panama PPJ Sendoff Party. We remember thinking that it was one of the most fascinating chats we'd had all day.

At the time, they were poised to sail north, 4,500 miles nonstop to Hawaii, and would cross their outbound track en route. Little did they know at the time what challenges lay ahead.

Not long after that Panama *fiesta*, we tried to follow up via email with a few questions and facts to clarify. But we never heard back from them until last month.

As we learned through Randy's email, their trip north was anything but a cakewalk. "We had a passage from hell after leaving Panama for Hawaii," wrote Randy. As you read the following account, bear in mind that when we interviewed the Barnharts in Panama, Carole said, "Up until now, we've really only had about two or three bad days on our whole circumnavigation."

Bad luck struck several days after their departure in early April, when Randy discovered that *Westwind's* diesel fuel tank, which should have been full, was nearly empty. He was shocked by the realization that it had leaked into the bilge through a pitted surface of the tank and had been pumped overboard by automatic bilge pumps. Luckily, they still had 75 gallons in jerry jugs.

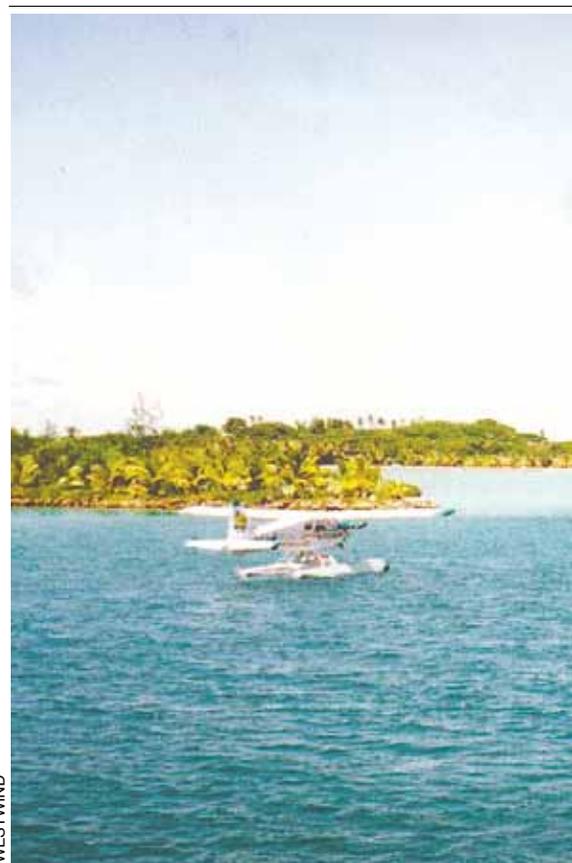

Dave and Jan struck a pose with their PPJ burgee at our 2008 Sendoff Party at Zihuatanejo, shortly before 'jumping' west.

plans frequently as new opportunities and inspirations present themselves.

This 'ad libbing' approach seems to have been taken by both Randy and Carole Barnhart of the Petersburg, Alaska-based Yankee Clipper 49 *Westwind*, and by Dave Pryde and Jan Eckmann of the Seattle, Washington-based Slocum 43 *Baraka*. The Barnharts cruised the world for 14 years before finally crossing their outbound track in May 2013 while en

As you can see, it was almost as if Alvin (blue line) was hunting down 'Westwind' (red line) as it built into a hurricane.

We'll share the drama that followed through excerpts from Randy's log:

April 16— "The winds are so light that turtles are passing us 10 feet away with birds on their backs."

April 24 — "Sailmail wind GRIBs show the Pacific High is not filling in as it should. We are lucky to make 50 miles a day." They'd been powering their genset to make water, but it blew a head gasket. Without the ability to make water, they instituted water rationing. At that point they had 40 gallons of diesel fuel left. Another concern was lots of growth on the bottom thanks to a new paint that didn't seem to be working

May 1 — "I took the Survivor 500 watermaker out of the liferaft and started making water with it. But I do not see how two people could survive on the little it makes. After pumping for a half hour it blew a seal and failed. I cannot fix it." Determined to find solutions, he took the diesel genset apart and improvised a head gasket, which held. They were then able to make water again, plus Randy dove on the bottom. Things were looking up, but the euphoria was short-lived.

May 15 — "Today our weather fax [via Sailmail] shows a deep low has formed 550 miles SE of us. This is what I did not want to see." By that afternoon the low had formed into Tropical Storm Alvin. It was tracking WNW at 14 knots

LATITUDE / ANDY

WESTWIND

COURTESY WESTWIND

RECOUNTING THE HIGHS & LOWS

The Yankee Clipper 'Westwind' lies in a peaceful anchorage at Malolo Lailai, Fiji during the early years of the Barnharts' circumnavigation.

and developing fast. "We are watching it closely," wrote Randy.

"At 1500 hrs the weather report states Tropical Storm Alvin will become a hurricane by tomorrow. We are in deep trouble. We have about two days to escape if it stays on course. I am hoping it will turn north. We are getting *Westwind* ready for a hurricane and will heave-to under mizzen to ride it out if need be." They secured everything on deck and dogged down all the hatches. Although their fuel was getting low, they felt their best hope of avoiding the danger zone was to motor to the southwest.

May 16— The next day Alvin had become a Category 1 hurricane with winds of 80 knots, and it turned south, as if chasing *Westwind*. When they learned of the storm's turn, they had winds up to 40 knots from ENE, so the hardy Alaskans turned due north to escape Alvin's wrath. That night winds picked up to 60 knots.

May 17— "We are hove-to at 14°42'N, 114°29'W. Winds have gotten up to about 80 knots. We are below deck and waiting. The noise is deafening. *Westwind* is sliding sideways at 2.5 knots and riding well."

By morning Alvin had passed them

and its fury was diminished to a tropical storm. "We were *very* lucky," said Randy. They set sail again under a 60% jib and double-reefed mizzen, as winds had decreased to 40 knots, with rough seas of about 15 feet. The next day they assessed the damage, which included a crack in the steering bracket.

May 24 — *Westwind* crossed her outbound track from April 2000 and Carole baked a cake to celebrate.

Things were definitely looking up, as they had steady ENE trades of 10-12 knots. But Randy was still hand-steering 18 hours a day and using the autopilot only while he rested due to their limited ability to charge batteries. Carole was unable to take the helm at all due to a

knee problem.

"We only have 14 gallons of diesel left now. The batteries are near dead. I am running the engine one hour a day and have to parallel the starter batteries to turn the engine over with 24 volts. This is not good. The bottom is getting dirty again, so we are making only about four knots max. It is not safe to go over the side again to clean the bottom. We are constantly dehydrated and down to 20 gallons of water total. Ration is reduced to one liter a day each. In the tropics that is not enough. Any work that I do causes me to sweat too much to recover with only one liter of water."

June 4 — Randy discovered that many strands of the forestay had parted. He jury-rigged forward tension with a halyard, and *Westwind* kept sailing under shortened sail. A few days later Randy was working on the damaged steering system when a deck hatch crashed down on his ankle, cutting it down to the bone.

June 10 — With only 287 miles to go before making landfall at Hilo, the rigging and steering repairs were holding, but the couple was down to only four liters of diesel and three gallons of water. With no juice for the autopilot, they had to heave-to at night to rest. They saved the little battery power they still had for

occasional looks at the chart plotter and AIS.

June 12 — "The starter is now going bad and the starter batteries are ruined. I will stay on watch until we get to Hilo as this is no time to rest."

The next day, June 13, they were 2.5

"Winds have gotten up to about 80 knots. We are below deck and waiting. The noise is deafening."

miles from Hilo with a half gallon of diesel left to keep the engine primed. As they got close, the wind died and *Westwind* began drifting north. Randy alerted the Coast Guard at Radio Bay of their situation, and requested that someone bring out five gallons of diesel. "I did not care who brought it, or what it cost." Just before midnight a Coast Guard Auxiliary boat fulfilled the request, and a short while later, after 67 days at sea, *Westwind* anchored in Hilo Harbor.

Reflecting on the ordeal, Randy wrote later, "On the good side, this passage was a great weight loss program." They'd each

LATITUDE / ANDY

Randy and Carole are seen here at our 2013 Puddle Jump Party in Panama. Is that a 'thumbs up' or are they hitchhiking?

lost 35 lbs. After 70,000 miles, he says "that was by far the toughest passage. It took all the knowledge we had to keep going. You never know how a passage will go until it is over. You can 'what if' it to death. You take what comes; do what needs to be done. You never wait to be rescued."

Of course, that passage wasn't the only time this pair was challenged.

CIRCUMNAVIGATORS' HOMECOMING —

In fact, it would be hard to imagine anyone sailing around the world for 14 years in a relatively small boat and *not* facing many substantial challenges. As we often observe, long-haul sailing tends to be a series of highs and lows. Here's an excerpted recap of the Barnharts' adventures before Panama, gleaned from that memorable 2013 interview. (A big, gregarious guy, Randy did most of the talking.)

They sailed south from Valdez in 1999, and 'jumped the puddle' to the Marquesas the next spring. "We were there for Festival 2000 [the millennium celebration] and had a ball," Randy recalls.

"From there we managed to get to Fiji just in time for the 2000 *coup d'état*. But our stay was wonderful. We spent a year there. Fabulous place. Then we kinda bounced around for a few years — Vanuatu, New Caledonia, Tonga. . ."

They loved Australia, and stayed for three years. "We liked it so well," said Randy, "we had to get out of there or we never would have gone anywhere else."

After a season in Cairns, inshore of the Great Barrier Reef, they crossed to the Louisiade Archipelago of Papua New Guinea: "*Westwind* was one of only about seven or eight yachts there. We did a lot of trading with the locals. Wonderful

people; very safe there."

Next, they went back to Australia and 'over the top'. "We managed to get to Bali just in time for the famous night club bombing [October 12, 2002]. We always seem to arrive when something interesting is happening!" From there it was on to Borneo and Singapore, then they bounced back and forth between Thailand and Malaysia, as so many cruisers do.

In December 2004 they had just gotten settled into the anchorage in front of the Royal Langkawi Yacht Club when a friend called on SSB. "He was about 80 miles out and said there was something

HIGHLIGHTS OF BARAKA'S EIGHT-YEAR CRUISE

When Dave Pryde and Jan Eckmann, now both 64, sailed south from Seattle in 2006, they already 'knew the way' to Mexico and also to French Polynesia, as they'd traveled the same route 18 years earlier on their first extended cruise. That four-year journey took them as far as Turkey. But when they headed west from Mexico in 2008, the plan was to go all the way 'round.

After eight years of voyaging, they finally completed their lap around the planet last summer. Last month, they checked in with some highlights: "Our travels through the Pacific islands were fabulous. The diversity of the various island groups made every landfall a new experience. Our stops at Palmerston Island and Minerva Reef were especially unique and most unforgettable."

Dave and Jan tested their agility in the ancient fruit carrier's race at the 2008 Tahiti-Moorea Sailing Rendezvous.

Like the majority of South Pacific cruisers, they "fell in love with New Zealand and couldn't get enough," wrote Dave. During the Southern Hemisphere's summer there, they bought an SUV and toured North Island before sailing up to the tropics again to tour Fiji, Vanuatu and New Caledonia.

Next, it was on to Australia, where they based at Scarborough and loved it. But eventually, "Southeast Asia beckoned as a great cruising area and a land of richly varied cultures. Indonesia provided a vibrant introduction to Southeast Asia, and what a grand way to begin. We were overwhelmed with the delectable foods and their 'poignant' aromas.

"Seeing Indonesia's fishing industry was worth the visit. Vessels of all sizes were using every method of fishing imaginable. Hundreds of tiny boats would go out every night, with nothing more than a lit cigarette indicating their presence.

"We cruised the waters of Indonesia, Singapore, Malaysia and Thailand, and took land trips to visit Cambodia, Vietnam and Laos. The combination of cuisine, cultures, history and affordability made our two years there fly by. A cruising boat proved to be a great base for exploration."

But when they were ready

to move on, they were faced with a tough decision. Due to piracy in and near the Gulf of Aden, they couldn't go up the Red Sea to the Med as originally planned. Shipping *Baraka* was not in the budget, and they were not too thrilled with the idea of sailing home via Japan across the North Pacific. "That left either selling *Baraka* or crossing the southern Indian Ocean, rounding South Africa, then taking on the Atlantic, Caribbean and Pacific.

"The southern Indian Ocean meant sailing 4,700 miles in unrelenting high winds, with few places to stop for repairs or re-provisioning. Rounding South Africa also scared us. Antarctic storms opposing the fabled Agulhas Current can create sea conditions that could sink almost any ship.

"Jan and I decided to break the Indian Ocean crossing into five passages, with planned stops at Cocos Keeling, Rodrigues, Mauritius and Reunion. We ended up making two additional, unplanned stops at Madagascar and Mozambique when forecasts for dangerous conditions made landfalls prudent. *Baraka's* 75-lb anchor held through five days of waves breaking over the bow and a howling full gale. Nail-bitingly difficult, but a safer alternative than sailing on through 70-knot winds and seas up to 65 feet high!"

After arrival at South Africa, they spent three months exploring its attractions, including game parks, wineries, battlefields and townships. The experience gave them "an appreciation for the challenges facing this beautiful but troubled country."

Although they'd seen much of the country, the hadn't yet rounded the treacherous Cape of Good Hope. "Heavy weather conditions were to be expected when sailing around the tip of South

RECOUNTING THE HIGHS & LOWS

going on out there. We thought: *tsunami!* We gave a warning, but nobody seemed to know what we were talking about. The locals said, 'Just tie more dock lines.'"

They made it far enough offshore to survive the tsunami's swells rolling under them, but burned up their diesel engine in the process. "We were safe," explains Randy, "but Rebak and Telaga Marinas were destroyed." Being a retired paramedic, he and Carole came back inshore to help out after the threat was gone. It was a full year before they completed their engine refit. That so-called Boxing Day Tsunami (December 26, 2004) was the deadliest in modern times.

Africa. The trip was rough and scary; the most scared I've been in over 12 years of cruising. We finally made it safely into the Simonstown marina, where the constant 40-knot winds were the norm."

From there, passages up the South Atlantic to the Caribbean, west to Panama, then north to Seattle, were relatively easy, as expected, despite a typical laundry list of broken gear along the way. After transiting the Panama Canal, they spent time in the Galapagos before crossing to French Polynesia again. Along the way, they completed the loop of their circumnavigation.

"*Baraka* crossed the ITCZ for the sixth time to reach Hawaii, then we made our bittersweet final passage home to the Pacific Northwest.

"On our eight-year voyage we traveled 46,000 sea miles, spent 284 days on passages, stayed in 242 anchorages and 77 marinas, and visited 45 countries. Sharing the world with other cruisers was one of the highlights of the trip for us. Since departing in 2006, we had the fortune to get to know the crews of 280 cruising boats, from 27 different US states and 26 different countries. Our lives were enriched by meeting these interesting travelers. . . Unfortunately, six of the boats we sailed with either sank or were lost on reefs. Thankfully no lives were lost, with several of the crews being rescued by fellow sailors.

"Although we have the figures on boat acquisition, equipment purchases, upgrades, repairs, maintenance, fuel, travel, etc., we have not yet run the totals. We only know it was the most rewarding investment we could have made!"

You can read more about *Baraka's* travels on their blog site, www.svbaraka.com, which also has a summary of their first voyage, from 1988 to 1992.

The Barnharts' eventual route through the Indian Ocean was down the outside of Sumatra to Aceh, out past Cocos Keeling and on toward Mauritius. They got within about 100 miles of it when a friend radioed that they *had* to go to the Seychelles, so they did. Next, it was on to the remote French archipelago of Mayotte, in the channel between Mozambique and Madagascar. "We'd wanted to go to Madagascar," explained Randy, "but they were having a coup at that time. Meanwhile, the Somali pirates were taking a lot of yachts and people were being shot. We managed to get through, right down the middle of the Mozambique Channel to South Africa."

Along the way they stopped at the tiny French island called Juan de Nova, in the narrowest part of the channel. While there, *Westwind's* "brand new" 3/8-inch anchor chain broke in 20 knots of wind. "It was supposed to be American-made, but it was Chinese." So Randy let down another rode, put on his scuba gear, and swam down to retrieve the 150-ft length of chain and an anchor. But things soon got more complicated. "There were a lot of sharks there and I had a lot of problems. The worst was that I got mask squeeze at 60 feet and basically went blind."

Adding to the urgency of the situation, the second rode got jammed on a coral head. Luckily, he was able to grope around and untangle it: "If I hadn't gotten it off we might have lost our boat. I followed the rode up, but I couldn't see. It was pretty messy; I'd hemorrhaged everywhere."

About the time he finally clambered aboard, the French navy came along and said *Westwind* couldn't anchor there. "I couldn't even see them." So for three days they sailed down the Mozambique Channel with Carole steering and tending the sails, while Randy helped to navigate as much as he could without vision. "By the time I got to Richards' Bay, South Africa," remembers Randy, "I could finally see again, but it looked like somebody had hit me in the face with a baseball bat."

