Tony Bigras’ one-year, 6,000-mile cruise from Vancouver to Florida — via Central America and Cuba — was unusual for several reasons. For example, the 52-year-old built Miss Cindy in just 450 hours, at a total cost of $8,500 for everything from sandpaper to electronics. He was able to take her from the boatyard to her launch in Baja atop an old station wagon. The cat’s main anchor only weighs 11 pounds, yet holds the boat in up to 40 knots of wind. He was able to take her 95% of the way from the Pacific to the Caribbean — via Lake Nicaragua and the Rio San Juan — on her own bottom. Because she only displaces about 1,000 pounds, she hit a top speed of 15.8 knots on the way.

As you can undoubtedly deduce, Bigras’ Turtle Island 16 micro cruises is a bit smaller than the average cruising cat. Miss Cindy is just 16’3” long, and has a beam of only 8’5”. The masts for her bi-plane lug rig are 17 feet tall, and she sets a total of 200 sq. ft. of sail. Able to carry a 500-pound payload, Miss Cindy’s typical speed under sail was 3 to 7 knots. She’s equipped with a 2-hp outboard for calms, which allows her to cruise at 4.25 knots at 15 mpg. The micro cat’s hull was built of quarter-inch marine ply, stitched and glued, then sheathed with e-glass and epoxy. Her masts are hollow fir.

As you might expect, we had a few questions for the sailor from British Columbia who sailed offshore passages spanning up to six days along the way:

**Latitude 38:** What kind of sailing experience do you have?

**Tony:** Quite a bit. I started in ’71 at Sidney, B.C. on small monohulls, then sailed a Buccaneer 24 tri in the Gulf Islands and around Georgia Strait for about five years. I had an Australian Quick Cat 16 that I would race unofficially with the Sunday fleet all through the nasty winter weather. In fact, I sailed that cat after school every day for about a year. I then built custom glass boats for a few years, then worked as a rigger for three years in Victoria, during which time I would sail on customers’ racer/cruisers.

Every boat I’ve owned since then has been of my own design and construction. I sailed Osram V, a 23-ft cat, around Vancouver Island, going offshore for the run to Victoria. In ’83, I sailed Osram VI, a 31-ft trimaran, from Prince Rupert around the Queen Charlottes, with a solo offshore run from there to Victoria. Neither of those boats had engines.

When I sold Osram VI in ’84, I thought I had gotten boats out of my system. I didn’t walk the docks, design boats, buy sailing magazines, go to boat shows or sail with friends. But in ’93, my wife was taking a course at a local college, and one of her classmates was this 80-year-old guy who’d bought Osram V from the guy I’d sold her to. My wife kept pestering me to meet him and show him how to sail the boat. After a couple of years went by without him croaking, I gave in to my wife’s nagging. I took the guy — who turned out to be nice enough — out on his boat, and after 12 years of remission, caught the sailing bug again.

So in ’97, I started building Osram VII, a 50-ft x 27-ft aluminum cat. Seeing how my getting back into sailing was my wife’s fault, she couldn’t help but be supportive — at least in the beginning. The support didn’t last, however, and the big tin cat went in a divorce sale in ’00. I have, however, gotten to sail on her several times since.

The year ’01 was pretty big for me. As the divorce was finalized, I did a big IT contract, and thanks to lots of hard work, brought in quite a bit of money. I flew to Hawaii hoping to find a boat wanting crew headed east or south. I got on a Gemini 32 cat for a 21-day passage to San Francisco. She wasn’t the best cat for the open ocean, but I loved being out there.

In ’04, I sailed a 40-ft keelboat from Victoria to San Francisco. After 36 rough hours in the beginning, it was a peacy sail the rest of the way. In ’07, I took my 40-ft trawler cat Osram VII 1,700 miles to the Queen Charlottes and back. And from May of last year until June of this year, I built Miss Cindy and sailed her 6,000 ocean miles. So I’m not new to sailing.

**38:** What inspired you to go micro?

**Tony:** I was looking for a quick-build, modest cost, easy-handling sailboat that I could take from the Pacific Ocean to Lake Nicaragua, and then down the Rio San Juan to the Caribbean Sea. I originally planned to sail her all the way down the coast from Victoria, but having lolly-gagged in Europe too long during the summer, I didn’t complete Miss Cindy until September.

**38:** Is the 450 hours it took you to build the boat about what you expected?

**Tony:** If you include stitching up
both sails. I had planned on 500 hours. I didn’t work too hard at it either, as I think my longest day was 10.5 hours. Most weeks I averaged less than 40 hours. Some of the credit for the quick build goes to the 6-inch heavy duty pad sander I bought for the project.

38: Did you ever take *Miss Cindy* through the surf?

Tony: No. I’m a pretty cautious guy, and wasn’t keen to gain that experience far from home. But I did beach her at a couple of spots in Mexico when the swell was small. And I did cross a couple of river bars in El Salvador and Nicaragua.

38: What’s the concept behind the unstayed lateral schooner rig, and were you happy with it?

Tony: I’ve long been interested in the rig for cruising, as the two sails make it great for downwind sailing. They are easier to handle than one big one, the center of effort is lower for greater stability, and there is some added redundancy of components. Upwind there isn’t much degradation from the rig, as it’s like two boats sailing close to each other. There is, however, blanketing on a beam reach, but I planned to swing the windward sail forward to reverse flow, leech to luff, in clear air. I also incorporated a concept of roller-furling I had first seen on Matt Layden’s Paradox design. The mechanism is quite different with mine, but the ability to roll the sails up quickly, and only as much as as I wanted, worked out very nicely. It proved to be a great rig.

I did do some minor tweaks to the roller-drum diameter and to the boom end hardware. And I would improve both of them some more if I were to do the trip again. My homemade sails worked well. The rig was easy to handle, and self-steered very well on all points of sail, not just when running. The limitations are handling 200 sq. ft. of sail when flying in big winds, but it was manageable. Had the sails been much bigger, I would have had my doubts. The unstayed masts were no trouble at all, as there was no clunking and no concerns. The one thing I learned about the rig is that you can never have too much chafe gear.

38: Were you concerned about the micro cat’s ability in the open ocean and in heavy weather?

Tony: Sure. Prior to setting out, the only experience I had was with a 2-ft scale model, and a few daysails on *Miss Cindy* in benign conditions. The first heavy weather I saw was three days out of San Felipe in the Sea of Cortez when we got a Santa Ana. But the little cat handled it easily. When I got into conditions beyond my previous experience — like on the passage from Isla Providence to Cayman Brac in the Caribbean — it got pretty interesting. But generally speaking, I was not concerned. I mostly tried to be kind to the boat, and to try to figure out the best speed and course for self-steering.

There were a couple of times when it got hairy; for example, when I was surfing big waves from Cayo Largo to the west end of Cuba. But I never had a sense that I was losing control. Given the choice, I would have preferred not to have been surfing at up to 15 knots in those seas. I did spend some time on the sea anchor, but mostly to get some sleep when the self-steering was not up to snuff. The boat was pretty sweet on the parachute.

38: Cats under 40 feet tend to have problems with pitching when sailing upwind. Was *Miss Cindy* so short that it wasn’t a problem?

Tony: There were some pitch issues.
to windward in the small inshore waves and lighter winds, so in those conditions I needed to free-off to maintain speed. While sailing to windward in Force 2 to 4 winds in the Caribbean, *Miss Cindy* was well-behaved. In rougher stuff, the issue was her launching off waves. I was able to moderate that by reefing and slowing down. *Miss Cindy* has a fairly fine entry with a big buoyancy increase when waves reach the knuckle, and that seems to help dampen pitching.

There is a link to a movie of her going to windward in the Caribbean at: http://turtleislands.net/tmc/atbeatwake.mov

38: What were the biggest seas and strongest winds you encountered?

**Tony:** The strongest winds I saw were in a Papagayo off Nicaragua. Maybe 45 to 50 knots, but the strongest wind I sailed in was the Santa Ana a few days out of San Felipe, when it blew 35 to 40 knots with 7-foot seas. Some of the most challenging sailing was the upwind work to Cayman Brac, where I had a day of Force 6, with pretty steady seas of 10 to 12 feet. Then there was the reaching and downwind work on the southwest of Cuba, when it was blowing 25 knots, and the 8- to 10-foot seas broke from time to time.

38: *Is Miss Cindy a boat you’d recommend to an average sailor?*

**Tony:** I don’t think the average sailor would want a pocket cruiser. Most would want either a higher performance day sailer or a more spacious cruiser. For those who want a pocket cruiser, and can watch the weight of what gets put in her, I’d say she’s a very sweet boat without vices. *Miss Cindy* is my favorite of all the boats I’ve sailed.

38: What would you think if someone wanted to sail a sistership across the Pacific?

**Tony:** They would have to sail solo due to weight constraints. For a pocket cruiser-type person who equipped the boat with a watermaker, parachute anchor, self-steering vane, and who had practiced righting her in controlled conditions, and who had the requisite experience for such a trip, yes, I think she could do the job — with a good vane set up. I’m confident that she would average 100 miles a day when sailed conservatively.

38: Any plans for another boat or cruise?

**Tony:** My drawing board is like most marinas — full of lots of boats, most of which only dream of going somewhere. I don’t see building anything for myself in the next year or two. Currently, I’m thinking about a six-month sojourn in the canals of Europe. I’d probably pick up something like an Albin 25 in Holland, then sell her once I made it down to the Med. As of right now, I don’t have any other sailing adventures planned for *Miss Cindy*.

38: Thanks, Tony. We wish you best of luck with whatever comes next.

When Bismarck Dinius, 41, accepted an invitation to go for a quick sail on Clear Lake on the night of April 29, 2006, he had no idea it would result in the fight of his life. For the last 3.5 years, he’s fought for his freedom. On August 20, was acquitted of causing the death of one of his sailing companions.

The Carmichael-based sailor had competed that day aboard a buddy’s Catalina 22 in the annual Konocti Cup. He attended the requisite après-race festivities at a local waterside restaurant, joined in a wine tasting, and ate dinner. As Dinius walked the docks that evening, he ran into sailing acquaintance Mark Weber, whose O’Day 27 Beats Workin’ II had placed second in the race. Weber asked if Dinius wanted to join him and a few friends for a short sail as a way to top off a great day of sailing.

Beers were cracked, wine was poured and the group of five people set off in a freshening breeze. As Weber raised sail, Dinius handled the tiller. The wind finally slackened, causing the jib to make such a racket that Weber’s fiancée, Lynn Thornton of Willows, asked him to douse it. Not long after — about 40 minutes into the trip — Weber gave the order to come about and head back to the dock. Static from the radio became annoying, so he went below to turn up the squelch. What happened next is a blur to everyone aboard.

Lake County Sheriff’s Russell Perdock, 47 — who, at the time, was the Number Two man in the department — claims he started his day by making breakfast for his son. Then-wife Donna disputes this assertion: “He never made breakfast in his life.” In fact, just about the only undisputed part of Perdock’s timeline for April 29 is that he led his son’s Scout troop on a hike. Family and friends met later to celebrate his son’s birthday at a local pizza parlor — he says after 5 p.m.; Donna says 3 p.m. — where Perdock admits to having had a beer.

When the family returned home — with three of their son’s friends in tow for a sleepover — Perdock began prep ping his 24-ft Baja Outlaw speedboat for a night run. Donna testified that when she asked him not to leave her to handle the four pre-teen boys by herself, he told her to “deal with it.” She estimates that he left around 7 p.m. He says it was an hour later.

The only other undisputed fact in his timeline of that pitch black night comes at just after 9 p.m., when Perdock crashed his boat into Beats Workin’ II at such a high rate of speed that it was launched over the top of the sailboat, landing on the other side. Lynn Thornton, who had celebrated her 51st birthday a month earlier, was sitting at ground zero.

As sailboat passenger Zina Dotti testified last month that, after they were headed back to the dock, she heard a powerboat that “sounded like it was going fast.” The next thing she remembers is “total chaos.” She recalls screaming for 9-1-1, and Perdock shining a spotlight on them, asking if everyone was onboard.

Dotti’s fiancé, Ed Dominguez, recalls finding Dinius and Weber lying on top of Thornton, all of them flattened under the weight of the dismasted mainsail. He struggled to pull Thornton free, Dominguez clearly remembers someone from the powerboat saying, “You didn’t have your fucking lights on.” He then focused his attention on Thornton, performing CPR until paramedics could take over. “She didn’t look good,” Dominguez said. Thornton died from her injuries three days later, leaving behind a teenage son.