They took *Westwind* around South Africa and up to Namibia. "That place was wonderful, in fact, the whole area is fantastic." On the way up the South Atlantic to the Caribbean they stopped

at St. Helena, where Napoleon was once imprisoned in exile by the British, then they made a stop at French Guiana on their approach to the Caribbean. "At the prison where Papillon was held, the old guards' accommodations are now a nice resort."

From there it was through the Caribbean, up to Puerto Rico and Florida and eventually on to Panama, where this narrative comes full circle.

A sunset snapshot of Carole and Randy in a Thailand anchorage in 2004. They were in neighboring Malaysia when the tsunami hit.

Despite that hellish run from Panama to Hawaii, the Barnharts would probably tell you that they experienced many more highs than lows. In fact, although they're now enjoying sailing in Southeast Alaska, they say the South Pacific still beckons.

"I could finally see again, but it looked like somebody had hit me in the face with a baseball bat."

Within the worldwide community of sailors, we hold circumnavigators in especially high esteem, as each of them has accomplished a truly remarkable feat.

Long ago, *Latitude 38* established an official roster of West Coast circumnavigators, which you can find at www.latitude38.com. We include sailors based on the West Coast, including Hawaii, as well as trips by non-West Coasters whose voyages began and ended here.

Will your name someday be added to that prestigious list?

— **latitude/andy**

HAWAII RACE PREP —

The 2016 Pacific Cup from San Francisco to Kaneohe Bay, Oahu, is still a year and a half away, but the Notice of Race has been posted and sign-ups are already underway. The first divisions will start on July 11.

The Singlehanded TransPac from Tiburon to Kauai is tentatively scheduled to start on July 2 next year, and the first start of the 2016 Vic-Maui Race has been announced for July 7.

If a 2016 Hawaii Race is on your to-do list, the time to start getting yourself and your boat ready is now. If you're planning for this July's Transpac, check to make sure you've already done everything up to the six-months-out section below and start there (see the box below for more on the Transpac).

This story is tailored for the boat owner/skipper. We'll follow up with some suggestions for would-be Hawaii race crew next month.

1.5 Years Out:

- "Decide if you are racing seriously, racing for fun, or cruising," says Pacific Cup Yacht Club staff commodore Steve Chamberlin, who's done four Pac Cups. "A mixed boat is an unhappy boat; everyone needs to be on the same page. Think about the Cruising Division: same event, much less pressure."

- If you don't already have one, select a boat and purchase it. A lot of worthy, ocean-capable boats can be found for sale in these very pages.

- Consider a partnership to share the cost. Two newly-purchased SC50s, *Adrenalin* and *Oaxaca*, are partnerships. But it's important to have a well-defined partnership agreement between people with similar means and goals.

- Already have a boat? Start spend-

"Spend Spring 2016 on the ocean, not getting the boat ready."

ing money on it now. The drain on your wallet will hurt less if you spread it out over time. If you're wondering how much this adventure might cost, check out a sample budget at <https://pacificcup.org/kb/pac-cup-expenses>.

- Also read Steve Chamberlin's <https://pacificcup.org/content/getting-organized> and Mary Lovely's Timeline article at <https://pacificcup.org/kb/timeline>. Much of the information in this story is gleaned from those postings. Lovely has done seven Pac Cups and one Transpac.

- More winter reading: Immerse yourself in last year's race updates on the Pac Cup and Singlehanded TransPac (SHTP) websites.

- Consider whether you'll be able to take the time off from work before spending a whole lot of money.

1.25 Years Out:

- Get trained. You'll want at least a full season or more of ocean racing under your belt, and in order to sail in local offshore races 30% of the crew must have valid Safety-at-Sea certifications — including the "person in charge."

The ISAF-approved BC Sailing Offshore Personal Survival Course will be offered at West Vancouver YC on March 1-2. In the Bay Area, SFYC will host the

run to the islands.

The oldest of the 'oldie but goodies' is *Martha*, an 84-ft schooner that was built in 1907, entered by the Schooner Martha Foundation of Port Townsend, Washington.

The second oldest boat entered to date is Sam and Willi Bell's Long Beach-based Lapworth 50 *Westward*. Built in 1962, the Lapworth 50 actually has a shot at overall corrected time honors, as evidenced by the fact that she was near the top of the leaderboard for much of the 2013 Transpac.

If you have a more 'normal' boat, don't be deterred from entering, as owners have already signed up with a Beneteau, two Jeanneaus, a Catalina and such. From Northern California, two Richmond YC-based boats are entered: the cold-molded Farr 36 *Sweet Okole* and the SC50 *Adrenalin*. Entry fees range from \$1,250 to more than \$10,000.

The race starts are on July 13-18. For details, visit www.transpacyc.com.

— **latitude** / richard & chris

48th TRANSPAC ENTRY ROSTER SHAPING UP NICELY

The standard entry deadline for the 48th Los Angeles to Honolulu Transpacific Yacht Race is four weeks away — March 1 — and the late entry deadline is June 1. As of press time, 35 boats had signed up, including two 100-footers fresh from success in the recent Rolex Sydney Hobart Yacht Race.

The Reichel-Pugh 100 *Wild Oats XI* took line honors in Hobart for a record eighth time, besting Jim Clark's \$100 million 100-ft *Comanche* and her all-star crew. *Wild Oats* has been entered in the Transpac by Robert Oatley of Australia's Hamilton Island YC and Roy P. Disney of Southern California. The second 100-footer entered is Manouch Moshayed's totally redesigned Newport Beach-based Bakewell-White *Rio100*, the fourth finisher in Hobart. *Comanche* will be going after the transatlantic record, so she'll not be racing to Hawaii, but there could be other 100-footers.

The third biggest entry is the inter-

national sailing legend, the S&S 79 *Kialoa III*, campaigned around the world starting in 1974 by Jim Kilroy of Los Angeles. She's now owned by Jorge Madden of Helena, Montana, who nonetheless will be racing under the burgee of the Yacht Club of Monaco.

The Transpac has always been a sledfest; so far three SC70s — *Grand Illusion*, *Holua* and *Maverick* — have signed up. More are possible.

Lloyd Thornburg of Santa Fe, St. Barth, and the New York YC will be returning with his totally rebuilt Gunboat 66 cat *Phaedo* ("Fay-dough"). The big orange machine — with a 12,000-lb load on the headstay at rest — had turned in a 24-hour run of 427 miles in the last Transpac before losing her stick. Another Gunboat cat, *Chim Chim*, the second Gunboat 62 ever built, is undergoing a total refit at Driscoll's in San Diego (see *Sightings* page 66). Her owner hopes she'll be done in time for a

TIMELINE TO SUCCESS

LESLIE RICHTER / WWW.ROCKKIPPER.COM

Kame Richards drives the Schumacher 46 'Surprise', skippered by Bob Hinden, in the home stretch of the 2014 Pacific Cup.

ISAF Sea Survival for \$240, with two weekends to choose from next month: March 7-8 or March 14-15.

One-day US Sailing Safety at Sea Seminars will qualify you for California to Hawaii and coastal races. The next one will be offered for \$130 on May 17 at Encinal YC in Alameda. Shoreline YC in Long Beach will host one on July 12. Sign up early, as these sessions fill up quickly.

- Prep your rig for offshore racing. Scott Easom of Easom Rigging says it takes about two weeks for his company to do a rig inspection and replace standing and running rigging. Do this before the spring offshore season starts.

- Have your hull and structure inspected.

- Plan an emergency rudder system and cost it out. "Seriously consider a cassette system that is effortless to install in a seaway," says Singlehanded TransPac chair Brian Boschma, a veteran of four Pac Cups and one SHTP. "Anything else will be virtually impossible in a seaway, especially if you're solo. I have broken a rudder on a Pac Cup, and the cassette e-rudder took 10 minutes to have up and running."

1 Year Out:

- Attend the Pacific Cup Offshore Academy (PCOA) at Richmond YC in June. These sessions impart "a lot of re-

ally good information on ocean sailing and preparing your boat for such adventures," says PCYC commodore Gary Troxel, a veteran of four Pac Cups.

- Sail on the ocean as much as you can, including at night, and with the crew you hope will do the race with you.

- If you're entering the SHTP, complete the 400-mile qualifier 12 to 9 months ahead of the race. "The weather offshore is typically more enjoyable in summer than early spring. The SSS LongPac (Longitude Pacific Race) is set up for this purpose," says Boschma.

- If you're not already physically fit, start working out. You'll need strength and stamina to make it to Hawaii.

- Go through all your boat's systems. Figure out a charging system that will power essential systems even on overcast or windless days.

- Select your communication gear, have it installed and start trying it out.

- If you're sailing solo or doublehanded, plan your autopilot and AP backup, get them installed, and test them in the LongPac or other qualifier. "Autopilots are the biggest power consumers," says Boschma. "Plan the

power budget accordingly and make sure the below-deck connections are sound."

- Start on any other boat projects you haven't already tackled.

- Get your boat insured for the race. "If you're racing solo in the SHTP, you likely will not be able to get insurance," says Boschma. "Consider the total loss of your vessel a possibility."

9 Months Out:

- Carefully review the Notice of Race and add deadlines to your calendar.

- If you've not already signed up, enter the race. For the Pac Cup, the facilities in Kaneohe are limited to about 70 boats, so get your entry in early.

- Continue with PCOA seminars.

- Make your reservations for land accommodations in Hawaii.

- Haul out, get a bottom job, and have your rudder inspected to make sure it is in sound working condition.

"If your rig or rudder have not been out of the boat in the last three years, they need to come out for a complete inspection," reminds Chamberlin. "This should be done at the latest the winter before the race. No excuses — do it. Failure of either of these two will make for a very unhappy passage."

6 Months Out:

- Lock down your crew. Not literally of course!

- Continue your education with the Singlehanded TransPac seminars, which will begin in January 2016.

- Take care of any pending medical and dental issues.

- Purchase or reserve rentals for offshore safety equipment that you don't have yet or that's out of date, such as

'Horizon', shown below finishing the 2013 Transpac, 'Adrenalin' and 'J/World's Hula Girl' are three SC50s entered in this year's Transpac.

SHARON GREEN / WWW.ULTIMATESAILING.COM

HAWAII RACE PREP

an EPIRB, satphone, liferaft or flares.

- Decide how you're going to get your boat back from Hawaii.
- Confirm the time off from work.
- Get your 2016 PHRF certificate.
- Boschma suggests an overnight ocean sail in a winter storm. "Pick one not too severe. Target Monterey and back. Take the crew along. This will result in realistic meal planning. Expect to look for a few more crew afterwards."

4 Months Out:

- Order any sails you still need. "You should allow at least eight weeks," says Kame Richards of Pineapple Sails in Alameda. "It is a lot less stressful and there is time to solve cloth availability problems, as well as time to practice with the new sails."
- Try out your emergency steering under sail with the crew.
- "Spend Spring 2016 in the ocean, not getting the boat ready," advises Chamberlin.

3 Months Out:

- Arrange for shipment of non-race

WWW.NORCALSAILING.COM

Brian Cline and the Berkeley-based Dana 24 'Maris' beat toward the Golden Gate at the start of the 2014 Singlehanded TransPac.

(return delivery) gear to Hawaii. If you're doing the SHTP, ship over larger ground tackle for Hanalei Bay.

- Have the rig checked again. You've been sailing with it on the ocean for a year now.
- Prepare for the pre-race inspection and schedule it.
- Practice crew-overboard and other emergency drills with your race crew.

- Set reefing up to be very simple, and practice reefing and sail changes.

2 Months Out:

- Start organizing your provisions and galley procedures.

1 Month Out:

- Correct any deficiencies found during the inspection.

In the Final Week:

- Finish provisioning.
- Attend the skippers/navigators' meeting and enjoy the pre-race parties.
- Get lots of sleep!

As this issue was going to press, 13 boats had signed up for the Pacific Cup, ranging in size from the Moore 24 *Mas* to the SC50 *Oaxaca*. Will your boat be joining them? For more information on the 2016 Hawaii races, see: Pacific Cup, www.pacificcup.org; Singlehanded TransPac, www.sfbaysss.org/shtp; and Vic-Maui Race, www.vicmaui.org.

"Zero point zero," reported the foredeck crew, even though we could all see the big knotmeter display on the mast as clearly as he could.

"Goose eggs," sighed the spinnaker

tion, either."

"It's going to be ugly at the next mark," predicted the foredeck crew. "Let's make sure the anchor is ready."

I suggested that he bring the small racing anchor up on deck.

That was the one with only a short length of plastic coated chain. We could deploy it silently because the chain didn't rattle, and it could be broken out

of the bottom easily when the wind came back.

"Step carefully!" I scolded. "Let's not shake the wind out of the sails, and keep your weight on the low side while you're in the cabin, if you can."

"No need, actually," said the tactician. "Wind is absolutely zero. Still making good progress to the mark with the current, though."

But even though we were being swept towards the mark at nearly two knots, there was a problem: The mark had to be left to starboard, and on our current trajectory we were going to drift right past it, leaving it to port. I put the boat on a starboard-tack beam reach, aimed at right angles to the direction of the current, hoping that the current might produce two knots of apparent wind in

"It's a better day for paddling than sailing, don't you think?"

the other direction so we could make some progress towards the required side of the mark. No such luck — the air seemed to be stuck to the water and, even after sculling the boat around to the desired heading, trimming the sails for a reach and heeling it over as far as we could so that gravity, if not wind, would allow the sails to take the proper shape, the knotmeter didn't budge from the peg. Then there was a sharp bump against the windward side of the hull.

With everyone hiking out to port we couldn't see what we hit. At first I

thought we must have drifted into a big piece of flotsam. But no, with our water speed at zero, it would be drifting at the same speed as us. A recognizable voice solved the mystery:

"It's a better day for paddling than sailing, don't you think?"

Lee Helm, in her kayak, came around our stern. She wasn't done with us yet.

"Too bad the whole fleet is, like, drifting on the wrong side of the mark. The boats in Division A have already anchored. Got the stealth anchor ready?"

"Now Lee," I warned. "No outside assistance, please."

"For sure, Max. I was careful not to push you forward when I bumped

FROM SEAMANSHIP BY S.B. LUCE

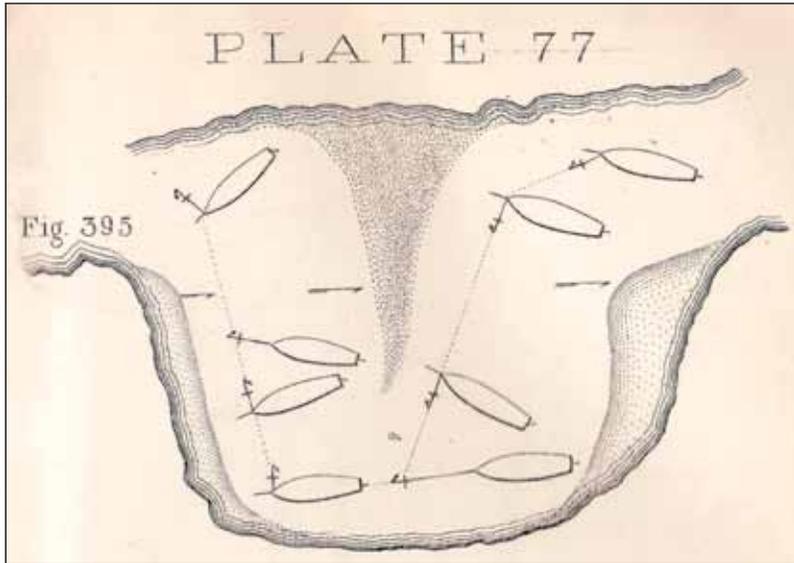

Illustration of clubbing, from the 1868 edition of *Seamanship* by S.B. Luce. Modern texts seem to have forgotten about the technique.

trimmer. He had already disconnected the sheet and lazy guy to keep the weight off the sail, and was holding the clew of the limp sail in his hand.

"Ground speed still one-point-seven," added our tactician, trying hard to sound optimistic. "And not in a terrible direc-

CLUBBIN' IN THE 1800s

Clubbing is described in detail in the 1868 edition of *Seamanship*, by S. B. Luce.

This was the standard text on the subject used at the U.S. Naval Academy; and reprints can be found online for about \$45. But the technique seems to have disappeared from modern texts on the subject.

"Clubbing is recommended for smaller vessels in a rapid river; you may heave in the cable until the anchor is under foot, when she will drift down by the force of the current, veering out or heaving in the cable as she deepens or shoals the water, or as you may wish to diminish or increase her drift, see Fig. 395, Plate 77. Vessels drifting in this manner, generally have a spring from the ring of the anchor, leading in at one of the quarters, so that by veering on the cable and rousing in the hawser, you may present her broadside to the current. This is termed clubbing a vessel. Though, from the danger of fouling the anchor against rocks, or other matter, and the inconvenience of the operation, one or the other of the previous methods should be resorted to, in preference to this.

"Clubbing is such a simple maneuver, where the sets of the tides a known, that it is only necessary to observe that a ship at anchor, with a tide running past her, is as much affected by a motion of the helm, as if she were reaching at the same rate under canvas; therefore, if a ship's helm be put over one way or the other, she will answer to it, and shoot across the tide, taking her anchor with her, if there be short enough scope, so by heaving in to that scope, and putting the helm hard over, she will cross the tide without losing much ground; hence, although, as represented by the arrows in Fig. 395, the tide sets directly over the sands and athwart the deep water channel, yet by sheering her as far as she will go, and bringing her up when she begins to lose ground, she may be dropped down, or sheered across any channel against the wind, where she might otherwise wait months for a fair wind to sail down. It is scarcely necessary to observe, that she will sheer to port more readily with her starboard anchor down, and vice versa."

DRAGGING IT SIDeways

into your hull. But, like, you do remember that you have more choices than just going with the current or anchoring in place when the wind is zero, right?"

"What's she talking about?" asked the tactician. "We can't control the direction of the current." He was new at being tactician, having taken over from Lee, who usually has that job when I can convince her to crew for me.

"But you can control the direction you drag the anchor," Lee replied. "And like, I've already said too much."

"Now I remember what Lee is referring to," I said. "I think it's called 'clubbing,' described in a book on seamanship from the middle of the 19th Century."

"They went clubbing in those days?" said the foredeck crew. "I thought they just passed around a barrel of grog."

"Lead the anchor rode through the

port after-guy block," suggested Lee. And watch what happens.

"Do it!" I instructed.

"But we're still half a mile from the mark," complained the tactician, "and still drifting towards it pretty fast. I don't think we want to anchor here."

"Set the anchor," I repeated.

My crew rigged the anchor rode as instructed, and when the hook took hold in the muddy bottom I let the bow swing around into the current. We suddenly had 1.7 knots of boat speed through the water, but zero speed towards the mark. We were also suddenly being passed by all the boats around us that were not anchored to the bottom, because they were still being carried towards the next mark with the tide.

"You don't want a lot of scope," said Lee from her kayak. "The anchor has to start dragging when you want it to drag."

"I know that!" I hailed back. "You have to keep out of this! No outside assistance!"

I did, in fact, know exactly what to do. The helm responded well in the current flow, so I steered over to the right, pulling the anchor rode with it. Then the rode was at about 45 degrees or more to the current, with the strain increasing all the time, it started to drag. We could feel the shocks and releases as it bounced along the bottom, sometimes catching but then letting go again. We were dragging, but dragging at almost a 45° angle to the current.

We were dragging, but dragging at almost a 45° angle to the current.

"Oh, now I get it!" exclaimed

the tactician. "We're using the keel as the sail, and the anchor as the keel. We can reach across the tide and get ourselves on the correct side of the mark for the starboard rounding!" "He catches on fast!" Lee joked.

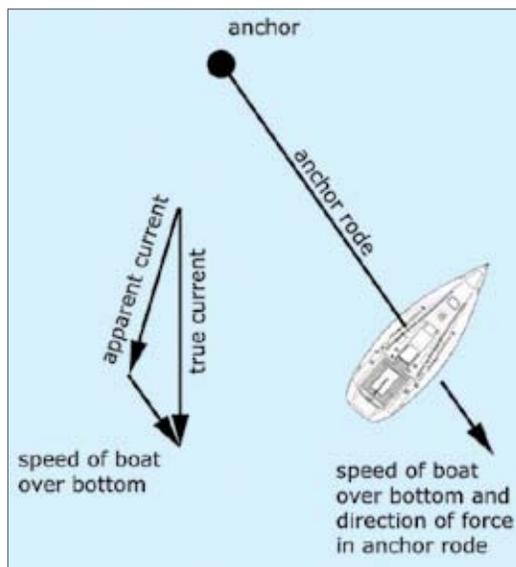

After a few minutes of this we

were the only boat positioned to drift around the mark on the required side, so we pulled the anchor clear of the bottom and took the rest of the ride directly down-current. When we found that we were giving the mark a little more room than it needed, we re-rigged the anchor rode to the starboard afterguy block and 'clubbed' over to the mark for a close rounding to starboard. Once clear of the mark we turned the boat back into the flow, let out some more rode so the anchor would hold, and admired the rest of our fleet as they drifted past the mark or anchored on the wrong side without having rounded it first.

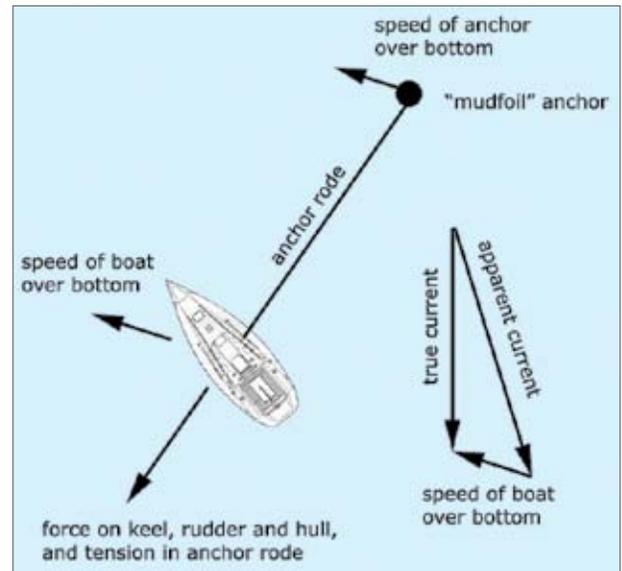

"Was that really legal?" asked the main trimmer. "Isn't there a rule that says we have to be propelled only by the natural action of the wind on the sails?"

"And by the water on the hull," added the tactician. "Seems okay to me."

The foredeck crew had a rulebook in his phone: "That must be old wording," he announced. "Now it's just says

Speed and force vectors for a boat clubbing down-tide, with a conventional dragging anchor.

Speed and force vectors for a boat clubbing up-tide, with a yet-to-be invented mudfoil anchor.

'A boat shall compete by using only the wind and water to increase, maintain or decrease her speed.' So it doesn't even have to be 'natural,' if you call what we did unnatural."

Lee had been paddling around the anchored fleet, exchanging taunts, encouragement, and unwanted advice with friends on various boats. I heard her remind several boats that if, after the start, they were first boat in their division to withdraw from a race that had no finishers within the time limit, then they would get the first-place trophy.

"That's a great trick," said the foredeck crew when Lee had paddled back over to us. "But you know, I think it

"Was that really legal?" asked the main trimmer.

would work better with a big length of chain and no anchor at all. That way it would slide along the bottom with more of a constant drag force, instead of alternately catching and breaking out. Wouldn't be so sensitive to changes in depth and scope, either."

"For sure," Lee agreed. "But like, if you had the right kind of anchor, you could actually drag the anchor upwind — I mean, upcurrent, instead of just within a range of angles downcurrent like you just did."

MAX EBB

"With zero wind?" asked the tactician. "How would that work?"

"I mean, like, you already figured out that the anchor in the mud is like the keel, and keel of the boat in the water is like the sail. We're using the same principles to work the mud-water interface instead of the water-air interface. If you can find an anchor with a decent lift-drag ratio in the mud, you can tack up-current."

"What would that anchor look like?" I asked.

"I dunno," replied Lee with a contrived shrug. "Would make a good design contest for an engineering class. I mean, we're all getting tired of that egg drop contest from the roof of the mechanical engineering building, and the concrete canoe race converged on the optimal design, like, a decade ago."

"I'm thinking it would have to look like a sideways pizza knife," said the mainsheet trimmer.

"You'd need a double rode to control the angle," added the foredeck crew.

"You'd have to sail it at the right angle through the mud, sort of like a kiteboard kite."

"I'm thinking it would have to look like a sideways pizza knife."

"At least three pizza knives, for stability in roll and pitch," the tactician thought out loud. "With spoon-like dishes around each blade wheel, to keep the blades from digging in too deep."

"What keeps them from popping out of the bottom?" asked the foredeck crew. "Remember, the tension on the rode has an upward pull."

"Weight," suggested the mainsheet trimmer. "Or angle."

"I worry about the friction of those dishes sliding along the top of the mud,"

said the foredeck crew. "That stuff down there is like glue — I think the anti-digging-in device should roll, not slide."

The brainstorm session lasted all through lunch, and only ended when a wind line finally reached us. As the only boat to have already rounded the mark, we sailed off on the next leg with a monstrous lead over the rest of the boats in our division, and ahead of some of the boats in the faster divisions too.

"Lee picked the wrong race to miss," I remarked. "She'd love being on the boat right now."

But the wind line was not the afternoon sea breeze fill we expected. It faded and then died again, and the race was abandoned when it was clear that no-one could finish within the time limit.

Lee was right after all. And if we had only had the sense to withdraw first, we'd be taking home the hardware for a division win.

THE RACING

Midwinter racing continues in the Bay Area, with reports this month from **Sequoia, Golden Gate, Sausalito, Berkeley, and South Beach Yacht Clubs**. We check in with two Southland races: the **Two Gates Pursuit Race** out of Long Beach and the **Marina del Rey Malibu & Return**. And we wrap up with some **Race Notes** from across the pond.

Sequoia Yacht Club Welcomes 2015

Just two days after a big party at the club to celebrate the new year, Sequoia YC racers gathered for Winter #3. Winter racing conditions, however, continued to be dominated by light winds. Race captain Tim Anto wisely called a short course of 3.7 miles, which allowed all the boats to creep around the course and return to the marina before the sun set. Charlie Watt in his unnamed red Open 6.50 handily sailed the course and finished in first place. He was followed by Tracy Rogers' J/92 *Relentless* and John Ryan's C&C 110 Express *Xpression*.

Winter #3 was followed just one week later by the third race in the Redwood Cup series. Although the Bay Area was still under a Spare the Air alert and winds were once again forecast to be light, there was a bit more optimism that a light wind could be coaxed to show up and push the fleet around the course. The Redwood Cup is run in pursuit format and so 10 boats gathered in the Port of Redwood City turning basin watching the wind and planning their starts.

Race Captain Andrew Rist called a 6.7-mile course based on expected conditions and an optimistic attitude. The first boat was across the start line

a fairly steady gentle breeze allowed all the boats to start and begin the many tacks required to get out the channel.

The windward end of the course was Sequoia club mark Y. As boats approached the mark to tack around it and begin the downwind run to the finish, they had a chance to watch the Sequoia YC cruisers forming a raft in the vicinity of the South Bay Wreck. Eight Sequoia boats participated in the raft-up, and they cheered on the racers as they passed by on their way to the anchorage.

The faster boats benefited from avoiding the double whammy of light winds and having to fight a strong ebb current. Spinnakers popped and a colorful display of sail made its way down the Redwood Creek Channel. With light winds there was no drama on the foredeck and it was a good day for exercising the crew in setting and dousing the spinnaker. As the day wore on, however, what little wind there was diminished and the ebb current increased. The slower boats found themselves crawling down the channel hoping to make the finish line before the race timed out at 5:00.

It was a very patriotic finish. Charlie Watt's red Open 6.50 took first place. Stan Phillips' white-hulled Farr 30

Frequent Flyer took second, and the blue-hulled *Relentless* took third. With an early winter sunset, the boats finishing in the back saw the stars.

Although the race would certainly not go down as one of the more exciting at Sequoia, all agreed that it was great to be sailing out on San Francisco Bay in January, and comments about friends with

boats in the Midwest and Northeast were not uncommon.

The next Winter Series race will be on February 7, and the next Redwood Cup race will be on February 21. For complete results, see www.sequoiayc.org.

— tim petersen

SYC's fourth midwinter race on January 4. Spread: the Sabre 402 'Escapade', J/105 'Triple Play', J/88 'Inconceivable', and Newport 30-II 'No Agenda'. Inset: having a chilly 'Escapade' on San Francisco Bay.

GGYC's Seaweed Soup

The third Golden Gate YC Manuel Fagundes midwinter race on January 3 started on time with a north-northeast wind in the high single digits and a building ebb current. The three fastest PHRF divisions and the J/111 class were sent on a triangular course from the start off the GGYC race deck west to Blackaller, out to Harding Rock, in to Fort Mason, and then another trip out to Harding, back to Mason, and finish. The slower PHRF and Catalina 34 fleets sailed the same triangle, but without the extra loop around Harding Rock. The Knarrs and Folkboats sailed a sausage course along the Cityfront, with Blackaller as the first mark.

The first leg to Blackaller was a close reach, and for the fleets headed out to Harding Rock the second leg was a long beat into an increasing ebb, which resulted in some wide roundings. It also resulted in several boats bumping up against the Harding Rock buoy when skippers misjudged the strength of the ebb. The short Harding Rock-to-Fort Mason leg was the only spinnaker run, and boats spread out, some sailing high

just after 1:30 and the race was on. Although far from some of the exciting starts experienced in summer months,

ROXANNE FAIRBAIN / WWW.FOXSHOTS.SMUG.COM

Two Gates Pursuit Race

In 2012, Long Beach YC re-invented their long-standing Two Gates Invitational race and turned it into a pursuit race. But they didn't change the 13.2-mile course, which starts in Long Beach Harbor, goes up to Los Angeles Harbor, and then returns to finish in Long Beach. The boats weave in and out of Long Beach's Queen's Gate harbor entrance and Los Angeles' Angel's Gate harbor entrance, hence the name.

Bill Durant and his team raced his Santa Cruz 52 *Relentless* to first-place honors in this year's Two Gates, sailed on Sunday, January 4.

Weather forecasters predicted little to no wind, but the good ol' Long Beach southwest breeze proved them wrong when it filled in and carried the 29-boat fleet to the finish line under sunny skies.

Durant — who is a veteran ocean racer, a regular in local regattas, and a match-racer — gave full credit to his crew. "It was a phenomenal day with the dream team," Durant said, "with my son and all of my very close friends."

This year, the slowest boats, which started the pursuit race first, were the two Cal 25s of Seal Beach YC's Felix Basadre and Dennis Diem of LBYC. The fastest boat, starting last, was Peter Tong's Santa Cruz 70 *OEX*, driven by John Sangmeister of LBYC.

As the boats sailed downwind to a turning mark and headed upwind to the finish, *OEX* was eating up boats, drawing down on Ray Godwin's Farr 40 *Temptress* and Durant's *Relentless*.

But as they all rounded and set their course for the finish it became clear that *OEX* was running out of time to repeat 2013's win.

Durant said, "You know, I've sailed on that boat before, and I can tell you that

toward Alcatraz and others lower then jibing back to the Fort Mason buoy.

Most boats sailing the Harding Rock courses finished in an hour and some pocket change. The Knarrs and Folkboats, which sailed a 6-minute course, took a few minutes longer.

The closest finish was Mark Dowdy's Express 37 *Eclipse* nipping Hank Eason's 8-Meter *Yucca* by 3 seconds on corrected time in PHRF 3. The closest one-design racing was in the five-boat Folkboat class, with a spread of less than 8:30 minutes.

The next GGYC race is scheduled for Saturday, February 7. Series standings can be found at www.ggyc.org.

— pat broderick

SYC Midwinter

The third Sausalito YC Midwinter race was sailed in a north-northwesterly that settled in at around 9 knots after a windier start. Fleets were sent from a start line near Little Harding Buoy on a beat up to the Sausalito daymark #2, then on a run to either YRA mark #6, Fort Mason, or YRA #17, Harding Rock. The two spinnaker fleets and J/105s

sailed the longer 6.8-mile course over to Fort Mason and back, while the non-spinnaker fleets sailed a shorter 3.5-mile course around Harding Rock.

Those sailing the longer course over to Fort Mason encountered a building ebb and lighter wind from about Alcatraz to Fort Mason. The spinnaker fleet boats split, with some boats staying high near Alcatraz and others sailing lower, arriving at San Francisco near GGYC then tacking up toward Fort Mason, taking advantage of the counter-current. The non-spinnaker boats encountered less ebb and enjoyed healthier wind on their shorter course.

Michael Radcliffe's Synergy 1000 *Kilo* eked out a 9-second win over Cam Hutton's *Rustler* in Division A. Don Wieneke's *Lulu* trumped the J/105 Fleet. Paul Tomita's Express 34 *Express Lane* took Division C; Dave Borton's Beneteau 350 *French Kiss* continued its winning ways, taking Division D; and Jim Snow's Cal 20 *Raccoon* thumped Division E.

The next SYC Midwinter race will be on Sunday, February 1. See series standings at www.sausalitoyachtclub.org.

Berkeley Yacht Club Midwinters

"They should start on time because it's just going to get floodier," commented one of the racers before the start of BYC's midwinter race on Saturday, January 10. And the race committee did send the first two divisions off on time, on a twice-around windward/leeward course with a windward mark set at 305°. But something happened to the wind after Division C's warning, and the boats were not making the start line against the building flood. They were postponed with 45 seconds to go until their 12:10 start. Divisions A and B continued making snail-like progress on their 8-mile course.

About an hour passed, and someone hailed the RC on the VHF: "We want to know your thoughts." BYC's Bobbi Tosse responded, "You don't want to know our thoughts." Finally, she announced, "We're going to give this a shot."