During the ensuing investigation, Perdock initially estimated his speed between 40-45 mph. Much later, he lowered that estimate to 35. Witnesses on shore, including Peter Elmer, a retired police officer and watch commander of East Bay Regional Park District’s marine patrol, put Perdock’s speed closer to 55 mph. He testified that he told others, “There’s an idiot for you. He’s going to kill himself or somebody else.” A few seconds later Elmer heard the collision.

Though he’s changed his story a number of times during the last 3.5 years, on one point Perdock has stood firm: The sailboat’s running lights were not on. That’s what he told responding officers — Lake County Sheriff’s deputies who all worked under him — at the scene. That’s what he told Sacramento County Sheriff Investigator Charles Slabaugh, who was brought in to interview Perdock. And that’s what he told a Lake County jury last month. For all we know, he truly believes it.

But while he may not have seen the lights, that doesn’t mean they weren’t on. A number of witnesses — including those for the prosecution — testified that
What started as a tragedy turned into a travesty. "Latitude’s unrelenting protests against the case eventually caught the attention of others: Dan Noyes of ABC 7 News, Elizabeth Larson of Lake County News, The Innocence Project, and the worldwide sailing community."

The sailboat was showing the appropriate running lights. Mark Weber distinctly remembers checking before leaving and saying "We've got lights — let's go." Another witness watched the lit-up boat sail away from the dock. One even claims to have watched the lights of Perdock's 389-hp speed demon converge with the nearly stationary lights of the sailboat a moment before hearing the explosive sound of the crash.

But when Sheriff's deputies inspected the sailboat's electrical panel, the running light switch was in the off position. Instead of wondering if the impact from a boat traveling between 66 and 84 feet per second could blow a breaker switch, they apparently presumed their boss was correct. As did Lake County District Attorney Jon E. Hopkins.

In a stunning moment of absurdity more than a year after the crash, Hopkins announced that he would bring the man responsible for Lynn Thornton's death to justice. "Bismarck Dinius was the operator of the sailboat," Hopkins claimed, and therefore had a duty to make sure the boat's navigation lights were on. Chapter 5, Article 1, Section 651 of California Boating Law does state that the 'operator' is defined as the "person...steering the vessel while underway," and Dinius was at the helm.

But Hopkins clearly didn't finish his assigned reading because later on, California Boating Law provides that the operator is "the person who operates or who has charge of the navigation or use of the vessel." In this case, that would be the sailboat's owner, Mark Weber. But even that seems a stretch, considering Perdock was breaking a number of boating laws himself — not giving way to a vessel under sail and not maintaining a safe speed, to name two.

No, Hopkins felt Dinius was his best target because a) he believed Perdock's story that the sailboat's lights were off, b) Dinius was at the helm, and c) he was legally intoxicated. After blood draws, Dinius's blood alcohol content came back at .12, Weber's at .18, and Perdock's at .00.

But as persuasive as Hopkins thought his case to be, jurors saw it differently. After three weeks of testimony and seven hours of deliberations, the nine-man, three-woman jury found Dinius innocent of felony BUI resulting in death, which, if he were convicted, could have landed him in jail for three years. After finding him not guilty, they then had to consider two lesser charges: boating under the influence and boating with a BAC over .08. They found him not guilty on the first charge and deadlocked on the second — 11 jurors wanted to acquit, with one holding out. The judge found that they were hopelessly deadlocked and ordered a mistrial on that count. Hopkins has said he has no intentions of retrying Dinius on that charge.

The worldwide sailing community, which had rallied around Dinius, breathed a collective sigh of relief. And in the next breath began screaming for blood — Hopkins' and Perdock's.

We sincerely hope Hopkins' mission was simply a misguided attempt to make an example out of Dinius and deter others from drinking while boating, and not an effort to protect a high-ranking county official, one with whom he'd worked in the past.

We really do.

But many believe the prosecution of Bismarck Dinius to have been not only a colossal waste of taxpayers' money, but also a cover-up. Protesters gathered outside the courthouse during the trial, demanding Hopkins' resignation and calling for Perdock to be indicted. Thornton's own family not only submitted to the court letters in support of Dinius, but they also attended much of the trial. "Lynn wouldn't want this," said her best friend and executor of her estate, Carol Stambak.

Questions have come up about a number of key issues: the security of the two vessels immediately after the accident; Perdock's whereabouts after leaving home; Perdock's access to his blood sample; why the
sheriff’s department either refused to interview witnesses who favored the sailboat’s version of events, or interviewed them but didn’t file reports; and most importantly, why the D.A. refused to even consider filing charges against Russell Perdock.

If it was a cover-up, it could cost the residents of Lake County a pretty penny. Carol Stambuk is already in talks with her attorneys to file lawsuits against Perdock, Hopkins and the Lake County Sheriff’s Office. “I’m doing this on behalf of Thornton’s son, John,” she said after the trial. “Perdock’s the only other party involved, and he’s just walking away.”

Immediately following his acquittal, Dinius had no plans other than to enjoy his freedom for awhile. “I’m sure I’ll sit down with my lawyers and discuss the possibility of a civil case,” he said, “but right now I’m just relishing in the fact that I’m not going to prison.”

But what many readers really want to know is if Perdock — whom they believe to be the man most responsible for Lynn Thornton’s tragic death — will ever be held accountable for his actions. Dinius’ attorney, Victor Halton, confirmed that the statute of limitations has passed for filing the same manslaughter charge that had originally been filed against his client (that charge was dropped shortly before the trial in favor of the felony BUI charge).

“Lynn’s family deserve for him to get what’s coming to him,” he said of Perdock. But how can that happen while the D.A. appears to be protecting him so fiercely? “I believe he committed perjury,” Halton said, “not only on the stand, but also during the depositions and interrogatories for the civil litigations. Hopkins would not make the charging decision for that because those were all done in Sacramento County. The D.A. there may be a little more objective.”

So though the storm has calmed since the conclusion of the trial, clouds are still on the horizon — and on the move toward Russell Perdock.

At a total cost of about $300,000, Dinius’ defense has nearly broken him financially. Add to that the loss of his job in May, and times have become decidedly lean for the Dinius family.

But Dinius refuses to harbor bitter feelings about his situation. “My family and I have been overwhelmed,” he said of the hundreds of complete strangers who have sent him encouraging notes and donated to his legal defense fund. (Send your contribution through Paypal to bismarckdinius@comcast.net.)

“I can’t even begin to thank people,” he said. “It’s really humbling, and has reinforced my faith in human nature.”

“So, you guys like to sail when it’s like this?” the shuttle bus driver asked the sailors stuffed in the 15-passenger van. You’d expect an enthusiastic “hell yeah!” But the driver’s question was met with a pregnant pause before getting tentative, affirmative replies from his preoccupied passengers — all of whom were staring at the fabled “Doug’s Beach” as the bus wobbled down Interstate 84. The breeze was already in the low 30s. From our vantage point above its southern bank, the Columbia River was already a frothing monster — and the clock had barely struck 8 a.m.

The sailors in the van had just dropped off their trailers in the town of The Dalles, some 80 miles east of Portland, and were heading 40 miles back down the river to Cascade Locks for the start of the “Double Damned Race.” After doing one, we realized it’s named as such not only because the racecourse is bound by dams on either end, but also because no matter how good you are, you are damned to meet with any manner of malfeasance at some point along the serpentine downwind journey against the river’s current.

We’d never sailed on Oregon’s Columbia River Gorge, so when Moore 24 sailor Rowan Fennell mentioned the race to us last year, we thought it’d be a perfect opportunity not just to see the beautiful scenery, but find out why everyone who’s ever sailed there is so ga-ga about it. We accomplished the latter objective easily: the 70-degree fresh water and breeze that averaged in the mid-to-high 20s while scratching 40-knots in spots, was all the convincing we needed. On rare occasions, we were even able to divert our attention from doing our part to keep Dan Nitake’s Santa Cruz-based Moore 24 Absinthe on her feet, and take in a stunning vista.

Billed as “a different kind of insanity,” the second annual 41-mile downwind run between Cascade Locks and The Dalles on August 8 was that, and a whole lot more. Twelve boats — nine Moore 24s, a Laser SB3, Open 5.70 and C&C 27 — completed the course. But not without some carnage along the way. Whether you wiped out wasn’t in question. How many times you did so, was. See this month’s Sightings, on page 91 for an example. Even Gorge resident and eventual winner Morgan Larson wadded it up more than once — in fact Larson’s Moore 24 Bruzer was the first — en route to breaking the course record Larson set last year by almost a half-hour.

PRO Doug Archbald from the Hood River YC, described the race as the Northwest’s Delta Ditch Run. Having done both, the only similarities we can derive are that they are both downwind races up a river and their names make the same acronym. Over the course of the Ditch Run, you’re sailing almost entirely through waters bordered by flat landscape. Over the course of the Double Damned, you sail up a steep-walled chute cleft from the Cascade Range, with various spires and mounds lining
There were times when even the chicken chute was a bad idea... Dan Nitake keeps 'Absinthe' groovin' while Randy Lakos engineers some rudder immersion and this writer hangs on. Not pictured is bowman Peter Carrick, because he's down below, packing the kites for another round of more insanity.

Run, you can push your luck with the edges of the channel, and a navigational overreach means a grinding halt in a sticky mud flat. Go too far in a Double Damned and you've run yourself into a sheer wall of igneous rock.

Fortunately, none of the fleet did that, and it was only the breeze that did the boat-breaking. That is, except for aboard the Laser SB3, where Portland sailor Kenny Smith decided to break the gooseneck on his forehead, sending him off the water and to the hospital for six stitches. Although the boat made it to the Dalles under jib alone, it took long enough that Smith was waiting there to help de-rig. But the Laser wasn't alone; at least half the fleet broke something.

"This has to be one of the best sails I've ever had," Nitake said. "This required the whole crew to pull this one off, rather than having half an hour to figure out something in the ocean. The jibing vs. crashing was the key to this race. Go fast, don't crash, and life will be good."

Standard operating procedure on a lot of the boats that were flying kites was to take the kite down before jibing and re- hoisting. Everyone we talked to copped to sailing under a main and jib alone at various points in the race.

Bruzer — sailed by Larson, his wife Christa, brother-in-law Andy Estcourt and Eric Hauge — finished in just over 3h, 50m. Second in were Northern California offshore shredders Peter Schoen and Roe Patterson, who were joined on Mooretician at the last minute by Fennell after he heard they had planned on doing it doublehanded! The trio also broke the previous record of about 4h, 18m.
by more than ten minutes. *Absinthe*, with ‘Cruzers Nitake, Randy Lakos, Peter Carrick and this writer were third, missing the old record by some four minutes.

In the post-race debrief over a huge taco bar hosted by The Dalles YC, talk turned to just what type of boats are capable of making the trip. One limiting factor is boat size: as a major shipping conduit, the Columbia is plenty deep for any trailerable boat. The problem comes when launching and hauling out. The only launching facilities at either end are ramps — both of which extend just long enough into the water to submerge a fairly short trailer, depending on the water level between the two dams. While boats as big as an Express 27 are capable of doing it, we don’t think you could go much larger. The other limiting factor is control. Save for the Open 5.70 — hampered by a broken reef-line clutch that left the main looking more like a balloon than a sail — the consensus was that most modern sportboats in stock configuration would have been overwhelmed by the conditions.

Although there was plenty of pucker-factor, we felt safe because we were sailing on a boat that counted four Pac Cups and thousands of miles of West Coast offshore sailing among the rest of the crew. Otherwise, we would have lobbied for a kite-free trip.

When "lifelines would have been nice" is the line of the day, you get the picture. The reality is that with current like that pushing one direction, and breeze like that pushing the other, an MOB — of which there were more than a few — means a rapid separation between the sailor and the boat.

Feeling like we’d just gotten off a gnarly roller coaster and wanted to jump right back on, we were trying to decompress after hauling out when Fennell came over to ask us what we thought.

"Well, was it everything it was made out to be," he asked?

"Way, way more..."

Having enjoyed two Ha-Ha’s and countless issues of Latitude, it’s great to be offered the opportunity to give a little back in the form of what we’ve learned about doing business from your boat in California and Mexico.

Let’s start with a little background. I’ve been working for Hewlett Packard from Mamahbird for six years now. HP, like many companies these days, is happy to have employees work remotely. I’d like to think they care deeply about my quality of life, but somehow I suspect it has more to do with reducing site-related costs and increasing productivity. Just think of all the time one spends around the coffee machine or taking long lunches in an office environment, and how one tends not to delineate so clearly between work time and home time when working from home, and the productivity argument becomes clear. As an engineer I spend around two-thirds of my time working from home, and the productivity argument seems to suffice, whereas my quality of life, I care deeply about that too, and like to think they do as well. Sharon is a geologist in an environmental consulting firm. Part of her job is overseeing environmental cleanup worksites — which obviously cannot be done remotely. But there is also a lot of report writing, permit applications and other paperwork to be done. Sharon worked out a deal with her San Rafael company whereby she took on more report-writing or writing, permit applications and other paperwork to be done. Sharon worked out a deal with her San Rafael company whereby she took on more report-writing while her co-workers spend more time on job sites.

Our Computers & Equipment

We each have a notebook computer dedicated to work, another dedicated to navigation, and a spare. This may be more than is typical, but many boats these days have more than one computer. As such, we needed a way to share an Internet connection.

We also have a HP Photosmart C7280 printer/scanner/copier, a Skype phone — which looks like a real phone, but ‘talks Skype’ over an Internet connection — and a couple of HP MediaVaults on which we store our music, movies and backups. All of these hook together through a simple wireless access point/hub down below. This is identical to what one might find in a moderately tech-savvy home. Where things differ is with our Internet connections.

The wireless access point has a single port marked ‘WAN’, which I can connect to the Internet through various means — a DSL or cable modem when at the dock, either a masthead omni-directional or railmount directional WiFi client when WiFi is available, or a Cradlepoint EVDO/HSDPA router into which we plug an AT&T, Verizon or Telcel modem. The WiFi standard defines 14 channels, but they overlap each other, so there are only really three non-overlapping channels (1, 6 and 11).

The directional setup is better in this regard. We have an 800mW radio that I mounted on a 19dBi flat panel antenna, and which could warm a plate of beans at 20 paces — and get me in trouble with the FCC if run at full power. This provides a strong transmitted signal, and also favors signals from the direction in which the antenna is pointed when receiving, hence cutting down on interference. This can be effective in marinas where the boat is relatively still, but we’ve had to drop a stern anchor to keep the boat from swinging when using it out in an anchorage.

Disappointments with WiFi

Even with good WiFi equipment on the boat, we’ve found WiFi disappointing.

Our WiFi Equipment

The WiFi equipment we have is professional-grade equipment from High Gain Antennas (www.highgainantennas.com). We have one radio mounted at the masthead, connected to an 8dBi omni-directional antenna. By placing the radio close to the antenna, we cut down on loss in the coaxial cable connecting the two. Standard network cable (CAT5) runs down the mast and carries data and power. The omni-directional setup is easy to use, but seems to suffer from interference when there are a lot of wireless networks around — which is often the case near marinas, where most of the high-end houses and water front businesses have their own

Even with good WiFi equipment on the boat, we’ve found WiFi disappointing.
Most in-home access points near marinas are protected. Some cafes and local businesses have unprotected networks, or the key can be bought for the price of a cup of coffee, but those tend to be heavily used by cruisers and as a result are very slow. Even the professionally run marina networks are often unbearably slow, particularly in the evenings.

WiFi connection quality can also be patchy — I remember getting a 'just good enough' signal in the Tenacatita Bay anchorage from a network in La Manzanilla one day, and the next day having to take a dinghy ride across the bay to get a strong enough signal to deliver a promised report. I have a picture in my mind of a low-powered wireless access point sitting on someone's desk behind a pile of books. Maybe I can scrape a signal from it, but then the owner sets a cup of coffee in front of the access point and my signal disappears. The other end is as important as my end, but I have no control over it.

**Cell-Based Telcel Modems**

Part-way into the winter we found out that Telcel offers a pay-as-you-go cell-based Internet service. It cannot be bought in the little Telcel shops that now seem to outnumber discount pharmacies in Mexico; only the large Telcel offices sell it. The deal is that you must provide your own GSM/HSDPA modem, or buy one from them. And you need a Telcel SIM card to put in the modem with some credit on it. Then you simply send a special code as a text message to Telcel telling them whether you want to buy a day, three days, a week or a month of service, and you’re online. There is no contract to sign, no early termination fee, no credit card required, and the price is comparable to Verizon or AT&T in the U.S.

We bought the modem offered by Telcel for about $120, which included the first month of service. We successfully used the service in Mazatlan and La Paz. We even just scraped a signal from the southernmost anchorage on Espiritu Santo.

Performance was excellent when near a dense population area, but dropped down as we moved farther away. Nevertheless it was still usable. I understand that this service is a recent offering by Telcel, and they are just starting to build out their high-speed network, so it may improve. Outside the high-speed coverage area, the modem connects in a lower-speed mode using the older EDGE protocol.

**Cell Phone Amplifiers**

During a visit to the U.S., I picked up a Wilson Electronics cell phone amplifier, and an external ‘marine’ antenna by Digital Antennas from 3gstore.com (a great dealer). These cell boosters come in two types: direct-connect and wireless. The former requires a special cable to connect the modem or phone to the amplifier — potentially different for each device you want to amplify — and you can only amplify one device at a time. The wireless boosters, however, use a second antenna mounted down below. They work by picking up the signal from your cell phone and/or modem on the internal antenna and retransmitting it with much more power through the external antenna. The former reputedly provides better performance, but we chose the latter for convenience.

As with any radio-to-antenna connection, it’s important to use good quality cable. The cable provided to connect the
amplifier to the external antenna was 25 feet of RG58, which, in my opinion, is very poor. What was provided to connect the amplifier to the internal antenna was even worse! I unsoldered the cable from the internal antenna and replaced it with a short length of the RG58, and used some LMR400 (very low loss coax) to connect the amplifier to the external antenna.

The cell modem with amplifier has worked very well for us. We found that it is critical to place the phone/modem very close to the internal antenna — any more than a few inches away and the signal drops off dramatically. This is quite deliberate on the part of the manufacturer, and necessary to prevent feedback between the internal and external antennas.

Turning Your Telcel Modem into an Onboard Router

The other device that we’ve really come to like is the Cradlepoint CTR350 EVDO/HSDPA router. You simply plug your cellular modem into the router, and it turns the cell-based connection into a WiFi network. This lets several computers and other devices share the same Telcel/AT&T/Verizon cellular modem.

Needless to say the cellular providers aren’t quick to tell you about this option!

— Colin Honess

Q & A with Latitude 38

Latitude: How well does your modem work, how much does it cost a month, and how long is the contract?

Colin: As mentioned, in Mexico the Telcel modem cost $120 US, including the first month of service. After that you add money to the SIM card and then buy the length of service you require. We were buying a month at a time for about $50. On this plan there is no contract. Other plans exist that involve a contract. They have cheaper rates, but the guy at Telcel said they are very difficult to terminate.

In big cities the modem used the HSDPA protocol — same as AT&T in the U.S. — and was fast. Downloads were at around 120 Kbytes a second. Elsewhere, it used EDGE and achieved maybe 28-30 Kbytes a second. We were continually amazed at where we got access. We had it a good chunk of the way from La Paz down to Cabo, and then from Cabo up to San Diego — sometimes as far as 20 miles offshore. We’d wait until we were pulling level with a village onshore, and then nip below and check for a signal. Very often we were able to download emails, send a few text messages with Skype, and pull a fresh GRIB file.

The cell signal really likes line of sight to the tower, so while it works very well in Bahia Gabriella on Espiritu Santo, we couldn’t get a signal in the anchorages farther up the island. Once we left the anchorage and went out into Bahia de La Paz, however, the system worked fine.

In the U.S., I’ve used both AT&T and Verizon. My experience has been that the AT&T service, when at its best, is considerably faster than Verizon. But we’ve found Verizon to have better coverage and to be much more consistent. Recently in Truckee, for example, I measured speeds on my AT&T modem approaching 3Mbit/second — which is blindingly fast — but then the next moment only 500Kbit/s — or one sixth as much. In Santa Cruz Harbor, a series of tests showed performance fluctuating between 150Kbit/s and 1.2Mbit/sec, which is miserable to good. Consistency of performance is often more important than peak performance since many real-time applications — Skype, media streaming and so forth — adapt to current link performance, but take time to adapt. Verizon always seemed more uniformly mediocre at around 1.2Mbit/sec.

The one thing to absolutely avoid is using your U.S.-based cellular modem in Mexico on a roaming basis. My AT&T plan charges $19.95 per megabyte. I’m not sure whether Carlos Slim wants to get fat at my expense, or whether AT&T has a CEO bonus to pay, but in my opinion it’s robbery.

Working from the boat involves the high tech and not-so-high tech — such as Colin’s old-school solution to glare on his laptop screen.
It’s worth making a point about the 5GB download limit associated with many of the cell-based plans. I think the intent of this is to discourage behavior that would otherwise bog down the service for everyone else. 5GB/month is a lot of data if you are just doing email, downloading and uploading photos, downloading the occasional program, etc. But you soon hit the limit if you’re using BitTorrent to share movies. We experienced some pretty miserable performance from several professionally run marina WiFi networks in Mexico, which would likely have performed a lot better had they placed such a limit on a few individual users.

I’m not sure whether Carlos Slim wants to get fat at my expense, or whether AT&T has a CEO bonus to pay, but in my opinion it’s robbery.

**38:** What kind of cell phone booster do you have, and how well does that work?

**C:** Wilson Electronics Mobile Wireless Dual-Band Amplifier (p/n 801201), Digital Antennas marine dual-band antenna, and some homemade cables. Many times I’ve been able to connect with the amplifier, but not without it. If the signal strength reported by the modem is correct, the amplifier/antenna combination is giving me a 30-40dB boost — not bad when you consider that every 3dB is an effective doubling of power.

One thing I’ve noticed is that the range achieved in California is much less than in Mexico. My professional fisherman neighbor says that he also gets noticeably better range in Washington and Oregon than in California. We’ve theorized that the greater population density in California requires more cell towers, which are then run at reduced power to prevent interference between towers. When you’re in an intended coverage area on land you don’t notice the difference since the power is lower but you’re closer to a tower, but the lower power in California doesn’t radiate as far out from the shore. It’s a theory at least.

**38:** What kind of cell phone do you use, how much does it cost, how long is the contract, and how well does it work?

**C:** I travel a lot for work, so I bought an unlocked GSM phone on E-Bay a long while ago. The idea was to buy SIM cards for the countries I visited. I bought a SIM card and a few hundred prepaid minutes from T-Mobile in the U.S. and then another SIM card with some minutes from Telcel in Mexico. But I’m really an email guy, and didn’t much use it. Sharon also prefers email.

Both Sharon and I have parents in Europe, and like to keep in regular touch using Skype. This doesn’t require a hugely fast Internet connection, but does require a consistent connection. In California with DSL, WiFi and a Verizon cellular modem, this worked fine for maybe three calls out of five. In Mexico, most WiFi connections weren’t consistent enough. But with a cellular modem, Skype often worked — albeit with occasional annoying quirks. It was good enough for family and friends, but not for business.

**38:** Can you give us a general idea of where it works and doesn’t work? And whatever problems you might have with the system?

**C:** Regarding the WiFi service in places we visited, the good, bad and ugly were:

- **Best:** Marina Costa Baja, which loans boaters a cable modem free of charge.
- **Good:** The anchorage in Cabo, El Cid Marina in Mazatlan, various cafes in La Cruz, and ditto in Barra de Navidad.
- **Okay:** The anchorage at Chacala and the Yelapa anchorage.
- **Bad:** Marina Palmira in La Paz and the marina in La Cruz.
- **Ugly:** Tenacatita Bay and Chemela.

As mentioned above, the cellular modem-based Internet service was outstanding. We got service in Marina El Cid in Mazatlan, in La Paz, in Bahia San Gabriel at Espiritu Santo Island, in the middle of Bahia de La Paz, at various places on the trip from La Paz to Cabo, going past Mag Bay, in Bahia Santa Maria, in Bahia Asuncion, in Turtle Bay, while going past Isla Cedros, while passing 10 miles off Ensenada, and many other odd "middle of nowhere" places up to 20 miles offshore.

We’ve noticed that it’s quite possible to get a good signal, but still not be able to get an Internet connection. It’s like some of the cell towers simply refuse a connection. I don’t know why.

**38:** And finally, any random thoughts on working from your boat?

**C:** From a connectivity perspective, if I were to start over I’d do things a little differently. I’d definitely get the cell-based system. I’d buy an unlocked GSM/HS-DPA modem on E-Bay that is compatible with the Cradlepoint routers, and buy the Telcel SIM card and pay-as-you-go service on arrival in Mexico. I’d set up the amplifier and Cradlepoint router...
exactly as we have it, as they work well. (I mention buying an unlocked card because this allows it to be re-used in different countries by buying a local SIM card, and because the cell company isn’t providing you with a modem, you have much better chances of negotiating a pay-as-you-go rate.