The postponement ended at 1:20. Divisions A and B were still working their way around on their second lap, so they mixed it up with the later-starting single-lap divisions at the mark roundings, and the patient sailors were rewarded with a completed race. Back at the club that evening, Tosse admitted that she had been close to giving up and abandoning.

At BYC's guest dock on Sunday morning, a racer commented to an RC volunteer, "Nice day."

"Yeah, if you like gloomy," the volunteer responded.

A monochrome tule fog covered the Bay on the morning of January 11. Visibility on the water was about one mile. It's eerie when you're on the Bay and you can't see any land. The postponement

was a foregone conclusion.

Treasure Island began to appear out of the mist first, then Angel Island, but the Golden Gate Bridge remained shrouded for most of the race. A narrow band of wind fluttered the water to the west of the starting area, and a less wispy one crept in from the southeast. Some of the boats were able to get in spinnaker practice on it. But would it hold? The RC was in no hurry to set up a course on it.

Finally, they dropped a windward mark at 090°, and the starting sequence began at 1:35, with a 4-mile single-sausage course assigned to all. The breeze died as the sequences proceeded, resulting in many over-earlies and a great deal of difficulty returning from the course side of the line in the flood.

Around 2:15, the predicted westerly of about 8-10 knots filled in, and the course was reversed. Spinnakers were hastily doused, only to be reset at the formerly leeward mark. Once again patience had its reward.

Racing concludes on February 14-15. Series standings to date can be found at www.berkeleyyc.org. We'll run final results in March's *Racing Sheet*.

— latitude/chris

Marina Del Rey Malibu & Return

Del Rey YC's first race of the 2015 season and the first of the Berger-Stein Series got underway on January 3 in very light air.

Cool temps of 50s and 60s, mirror-flat seas, and sunny skies prevailed for the 90 entries, causing most competitors to gripe about the land of no wind living up to its name. No residual effects were left over from the record New Year's Eve wind and surf.

At the start of the Maxi (PHRF AA) fleet, the wind barely touched a knot and a half, according to Andrews 70 *Pyewacket's* Robbie Haines. He would later record winds of six knots at Malibu en route to claiming line honors.

Maverick, Chris Slagerman's SC70, barely got past the start line and made up time by staying away from the shore. After a 15-minute delay, the other six classes started. The boats that were able to go outside managed to go rhumb line. and their only tack was at Malibu. Most enjoyed a nice reach back to Marina del Rey on the 22-mile course.

Holua, Brack Duker's SC70, saved her time over *Pyewacket* and took first in class. *Coquille*, Gary Ezor's Farr 40,

This page, clockwise from top left: The SC52 'Relentless' crew celebrates their win in the Two Gates Pursuit Race; colorful spinnakers at SBYC's Island Fever Race; when navy blue boats meet: Bob Johnston, singlehanded the J/92 'Ragtime' in BYC's Sunday race, slips to leeward of Tim Han's J/105 'Energy'; "Hurry up! The paint's drying!" (at a Saturday BYC mark rounding).

won PHRF A by more than 11 minutes.

Island Fever at South Beach

No hands were idle in the third race of South Beach YC's Island Fever Series on January 17. With winds between 7 and 11 knots at the start line, fleet division contenders kept close to one another's sterns and bows for an hour's worth of spirited competition. Winds picked up a few knots farther from land and remained steady from out of the north — keeping conditions just right for two spinnaker sets followed by a smooth glide along the breakwater to a finish inside McCovey Cove.

In Spinnaker PHRF 99 and below,

THE RACING SHEET

Mark Kennedy's Flying Tiger 10 *Centomiglia* blasted by the breakwater bunch-up, followed by Donald Olgado's J/105 *Aquavit*, and in third was Nico Popp's *Dare Dare*, a Jeanneau Sun Fast 3200.

The Spinnaker PHRF 100 and above division saw nine boats on the water, plus tight turns at the marks. Robert Fairbank and David Crone's Yankee 30 *Double Play* prevailed. Ray Irvine's Catalina 34 *Crew's Nest* followed in second, and Ray Collier's Catalina 320 *Linda Carol* earned third place.

In non-spinnaker, the SBYC/BAADS boat *Alpha*, a 23-ft Sonar helmed by Dylan Young with John Wallace on main, took first again this month. They were followed by Peter Hamm's C&C 115 *SeaView* and Jess Ramos' CS30 *Unanimous*.

This month a longtime charter addict gives us **Insights into Sailing Two of the Med's Most Alluring Islands**, and we present **The Case for Shoulder Season Chartering**.

Even though sailor Erik Westgard lives in St Paul, Minnesota, he has long been a loyal *Latitude 38* reader and occasional contributor. The trip report below is from his 15th charter. As with several sailing vacations that he's reported on previously, on this trip he brought along an all-woman crew. — Ed.

Sailing Sardinia & Corsica With an All-Girl Crew

Sunsail has been promoting a new base in Cannigione, Sardinia. Roughly 112 miles west of Rome, Sardinia appeared on the yachting radar starting in the early 1960s, when religious leader and sportsman the Aga Khan IV bought 35 miles of coastline on the northeast corner of the island.

Recognized through history for an abundance of natural bays and harbors, the area also has excellent wind. You will need your ICC Certificate to skipper a yacht in Italy, which is the ASA 101/103/104 + ICC course sequence for Americans.

Armed with stacks of Euros, and some jackets, as it was early May, we flew into Rome and gathered at our usual hotel, the Best Western Villafranca, near Termini train station. From Termini,

the Leonardo Express runs twice an hour to the airport, and there is regular service to the ferry/cruise ship terminal in Civitavecchia, and of course the Metro.

To get to the Sunsail charter base in Cannigione, use Olbia, Sardinia as your gateway. You can fly to Olbia from various places, or take a jetfoil or overnight ferry from Civitavecchia. Ask the base to order you a taxi to and from the Olbia ferry dock, as there did not seem to be a lot of cabs standing by. It's about a 40-minute ride.

We arrived at the base early Sunday morning, which is run jointly with Sailitalia. We purchased the smallest "Get Going" provisioning package for six of us, and topped that off from the local deli-type shops, as the nearby supermarket was closed Sundays. We did face a minor crisis: the low-end red wine was undrinkable. So an expedition set out and returned a few hours later with a plastic jug of red table wine obtained from a tank at a local co-op market.

There was a strong wind forecast (30+ knots) and we would need to stay

SUSAN SHELSON

MARIANNE PERRY

Left: A jovial waiter brings out the 'last crab' on a bed of pasta. Above: Much of the town of Bonifacio is perched high above the water.

in port during our first scheduled night out. At a lovely dinner in Cannigione, we were offered the "last crab" in the lobby aquarium, a giant specimen, which was expertly prepared atop some fresh linguini. We had to smile on the way out the door as a replacement crab appeared in the tank.

The centerpiece of the sailing area is the La Maddalena Archipelago National Park and Marine Reserve. These beautiful islands are right outside the Golfo di Arzachena where the Sunsail base is, and fill almost ten pages in Rob Heikell's excellent guidebook *Italian Waters Pi-*

lot published by Imray. This book, and the Italian charts, such as NGA #53285 (or 3350), should be consulted for details on the complex park regulations and the many charted and well-marked hazards in the area.

Our first stop was the Cala Gavetta marina on La Maddalena. You need to watch for ferry traffic on the way up there. We were told to expect "lazy lines" and/or buoy rentals in most places, so we would not need to anchor. The key to lazy lines is to get them very tight. You toss over your stern lines and run them to your cleats via rings on the dock, and rapidly secure the lazy line to the bow. Then let the stern lines out as far as they will go (say 10 feet) and tighten the lazy line.

Only then do you use the engine and/or winches to pull the boat back to within a few feet of the dock, so the plank can

ERIK WESTGARD

OF CHARTERING

It would be hard to find a boat refuge more picturesque than Bonifacio's natural harbor.

be secured. The idea is if you can still back the stern of the boat right up to the wall under engine power, the wind will do that for you in the middle of the night or when you are away sightseeing. You'll want to leave a fender or two back there as well. In Europe — we watched a few minutes of a sailing class — they teach you to station crew holding fenders by their lines between boats as you go in or out.

The town was lovely and we were again offered the "last crab" for dinner.

The Sunsail regulations allowed us to sail to Corsica, across the channel, and politically part of Metropolitan France. Headed for Bonifacio, we put up a French courtesy ensign and were directed on VHF to the last bit of dock available for a large boat. The docks are being rebuilt and there were nice showers and facilities. You check in with your passport at the marina office at the back of the harbor.

Above: Local fishermen ply their trade in small boats, as generations have done before them. Right: Erik loves sailing with all-female crews, and they love him for inviting them.

We decided to stay an extra day and explore the walled city and fortress in Bonifacio, which was designed for the defense of Tuscany. The whole French flair was popular with my crew. You could find crêpes, French wine and even a disco ringing the harbor, or walk or take a tiny tram up the hill to the main

town, which has many historical sites. For our last night out we chose Santa Teresa Di Gallura, back on the Sardinian mainland. On paper, this port made me nervous as it was blowing more than 20 knots out in the Bocche di Bonifacio channel, and the guidebook aboard (in Italian) stated the harbor had a vessel length limit of 20 meters, and seemed narrow. The shelter was good once inside. A pair of large car ferries get in and out regularly and there is room in a few places to turn around.

There were some seasonal shops and restaurants in the marina, but most were in the existing town, which was across the harbor and up a little hill. We dined on pizza, pasta with bacon and excellent desserts. The dockage fee was reasonable, 31 Euros for 50 feet, but it goes up in season.

All in all it was an excellent week. The area is sheltered and has well-developed marinas, and plenty of safe anchorages.

— erik westgard

In Praise of Shoulder Seasons

When you're thinking about taking a sailing vacation, there are, of course, a few basic decisions you have to make at the beginning of your planning process: where to go, whom to go with, and what time of year to go. We've got a few points to make about the latter.

Many travelers automatically assume that the middle of the prime sailing season in any charter venue is unquestionably the best time to sail there. Well, that depends on what you're looking for. For example, in European sailing destinations such as Croatia, Greece

ERIK WESTGARD

WORLD OF CHARTERING

and Turkey, you often see hordes of Germans, Brits and Scandinavians traveling in flotillas of six to ten boats during the midsummer months. The sailors on board seem to relish the excitement of nonstop talk and laughter, and the daily chaos of trying to shoehorn their boats into a tiny gap along the village quay.

But such 'togetherness' isn't for everyone. If you're more interested in uncrowded anchorages and beaches, fewer diners in restaurants, and more attentive service in shops, consider chartering during non-peak time periods, particularly in the 'shoulder seasons' between the high and low seasons. Ponder this: The Eastern Carib is considered a year-round sailing destination, and people do charter there even at the height of hurricane season (September and October). True, boat rental prices are cheapest then, but skies can be gray and a little gloomy, as tropical waves pass through frequently. By contrast, just

Turkey's picturesque Turquoise Coast is less crowded in May and September, and sailing winds may be better then also.

before and after the December-to-April peak season, prices are a bit higher, but sailing conditions are generally better.

Mid-summer brings the hottest temperatures of the year to Greece, Turkey, Croatia and Italy, just as it does to the Pacific Northwest, but not necessarily

the best sailing breezes. In all these places you're *generally* more likely to find better wind conditions — and much smaller crowds — in May or September, the shoulder seasons.

Of course, if you have kids in school, your travel windows are basically during Christmas break and mid-summer. But if kids aren't part of the equation, we highly recommend planning this summer sailing getaway for either before Memorial Day or after Labor Day. In many prime venues you'll save a few bucks and find less-crowded anchorages and better wind — a combination that should lead to minimal frustration and maximum relaxation.

If traveling during the late spring shoulder season sounds like a winning idea to you, we suggest you waste no time in locking in the boat of your choice and shanghaiing your favorite sailing buddies. You'll be glad you did.

CHANGES

With reports this month from **Serenity** on a less than pleasant west-bound crossing of the Atlantic; from the Massaro family on **Benevento** on an educational cruise from the Spanish Virgins up the East Coast to Cape Cod and a nice eastbound crossing of the Atlantic; from **Eleutheria** on a nasty pre-Thanksgiving passage from Maui to Oahu; cruiser remembrances of the **Careyes Resort** on Mexico's Gold Coast; healthy and inexpensive eating suggestions in Mexico; and **Cruise Notes**.

Serenity — Tayana 52DS Gordon and Sherry Cornett Crossing the Atlantic (Ventura)

Shortly before Christmas we arrived safe and sound — but extremely tired — at the Port du Marin Marina in Martinique after taking 28 days to cross the Atlantic Ocean from the Canary Islands. It was a very slow time for us, but then our crossing had been quite challenging.

Sherry and Gordon got skunked on what's normally a nice tradewind sail across the Atlantic.

We're not exactly cruising novices. We did the 2009 Ha-Ha, then sailed across the Pacific the next year to wait out cyclone season in New Zealand. After sailing back to the South Pacific, we continued on to Australia, where we waited out another cyclone season while doing lots of land travel. In 2011, we sailed up the east coast of Oz to Darwin to join the Indonesian Rally. After that, we continued on to Indonesia, Singapore, Malaysia and Thailand.

Because of the threat of pirates, we had *Serenity* shipped to Turkey. We then cruised Turkey, Greece, Albania and Croatia. After crossing the Adriatic to Italy, we sailed down to Sicily, where we wintered at Marina di Ragusa. In April last year we did the west coast of Italy and continued on to Elba, Corsica, Sardinia, Menorca, mainland Spain and Gibraltar.

After a stop at Morocco, we made it **A couple of the Atlantic Odyssey entries leave Lanzarote in the Canaries for Martinique. They wouldn't have the best weather.**

to Lanzarote in the Canary Islands to join 19 other boats for the November 18 start of Jimmy Cornell's Atlantic Odyssey to Martinique. Over the years we've found that rallies provide us with the opportunity to meet some great people in the cruising community while having a great time.

Our ill-fated 2,700-mile crossing of the Atlantic began with four days of motoring because there was no wind. This is apparently normal around the Canaries. Even though we expected it, this used up a lot of our fuel. We were then hit by four cold fronts, which brought rain, thunder and lightning. It also brought wind from the southwest, the very direction we were headed! And this was supposed to be a glorious off-the-wind tradewind sail. When we finally got far enough south to find the ENE trades, they were very light.

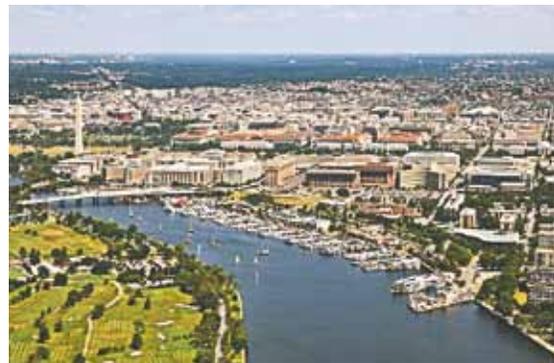

We had more than weather problems. The clew ring on our genoa, the sail that provides most of our drive when sailing off the wind, blew out. As such, we were unable to use the sail until I was able to complete a repair. In addition, our generator died and the genoa furling line pulled out once we reset the repaired genoa.

Those were lesser problems compared to our autopilot's dying 780 miles from Martinique. This meant that the two of us had to hand-steer for over eight days, something that proved to be a physical and mental disaster. We did one-hour-on, one-hour-off watches, then heve-to at midnight to get five hours' sleep.

Many of the other Atlantic Odyssey participants were on the dock to cheer our arrival when we finally got to Martinique, which was nice. But after nearly a month, ours wasn't even the last boat to finish, as others had challenging crossings as well.

To think that we had told friends how much we were looking forward to the 'tradewind crossing'! It was not a lot of fun. But we made it, and it's safe to say the next time we cross the Atlantic it will probably be aboard a 747.

After some cruising in the Caribbean, including Cartagena, we plan to continue on through the Panama Canal, complete our circumnaviga-

tion in Mexico, and return to our home port of Ventura.

— the cornetts 12/22/2014

Benevento — Pacific Seacraft 40 The Massaro Family The Other Latitude 38 (San Francisco)

As we mentioned in Part 1 of our report, it's been more than 12,000 nautical miles since we — my husband Darold, our 10-year-old son Dante, and I — left San Francisco in September 2013 on a two-year cruise. We sailed under the Golden Gate Bridge, turned left, and six months later were in Puerto Rico facing the decision of where to go next.

One decision could have been to continue heading east toward the US and British Virgin Islands, and maybe as far

Enjoy the variety of the world via cruising boat. Spread; The blue waters of the Exumas. Insets, clockwise from left: Jennifer and son Dante in the Bahamas. Mt. Vernon. Anchoring near the Washinton Mall in Washington, D.C. Annapolis, Maryland. A \$30 mooring on New York's East River.

southeast as St. Martin or Dominica. Doing that, however, would have meant that we would have to make doubletime it back up the East Coast of the U.S. in order to be in Georgia by June 1, something required by our insurance company. So we decided to head to the Bahamas, then north to the U.S.