I’d not bother with the very high power and complex WiFi setup, but go with something like the Engenius EUB-362 EXT and a 9dBi external antenna. We have these also, and they’ve worked surprisingly well. This is functionally very similar to the package offered by West Marine, but can be had online for around $60-70. It’s not nearly as powerful as the ‘professional grade’ equipment, but with the cellular system it isn’t often needed. And as mentioned earlier, we’ve found WiFi to be disappointing.

Like anything on the boat, it’s im-

Colin and Sharon are currently back in the States fattening their cruising kitty, but we’re sure they’ll be back ‘out there’ soon.

A

portant to have spare parts if those parts are important to you. A month or so into the winter — and probably after a sundowner or two — I picked up my work computer by the lid, buckled the case and damaged the screen. How can your company send you a replacement in Mexico? I ended up working on the spare for the rest of the winter.

As with all things boating, it’s important to have choices and be flexible when it comes to working aboard. Usually cellular technology works fine, but sometimes WiFi is significantly faster. Other times you may have to go into town and sit in a cafe to get online, while on the odd occasion you have to resign yourself to not getting on the net at all. But given the right job, working from your boat these days is a very real possibility. And while you lose some of the camaraderie of working in an office with co-workers, I’d exchange smog for a sea breeze, cube walls for playful dolphins, and a coffee machine for a palapa anyday.

—as Colin Honess

You Can’t Afford To Make This Mistake

In these tough economic times, letting your boat insurance lapse could be a huge mistake.

Fire, sinking, fuel spill, damage caused by your boat to other property or people — the costs of these catastrophes will come right out of your pocket without insurance.

At BoatU.S., we offer a variety of low-cost policies featuring the protection you need and the flexible payment options you want.

Don’t make a mistake you can’t afford. Let the experts at BoatU.S. find the perfect coverage for you, your boat and your checkbook.

Call 1-800-283-2883 for a quote

Mention priority code 4848

or apply online at BoatUS.com

Installment fees apply to payment plans. All policies subject to limits and exclusions.
Use the Autopilot Favored by Singlehanded Racers

Because for More than 30 Years ALPHA PILOTS Have Delivered the Highest Performance, Reliability and Low Power Consumption These Competitors Demand!

Why buy an Alpha Autopilot? We’ll make your boating more fun!

Singlehanded skippers have proven that the world’s best autopilot can steer almost as well as they can, save battery power, be more reliable than most crew members, and almost never break down. But, what really counts is how much more enjoyable your boating can be with an Alpha Pilot!

Please visit our web site at www.alphamarinesystems.com or call 1-800-257-4225 and let our knowledgeable staff discuss how we can put pleasure in pleasure boating.

MARINE BATTERIES
The original AGM manufacturers for the Marine and RV Industry

Sealed, Pressure Relief Safety Valves

Lifting Handles Easy lifting, coring & installation

Copper Alloy Terminals Provides low resistance electrical connection (braid to copper), less oxidation, increased environmental protection & improved safety — no exposed lead

Reinforced Polypropylene Container & Cover

High impact resistance and impact bonding over under — zero overcharge and temperature

Absorbent Glass Mat (AGM) Separator

Cutout designed and manufactured to achieve superior wetting characteristics for extended runtime

Polyethylene Envelope

Thick plate internal liftability, shock, vibration & durability growth

Lifeline, a pioneer in AGM technology was originally developed in 1985 for military aircraft. Lifeline series of maintenance free deep cycle batteries that have been the leading AGM battery in the Marine and Motor Coach Industry for the past 15 years.
September on the Bay is generally a month to remember. The screaming grey breezes of August begin to mellow and warm, leaving the coast clear for racers, daysailors and migrating cruisers alike.

Of course, for many of us, it’s also the month that kids go back to school, taking with them the opportunity for family time aboard the boat. Soccer practice, ballet recitals, football games, the dreaded parent-teacher conference — they all conspire to rob you of your will to live, forget about sailing.

But the last thing you should do is forget about sailing. Not only does sailing as a family create a bond not easily broken, it also teaches kids that you can have fun with the parental units. Take along some of their friends and you’ll soon be known as the coolest ‘rent in the ‘hood.

“I don’t have the time,” you may groan. Balderdash! If you have time to watch Jon & Kate Plus 8, you have time to take your boat out of its slip. Schedule one
Forget me not, summer sailing on the Bay — (clockwise from below) Making a splash on the Cityfront; catamaran sailing gives you a sense of 'Serenity'; 'Caroline' bows to her partner; we forgot the question; club sailing aboard 'Cavieyacht' (center); 'Renaissance' fair; a sail to remember; 'Daydreams' are made of these; 'Alexandra' performs a little 'Magic'.
night a week to turn off the idiot box, pack some food, and take the fam for an evening sail.

Winds are generally calmer at that time of day and there are fewer boats on the water. Official sunset in the Bay Area is after 7 p.m. throughout most of September, which means it will stay light until about 8 p.m. — plenty of time for a quick spin.

If you've never sailed at night before, here are a few tips to keep in mind:
• Bring plenty of warm clothes — even on the hottest days, temps drop quickly when the sun goes down.
• Pack a picnic dinner, or grab some take-out on your way to the boat. Nothing can ruin a good time faster than a cranky teenager on the prowl for food.
• If you suspect you won't be back before dusk, turn on your running lights before you leave the dock.
• As soon as the light begins to fade, assign everyone on board the duty of keeping a sharp eye out for other boats and commercial traffic — their lights can be tough to see against the backdrop of the City. Stress the importance of this activity without scaring the crew. Try making a game out of it with younger kids: “Who can find the most boats?”
• Keep a good star chart and red-lensed flashlight onboard. Light pollution drowns out all but the brightest stars, which makes identifying them a breeze.

Finding time for family activities after school begins can be a challenge, but this is one that's worth the effort. Not only will you teach your kids about responsibility while having a good time, but you'll create memories that last a lifetime — or at least until Dancing with the Stars comes on.

— latitude 38/ladonna

We Still Offer More!

Making boating easier – and more fun! – is what a marina should be all about. That's why Oyster Cove Marina rates number one with many Bay Area boaters. It's an exclusive yet reasonable facility of 219 berths, accommodating pleasurecraft in slips up to 60-ft long. Oyster Cove is the private Peninsula marina closest to bluewater boating. Want to cruise to Sausalito, lunch at Tiburon, or sail to Angel Island? How about a day’s fishing outside the Gate, or a weekend at the Delta? No other private Peninsula marina is better situated or offers nicer, fresher surroundings.

OYSTER COVE MARINA
385 OYSTER POINT BOULEVARD #8A, SOUTH SAN FRANCISCO
(650) 952-5540

- Berths 30 feet to 60 feet
- Double Finger Concrete Slips
- Telephone Available
- Five Minutes from SFO
- Heated Dressing Rooms & Showers

- End Ties Available at $5.95/Ft!
536 sailors completed Baja Ha-Ha XV!

The Rally Committee encourages you to patronize the advertisers who make this event possible – and take advantage of their Baja Ha-Ha Specials!

If you check out the ever-expanding entry list of this year’s rally and you’ll see that there is no shortage of sailors eager to head south this year. With a few days still remaining until the September 10 entry deadline, 160 boats have already signed up, with homeports as diverse as Kauai and Montreal. The smallest so far is Little Lara, Jay Bowden’s Pacific Seacraft 24 from Santa Barbara, and the largest so far is William Hogarty’s Rhode Island-based Maxi 97 Odysseus.

If you’re new to the event, let us explain that the Ha-Ha is a 750-mile cruisers’ rally from San Diego to Cabo San Lucas, with stops along the way at Turtle Bay and Bahia Santa Maria.

You’ll find frequent updates on this year’s event, in addition to all sorts of other hot sailing topics at Latitude’s three-times-weekly news portal, ‘Lectronic Latitude (found at www.latitude38.com.)
Among the important dates to note (at right) is Latitude’s annual Mexico-Only Crew List and Ha-Ha Party, September 9. There, hundreds of potential crew mix and mingle with Ha-Ha boat owners looking for extra watch-standers. Get a headstart on the process at our constantly updated Crew List site at www.latitude38.com. As many Ha-Ha vets will confirm, the best way to prepare for doing the event in your own boat is to crew for someone else first.

**IS THE PACIFIC PUDDLE JUMP IN YOUR FUTURE?**

For many cruisers, the next logical step after cruising Mexican waters for a season or more is to hang a right and head west into the Pacific.

We call that annual springtime migration the Pacific Puddle Jump, and report on it heavily in the pages of Latitude 38. Making that 3,000-mile passage is one of the most thrilling accomplishments in the realm of sailing. Learn more at www.pacificpuddlejump.com.
IMPORTANT DATES

Sep 9 — Mexico-Only Crew List and Baja Ha-Ha Party, Encinal YC in Alameda; 6-9 pm.

Sep 10 — Final deadline for all entries.

Oct 18 — Ha-Ha Welcome to San Diego Party, Downwind Marine, 12-4 pm. Ha-Ha entrants only.

Oct 24 — Informational Meeting about the Pacific Puddle Jump, West Marine, San Diego, 5 pm.

Oct 25, 9 am — Final deadline for all crew and skipper waivers, West Marine, San Diego.

Oct 25, 11 am — Skipper’s meeting, West Marine, San Diego. Skippers only please.

Oct 25, 1 pm — Ha-Ha Halloween Costume Party and Barbecue, West Marine, San Diego.

Oct 26, 11 am — Start of Leg 1
Oct 31, 8 am — Start of Leg 2
Nov 4, 7 am — Start of Leg 3
Nov 6 — Cabo Beach Party
Nov 7 — Awards presentations hosted by the Cabo Marina.

Oct 31, 8 am — Start of Leg 2
Nov 4, 7 am — Start of Leg 3
Nov 6 — Cabo Beach Party
Nov 7 — Awards presentations hosted by the Cabo Marina.

Baja Ha-Ha Inc.
c/o 15 Locust Ave.
Mill Valley, CA 94941

www.BAJA-HAHA.COM

PLEASE NOTE: There is no phone number for the Baja Ha-Ha Rally Committee. Please don’t call Latitude 38 with questions. The Ha-Ha is a separate operation.
Big boats, small boats. Fast boats, slow boats. New boats, old boats. All sorts of boats turn up each year at the starting line of the annual Baja Ha-Ha rally — the 760-mile run from San Diego to Cabo San Lucas. And the backgrounds of the event’s 500 to 600 participants are always as diverse as the boats they sail on.

You’ll be introduced to them here, and in two following installments in our October and November issues. As you’ll learn, they all seem to yearn for adventure and a change of pace from the workaday world back home.

Despite the lousy economy, there seem to be as many boats as ever heading south this year. So many, in fact, that we only have room to run abbreviated profiles here, plus a few vignettes of crews we thought were particularly interesting. Before the October 25 start, however, you’ll find full info on all entries in a downloadable event program at www.baja-haha.com.

Here then (drum roll please) are members of the Baja Ha-Ha Class of 2009. (Boats are listed in the order in which they signed up.)

**Natalie — Ericson 35 Mk I**
Ford Johnson, San Francisco

Noteworthy: The mold for this boat was salvaged from a landfill — where it had been abandoned by Pearson Yachts.

**Sirocco — J/130**
Lee Pryor & Cathy Sweet, Oceanside

Quote: Lee: "It was my wife who decided we should go. But I make all of the key decisions otherwise, like where we will store the toilet paper."

**Galatea — Island Packet 380**
Doug & Cathy HounsHELL, Berkeley

Quote: "After 10 years of dreaming about it, we’re finally looking forward to sailing our boat in warmer water."

**Sally Lightfoot — Corsair 31 UC**
Paul Martson, Ventura

Quote: "My crewman, Darren Doud, is like me. He’s been sailing in California and elsewhere since childhood — including weird places like New Calendonia."

**Trim — Del Rey 50**
Ken Newell, Irvine

Noteworthy: Ken eventually hopes to do the Pacific Puddle Jump and dive on Beveridge Reef.

**Moondance — Canadian Sailcraft 34**
Niels Frommann, Santa Clara

Quote: "My plan is to have no plan."

**Sabbatical — Mason 33**
Bill Thompson & Claudia Cowen
Long Beach

Noteworthy: This is a family effort: Bill’s sister Janet Baker and her husband Paul will crew to the Cape.

**Norwegian Steam — Jason 34**
Alan Westhagen & Sally King
Seattle, WA

Quote: "We have 50 bottles of rum. Hope they last us to Mazatlan."

**Laura — Bristol 41.1**
Michael & Laura Michel
Richmond

Quote: "Retire now and work later."

**SeaFox — Sabre 452**
Jim Hurst & Randee Fowler
Sausalito

Quote: "SeaFox is fast, comfortable and safe, but like any lady you should never take her for granted."

**Gato Go — Kennex 445**
Craig Wiese, San Diego

Noteworthy: Craig’s sailing resume includes a 5-year circumnavigation.

**Mykonos — Swan 44**
Myron & Marina Eisenzimme
San Francisco

Noteworthy: This will be the couple’s fifth Ha-Ha aboard their Frers-designed sloop.

**Pipe Dream IX — J/160**
Scott Piper & Tracy Nance
Miami, FL

Noteworthy: Scott undoubtedly has more ocean miles under his belt than any other entrant. Having completed four circumnavigations aboard this boat, he was awarded the Cruising Club of America’s Blue Water Medal this year.

**Siempre Sabado — Westsail 28**
Stephen & Lulu Yoder, Newport, OR

Quote: "We’re hoping to be the smallest boat in the fleet. No particular reason, just because."
— HEADIN' SOUTH OF THE BORDER

**Meshach — 45-ft custom trimaran**
The Temme family
Nawiliwili, Kauai, HI
Both Thor and Tanya have been sailing since their teen years, but their kids have got them beat: 

"Tristan, who’s 6, and Sienna, who’s 3, have been on boats since before they where even born!"

“We have heard so many great stories about the Ha-Ha,” says Thor, “and thought it would be a great introduction to the cruising life for our kids.”

They plan to spend a season in the Sea Of Cortez and along the Gold Coast aboard their custom tri — which has unstayed carbon-fiber masts. After that? “If we’re still having fun, we will jump off to the South Pacific and beyond.”

---

**Maya — LaFitte 44**
Rick Meyerhoff, Sausalito
Noteworthy: Rick’s done two previous Ha-Has. Having learned from past problems, he’s now better prepared than ever before.

**Vento — Swan 391**
The Lalovic family, San Francisco
Quote: Ivan and Ursula say, “Our 2-year old deck swabbie, Ena, keeps things interesting.”

**Kaholo — J/40**
Martin & Lisa Falk, Redondo Beach
Quote: “We aren’t retired, but we are tired of working!”

---

**Theophilus — Voilier Grand Duc 41**
The Derrick family
San Francisco
Noteworthy: Kiwi, Debbie and their seven-year-old daughter Alicestasia are eager to find other ‘kid boats’.

**Beach Access — Lagoon 380 cat**
Glenn Twitchell, Newport Beach
Noteworthy: Glenn claims that Beach Access is the most improved Lagoon 380 on the West Coast.

---

**Serenity — Tayana 52 DS**
Gordon & Sherry Cornett, Ventura
Why did Gordon and Sherry decide to join the Ha-Ha this year? “It was the one way to get rid of the squatters (our kids) living in our house.”

Now both retired from medical careers, they learned to sail aboard Lido 14s while at UC Irvine. After exploring Mexico for a season or two, they plan to hang a right and do the Pacific Puddle Jump, with an open-ended timetable.

Their advice: “Spend more time counting your blessings, and less time moaning about your misfortunes.”
Full Service Marina

Offering a splendid combination of amenities such as:

• With up to 400 vessel capacity from 30 to 400 ft.
• Pump out  
• Diesel and Gas fuel station  
• High quality and comfort in all slips  
• Power 110, 220 y 440 volts  
• Ship yard with Travel Lift up to 150 tons capacity  
• Restrooms  
• Showers  
• WiFi  
• Security 24/7

FilterBOSS COMMANDER
“Don’t Leave Shore Without It”

Cleaner Fuel • Better Performance • Better Mileage
Install the FilterBOSS COMMANDER and enjoy the benefits of clean fuel and the ability of anyone onboard to switch over to a clean fuel filter, while the engine is running, in seconds! A patented dual filter controller with an integrated fuel pump make this the COMPLETE fuel maintenance system for your boat. The early warning panel at the helm lets you know the filter is clogging BEFORE you loose your engine.

Features
• Dual Fuel Filter Controller
• Complete System Testing
• Remote Warning Panel
• Integrated fuel pump
• 12 volt OR 24 volt systems
• Complete Onboard Fuel Polishing
• Single lever operation
• Modular design for tighter spaces
• Built in flow sight
• Built in vacuum & pressure gauges

Optional Fuel Pump Sizes - Allows for high flow fuel polishing
Optional Fuel Filter Sizes - Allows for higher fuel flow up to 180+ GPH

Heading to warmer waters? Make sure your engine stays running with the FilterBOSS COMMANDER, it will keep your engine supplied with clean fuel!

San Francisco

Quote: “No comment.”

We’ll take a breather here, and pick up where we left off next month. If reading about all these lucky souls makes you eager to throw off your own docklines, we say, “Do it!” There’s still time to sign up before the September 10 deadline.

If you need crew — or are a potential crewmember looking for a ride — we urge you to sign up on our online Crew List at www.latitude38.com, and show up at the September 9 Crew List Party at Alameda’s Encinal YC (6-9 p.m.).

**Rotkat**
Arjan Bok, Emeryville

Having witnessed the beginning phase of Rotkat’s construction, we were thrilled when Arjan finished and launched her in the summer of ’06 — after about a million hours of hard labor. But we’re even more thrilled that he and Debbie are heading south this year with the Ha-Ha fleet. Designed by Australian Garry Lidgard, with design input from Arjan, Rotkat is one of the best-looking cats around. And she’ll be a whole lot more comfortable to cruise than the Newport 33 Tiger Beetle that Arjan and friends took south in the 2000 Ha-Ha. Debbie took a pass on that trip, but she’s aboard and eager this time.

Echo — Islander Freeport 41
Michael Bereznai
Beaverton, OR

Noteworthy: In keeping with his philosophy that “warmer and farther is better,” Michael hopes to eventually reach Borneo, Indonesia and the Philippines for some diving.

Made in the USA!

PERFECT FOR THE HA-HA
Sal was the last person I would have expected to see in a kayak. And never in my wildest dreams did I imagine that he would paddle all the way to this island. But as I walked down the trail to get closer to the beach, I confirmed that it was, in fact, my friend Sal Minella, owner of a well-known upscale restaurant, climbing out of a sea kayak. Sal is a confirmed powerboater — one of a very few in my yacht club — and his boat is one of the largest boats in the marina.

"Like my new ride?" he said as he slid his boat up to the high water mark.

"It's beautiful," I responded, although to me every kayak looks the same as any other, unless it's one of those strip-planked varnished works of art that should never be allowed anywhere near a gravelly beach. "But Sal," I said, "I didn't notice your boat in the anchorage, or at the docks when we pulled in — and it's pretty hard to miss. Are you anchored over on the east side?"

"Guess again," he said proudly. "I paddled here from my slip near the yacht club!

This didn't make sense. It was after 6 p.m., the last ferry had already left the island, and even we yachties would have to be back on our boats and away from the docks by sunset. He would never make it home before dark.

"But how are you going to ... ."

"I'm camping here for the night," Sal explained before I could finish asking. "Not alone, mind you. There's a big group on the way. I started early because I'm still new at this, but I made excellent time. It's the first leg of a week-long sojourn around the Bay.

"Sounds ambitious," I said. "But what about your big boat? You know, the one my friend Lee always calls the OPEC Special?"

As if the mere mention of her name had conjured her from thin air. Lee Helm sailed into view on a windsurfer. Sal waved her to the least rocky landing spot. She had run out of wind close to the island, and had to pump the sail to propel the board the last few hundred feet.

"Max!" Lee hailed as she hopped off into waist-deep water. "Imagine, like, running into you here at Kayak Camp!"

"I'm tied up dockside in the cove," I explained. "Why did you jump off all the way out there when you could have sailed right to the beach?"

"Don't want to ding the skeg," she informed me. "They're expensive."

Everything became clear when she carried the board up to the beach. There was no centerboard, but that skeg was an impressively long, thin piece of carbon.

"One of the boats from the sailing club is bringing my gear," she explained. "I left, like, an hour after them but I passed them just before I got here."

Lee apparently had never met Sal, so I made the formal introduction.

"You're the guy with the OPEC Special!" she said. "Awesome boat."

"Not any more — now I just have this kayak."

"Does Cash for Clunkers include big powerboats?" she asked. "Too bad they had to crush your old boat, but at least it's off the road. What a great program!"

"No, no, no. My cardiologist made me do it. He ordered me to start exercising, and I hate gyms, and my imagination is much too vivid to relax on a bicycle, so here I am with a kayak. I've been out every day for a month, and I'm already down 10 pounds! All thanks to Dr. Bocks."

"Doc Bocks is in our yacht club, too," I explained to Lee. "And he's been after me to do the same, but I'm not about to sell my boat, and I don't really have a good place to store a kayak. Where are you keeping yours, Sal? It must be an awful schlep bringing it down to the marina every day."

"Oh, I still have the marina berth," he said as he popped a waterproof rubber hatch off his kayak's aft deck and pulled out bags of camping gear. "The 'yak lives on a little floating platform, and there's a locker for the paddle and PFD. I still have to decide how to fill up the rest of the space. Maybe a pontoon boat for barbecues, and storage for more water toys."

"I vote for a pontoon boat with a hot tub," suggested Lee. "But the marina should totally be adding kayak and dinghy racks in the parking lot. Maybe even put storage racks on floats in some of the empty berths. When you think of how many kayaks or windsurfers can fit in one parking space, it should be a no-brainer."

Meanwhile a small sailboat coasted to the beach, grinding to a hard stop as the bow hit the gravel. I could tell it was a boat from Lee's club.

"Oh good, my gear is here," Lee observed.

Lee then introduced us to Helena Handbasket, an economics professor who, as we were to learn, had once done some consulting on marina development projects.

"Marina operators love dry stacks,"
In the current climate, they don’t want square foot than a few big berths. But small boats generate more revenue per i she informed us after her boat was to kayak storage. “And even for wet to build facilities for any boats under 35 feet long. Which is very shortsighted, if you look at the trends in urban housing. Fewer people who live close to the Bay will have garages or driveways for storing trailerable boats.” “So you think the demand for small berths will come back?” I asked. “It might,” said Helena. “The car of the future will not be able to tow a trailer.” “It might not even be able to hold a kayak on roof racks without being blown off the road,” I surmised. “On the one hand,” said Helena, “boating activity may continue to decrease across the board. On the other hand, smaller sailboats and hand-launched boats of all types will be a much bigger segment of the market, and demand for on-site storage will be strong.” Fortunately Helena had only two hands, and the economics lesson was cut short when a gaggle of at least a dozen more sea kayaks paddled around the point. Their leader was another sailor I recognized, Roxanne Scholes. Apparently she too had switched to human propulsion this trip.

The next wave to assault the beach was a fleet of dinghies from Lee’s university sailing club. They were a little less experienced at beach camping, and had much more gear on board.

More assorted small craft arrived. There was a six-person outrigger and a couple of singles from the canoe club. There was a whaleboat with ten rowers. There was Doc Bocks on his Laser, who, even as I helped him pull his boat onto the beach, scolded me again for not being on a regular exercise program.

The party had begun. Tents were pitched and barbecues were fired up. Prodigious amounts of food were produced, although it was never clear to me where everything had been stowed.

Roxanne filled me in on what this event was all about. “Our group is called Bay Access — we advocate for the Water Trail, and our main goal is to develop and preserve access points for all kinds of hand-launched non-motorized small craft, and to make extended beach camping possible again.”

“I used to do this as a teenager back east,” recalled Sal, “Back in the day, you could beach your boat and camp on just about any deserted beach. No problem at all. But here on the Bay . . . .”

“There are two big problems our group is trying to solve,” explained Roxanne. “First, we need places where people can camp without getting arrested. And second, we need launch sites where we can leave our cars for a week without their getting towed.”

“This island seems to work out well for your group,” I said.

“Only if you can, like, make reservations months in advance,” noted Lee.

“If cruising the Bay in a kayak or windsurfer or small sailboat is ever going to become common,” said Helena, “we will need legal overnight venues with sail-in or paddle-in access, no reservations required.”

“Locals never agree to new campsites,” said Sal. “Local security and safety risk or something.”

“Oh man, are they ever wrong,” said an older paddler walking by with a very long, very narrow, and apparently very light kayak balanced on his head. He had long hair and a tie-dyed shirt.

“This is Ellis Dee,” Roxanne said to introduce him. “Professional paddler. Just back from paddling from the San Juan islands to the Sea of Cortez.”

“How long in each area?” I asked.