We spent a month cruising the Bahamas, including a visit to Acklins Island (where we had the anchorage all to ourselves), Thunderball Grotto near Staniel Cay (which was like swimming in a kaleidoscope of fish), Georgetown (in time for the Family Island Regatta), and the Exuma Cays Land & Sea Park (which was breathtaking). A month

wasn't nearly enough time to do justice to the Bahamas. In fact, our entire trip has seemed more like a sampling than a comprehensive tour. It's really just been appetizers for a much longer trip in retirement — or sooner.

We arrived back in the U.S. at Fort Lauderdale, and spent time in Miami, the Everglades, and Cape Canaveral before traveling inland to Orlando. We do, after all, have a child with us. We dubbed the rest of the season 'The Summer of American History', as we alternated between going up the Intracoastal Waterway (ICW) and sailing coastal waters north.

One aspect of sailing the East Coast versus the West Coast is the

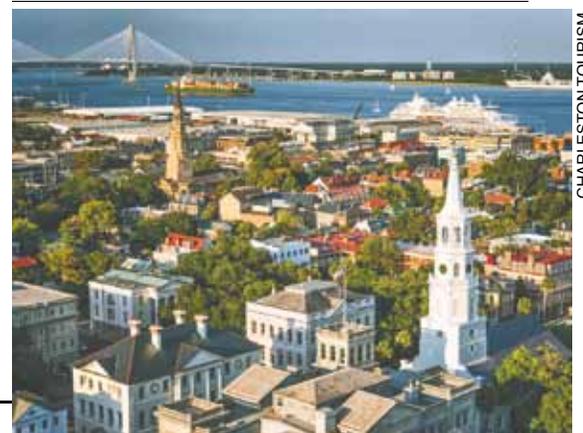

vast number of anchoring possibilities on the East Coast. It's no problem sailing for the day and being able to find a place to drop the hook that night.

After stopping in St. Mary's, Georgia and the Cumberland Island Seashore (famous for its feral horses, historic Cargenie mansions, and the trees that were used to build the hull of the *U.S.S. Constitution*), we made our way up to the Savannah River. Passing lots of container ships, we tied up at the Savannah city dock, which was charming. We then anchored in Charleston's Ashley River, with Fort Sumter, site of the first battle in the Civil War, in view. Even though it was hot, we absolutely loved Charleston.

In addition, we thoroughly enjoyed the remote and beautiful anchorages of Georgia, South Carolina, North Carolina and Virginia as we made our way up the ICW. Thanks to the suggestion of Robert, an awesome lockmaster, we tied up safely inside a lock within the Great Dismal Swamp as hurricane *Arthur* roared through the Outer Banks. Robert also converted the Triton's trumpet conch shell we'd bought from the Kuna Yala in Panama into a horn, much to the delight of Dante.

After the hurricane passed, we continued to Hospital Point anchorage on the Elizabeth River between Portsmouth and Norfolk. We kept the boat there for 10 days while we rented a car and visited many of the amazing 'Colonial Triangle' locations in Virginia, including Jamestown (first British colony in US), Yorktown (definitive American Revolution battle precipitating the end of the war), and Colonial Williamsburg (Disneyland for history geeks). We loved it. The Mariner's Museum in Newport News was perhaps our favorite museum. An entire day wasn't enough for that alone.

Continuing our first-person American history lesson, we made a detour to go ***The Massaro family loved just about everyplace they visited, but historic Charleston, South Carolina was among their very favorites.***

CHARLESTON TOURISM

CHANGES

up the Potomac River to Washington, DC, stopping at Mount Vernon along the way. Tolling the ship's bell three times has been a tradition since the night George Washington died.

Washington, DC has been one of our favorite stops so far. We anchored on the Washington Channel next to the welcoming Capital YC, with the Washington Monument serving as one of the bearings for our anchorage. For a small fee we were granted access to a secure dinghy dock, Wi-Fi, the yacht club facilities — and the very friendly members of the club. Even though we were there for two weeks, we barely scratched the surface of what there was worth seeing in the District of Columbia.

We then wound our way up the Chesapeake, and made stops in St. Michaels and Annapolis, and then crossed over to the Delaware River via the C&D Canal. It's a tight squeeze in that canal — which we traversed at night — with all the container ships.

We continued north up the Delaware and spent a few days in Philadelphia. We found a small anchorage just north of Penn's Landing, and had time to visit the city's amazing historical center, have a few cheesesteaks, and run up the art museum's steps *a la* Rocky Balboa. Dante had been learning about the Constitution, and visiting Independence Hall brought his history lessons in books to life. The National Park Service does an outstanding job of interpreting our nation's historic sights.

After harbor-hopping up the East Coast of the U.S., the Massaros spent 16 solitary days sailing to the Azores, then eight more to Portugal.

We sailed directly to New York City, motoring under the Verrazano-Narrows Bridge just as the sun was rising. It was an amazing sight and gave us a feeling of great accomplishment. We briefly anchored by the Statue of Liberty for a photo shoot.

Transient slips in New York Harbor are quite expensive — upwards of \$6/foot per night — so we made our way up the Hudson River to the 79th St. Boat Basin, which is operated by the New York Parks Department. We secured a mooring for \$30/night. The price was right and the access to the city was excellent.

We made our way up the Hudson River, passing beneath the Tappan Zee Bridge to Tarrytown, where we picked up family. We would later anchor for a week at Croton-on-Hudson while visiting with relatives. Then it was back down to New York Harbor, up the East River, through Hell's Gate — wisely timed with slack tide — and into Long Island Sound.

We made our way over to Mystic, home of the famous Mystic Seaport, where our Uncle Roger joined us for a sail to Block Island, Rhode Island, and Cuttyhunk, Massachusetts. Of all the anchorages we'd stayed in the previous year, Block Island on Labor Day was definitely the most crowded! In spite of that, it was still a great place to visit. From there we went to Cape Cod, leaving the boat at Hyannis while staying with family and getting *Benevento* and ourselves ready for the Atlantic crossing.

It was amazing to stop and think of all we'd seen and done in just one year of cruising. We can easily see how cruisers could spend years in single locations we've visited, such as the Sea of Cortez, the San Blas Islands, the Caribbean, the Bahamas, the ICW, the Chesapeake Bay or New England. We realize we're moving too fast, but that's the trouble with having a timeframe of only two years to do our trip. We've perhaps been a bit too ambitious in planning, but it has been worth it. Just about everyone has told us that the most dangerous piece of equipment on a sailboat is a calendar. They are right.

Our trip across the Atlantic was thankfully uneventful. It took 16 days to get from Cape Cod to the Azores, and then another eight days to make landfall in Lisbon, Portugal — which, like San Francisco, is at latitude 38. It was during the crossing that we used a professional weather

service — Commander's Weather — for the first time. We were pleased with their forecasts and service.

Now safely on the other side of the pond with a little time to reflect, we recognize that cruising is no vacation. Between home-schooling, provisioning, boat repairs, laundry and passage-making, it's a full-time job. But it's also the adventure of a lifetime. As it happens when you live life large, time seems to compress and expand like an accordion. Time is flying by for us, but when we look back at our photos it seems as though it's been ages, not just a year, since we left San Francisco.

Our trip has been an incredible experience for Dante, who turned 11 in the middle of the Atlantic. He has become more worldly and mature, through both direct learning and osmosis. His favorite experience so far has been the San Blas Islands, we suspect for the friends he made as much as the snorkeling and

Eleutheria — Tartan 37
Lewis Allen and Alyssa Alexopolous
Maui to Oahu Sleigh Ride
(Redwood City)

Let me start by reminding ourselves and fellow cruisers that sailing and schedules don't go together. We have always held true to our rule that visitors can choose either a location or a date to meet up with us, but not both. This prevents us from pushing our boat and ourselves in conditions that we would not find ourselves in by choice.

The rule has served us well — until we broke it just before Thanksgiving by sailing from Maui to Oahu in order to

meet family. The story that follows is that of our punishment for breaking the aforementioned rule. Neptune was paying attention to our lapse in judgment and smacked us for it.

We sailed up the leeward side of Maui as far as the Kaanapali Coast before hitting the 30-knot headwinds gusting down the Pailolo Channel between Maui and Molokai. Ahead of us was a sea of whitecaps and waves that periodically broke. We double reefed the main and sheeted the sail as flat as possible. We then furled the genoa and raised the yankee on the inner stay, leading the sheet outboard and sheeting it flat, too. We decided we were then ready for the channel and fell off.

When the sails filled, *Ellie* heeled and bore off on a beam

reach across the channel at 7 knots. Even under reduced canvas she was making too much way on. This was the first time I wished we had a third reef point. I decided the wind wasn't putting a dangerous load on the rig yet, so I would just handsteer and enjoy the roller coaster ride across the channel. After all, it was only 12 miles until we reached Molokai — and what I assumed would be a good lee.

We tore across the channel with big wind and breaking seas pooping the cockpit every five minutes. But we're young and hardcore, so we threw out a handline with a cedar plug, convinced that we could land a mahi at such speeds. After 15 minutes the bungee went tight, and I called Lyss to come pull it in. The sailing conditions demanded 100% of my attention, so she was on her own to land the fish.

Using her gloves, she pulled in a wildly flailing 42-inch mahi, with blood splattering everywhere. We'd heard that flipping a mahi over and hugging it might calm the fish. We then tail-wrapped it, made some cuts, and threw him over the leeward side to bleed out. Alyssa finished bagging the filets just before we passed the eastern point of Molokai. We were happy to have fresh fish for the first time since the Marquesas.

We discovered that the trades howl down the Pailolo Channel, split at Lanai, and turn down the coast of Molokai, ripping down the Kalohi Channel between Molokai and Lanai. So instead of finding a pleasant lee, we found more 30-35

Just when Lewis and Alyssa needed it the least, they hooked a 42-inch mahi. But Alyssa landed it before the sharks could get a bite.

You have to land a fish fast to beat the sharks.

knot winds and the same big seas. The only difference was that we were now sailing with the wind on the starboard quarter, so there was much less motion and strain on *Ellie*. Although it was still blowing 30 knots, we had a nice sail

Sailors aren't the only ones challenged by the entrance to Lono Harbor during a big winter swell.

toward Lono Harbor, which we assumed would be a good overnight anchorage.

Lono Harbor features a man-made breakwater on the SW end of Molokai. It was built so sand harvested from Molokai could be taken to Oahu to create the beach at Waikiki. We read that you can enter Lono Harbor in most settled conditions.

As we approached Lono, we started to see breaking waves. Studying them, we saw that they were breaking on the east side of the breakwater, suggesting that it was just the trades breaking against the wall. Business as usual.

According to our chart, the entrance to Lono is about 50 yards wide, which I felt was adequate, even if we had to fight the wind to get in. As we got closer, we could see that sometimes there was a swell all the way across the entrance, but never a breaking wave. Deciding it was safe, we began to close on land.

A half mile out, I told Alyssa that I was noticing a large swell, and that we should keep an eye out as a rogue set could catch us in shallow water outside the breakwater entrance. That would be very bad.

Lono Harbor as seen from above. If the surf throws you into the breakwater, both you and your boat will become nautical 'toast'.

NOAA

We were in 25 feet of water and lined up with the Lono entrance a tenth of a mile out when Alyssa yelled, "Oh my God!"

I turned my head and almost had a heart attack, as I was staring at what I estimate to have been an 18-ft wave, half of which was breaking in a barrel! At this point we were less than 70 yards from the entrance, and that wave was on a mission to break right where we were, then crash into the harbor entrance.

I threw the wheel hard to port, spun *Ellie* around, lined her up with the wave face, and gave the engine full throttle. We climbed up the wave face with the breaking barrel only 15 yards to starboard!

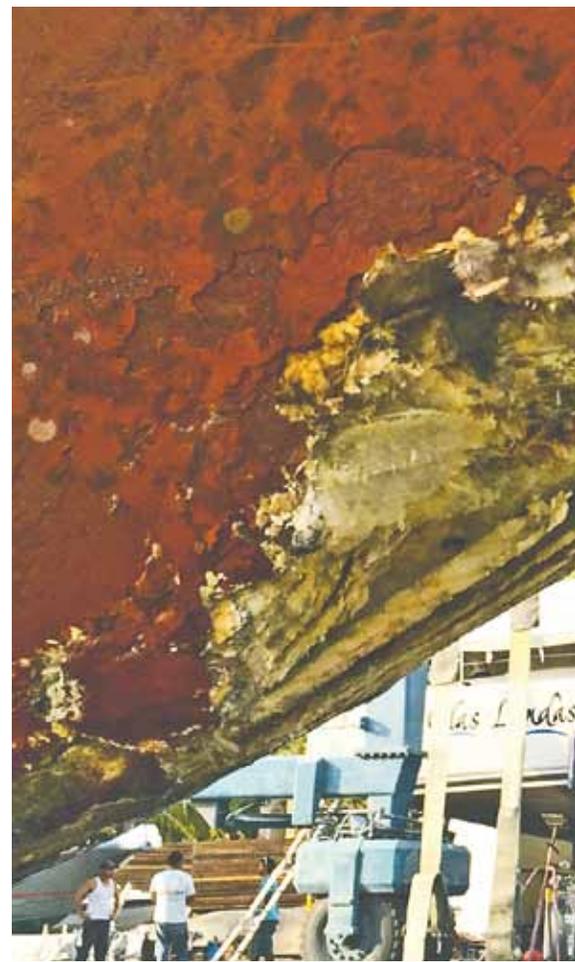

Once we reached the crest of the wave we saw the next one coming. It was even bigger and it was already breaking! I bore off to port and then lined up with the face before it hit. Thankfully we made it over the wave before it closed out, and then made haste to deeper water. Once we were safe, it sank in just how close we'd come to shipwreck if not death. Had we been caught broadside by either wave, we certainly would have been rolled and thrown into the breakwater. We'd certainly been foolish trying to enter a harbor when a large swell was running.

The trades were blowing too hard to try to beat back up the coast of Molokai, so we resigned ourselves to an unpleasant night at sea. We would make Oahu by morning, tuck *Ellie* into a marina, and celebrate just being alive. There was just one catch. We had to cross the Kaiwi Channel at right, in strong trades and with a huge NW swell running.

Conditions weren't bad until we cleared the lee of Molokai, at which time we became exposed to the full wrath of the stiff NE trades and gigantic NW swell. That's when the seas got very steep, confused, and started breaking. The wind was at 33-38 knots sustained, and

we were running downwind with 1/3 of the jib poled out to port. The wind had created 13-18 foot waves that were mixing from the north and east around the SW corner of Molokai. This sea state combined with the NW swell to create tremendous washing-machine conditions.

We thought *Ellie* was handling the sea state well until a few breakers crashed into the cockpit. That's when I focused my hardest to take the optimum track down

the wave faces and make sure we didn't round up into the wind, which would have put us beam-to the seas and at risk for capsize.

I was focused on the next set of waves when we were lifted up the crest of a particularly large wave that broke while we were at the top, then thrown into the trough below. The whisker pole hit the water and dug in, shuddering the rig and stopping our forward progress. We were alarmed and confused at what had happened.

I got *Ellie* lined up again, and after getting her back on course took a few minutes to inspect the rig. We were elated to find there was no damage. We thought the sail may have ripped from the force of the pole being pushed aft in the fall, but the line leading from the pole to the bow held, and saved the sail, pole — and quite possibly the entire rig.

At this point we were so startled that we began thinking about other options. Could we make for Lanai? No, as that was upwind. Could we run back to the lee of Molokai? No, as that was upwind, too. Could we lie to our sea anchor? We

IN LATITUDES

LATITUDE / RICHARD

The large gouge in the bow of the Westsail 42 'Daneka' was caused by a pinnacle rock off Punta Mita at 20°45'.843 North, 105°32'.889 West. At a bearing of about 80°, it's "about .786 nm NW of the point north of Punta Mita Light," reports skipper John L. Larsen. Details in 'Cruise Notes'.

could, but we'd be in the shipping lanes and the trades were forecast to get even stronger over the next two days. Keep running dead downwind? No, because it was a heck of a long way to the Marshall Islands. We had only one option: continue on to the lee of Oahu 60 miles away. It was going to be a long night.

It soon got dark, which meant there was no moonlight by which to see the waves. We took turns at the helm for the next eight hours. Dodging shipping traffic outside Honolulu was an added bonus to all the fun we were having with the weather.

We covered the 60 miles in record time, and made the lee of Oahu by 2 a.m., at which time the wind and waves began to subside. We motored into the lee of the island and dropped the hook behind a curve of sand in front of a power plant. Exhausted, we gave each other a hug, happy to be safely anchored after a very trying passage. We also swore that we would never again violate our rule

about pushing it to make a schedule or accommodate a visitor.

We also vowed never again to cross between islands when the trades are pumping. Sailing in Hawaii is no joke! We hadn't seen seas that large since we left Northern California last year. We were also very proud of *Ellie*; she is one tough boat to have come through unscathed.