“No, we paddled from the San Juans to La Paz. A really cool trip, you should do it. But yeah, a managed campsites is much safer than a deserted park, even in daylight.”

“You know, I’m surprised how old most of these paddlers are,” I said after Ellis had walked away. “The sailors are the younger group. Somehow I would have expected it to be the other way around.”

Roxanne thought for a minute. “We are mostly boomers,” she admitted. “Except for Jen Ecks, our liaison with the Bay Trail. She’s in her forties.”
"I remember reading about this Water Trail thing when the legislation was being discussed a few years ago," I said. "Is the trail a done deal?"

"The legislation passed, but so far the only funding has been for planning. And you'd be surprised how much opposition we get from so-called environmental groups," Roxanne sighed. "They don't realize how much they are working against their own goals when they object to access points for non-motorized boats near natural shorelines. They don't understand how effectively it builds a constituency for the habitats we're all trying to protect."

"Right," said Ellis, after putting his boat where he wanted it. "You can't put anyone in a kayak without turning them into a birder."

"Happened to me," said Sal, reaching into one of his packs. "See, here's my binocs and my bird book. I never go paddling without them. And my Audubon card. But I'm no tree hugger. My old powerboat used to take on a thousand gallons of diesel every time I pulled up to the gas dock."

Lee explained the rest of the group’s itinerary. They would spend two nights at Kayak Camp, then hit four more campsites, yacht clubs and marinas over the next five days.

"Last year some of the stops were at waterfront hotels," said Ellis. "Kind of a bummer, man, not being able to camp outside."

"It’s urban cruising," said Roxanne. "Bring your paddle and your plastic."

Suddenly I remembered that my boat and the rest of my crew were still at the dock over on the other side of the island, and park rules required that we vacate by sunset.

"Maybe not," said Lee. "The park now lets boats stay at the dock overnight, if the crew has a reserved campsite on the island."

"I'm sure we can find tent space for you," said Ellis. " Heck, I won't even use my tent, unless it rains."

"But you will all have to become members of Bay Access to be in on the campsite," said Roxanne. "Insurance, you know."

"Sure, sure," I said. "How much?"

One check and some waiver forms later, and I was a member with a camping reservation on the island. I made it back to the dock just as the sun was setting, told the ranger I was with Bay Access for the night, and brought the rest of my crew over to Kayak Camp.

The ground wasn’t as soft as our berth cushions, but the company was as interesting as it ever gets.

And the highlight of the evening was a peek into the secret shoreside recreations of windsurfers and dinghy sailors: The fireside "wetsuit striptease," wherein sailors put on amazingly erotic performances while stripping from wetsuit to swimsuit. It was PG-rated, but just barely.

It was almost enough to make me think seriously about trading down.

— MAX EBB

Deadline: November 6
While there weren’t the one-after-the-other national championships of August ’08, last month was plenty full of top-quality events. Two in their sophomore iterations were Golden Gate YC’s Inter-YC Challenge and the Sarcoma Cup, both of which grew in size and scope. We also check in with the YRA Second-Half Opener, and the harrowing tale of Savage Beauty. Don’t miss a write-up of the LongPac, plus a look at the Santa Barbara King Harbor Race. We have a quick look at local IRC racing and the first-ever Kiteboarding Worlds. On the championship side of things, there are snapshots of the 505 North Americans, plus the Columbia 5.5 Meter and Santana 22 Nationals. Enjoy!

**Inter-Yacht Club Challenge**
In its second installment, the Golden Gate YC’s Inter-Yacht Club Challenge for the Golden Gate Cup drew a high-caliber field for the three days of match racing sailed in 1D35s on the Cityfront July 23-26. With BMW Oracle Racing CFO Chris Perkins at the helm and spokesman Tom Ehman backing him up on tactics, Golden Gate YC won the final by a 2-0 count over St. Francis YC’s Genny Tulloch and Russ Silvestri — winners of the four-round robin qualifier despite an incident that left their boat with a broken spinnaker pole.

“Tulloch and Ehman had to get their checkbook out and fix their boat, including a new pole. Tulloch nailed the start and took control of the match on the first boat. But a missed layline eroded St.FYC’s advantage, allowing Perkins to sneak by and ultimately take the first race. For race two, Perkins and Tulloch got into a heated battle in the pre-start, using the committee boat as a pick. But this time Perkins and Ehman nailed the start and never looked back. In the petit final, San Diego YC beat Berkeley YC 2-0. The pro-am event brought out some impressive talent: Noel “Nitro” Drennan, Andrew “Meat” Taylor, Shawn Bennett, Holt Condon, Alex and Brian Camet among others. With on-the-water judging and the use of the 1D35s, which are much higher-performing than most other match race boats, the event was far bigger in scope than its four-boat fleet and a welcome addition to the Bay’s racing calendar.**

**INTER-YACHT CLUB CHALLENGE 7/23-26**
Final — Golden Gate YC, Chris Perkins def. St. Francis YC, Genny Tulloch, 2-0; Petit Final — San Diego YC, Brian Camet def. Berkeley YC, Alex Farrel, 2-0. (4 teams)
Complete results at www.ggyc.org

**YRA Second-Half Opener**
Over 110 boats showed up for the YRA Second Half-Opener July 25-26. Hosted by Encinal YC, the event brought out the Bay’s hardcore following for the second installment of the popular Party Circuit. The racers who showed up were greeted with both a healthy breeze and plenty of current — the latter being indirectly responsible for one of the more dramatic episodes of the season so far.

One moment, John Lymborg’s Flying Tiger 10 Meter Savage Beauty was short-tacking up the Marin Headlands — successfully evading a flood that was pushing against the fleet at more than four knots — during the Saturday afternoon race to Pt. Bonita. The next thing they knew, Lymborg and his crew — Jesse Repp, Jeff Bruton, Matt Nguyen, and Xenon Herrmann — were stuck, their 7.5-ft-deep keel firmly wedged into a submerged rock pile just west of the second of two promontories to the west of Kirby Cove. Buffeted by the surge from the south swell that had produced epic surfing conditions up and down the coast, the crew set to work trying to free the boat.

“We were constantly keeping an eye on the boats in front of us, to see how far inside they were going,” said Lymborg, a Singlehanded Sailing Society member who, in his 15 years of racing, has “four or five” SHF races under his belt — including this year’s aboard Savage Beauty. “From past experience I’ve always known the area to be pretty
Golden Gate YC and St. Francis YC get all tangled up at the Inter-Yacht Club Challenge. The event featured all the trappings of a top-flight match racing regatta: top-flight sailors, on-the-water judging, and some unredeemed damage deposits . . .

deep. None of us felt like we were going extremely close or that any of the other boats were either."

Lymberg said Savage Beauty found the rock while in the process of tacking out from the shore, in breeze ranging from 9 to 14 knots.

“We immediately tried to save our boat and get out of there,” he said. “Hitting the rock swung us back hard in the other direction. Our sails were eased because we had been in the process of tacking. Just as we started trying to free the boat, a wave set came through and started rocking the boat back and forth: it made it impossible to get any shape in our sails. So we quickly said, ‘Forget the sails — let’s turn the motor on and get out of here.’”

The boat is equipped with an inboard well for the boat’s outboard motor, sealed by a sliding ‘door’ that fits flush with the hull. The door, which he said functions perfectly when the boat is afloat, had no interest in cooperating.

“One of our experienced crew was trying to get the door open, but it was jammed,” he said. “I was finally able to get the motor down and we tried motoring off in reverse — it felt like we were getting somewhere. Then we realized the bulb was scraping up against a rock shelf. All of a sudden, we heard a shrieking sound, the motor stopped and we realized the prop was wrapped-up.”

A passing small fishing boat with an off-duty Marin County Sheriff’s deputy aboard saw Savage Beauty being thrashed around on the rocks. The deputy immediately called his colleagues at the department’s marine patrol, which responded quickly. In the meantime, photographer Peter Lyons was next on the scene. He took a line from the stricken vessel and tried to tow it off the rocks with his RIB. Just as Lyons took up tension on the tow line, a set came through and rockered Savage Beauty, snapping the tow line. Next to arrive was Richmond YC member Chris Longaker — aboard his Express 34 Two Scoops — who stopped racing and called the Coast Guard. Longaker said he had to dodge passing racers to reach Savage Beauty after watching “at least a dozen boats sail past.”

Meanwhile, Lymberg had turned on his handheld VHF to monitor the radio traffic. In what Lymberg estimates was 15-20 minutes, the Marin County Sheriff’s Department RIB was on the scene; before long, they were removing the crew from the boat in multiple passes.

“They had to wait for the right moments,” Lymberg said. “They’d come in and pick up one or two of us, and then they’d have to go back out and wait for a set to pass before coming back in.”

With all five sailors safely aboard the MCSD’s RIB, the attention turned to the boat — which was still stuck on the rocks but otherwise intact, sitting proud, and largely upright, on its keel.

“We were very impressed,” Lymberg said. “We’d been monitoring the situation down below while trying to save the boat, and there hadn’t been any water coming in anywhere. The Sheriff’s deputies asked us if we wanted to contact a salvage company.”

Lymberg called Vessel Assist, and as he wasn’t a member, he was required to provide a credit card number up front. “I was taken aback by the cost,” he said. “They told me it would be $5,000. But at that point the boat wasn’t getting pounded on the shore, and looked as if it could be salvaged. I just felt like, ‘We’ve got to try this.’”

Lymberg said he hadn’t realized that Vessel Assist would be coming from Alameda. After what he estimates to have been more than an hour the salvage boat hadn’t shown up yet. In the meantime, the San Francisco Police Department had arrived, as had one of the Coast Guard’s 47-ft motor lifeboats — neither could safely get close enough to pull the boat off the rocks. But the rising tide and another set of waves came through, lifting the boat off its impromptu stand and washing it into the rocky shoreline.

“The boat started bobbing free, and I thought maybe we could get it,” he said. “But then it crashed into the cliffs — the rig was scraping on them — and I knew it was over.”
In addition to the boat, Lymberg said he was upset about the crew losing personal effects. Nguyen had a set of keys in his bag for which he had neither copies and nor a way to get an alternate set quickly. So after being dropped off at South Beach Marina, sailor Lance Berc drove the crew over to Kirby Cove to comb the remains of the day, where they found only a few PFDs, the boat’s horse-shoe life ring and sympathetic campers who treated the wet and weary sailors — still in their sailing gear — to a cold beer and ride back up to the campground entrance. As luck would have it, the following day, fishermen combing through the debris field found Nguyen’s bag and called the Coast Guard, who returned it to him. “He was ecstatic,” Lymberg said.

The following Monday, Lymberg’s credit card was charged $3,000 by Vessel Assist. After a quick phone call to a company representative who Lymberg described as “very helpful,” the charge was reduced to the company’s hourly rate for the two hours they spent responding, and Lymberg said he ended up paying only $500.

Reflecting on the incident, he said the
fact that no one was hurt is attributable to those who came to the rescue.

“The Marin Sheriffs did an outstanding job,” he said. “They deserve a lot of credit, as well as the SFPD and Coast Guard. We really appreciate the heroic effort by Peter Lyons, and Two Scoops for standing by.”

Two Scoops owner Longaker said he definitely felt he’d learned a lesson. “The boat was no longer a safe or stable platform,” Longaker said. “There’s no way [the crew] could have gone in the water and then been safely rescued without getting seriously hurt. We all need to be reminded that time is — and should always be assumed to be — of the essence. This could have been a real human tragedy.”

In the ensuing month, Lymberg — who told us after the incident that he hoped to get another Flying Tiger to replace Savage Beauty — has already made great strides toward getting back on the race course.

“I am happy to report that my insurance company was fantastic,” Lymberg said. “My claims agent was understanding regarding the accident, and very pleasant to deal with. All he wanted was a fair market value for the boat so the company could cut a check, which arrived within days of them receiving that info. As far as replacing the boat . . . all I’ll say is that I am actively working on that, and it could be sooner, rather than later.”

For complete result from the weekend's racing, visit www.yra.org.
LongPac

A cutoff low that produced breezy, spring-like conditions over Southern California had the opposite effect for the 25 boats that started the Singlehanded Sailing Society’s Great Pacific Longitude Race.

“It’s brutal out there,” said Race Chair Ruben Gabriel.

Eight boats were having such a slow time that they called it quits before finishing the course, which is rated at 400 miles. The remainder put in plenty of time to get back to the Bay. Elapsed time winner Jeff Lebesch’s Hammerhead 54 trimaran Hecla was the fastest back from 126º40’ West, the line the boats are required to touch at any point north-to-south before turning for home. Singlehander Mark Deppe’s J/120 Alchera was the first monohull home.

As the LongPac is a qualifier for next summer’s Singlehanded TransPac, we thought this would be a good time to pass on the published announcement for it, and a note from Race Co-Chair Bob Johnston:

“Now that LongPac 2009 is “in the books,” it’s time for that next great SSS tradition. Of course what I’m talking about is the biennial on-line argument over whether SSB’s or sat phones are better for checking in offshore! This debate has already started, and somewhere in the middle of it there will be a little sailboat already started, and somewhere in the information for those plus info on the ‘10 Singlehanded TransPac.

LONGPAC (7/29-8/4)

SINGLEHANDED 1 — 1) Green Buffalo, Cal 40, Jim Quanci; 2) Tiger Beetle, N/M 45, Rob MacLeod. (3 boats)

DOUBLEHANDED 1 — 2) Azzura 310, Greg Nelsen; 10) Outsider, Azzura 310, Greg Nelsen; 10) Redsky, Olson 34, Brian Boschma. (26 boats)

SARCOMA CUP

Richmond YC and Beat Sarcoma teamed up August 22-23 to hold the second annual Sarcoma Cup. As of this writing the final numbers on how many dollars were raised weren’t yet available, with donations still rolling in, but the near 75-boat turn-out had to bode well for the effort to double the $18,000 raised in last year’s event for sarcoma research.

“We applied a lot of learning from last year and incorporated feedback from participants,” said founder Nathalie Criou. “It’s a very young event so there’s definitely a lot we can improve on! What
harrowing experience of the crew of Drew Harper’s Viper 640 BoomSlung, which capsized while beating to windward near Alcatraz in a roaring flood. While getting ping-ponged around in a gagle of boats, the boat was hit by a puff during a tack. Despite the strong winds, the two-man, one-woman crew were able to right it, but as soon as the sails loaded up, it took off sailing on its own. In no time the flood pushed the soggy crew to Alcatraz, where one of the men was able to safely scale the seawall. The others were soon rescued by the Protector Escapade, whose crew then chased down the Viper, which was eventually towed in safely, albeit with a broken topmast.

For more information on the regatta and the fundraising, visit www.beatsarcoma.org.

SARCOMA CUP (8/22-23)
J/105 — 1) Arbitrage, Bruce Stone, 14 points; 2) Blackhawk, Scooter Simmons, 22; 3) Mojo, Jeff Litfin/John Case, 23. (19 boats)
EXPRESS 27 — 1) Witchy Woman, Tom Jenkins, 6 points; 2) Wile E Coyote, Dan Pruzan, 9; 3) Get Happy!!, Brendan Busch, 9. (10 boats)

WYLIE WABBIT — 1) Kwazy, Colin Moore, 5 points; 2) Mr. McGregor, Kim Desanaberg, 9; 3) Kela, Ron Tostenson, 10. (6 boats)

ETCHELLS — 1) Agent Smith, Jim Gregory, 4 points; 2) 530, Jeff Wayne, 11; 3) Cougar, Ethan Doyle, 12. (14 boats)

BENETEAU 36.7 — 1) Mistras, Ed Dunbin, 3 points; 2) Ay Caliente!, Aaron Kennedy, 6; 3) Buffiehead, Scott Stuart, 9. (3 boats)

OPEN 5.70 — 1) Boracic, Michael Gough, 3 points; 2) Semi-Aquatic, Jeremy Sammarcelli, 6; 2) Demonic, Nicolas Vale, 10. (5 boats)

ARIAD-MERCK CRUISING — 1) Kooyah, Donald Farquharson, 4 points; 2) Native, Adam Gambel, 7. (2 boats)

PHRF B — 1) Twisted, Farr 40, Mike DeVries/Tony Pohl, 4 points; 2) N/N, Farr 36 OD, Mark Howe, 8; 3) J/World, J/120, John Cabrall, 8. (6 boats)

PHRF C — 1) Hoot, Olson 30, Andy Macfie, 4 points; 2) Dragonsong, Olson 30, Sam McFadden, 9 points; 3) UFO, Ultimate 20, Trent Watkins, 10. (7 boats)

PHRF D — 1) Wool, J/24, Wally Whitier, 4 points; 2) Windflower, Santana 30, Bill and Pattie O’Connor, 5. (2 boats)

Complete results: www.richmondyc.org

Nearly 75 boats showed up at Richmond YC August 22-23 to race for the Sarcoma Cup and raise big $$ for sarcoma research.

we can say at this point with certainty is: we received $20,000 in cash sponsorship — over twice the amount from last year — and all the prizes, awards, plus most of the food donated, so our cost was either lower, or in line with last year, even though we were able to offer more things like fruits, dessert, massages and 2 different types of really nice beer. We had 2.5 times more attendance than last year and donations are still coming in as we have a fundraising competition.”

Sarcoma survivor and Pacific Cup veteran Criou started the event last year as a way to raise money for research on treating the extremely rare group of cancers of the connective tissues. Due to the relative rarity of the diseases — which disproportionately affect children — their study receives very little funding: less than 1% of all cancer research funds.

All the money raised during the regatta goes toward funding sarcoma research.

As for the racing, it was breeze-on for both Saturday’s buoy racing and Sunday’s pursuit race, as evidenced by the harrowing experience of the crew of Drew Harper’s Viper 640 BoomSlung, which capsized while beating to windward near Alcatraz in a roaring flood. While getting ping-ponged around in a gagle of boats, the boat was hit by a puff during a tack. Despite the strong winds, the two-man, one-woman crew were able to right it, but as soon as the sails loaded up, it took off sailing on its own. In no time the flood pushed the soggy crew to Alcatraz, where one of the men was able to safely scale the seawall. The others were soon rescued by the Protector Escapade, whose crew then chased down the Viper, which was eventually towed in safely, albeit with a broken topmast.

Santa Barbara to King Harbor Race
Afterburner, Bill Gibbs’ Ventura-based 52-foot Bladerunner catamaran, used idyllic catamaran sailing conditions to set a new course record of 5h, 37m during July 31’s 81-mile race from Santa Bar-
THE RACING

bar to Redondo Beach. The Kiwi-built cat averaged a marvelous 18 knots for the distance sailed, and a little over 14 knots for the rated course, to eclipse her old record by 10 minutes.

Fifty minutes behind Afterburner was Doug Baker’s Andrews 80 Magnitude 80 from Long Beach, just back from Hawaii, where she missed the all-time monohull TransPac record by only minutes.

But don’t try to get Gibbs into a multi-hulls versus monohulls argument. “It’s all horses for courses,” he said. “I have tremendous respect for canting keel monohulls, and Magnitude has beat us boat-for-boat a number of times. What this year’s race proved is that a catamaran like mine needs moderate winds, meaning 10 to 20 knots, and flat seas, to set records. In winds under eight knots or over 20 knots, and in bigger seas or sailing upwind. Magnitude is faster. But this year the conditions were right there in Afterburner’s sweet spot.”

In the world of course-record setters, Afterburner is a budget operation. Gibbs bought the now 22-year-old cat more than nine King Harbor Races ago for $100,000, and most of his sails are nearly seven years old, having been over-built from Cuben Fiber to last for many years.

But when it came to corrected time honors in the 107-boat fleet, Chris Slagerman’s Firebird Phat Cat stole both ORCA honors and the whole show by nearly 40 minutes over Sprit Ul-winner, John Staff’s Viper 830 Plankton. John MacLaurin’s well-traveled Davidson 52 Pendragon IV took the honors in ULDB A, while Mike Wam’s SC 50 Fifty-one Fifty did the same in ULDB B. The “Black Widows” on Mike and Gary Burke’s Hobie 33 Capt. Sluggo took ULDB C. Sprit Pl went to Gary Winton’s J/120 Shenanigans. In the displacement divisions, Folkman Galloway’s Olson 40 Ono took PHRF A, while Chad Downey’s Jeanneau 49DS Elxiir took PHRF B, PHRF C went to Larry Leveille’s J/29 Rush Street and PHRF D went to Ken Ziegler’s Islander 36 Rasa.

Mark Noble’s Escapade took the J/105 class and Dave Voss’ Pranita took the Farr 40 division.

We’ve done about 10 King Harbor Races over the years, and can’t remember one that was more pleasant. Thanks to the start’s unusually strong winds — eight knots — boats were able to get away from Santa Barbara faster than normal. While we never saw more than 15 knots, the wind was unusually consistent in the traditional light spots, meaning the lee of Santa Cruz Island and when crossing Santa Monica Bay. It

We would like to keep a running tab on beer can results through the summer — and we need your help. We don’t have the time or manpower to chase down results. You have to either post them on a website or send them directly to the race editor at rob@latitude38.com.

Our format, lo these many years, is to include the name of the boat, the type and length of boat, and the first and last names of the owner(s). The following are the only results that were posted online for August. Don’t forget the Latitude 38 Beer Can Challenge: sail every night at a different beer can race in any given week, then send us photo documentation, and we’ll send you some swag to commemorate your pursuit of sailing satisfaction.

**BVBC MONDAY NIGHT MADNESS (7/20)**

**COMPLETE RESULTS: www.ggyc.org**

**ICY SUMMER TWILIGHT SERIES (8/14)**

**DIVISION A (PHRF 0-150) — 1) Uno, Wyliecat 30, Steve Wonner; 2) Spirit of Freedom, J/124, Bill Mohr; 3) Twisted, Farr 40, Mike DeVries/Tony Pohl. (7 boats)**

**168 RAPPERS — 1) Phantom, J/24, John Guillford; 2) Bewitched, Merit 25, Laraine Salmon; 3) Bandido, Merit 25, George Gurrola. (6 boats)**

**DIVISION D (PHRF > 150) — 1) Lelo Too, Tartan 10, Emiles Carles; 1) Dumbo, Catalina 22, David Torrisi; 2) Shadow Fox, Olson 25, Mark Simpson. (5 boats)**

**NON-SPINNAKER — 1) Svenska, Peterson 34, Fred Minning; 2) Blueberry, Nonsuch 22, John Foster. (5 boats)**

**COMPLETE RESULTS: www.yc.org**

**MPYC SUNSET SERIES (7/15)**
allowed our Profitgate — despite being loaded down with twin RBs and outboards, full water and fuel tanks, plus other junk, to finish just 10 minutes after Fifty-one Fifty. Alas, two hours were later mysteriously added to our elapsed time, perhaps as a penalty for taking up too much yacht club dock space after the race. Does that mean we’re going to have to forfeit our fourth-in-class cheese platter trophy? We hope not. No matter what, like the Terminator, we’ll be back. And you should think about signing up too!

More info and full results are at www.sbyc.org.

**Aldo Alessio Regatta**

Dan Woolery’s King 40 Soozal added yet another regatta title to its ever-growing list in the IRC division at St. Francis YC’s Aldo Alessio Regatta July 31-August 2.

Posting a 3-2-1-2 in the four-race, no-throwout series, Soozal finished one point clear of John Siegel’s Wylie 42 Scorpio. Trailing the latter by a point going into the final race, Woolery was able to put a boat between them to close out the regatta.

Nineteen J/105s showed for the regatta, with Phil Byly and Rich Phipkin’s Racer X sailing a consistent 2-3-3-5 series to overtake early leader and eventual runner-up, Adam Spiegel and Guillaume Brouillard’s Jam Session. Steve Madeira’s Mr. Magoo won the eight-boat J/120 division by three points. Full results are available at www.stfyc.org

**SFYC IRC and Express 37 Nationals**

San Francisco YC hosted the IRC and Express 37 Invitational on August 15-16. Four Express 37s showed and Bart Schneider’s Expeditious bookended a 2-3 with a pair of bullets to finish one point clear of Kame Richards’ Golden Moon. Dan Woolery’s King 40 Soozal ran the table in the IRC Division. Next month’s Rolex Big Boat Series is the final event in the SF Bay IRC series and Soozal will be carrying the series lead into the regatta, which also serves as the U.S. IRC

Dan Woolery’s Pt. Richmond-based King 40 ‘Soozal’ continues to tear up the SF Bay IRC fleet, having jumped into the series lead going into the final showdown at the Rolex Big Boat Series.
Santana 22 Nationals

For the fifth time in six attempts, Michael Andrews’ Bonito took home the Santana 22 Nationals trophy after a vintage weekend of Bay sailing hosted by the Corinthian Yacht Club on July 25-26. Tom Montoya’s Meliki and Jan Grygier’s Carlos joined Andrews on the podium, taking second and third, respectively, in the 19-boat fleet. As is always the case with the Tunas, both the racing and roundings were extremely tight and not without a bit of bumping and grinding.