We're now in the beautiful Ko Olina Marina on Oahu. It's the most expensive marina we've ever been in, but worth every penny as far as we're concerned. This is resort country club living at its finest — beaches, pools, grass, grills, showers, laundry, restaurants, live music, watering holes and most importantly, flat water. After 9,000 miles in the past year, including the South Pacific, *Ellie* deserves the TLC that we're giving her.

We'll be back in Oahu in January to get *Ellie* ready to head south again. We plan

to be in the Line Islands by April, the Cooks by May, Samoa at the beginning of June, Tonga by July, Fiji in September, New Caledonia in October, and Brisbane, Australia before the onset of cyclone season. At least that's the current plan we've written in sand at the low tide mark.

— lewis & alyssa 11/22/2014

Careyes Resort Past and Present (Mexico's Gold Coast)

The Wanderer posted the drone photograph he took of Careyes — see next page — on his Facebook page on January 13, and received a lot of entertaining comments. So he made it a January 14th 'Electronic' item, and got even more responses. We liked the responses so much that we're sharing some of them with you. The last one gives the definitive report of what's going on at Careyes now.

(To read the original post about Careyes, see the January 14 'Electronic Latitude'.)

"I used to anchor in the cove just below the resort on the hill and put a long stern line to the pier to keep from swinging. One time I was there when the now long-defunct Club Med was having Lesbian Week. There was great scuba diving around the little islets." *Ted Reed*

"I love Careyes! I believe Heidi Klum and Seal were married there in 2005. Teal and I were there also with our trimaran *Savannah*. Too bad we weren't invited and/or didn't have a drone like the Wanderer." *Lihn Goben*

"Careyes is a fabulous location that we visited in the 1970s when the Playa Blanca Club Med was still in operation. Upon our arrival we were notified that they were out of cash. A number of *banditos* on horseback had robbed them the previous day! We have stopped there many times since on *Dj's Dream*. The anchorage is tight against the rocks,

Looking down on the Careyes anchorage from one of the luxury accommodations on the hill. We'd rather be on a boat.

LUXURY ESTATES REALTY

CHANGES

but the setting has always been so spectacular we wouldn't miss it." *Rog and Di Frizzelle*.

"The 1998 MEXORC started on Banderas Bay and ended at Las Hadas. Who

remembers Pat Farrah's famous ping-pong tournament — with hundreds in cash prizes for anyone in a bikini?

The stop in Careyes featured a special fireworks display. We watched a cigar-smoking Mexican spend the day assembling it atop a bamboo frame that stood 25 feet

The 220-ft tall bridge between Mi Ojo and one of the islands.

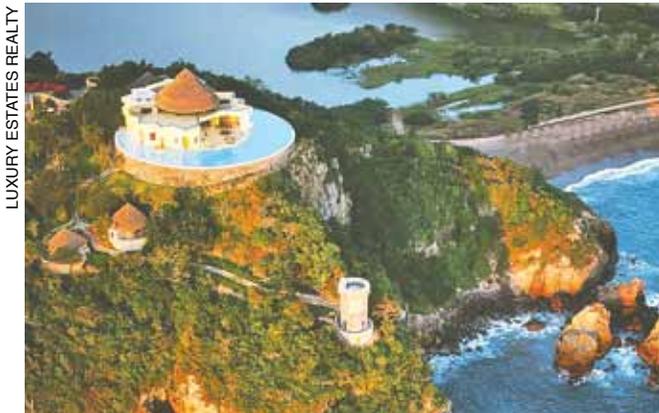

tall. It had pinwheels and a rotating sign on the top. The old cigar smoker stood under it and lit the fuses from his cigar.

"There were at least 20 boats anchored in the bay in front of the Careyes Hotel and the old Club Med facility next door. They had also built a pier so the MEXORC crews could get ashore. Among the 70s in the bay were *Citius*, *Kathmandu*, *Blondie*, *Mongoose*, and the maxi *Sorcery*.

"One of the coolest features of the Careyes stop was that some Arab sheik was preparing to host his daughter's wedding there some time in the future, so he and the hotel were having a dress rehearsal. It was so over-the-top! Still a favorite!" *Mike Priest*

"We anchored just off the beach behind the reef on numerous occasions. Susan's daughter Leah, of Brandon & Leah fame, were staying at Dos Estrellas, which looks like a hotel on the point just above the reef. It was/is owned by

You've heard of 'surround sound'. Well, this estate above Careyes is unique in that it has 'surround swimming'.

LUXURY ESTATES REALTY

a music mogul. In the next bay to the south was a place called Cocodrillo, one of our favorite places to eat. It was run by a guy who used to manage the Hotel Careyes. Lots of very Italian folks from the homes in the area liked to frequent the *palapa*. There is a private polo club behind the hotel as well." *Jerry McNeil*.

"Cindy and I anchored off the old Club Med site with *Beach House* in 2008. We saw our first coatimundi climbing on the aforementioned suspension bridge. Now that I know Uma Thurman was swinging around on the bridge, it has more meaning. We were not un-welcomed, nor were we invited ashore. It was a very cool little spot.

"We were at Careyes in January 2010 and toured the main hotel hassle-free. The only thing remarkable, aside from what you've already mentioned, is that I snorkeled into a tampon. Gross! It was too expensive, too crowded, and kinda dirty for us." *Rita Webster*.

"We've stopped in Careyes many times over the last 20 years, most recently in

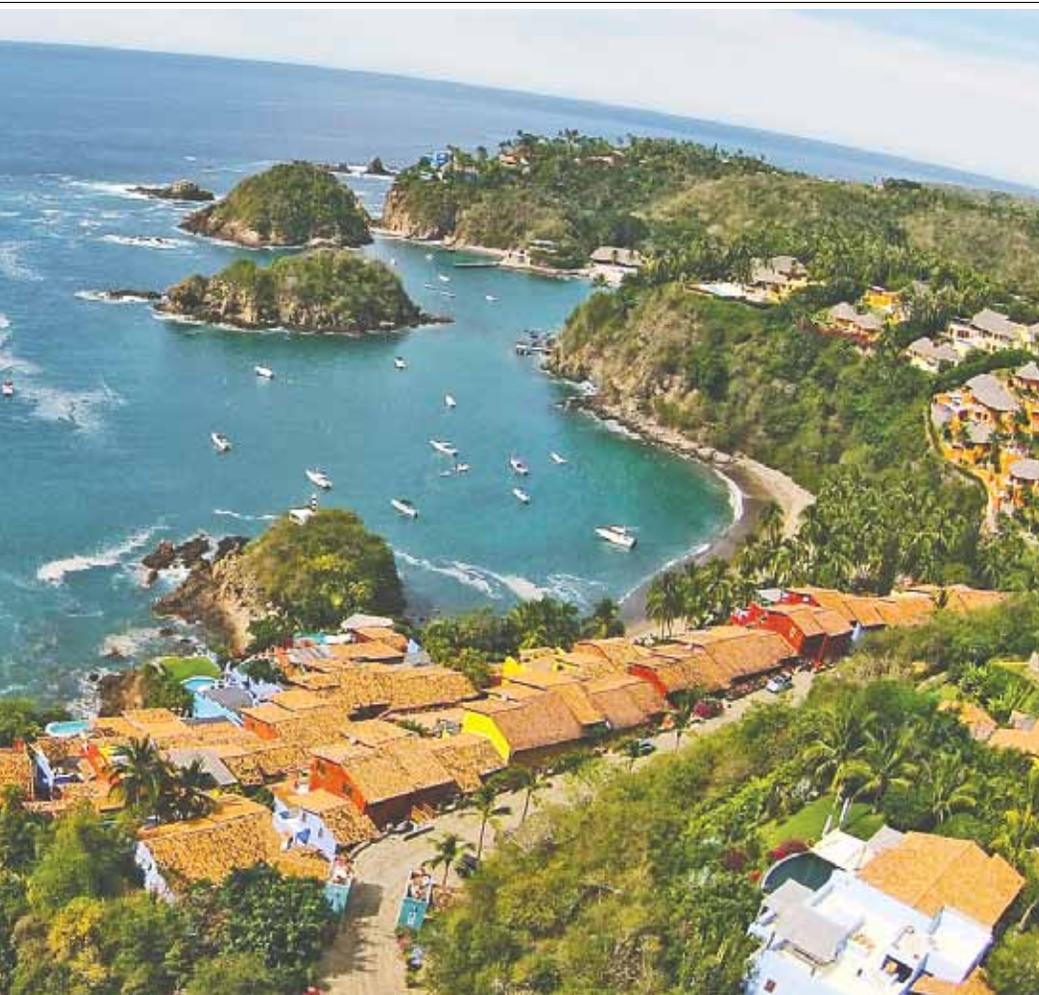

January 2014. The suspension bridge was still there, and the outer island was spectacularly lighted for a couple of hours every Saturday night.

We were told that about 10 years ago a local resident didn't like the kind of crowd the Club Med brought in, so he asked them what their profit for the operation was. He paid them the same amount to keep it closed. He later bought it, tore out many of the cabins, and used it as his personal park. He has anchored a number of nicely painted pastel blue *pangas* in the cove to prevent cruisers from anchoring there.

"The middle cove still has the expensive French restaurant, and they do allow cruisers to beach and dine there. The cove is filled with *pangas* on moorings, so the anchorage is outside that and inside the outer island." *Tom Collins*

"My husband John Rains and I have anchored off Careyes 10 different times, but have been turned away by a big swell or too much surge twice as many times. Our best experiences at Careyes have been when we dinghied ashore to Playa Rosa, had lunch with the French lady

IN LATITUDES

LATITUDE AERIAL / RICHARD

If you want the best view of Careyes, you need to get high. The hotel is now closed and being converted to condominiums.

who started it, then walked next door to the Bel Air Hotel. The manager personally took us around to look at two posh guest rooms/suites and everything else. He said they welcomed boaters to come in and use the pools and common areas if they bought a meal or a day pass for \$15. At the end of the tour, the manager invited us to stay and inspect everywhere except the guest rooms upstairs. Then he gave us two free day passes and invited us to come back for dinner, on the house, that night. Can you imagine what Careyes would be like if it had a big breakwater and a few slips? Hmmm, I guess it would be crowded like Portofino in Italy." *Pat Rains*

"When we sailed our Islander 36 *Misfit* up the Gold Coast in early 1988, we received a VHF call from Peyton Coffin, who was heading south and whom we'd met at the Publisher's Cup he'd run a few years before. We both pulled into Careyes where we rafted up for the night. We had a wonderful dinner and partied until very

late. I never heard from Peyton again, but it was one of the most memorable nights of my life. It was stunningly beautiful, with a sky full of stars and my belly full of rum." *Tim Stapleton.*

"In 1991, my wife and I pulled in to Las Hadas with our Farr 46 *Beach Party* and Med-moored next to famous sailmaker Lowell North and his guests. They were very cordial and invited us to join them in a sail up to Careyes the next day, which we did — and under spinnaker, no less. Naturally we had to go to the Club Med, which charged us \$35 for an all-day pass that included all the food and beverages we could consume. I reached the finals of the table tennis tournament, which really pissed off the young studs who were trying to impress their new brides or whatever. Unfortunately, I lost in the finals. I had trouble focusing on the ball because I'd been drinking all day." *John Sprouse*

"I first anchored at the Careyes Club Med in 1981 when I

made a pit stop on a delivery home after the Manzanillo Race. The guests were very accommodating. Management, not so much when they found out we were swimming ashore at night to enjoy the many amenities. Captain and crew were 'de-beaded' and had to promise we would weigh anchor at first light — or else. We did not ask what "or else" meant. It was fun while it lasted." *Craig Chamberlain*

"We anchored between the hotel and the island in 2009. They wanted \$10 for us to hang at the pool, where we met some polo players. They took us to watch a match and drink some Pimms, then took us to the lighthouse and the giant soup bowl sculpture on the cliff. You climb inside the bowl by going under the thing. It's amazing! If you climb inside the lighthouse, you can turn the light on by connecting the positive cable on the battery." *Kurt Roll*

"My wife and I anchored there in 2006 while I cleaned a fish in our cockpit. The tourists were not impressed." *Douglas Leavitt*

"I was told I had a good time during the MEXORC stop at Careyes. The 1987 Careyes to Manzanillo leg had 50 knots of breeze from dead astern for the sled class. Cowabunga!" *Tom Priest*

"Most of our 1985 MEXORC crew got food poisoning at the Careyes stop. I seem to remember Paul Cayard handing the wheel to someone for about 15 seconds so he could take a chum break. Beautiful place." *Paolo Shearer*

"I had the honor of being tossed out of Careyes in the late 1970s, along with Humpo and Dangerous Don H! Those folks have no sense of humor." *Ian M. Montgomery*

"My most pleasant memory was in 1991 when the Victoria Secret folks were doing an all-day photo shoot around the pool and beach. I think I ordered a cheeseburger because I was in . . . well, you know where." *Rob Wallace*

And now, for the definitive Careyes Update by Mike Farley:

Some of the world's most famous celebrities have trod the tiles of the Careyes Hotel aka the Bel Air Hotel. This is Doña, not a celebrity.

CHANGES

"Way back when I ran the 48-ft Bruce King designed bilgeboarder *Hawkeye* — we had the great battle with the old *Swiftsure* in the Big Boat Series, the one that ended with the epic waterfight back at the docks. Then I ran the *Alaska Eagle* project for the 1981-1982 Whitbread Around the World Race for Neil Bergt. Following that, I came down to Mexico to run a yacht for a Mexican owner, and have been in the Careyes area ever since, dividing my time between our place there and up in Colima where our kids go to school.

The hotel at Careyes got shut down several years ago because of a lack of business. While the Brignone family still has a lot to do with Careyes, a corporation owned by a Mexican in Mexico City owns the hotel and many of the apartments. Last year he decided to convert the entire hotel to condos. The renovation project is huge. We had to move out right after last Easter, and are hoping to be able to move back in this fall. It's a hard hat area, which is why the guards denied the Wanderer entry. But I hope you went next door to the Playa Rosa.

"Unfortunately for visiting yachties, there is no more hotel to welcome people for lunch and drinks around the pool. That leaves Playa Rosa, the cove to the north, as the only option. So many moorings have been put in over the years that there is little space for visiting yachts to anchor.

"As you surely know, the Club Med was closed down years ago. It's been

The famous and absurd soup bowl sculpture. Filled with tortilla soup, it serves 979. Filled with tequila, it serves four times as many.

turned into a private estate by the same man whose yacht I ran for 20 years before I retired. So no more fun and games for visiting yachts there anymore either.

"Too bad I didn't know the Wanderer had come by, as I could easily have gotten him past the guard gate."

— *latitude/rs* 01/15/2015

Healthy Cruising (Mexico)

You know how much it costs to eat nutritious meals on a boat in Mexico? We don't either, but we can tell you that it's not much.

For instance, the six avocados, four tomatoes, five carrots, two cucumbers, head of cauliflower, and bunch of broccoli in the accompanying photo cost us all of \$4.71. We bought the stuff at the Campo and Turismo wholesale fruit and veggie distributor on the outskirts of La Cruz. We don't want to contemplate what it would have cost at Whole Paycheck in Mill Valley.

Add a little lettuce and some lentils to that stuff and you'd be eating well and shedding pounds with ease. If you're looking for more than the 30% protein found in lentils, you can buy a rotisserie chicken at many places for about \$6 — including rice, tortillas and some great hot sauce. Feed the rice and tortillas to the local pets because you don't want to eat that stuff.

You can eat half the chicken for dinner, then save the rest for the basis of chicken and greens salads or chicken and veggie soup. Mind you, soup for breakfast is *buena*, even in the tropics.

If fish is your preferred source of protein, you can get a nice slab of fresh tuna. We get our tuna — or mahi or other seafood — at the La Cruz Fish Market. Last time we were there they asked us to wait 10 minutes so they could bring in an untouched 80-pound tuna, then cut the steaks to our specs. A good-sized tuna steak runs about \$2.50 per person.

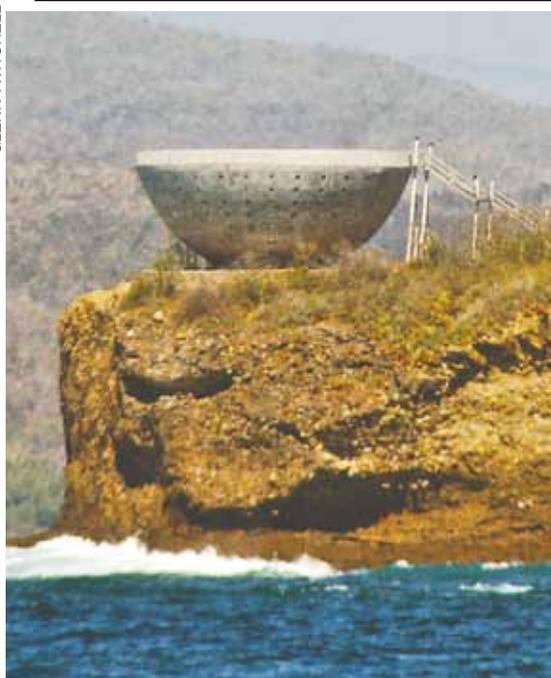

We don't always eat as inexpensively as we can, in part because we don't like a day to go by without raspberries, blueberries, strawberries or blackberries to accompany our uncooked oatmeal, sugar-free yogurt and sliced almonds in a bath of almond milk. The berries — which come from God-knows-where — are a little more dear than the other items. For example, a small carton of blueberries and a large container of strawberries set

us back \$3.78. We paid nearly \$15 for a large container of cherries from Chile at Costco. We'll pay almost anything for cherries.

In other reports, Craig Owings said he was getting 16 bananas to the dollar in Panama. Greg King reports the weekly fruit and veggies boat in the San Blas Islands charged him about \$12.25 for an amount of fruit and veggies similar to what we got in La Cruz, but that fruit and veggies are much less expensive in the South Pacific. Ken Miller says he got a small carton of blackberries in Sonora, California, for \$2.50 — although his wife Amy got the same for 99 cents as a loss leader at the Dollar Store.

If you like to dine out in Mexico — which de Mallorca would like to do every night — there are good bargains, too. The various 'tacos on the street' places are good, although somewhat limited in variety and greens. We love Natly's in Sayulita, where the big and delicious

IN LATITUDES

ALL PHOTOS LATITUDE / RICHARD

there are still families and kids playing there most evenings. My advice to arriving cruisers is not to be in the wrong part of town after dark, and don't try to deal or buy drugs. If you do that, you should be fine."

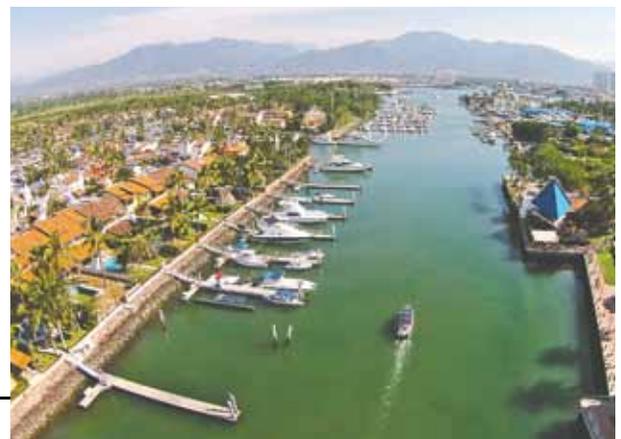

For more facts and a more detailed analysis of the situation, see the **Baja Insider's** online report. For what it's worth, we at *Latitude* would not hesitate to take our catamaran to La Paz.

Speaking of *Profligate*, somehow the port side three-bladed Flex-O-Fold prop managed to fall off in early January. But that's nothing compared to what 2011 Ha-Ha vet Erlin Loving of the Bainbridge Island Tartan 37 **Ventured** has had disappear from his boat off Costa Rica. When he left Playa del Coco to join some other boats for New Year's, he made the unfortunate decision to tow his dinghy rather than storing it on deck as he usually does. After sailing downwind, then beating in moderate conditions, he noticed that the dinghy and outboard were no longer trailing behind his boat.

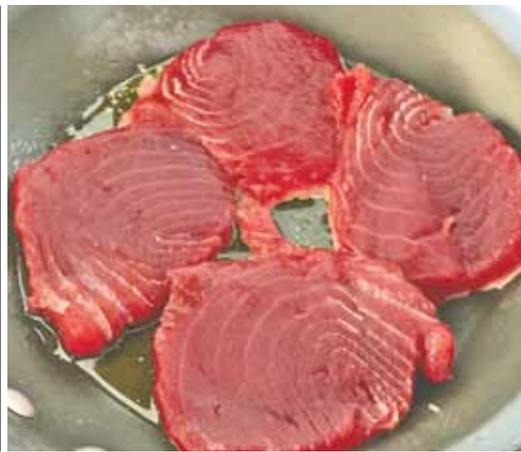

"The line was intact, so it's most likely that the bridle on the dinghy broke," Loving writes. He wasn't sure when the dinghy and outboard separated from his boat, but it could have been as much as 10 hours before. Realizing that a search was all but hopeless, he knew he'd feel terrible if he didn't at least make an effort. That's when things went from bad to worse.

"I heard a weird rattle from the centerboard, which was down at the time," Loving writes. "I began to pull it up, but the line went abnormally tight, so I stopped. Then I saw the line that holds the centerboard up go slack. I figured I could replace that, as the boat's manual tells you how to do it even when the boat is in the water. What's going to be a little more difficult and expensive is replacing the centerboard. For when I got

Aerial Photo Phun. Here's a view of the channel from Marina Vallarta to the sea you don't see very often. Unless you're a seagull or pelican.

LATITUDE AERIAL / RICHARD

Healthy and inexpensive food south of the border. Clockwise from above: You get all this, and change, for \$5. If you're too lazy to cook, try Natlys in Sayulita. Wal-Mart has become a 'green grocer'? A berry, berry good breakfast. A \$5 scallop and avo tostada. Ten bucks of fresh tuna.

helpings of food in the accompanying photo cost less than \$3. As always, you're going to pay more for sit-down dinners, and the tourist places can be as high as restaurants in San Francisco or L.A.

Now that you've got your inexpensive, healthy eating dialed in, let's talk about exercise, the other component of good health. Your 'health club' in Mexico is the warm — at least on the mainland — Pacific Ocean. It's free. It offers sailing, surfing, swimming, boogie boarding, SUP-ing, and in some places, good diving. Most activities are great for the muscles, cardio, and the mind. There are lots of great inexpensive places to cruise to in the world, but Mexico is among the best, and it's certainly the closest.

— *latitude/rs* 01/18/2015

Cruise Notes:

The name of the southern Baja city of **La Paz**, 'Gateway to the Sea of Cortez', means 'The Peace'. But it's been anything but peaceful since July, as there have been over 50 homicides, about 12 times the number in previous years.

"It's mostly professional hit men taking out members of other cartels," Shelly Rothery Ward, Commodore of the Cruceros de La Paz, tells *Latitude*. Indeed, to our knowledge no boaters or tourists have been killed or even wounded.

"The turf battles have not affected most of us cruisers in any way at all," continues Ward. "I have not changed my life, although I've noticed there are more of the new police all over the city, and especially on the *malecon*. But

CHANGES

to Quepos, I dove on the bottom — and discovered the centerboard was gone!"

"There is no romance or adventuring in RV-ing," reports Dewey Engleheart of Hollister, who did the 2001 Ha-Ha with his wife Nan aboard their Catalina 400 **The Great Escape**. After nearly six years of cruising, which took the couple to the Caribbean and back, they sold the boat in San Carlos in 2006 and bought a 34-ft diesel pusher type RV. They enjoyed RV-ing, but Dewey said it wasn't very exciting — particularly for a guy who used to land jet fighters on aircraft carriers. In search of more adventure in their lives, last March Dewey and Nan returned to San Carlos and bought the Hunter 42 **Flight**. They now do 'six' on their RV and 'six' on their boat. Indicative of the greater excitement when sailing, Dewey says they saw 30 whales on their way to the Marieta Islands one day last month.

Almost around! Scott Stolnitz reports that he's left Fort Lauderdale aboard his Marina del Rey-based Switch 51 cat **Beach House** for Cartagena, the Canal, and Central America. Once he reaches Costa Rica, he'll have completed a cir-

LATITUDE / RICHARD

How hard is it to land a fighter jet on an aircraft carrier? "Doña de Mallorca could do it," claims Dewey of 'Flight'. "But not at night."

cumnavigation that he started about eight years ago with his late wife Cindy.

What do you learn after **Bashing up the Baja** coast multiple times? For one very experienced sailor who shall remain

unnamed so he doesn't lose his insurance, it's that you should never bash on a Bash. "I've learned my lesson," says the owner of several sailing businesses. If the weather is bad, I'll just hole up until it gets better. No more beating up the boat and/or beating up myself."

The other thing he's learned — and the reason we can't identify him — is that he prefers to do it singlehanded.

When is the best time to **Bash**? We at *Latitude* think it's late June or early July. Mike Danielson of **P.V. Sails** is pretty much in agreement. He's no weather dummy, having given us the following summary of weather on Banderas Bay:

"December and January usually have the lightest winds of the year because the ocean is still warm while the inland valley is about as cool as it gets. April and May are the windiest — 18 to 25 knots — because the ocean has cooled and the valley has gotten really warm, creating the same dynamic that brings strong summer winds to San Francisco Bay. But after the first rain, usually in mid- to late June, the land starts cooling

down as the ocean starts getting warm again, reducing the gradient and the windspeed."

When it comes to boat transmissions, Guy Bunting says that saildrives aren't necessarily the worst things in the world. Bunting, who has been out cruising since 1988 with his wife Deborah aboard the M&M 46 **Elan** that he built in Vista, speaks from experience. Lots of it, as prior to the M&M cat the couple cruised on a Prout cat for four years.

We got into a conversation about **Yanmar saildrives**, which are notorious for cone clutch problems, while Guy was on *Elan* and the Wanderer was hovering nearby on an SUP. Guy recounted his problems with a straight shaft.

"One, the setup is extremely noisy. I'm told that 60% of engine noise transmitted to the hull is via the strut. Second, my straight shaft is tapered, and I've found it's almost impossible to get the prop off. Third, the Yanmar diesel is on rubber mounts, and thus it moves around quite a bit, while the v-drive is rigid. So they don't stay lined up when in waves."

Latitude's Leopard 45 '**ti Profligate** avoids three of these 'straight shaft' problems as follows: 1) The prop comes out of the back of the keel-let, so there is no strut to transmit noise — although it's still noisy. 2) The shaft isn't tapered, so it's easy to get the prop off. 3) There is no problem getting the engine and saildrive lined up.

By the way, in late December three men — a **realtor, a painting contractor, and a magazine publisher** — attacked two Yanmar saildrives with cone clutch problems on *Profligate*. When done by professionals, such repairs can easily cost between \$1,000 and \$2,000, and are now termed "normal maintenance" every 450 hours by Yanmar. We know, that is ridiculous. While it took the trio 4.5 days to make the repairs, they now think they know the tricks, and are thus confident they could now do one

Servicing or replacing the cone clutch on a Yanmar saildrive is an oily job. But if you're cruising with one, you'd better know how to do it.

in just 2.5 hours — and with the only expense being a little lapping compound. We'll have the full story in the March *Latitude*. If you have a Yanmar saildrive, you won't want to miss it.

Shea Weston, a West Coast marine communications guru, shared the following communication news for cruisers:

"SailMail now supports the **Iridium GO!** device. Airmail (for SailMail only) is approved by Iridium for use with and

Is it just us, or is it really hard to keep up with all the developments in maritime communications?

Is there any better feeling than overcoming a serious problem while cruising solo? Not for Brian Charette of the 36-ft northern Idaho-based catamaran **Cat 2 Fold**. The problem he faced was keeping his catamaran, which is meant to fold together for trailering, from folding together while 60 miles offshore during a 600-mile singlehanded sail from San Carlos to Banderas Bay. But Charette persevered, which left him smiling the way you see him in the photo at right. By the way, his trip didn't start in San Carlos, but with his cat on a trailer in the snow in northern Idaho.

If you think there isn't much transparency in United States government — and there isn't — Nicaragua's Daniel Ortega, his wife 'The Witch', and Sand-

LATITUDE / RICHARD

Why is this man smiling? Because he managed to repair a potentially serious problem on his cat at sea, and because his kids are joining him.

inista insiders have our government beat hands down when it comes to opacity. It's only five years until the first ship is slated to use the **Interoceanic Canal** from Nicaragua's Rio Brito on the Pa-

cific to the Punta Gorda River on the Caribbean side. Nonetheless, only Ortega and his closest advisors know: 1) What will happen to the 30,000 people that will be displaced by the canal. 2) How many construction workers from China will arrive and when. 3) And why no environmental studies have been done for what would be the severing of the 'land bridge' between North America and South America.

If the canal gets completed — and some have their doubts — it will be 173 miles long — four times as long as the Panama Canal — but be able to handle much larger vessels. The completion of the Interoceanic would have major political and strategic ramifications. Nicaragua could overtake Panama as the most strategic link between the two oceans, and it would give the Chinese a much-wanted foothold in North America. But the domestic ramifications in Nicaragua could be even greater, as many of Ortega's former brothers-in-arms in the Sandinista National Liberation Front are furious with the behavior of their

Navigation, Communication & Weather

President *cum* dictator, who they believe is selling out both them and their ideals.

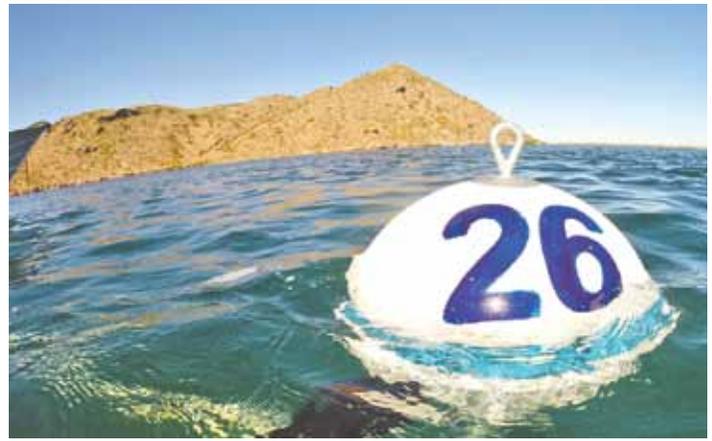

"Is it true that all boats coming down the West Coast are required to check in at **Ensenada**?" a reader asked. "And if they don't, what are the risks?"

No, you do not have to make Ensenada your first stop. But unless you get a temporary mariner's visa online before entering Mexican waters, you can't stop anywhere in Mexico until you've cleared in at a Mexican port of entry. The most logical ports of entry after Ensenada are **Cabo San Lucas, Mazatlan, and Puerto Vallarta.**

By the way, Ensenada got a very favorable review in a January issue of the *New York Times* Travel section. By the way, Part Two, we haven't heard of a trace of the paperwork problems that caused such an uproar in Mexico last year. It's like the good old days — except that Mexican officials have lots of computers now. While sometimes confusing, Mexico's paperwork rules are fair and the costs are low, so it would be foolish not to respect them.

"**Puerto Escondido** started to get a facelift on January 10," reports Connie Sunlover. "It actually began in the middle of last year when Lic. Andres Barrera Peralta was appointed the new manager of the Fonatur facility here. Since his arrival, all services have im-

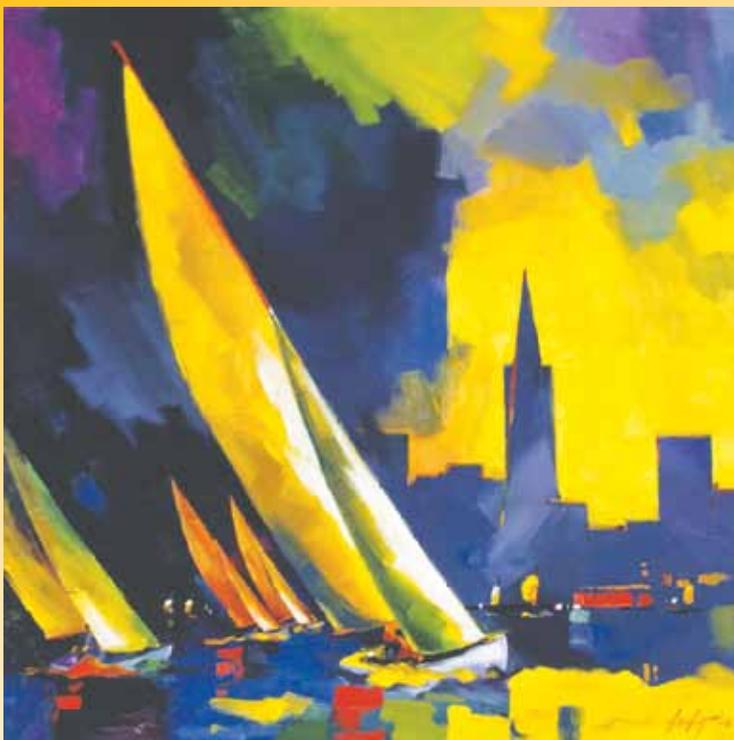

proved. Gas and diesel have been available without disruption, and there has been hot water, soap and toilet paper in the heads. In addition, the new moorings will be complete by February 1, with diver Carlos Christani Cruz having gotten the contract to put in new line, chain, shackles, mooring balls and so forth. Furthermore, by the time anyone reads this, a new chef from Cabo will have started preparing meals at the new restaurant that will be opening on

By the time you read this, new moorings — with new line, chain, shackles and buoys — should be ready for occupancy at Puerto Escondido.

the second floor of the Fonatur facility. Backed by the towering Sierra Giganta and overlooking the main harbor, the views will be great. Alma, owner of the Tripui Resort, is the proprietor."

We can't do without cruising in the **Caribbean and in Mexico**, but they are so different. Here are less well-known ways: 1) The other afternoon we walked into a *bodega* to get a banana, and the proprietor insisted on opening up a bag

CHANGES

of chips and sprinkling hot sauce and fresh lime juice on the chips. Then he all but forced us to eat some. There's more. Despite our repeated protestations — we really don't care for beer — he insisted on opening up an ice-cold *ballena* of Pacifico and making us drink a cup. And he kept refilling the damn thing. That wouldn't happen in the Caribbean. 2) We drove down to Barra Navidad to get some aerial photos of the Barra area, and needed a hotel. We ended up with a room in the five-star Grand Bay Hotel by Wynham for \$106 — although they sneaked in a \$20 resort fee. Try to find something that reasonable in the sunny Caribbean.

Come to think of it, air fares home from Mexico are much cheaper than those home from the Caribbean. Rob and Lynne Britton, Ha-Ha vets with the Olympic 47 **Aldebaran**, formerly from San Diego, report they just got two round-trip tickets between Puerto Vallarta and San Diego on **Volaris** for \$400.

Earlier in *Changes* we had a two-page photo of John Larsen's Westsail 42

Compared to the Ocean 71 'Big O' that we once owned, the Ocean 80 'Ocean' is huge.

Danika, which had struck an uncharted — at least on his Navionics chart — pinnacle rock off Punta Mita. The irony is that Larsen is a marine pilot for cruise ships in Alaska during the season. But if the rock wasn't charted, how was he supposed to know it was there? At times there has been a buoy to mark the rock, which comes to within five feet of the surface, but it had drifted off station. Larsen has been told that Navionics is putting the rock on the newest versions

of their charts — which won't help anyone with an old version. The six-knot impact with the rock put a big gouge in the Westsail, one of the thickest hulls in the industry. Larsen didn't have trouble making it to the boatyard, but later discovered that a small amount of water had gotten in.

Larsen has a good sense of humor. He told us that he'd purchased *Danika* as a hull and deck in 1974, and had done a good job of it finishing her off. When we asked him how long it had taken him, he replied, "I'm almost done."

How big is too big a boat for a couple to cruise? If you ask Tal Gutbir and Marina Janecek of Vancouver, 80 feet isn't too big. The two of them are cruising the Ocean 80 schooner **Ocean**, which is a huge Peterson design that displaces 140,000 pounds. She's a lot of work to maintain, but Tal says he learned all he needed to know during his two years in the Israeli Navy. It didn't hurt that the boat, built in 1981, came with two new masts, a new engine, and a new generator.

43-FT SAGA, 1998. Ventura, CA. \$215,000. Rare West Coast offering of this sought-after performance cruiser. Meticulously cared for by second owners. Absolutely turnkey. Panda 4kw genset, 150 gpd watermaker, Hydronic 5-station cabin heat, Icom 802 SSB, carbon fiber sprit pole, cruising spinnaker with snuffer, 200 watt solar panel, 11-ft RIB dinghy with 8.0hp and 3.3hp outboards. See manufacturer website for further specs. www.sagayachts.com. Call (805) 985-4532 or lanikai3@live.com.

47-FT BENETEAU 473, 2005. Southern California. \$239,900. Beautiful and in excellent cruise-ready condition. 3 state-rooms, electric winches, furling sails, bow thruster, dinghy with outboard, stereo, 2 TV's, autopilot, radar, VHF, Wi-Fi antenna, microwave, custom features. Owned in LLC for possible tax advantages. (310) 893-6061 or sylippman@earthlink.net.

44-FT HERMANSEN, 1994. Santa Cruz /San Francisco Bay. \$69,000. No.6 of 6, perfect budget expedition platform, steel/aluminum construction (no corrosion, fresh blasted, 9 coats of paint), pilot-house, modern design, newer (600hrs) Perkins. 4-236 brand new mainsail (Doyle), new standing rigging. New cold water liferaft. All new electronics (VHFx2), autopilot, tridata, satellite compass and ARPA radar, 4kw. New ship-like interior (very spacious), 1200AH new lifeline, AGM batteries, Achilles dinghy and 6hp outboard. Many spares and tools. This is a serious go-anywhere boat, offered at a most reasonable price. Lots of boat here. See website for more information. www.monarchyachtsale.com. Call (831) 324-6316 or (845) 544-8045 or email at ennas11777@gmail.com.

44-FT CATALINA MORGAN, 2007. Seattle, WA area. \$269,000/obo. Mint condition. Captain-maintained. Beautiful deck salon, light and airy. 75hp Yanmar, low hours. Batteries recently replaced. Two large solar panels, cruising spinnaker, power winches, hydronic heat, Raymarine C120, radar, autopilot, bow thruster. Will deliver on West Coast. (408) 666-3261 or jerryfsaia@aol.com.

42-FT TAYANA. Vancouver Center Cockpit, 1988. La Paz, Mexico. \$139,000. Joss has been continuously updated and cruised by the current owners since 2002. She is ready to cross the oceans or cruise the coasts. If you are looking for a blue water cruiser that is ready to go, this is the boat for you. Equipment and inventory too extensive to list. Call or email for complete details and photos. (310) 489-4682 or cmikejones@hotmail.com.

44-FT MILLER MARINE, 1980. San Rafael. \$99,500. Beautiful and cruise-ready. Mexico and Alaska veteran. Custom built by Miller shipwrights on Bainbridge Island WA with a gracious teak interior. Solar, 85 hp Perkins. For more information go to www.yachtcontessa.com. Call (707) 813-1444 or yachtcontessa@gmail.com.

42-FT ROBERT PERRY TATOOSH. 1981. Panama. \$115,000. Safe, fast, Puddle Jump-ready. Yanmar, Neil Pryde sails, Viking raft, Monitor vane, full electronics, Iridium phone, Dyer sailing dinghy. Many recent upgrades. Spares, charts and recent survey. Health forces sale. Contact jonessail@aol.com.

CLASSIC BOATS

46-FT JOHN HANNA CAROL KETCH. 1946. Berkeley. \$35,000. Carvel planked fir on oak frames, diesel, windlass, good sails and rigging, well-maintained. Last hauled Jan. 2014. Priced under surveyed value. Owner moved out of state. More at www.faihforsale.com. (970) 261-1611 or (510) 507-4589.

MULTIHULLS

52-FT MODIFIED TENNANT. Blade Runner, 1987. Ventura, CA. \$175,000. Afterburner, fastest coastal sail catamaran on the West Coast, for sale to a good home. For more information: <http://afterburner.gibbscam.com>. Call (805) 377-1789 or afterburner@gibbsCAM.com.

34-FT GEMINI 105 M, 1997. Alameda. \$88,000. I am selling my beloved Catamaran. Here are the highlights: 1. The boat, in my opinion, features the best layout I have seen on a catamaran. Even 500K boats can not compete. 2. You can run this boat alone with no help allowing you to go anytime. 3. This boat is relaxing. In 30 knot winds it will stay flat, warm and calm. *Milo* shows very clean and proud. Email ahilden@hotmail.com.

37-FT SEARUNNER TRIMARAN. Vavau, Tonga. \$28,000. Famous Jim Brown design, lovely condition, at peaceful, idyllic Vavau, Tonga location. Private, secluded, rent-free mooring. Tremendous daysail/charter opportunity, or a perfect family sailing cruising home in Paradise, just a short flight away. First \$28,000 assures quick acquisition. For more information contact royjones90@yahoo.co.uk.

35-FT BENETEAU CATAMARAN, 1986. Ensenada, Mexico. \$75,000/obo. Boat has two 17hp Yamar diesel engines, two 20 gallon water tanks, two 20 gallon diesel tanks, two double berths and furling genoa sails. More information at <http://4salecatamaran.simplesite.com>. Call (413)599-228, (928) 301-2189 or (928) 899-0401 or edbooty10@yahoo.com.

57-FT CUSTOM CATAMARAN, 2014. \$58,000/obo. 57x30 custom catamaran. Marine ply w/epoxy fiberglass. Rotating mast. Hulls, deck, bridge deck and basic interior completed. Needs engines, sails, steering, finish interior. Owner can help finish. Contact: orlovicr@yahoo.com or (650) 773-6327

POWER & HOUSEBOATS

DUTCH RIUTER TRAWLER, 1980. France. \$185,000. Cruise EU canals and the Mediterranean. Gorgeous Dutch trawler. Steel hull, twin diesel, solid blond teak interior. Professionally maintained. Turnkey, fully loaded. Fresh bottom job. Dry docked in France. Live the dream. Contact a1martine13@gmail.com or (239) 821-3749.

25-FT NAUTICA WIDEBODY RIB. 2000. Pier 39, San Francisco. \$95,000. Fresh rebuild on twin 225hp Yamaha 2-strokes. Pier 39 slip with jetdock, trailer, radar, Icom VHF, C/plotter fishfinder. Turnkey charter business. See more at www.webscameravehicles.com. Contact: (650) 799-9222 or captweb@juno.com.

28-FT GREAT DANE, 1969. \$9,000.

This Great Dane is capable of being a good starter offshore boat. She is old school, stiff and can carry you safely across oceans. Berthed in La Paz, Mexico.

Cruise/floating office/liveaboard (with approval). May finance or trade. For more information call (415) 888-3856 or rogercperry@gmail.com.

PARTNERSHIPS

CATALINA 380. 2001 Sausalito Yacht Harbor. Full electronics, new tridata, chartplotter, autopilot, radar. New AIS radio. Recent in-mast furling main and genoa. Spinnaker, Yanmar 40, dodger, electric windlass. New standing rigging. Professionally maintained. Perfect for sailing and cruising: light, airy salon, front/top load refrigerator, microwave, flat screen HDTV/DVD, electric head, shower (acrylic door). \$4,000 of interior amenities. New dinghy, outboard and davits. Ultraleather and Corian interior. 25% equity share available, buy-in plus \$675/month. Call (925) 352-7620 or Mascaii@aol.com.

SHARE BLUEWATER SAILING. Oregon. Share bluewater 45+ sailboat for equator to 35S. Extensive sailing experience helpful. Also available: 36-ft 1978 staysail sloop. A TLC bargain at \$15,000 or do the work for 50% off at \$7,000. (541) 378-1671.

KEEP YOUR BOAT IN HAWAII. Maui. Keep your boat secure and maintained in Hawaii for less than the cost of berthing it in the SF area. I am looking to fill my 20 x 50' slip on Molokai with a vessel that can be used for occasional overnight and day charters. I am an established business man on Maui with marine and land-based companies. Vessel must be US-built, eligible for commercial use, and in great condition. *Shadowfax*, the current vessel, is moving to a slip on Maui. The wait list for slips is over ten years normally. Take advantage of this rare opportunity. Please call or email for details. <http://www.sailmauiui.com>. (808) 870-1741 or (808) 874-1110 or Mike@sailmauiui.com.

44-FT BENETEAU OCEANIS 440. 1995 Sausalito. \$25,000. 25% equity partnership. Comfortable safe boat to enjoy the Bay on your week every month or share with others. \$300/month covers slip, insurance, maintenance and upgrades. Well maintained by mature knowledgeable owners. Quiet Sausalito slip. Upgraded instruments, radar, AIS, new dodger. Former partner upgraded to larger Beneteau. Sharing is the best way to own a yacht and great boats deserve great partners. Trade for boat, car, plane? (949) 338-6298 or mjeh49@yahoo.com.

BERTHS & SLIPS

40-FT PIER 39 SLIP SAN FRANCISCO. \$12,000. Dock D-13, Excellent location, only 3 or 4 slips from the harbormaster. Priced to sell. Contact: Ronald at (213) 622-5033.

50-FT PRIME SLIP, PIER 39, SF. \$50,000. F-Dock, Slip 11, east side. Protected from wind. Close to gangway, showers and marina office. Covered parking across street with special rates for owners. (559) 355-6572 or scorch@tempest-edge.com.

37'+ SLIP FOR RENT. Alameda Estuary. \$259/Mo. Private Dock. Safe, secure, peace of mind. Easy access/parking. Electricity, water & room to work on your boat. (Sorry no liveaboards.) Call Ed at (510) 521-2000 or email capt.edpayne@att.net.

SOUTH BEACH HARBOR BERTHS. Available for 30-ft to 38-ft boats in the Spinnaker Sailing Charter fleet. Must be late model, in excellent condition. Great income opportunity for boat owner while berthing at the best marina in NorCal. More information at www.spinnakersailing.com. Call (415) 543-7333.

SANTA CRUZ HARBOR SLIP. Santa Cruz. PacifcSail.com, a sailing school and charter company is seeking a 31- to 44-ft late model or new sailboat to join our fleet. Tax benefits and income. More information at www.pacifcSail.com/home. Contact (831) 423-7245 or info@pacifcSail.com.

SOUTH OF THE BORDER

Marotta Yachts of Sausalito

Brokers of Fine Sail and Motor Yachts

415-331-6200 • info@marottayachts.com • www.marottayachts.com

See at: www.marottayachts.com

48' TAYANA CUTTER Deck salon version of Robert Perry's 'go-to' design for safe, luxurious passage making. This low time, late model example is BRISTOL and TURNKEY. **\$419,000**

See at: www.marottayachts.com

46' KELSALL CATAMARAN, 2008 Easy to handle long-distance cruiser, bristol in and out. Twin Volvo diesels, Northern Lights genset, full electronics, lying in Sausalito YH. **\$324,000**

See at: www.marottayachts.com

50' BREWER-DESIGNED KETCH, 1989 Bullet proof, steel-hulled, cutter-rigged, full keel with cut away forefoot and skeg hung rudder, 5kW Northern Lights genset. **\$179,000**

See at: www.marottayachts.com

41' KIRIE FEELING SLOOP, 1996 Spacious accommodations with a cabin skylight and great sailing in typical SF conditions. Starfinder is a great example of a great design. **\$134,000**

See at: www.marottayachts.com

43' HUNTER 430, 1995 In nice shape inside and out. Spacious, well laid-out 3-stateroom/2-head interior with 6'6" headroom and lots of light and storage. Lying Oxnard. **\$97,000**

See at: www.marottayachts.com

42' PT PERFORMANCE TRAWLER, 1986 Cockpit motoryacht. Really nice, heavily built trawler with twin diesels, shows bristol inside and out. **\$95,000**

See at: www.marottayachts.com

38' CATALINA 380, 1997
Mexico veteran. Set up for short-handed sailing. Deep draft version. **\$87,000**

See at: www.marottayachts.com

31' PACIFIC SEACRAFT, 1988 Designed and built by actual cruisers. Shows very nicely. Yanmar diesel, radar, chartplotter, autopilot, offshore dodger, wheel, roller furling. **\$78,000**

See at: www.marottayachts.com

44' FELLOWS & STEWART, 1946 Repowered beauty owned by professional shipwright and maintained at Sausalito's Arques Shipyard many years. Shows bristol inside and out. **\$69,000**

See at: www.marottayachts.com

45' HUNTER, 1987 Amazing space below with 6'7" headroom; feels like a 50+ footer! Boat is in nice shape, well equipped and well priced. Pullman berth forward, shoal draft. **\$69,000**

See at: www.marottayachts.com

28' ALERION EXPRESS, 2000 Lovely little daysailer shows as new for a fraction of the price. Very well equipped; potentially transferable Sausalito Yacht Harbor slip. **\$52,000**

See at: www.marottayachts.com

36' ISLANDER, 1979
One of the nicest Islanders we've seen in years, this boat has been extensively updated inside and out and is a MUST SEE! **\$49,000**

See at: www.marottayachts.com

35' MAXI 105, 1983 High quality Swedish-built yacht with a 3/4 aft cockpit configuration. In excellent condition, she shows much newer than her actual age. **\$49,000**

See at: www.marottayachts.com

32' DREADNOUGHT, 1978 Classic Crealock-designed California-built cutter. These double-enders have sailed all over the world. Potentially transferable Sausalito YH slip. **\$24,500**

See at: www.marottayachts.com

31' HUNTER, 1987
Clean and well priced. Would make a good, inexpensive, fun daysailer or weekender. **\$19,000**

BOTTOM PAINTING & REPAIR

DON'T WAIT UNTIL IT'S TOO LATE

Uh oh, it looks like someone neglected to give the boat above her regularly scheduled bottom paint job. Notice how the bottom paint has deteriorated, exposing the gelcoat. This can allow hard, calcified growth to develop, which can degrade the performance of the vessel, and in time, damage the hull. Don't let this happen to your boat! KKMI delivers the most comprehensive bottom painting packages at a fixed price, so why gamble? KKMI quality and value is just what your bottom line and paint needs.

Special Package on Pettit antifouling paint being offered now! Call today, quantities are limited.

PRACTICAL & PERFECTIONIST VALUE

When it comes to smoothness of your bottom, so-to-speak, there is a range of options. Many boat owners are happy with rolled-on antifouling paint... but for others, nothing less than gently sprayed-on perfection will do. KKMI understands these differences... and that like all paint jobs, great results begin with proper preparation. No matter your preference... you undoubtedly appreciate quality service at a good value. Now, the best value in the Bay is even better. For a limited time you can get your bottom painted with Pettit's Z*Spar Pro Gold antifouling paint... at an outstanding price. Contact KKMI today and ask them for details about the Special Bottom Package!