The regatta played out quite similarly to the last time the Nationals were held on the Bay in ‘07 at Richmond YC, with Andrews and Bonito earning three hard-fought bullets on Saturday, then losing most of their lead after blowing up a bit in the fourth race, but then pulling out the victory with a convincing bullet in the final race.

“Our plan was to start conservatively, then rely on our boat speed and crew work,” Andrews said. “We believed strongly that we couldn’t afford to be OCS in any race, nor finish very deep, because we knew there were at least four other boats that would likely have nothing but low scores as well.”

The conditions might have worked to Bonito’s advantage also. Though not as nuclear as Friday’s practice race, the weekend saw plenty of breeze in the high teens.

“Having sailed Bonito with Wayne Best and Shawn Grassman for six years now, I have a lot of confidence in our ability to work our way into a good position and win,” Andrews added.
find lanes even in challenging conditions,” Andrews said. “Of course it doesn’t hurt that I grew up sailing out of the San Francisco YC in the Knox area and that we get our weight out and keep the boat flat as well as, or better than, anyone else when it’s windy.”

But while Andrews, Best, and Grassman had a lot going for them, one crucial factor was the absence of 92-year-old Ernie Rideout and his far younger Tuna Maybe, who proved that ‘Old Guys (Still) Rule,’ even when they’re not able to participate in the regatta. We had initially heard that two-time nationals winner Rideout — the only other sailor to win the event since Andrews joined the class — would not be able to participate in this year due to a spill off of a ladder. So as much as the Bonito crew was relieved to not have to compete against him, they were even more so when Rideout arrived at the fleet dinner on Saturday evening to donate a half-hull trophy to be awarded to the regatta’s ‘most seasoned’ skipper.

It turned out that Maybe’s absence was due to injuries to Rideout’s longtime crew, Ray Pingree and Phil Worthen, whom he taught to sail when they were juniors. Complete results are at www.cyc.org.

Columbia 5.5 Meter Nationals
Encinal YC hosted the Columbia 5.5 Meter Nationals on the South Bay on August 15-16. After a dismasting knocked him out of the regatta last year, Bill Colombo took this year’s title over seven other boats with a 4-1-1-1-2 in the six-race, one-throwout series. Runner-up Adam Sadeg ended up a point back, three points clear of Liem Dao. Full results are up at www.encinal.org.

Kiteboarding Worlds
For the first time ever, ISAF sanctioned a World Championships for Kiteboard Course Racing. Given that it’s the discipline’s birthplace, it was only fitting that St. Francis YC would host the hugely successful inaugural event last weekend. Sean Farley, winner of last year’s course racing nationals, bested the fleet of 68 kiters to take the ‘09 World title. Locals Chip Wasson and John Heineken were second and third respectively. Complete results are online at www.stfyc.org.

505 North Americans
Mike Martin and Jeff Nelson won the 505 North Americans while sitting out the last race. They scored four bullets and a second in the six-race, one-throwout series hosted by St. Francis YC on the Circle August 18-20.

The Southern California duo has won practically every 505 regatta on the Bay leading up to the NAs, so we weren’t surprised to see this result. Santa Cruz’s
Mike Holt, sailing with Carl Smit, has been knocking on the door recently and, after a scoring a 6-2-2-2-1 in the first five races, were also able to sit out the last one and take second for the regatta.

“It’s been a great week but the long days tire you out and you can make mistakes,” Holt said. “It was a bit lighter today so it made for a fantastic day. That, and knowing we didn’t have to go out for the last race.”

Being as it sailed on the Circle, while the boats were launched from Crissy Field, the 69-boat fleet had been sailing not only two races a day of a minimum w-l-w-reach-l-w-l-upwind finish, but they had to essentially sail a triple weather leg to just get back to the barn every day!

For those who did sail the final race of the series, third in the regatta went to Howie Hamlin and Ian Mitchell, with fourth going to reigning world champions Ian Finnell and Carl Gibbon. East coasters Tyler Moore and Geoff Ewenson were fifth. As we went to press, Martin and Nelson were leading the SAP 505 World Championships presented by APL. Look for coverage in next month’s Latitude 38.

Race Notes
San Diegan George Szabo and Southern Californian crew Rick Peters became the first American team to win the Star Worlds since Mark Reynolds and Magnus Liljedahl did it in 2000. In what was Szabo’s 14th attempt, the duo managed to overcome a 54th in the opening race to beat the 84-boat fleet gathered in Varberg, Sweden.

Seven boats showed up on August 15 for Encinal YC’s Gracie & George Race — doublehanded with a female skipper and male crew. After a half-hour delay...
Tight match racing action off Paradise Cay. Kristen and Peter Lane have joined forces with CMA to start the Bay’s only weeknight match racing scene — wildly popular in just a few months.

A 5- to 10-knot westerly filled in for the 8.6-mile South Bay course. Joan Garrett and Norman Davant aboard the J/100 Javelin took line honors in just over two hours, narrowly beating the overall and C Fleet winners Karen Flick and Steve Wonner on the Wyliecat 30 Uno at the Estuary finish.

Alinghi announced on August 5, that they will be hosting the match for AC 33 in Ras al-Khaimah, one of the seven United Arab Emirates.

“Our absolute priorities in making this decision are the prevailing weather conditions and the resulting safety that they bring to both teams,” said Alinghi skipper Brad Butterworth. “We looked everywhere for a venue that suited having good racing for the Match dates in February.”

While Alinghi might have found what they think is the perfect venue, it violates the provisions in the Deed of Gift that the match be held in the summer months of whichever hemisphere it’s sailed in.

Alinghi is banking on a liberal interpretation of Justice Herman Cahn’s ruling in the Commercial Division of the New York Supreme Court that said that the match, “...may be held in Valencia or any other location...”

“Golden Gate YC believes SNG’s choice of this venue, without our mutual consent, is contrary to the Deed of Gift and decisions and orders of the New York courts,” said BMW Oracle spokesman Tom Ehman. “We are reviewing our options.”
With reports this month on Converting Young Sailors Through Exotic Travel, our first-time-ever Photo Contest, a young Bay Area sailor’s Trials and Tribulations of Sailing the Abacos, and miscellaneous Charter Notes.

'Total Immersion' Into the Sailing Life Through Destination Chartering

You gotta love the photo at right. If it doesn’t scream “We’re having big fun in the sun!” we don’t know what does. And it reminds us that a sailing vacation in some beautiful, sun-baked destination is one of the best ways we can think of to introduce newcomers — especially kids and active young adults — to the joys of sailing.

From personal experience we know that taking young inductees along on often-chilly daysails here on San Francisco Bay doesn’t always make them instant converts to the sport — especially when they show up wearing shorts and sandals, with only cotton sweatshirts to block the wind and spray. But take them along on a week-long charter in some tropical wonderland like the British Virgins or Grenadines, and they’ll definitely have some instant converts to the sport — especially if they show up wearing shorts and sandals, with only cotton sweatshirts to block the wind and spray.

Why? Because for most of us, our love of sailing involves a lifestyle more than simply a recreational pastime: a lifestyle that, when you think about it, encompasses not only physical exertion, but also bonding with nature, stress relief, problem solving, the application of scientific principles, and more. By coming along on a yacht charter, your young guests will get a 24/7 introduction to the sailing life in the best of circumstances. Just as a ‘total immersion’ foreign language course abroad — where you live with native speakers — can rapidly accelerate your language skills, a stint of living all aspects of the sailing life will give newcomers a first-hand appreciation of all its subtle and not-so-subtle attractions.

Put young trainees on the helm when you’re blasting along on a beam reach with the warm trade winds blowing and cool salt spray flying, and they’re sure to appreciate the magic of harnessing the wind.

Explain the simple physics of ‘lift’ that allows a Marconi-rigged sailboat to sail into the wind, and you’ll be giving them a real-world example of scientific principles that they’ve probably touched on in school.

Teach them the rudiments of chart navigation, then ask them to help you plot a course and measure the distance from one day’s anchorage to the next. You’ll be giving them useful insights into the process of piloting a vessel around the world, plus an appreciation of the challenges faced by the early explorers during the Age of Discovery who were often forced to ‘wing it’ due to their grossly inaccurate charts.

Introduce your young guests to snorkeling over coral reefs in clear, turquoise waters, and you’ll witness their scientific curiosity coming alive, as they ponder the complex relationships between the hordes of brightly colored fish and the soft and hard corals that they feed on.

In addition, when you make young sailors — even those of grade school age — responsible for specific aspects of running the boat, they’ll realize that they’re part of the team effort that’s essential to making any boat function smoothly and safely. For example, after thorough safety training, if you designate your 14-year-old to be the dinghy captain, you’ll see his or her self-esteem rise exponentially, and that previously disinterested kid will likely also take a greater interest in other aspects of crew work.

The killer photo above — which, by the way, won third prize in a recent Moorings photo contest — shows a group of young adults whooping it up in the tropics. Guessing that they’re all college age or a bit older, we have to wonder if some of them were initiated into the ‘world of chartering’ as kids. Because from personal experience we’ve seen that there’s a natural progression for young sailors to learn the ropes from their parents, then want to share the sailing life with their buddies when they’re old enough to skipper a charter boat on their own.

How can young people afford such a trip? Run the numbers and you’ll see it’s not impossible, especially in times like these when airfares are cheap and charter operators are offering deep discounts. Here are a few useful tips: First, if prices from the top-rated companies are too steep, check out second-tier companies that offer somewhat older boats for lower prices — after all, a boat...
that's a bit worn and tired will get you to the same anchorages as one that's brand spanking new.

Second, consider chartering in the off-season, when prices are much lower — and many operators are especially motivated to wheel and deal. Third, go ahead and pack the boat to max capacity, booking two to a cabin, with another couple sleeping on the drop-down salon table. Sure, it will be a bit crowded and messy that way, but when you're young, 'the more the merrier' is an appropriate mantra — especially if it makes the difference between making the trip happen or not.

Finally, pick a destination that's relatively close to home, so airfares won't be a deal-breaker — Mexico's Sea of Cortez and Belize come to mind. And book far in advance so you'll have a reasonable chance of using your frequent flyer miles (or better yet, miles gifted from generous friends or relatives).

Whether you're a young adult hoping to put together a dream getaway with your favorite bunch of party animals, or a parent who'd love to instill a love of sailing in your kids, we say set a date and place, and book it. We're sure you'll be glad you did.

We've Showed You Ours,
Now Show Us Yours

Over the years, whenever we've gone 'on assignment' (ahem!) to an idyllic charter destination, we've been happy to share our best photos with you in these pages. And, of course, we're always pleased to publish shots that readers send in from sailing venues around the world.

But we were reminded by The Moorings' photo contest, mentioned above, that we've never actually held a photo contest of our own — and it's high time we did.

So we invite you to email up to five of your best high resolution JPGs before November 1 to andy@latitude38.com. We'll pick winners in several yet-to-be determined categories, and publish them in the magazine. In addition to earning that 15 minutes of fame, winners will...

Cool shot, eh? Why not show us your best images? You could win some 'Latitude' swag, plus get your shots published in the mag.
receive some official Latitude 38 swag. So don’t be shy, show us your best! — latitude/andy

High Times in the Abacos:
Skinny Water, Fliry Rum & Mischief

After loving our previous charters in the Grenadines, Greece and the British Virgin Islands, we set our sights on the Bahamas late last fall.

Flying in from Monaco, New York, London and San Francisco, our crew rendezvoused at Miami International Airport, then caught a puddle jumper to Marsh Harbour, Great Abaco, in the Bahamas. Not long after our arrival at The Moorings’ base, we checked out our beautiful 43-ft cat, Ultimate Pair O’ Docs, and our flotilla partner, the 42-ft cat Calusa. Both boats were built in South Africa, and have four large double berths and four heads. Our provisions had already been delivered and stowed. We could not have been more excited!

After overnighting at the nearby Conch Inn, we went through a chart briefing and a walk-through of the boats with a staffer named David, who’s originally from Cape Town. (You’ll hear more about him later.) There were a few issues to sort out with the boats, which burned up a few hours. But hey, we were in the islands, not the U.S.

As it was the last week of hurricane season, winds were pretty strong that first day — 25 knots initially, building to 40 — although much milder throughout the week. We pulled out of the harbor under a double-reefed main and headed out to Treasure Cay, arriving at the anchorage in only 90 minutes. We wanted to check out the beach, but our dinghy engine wouldn’t start. So we hung out on the boat and went for a swim — the water was still a bit cold, in the low 70’s, at that time of year. Afterward, we had a communal dinner party with the Calusa crew and somehow managed to go through 2/3 of our weekly alcohol provisioning in one night. Quite an achievement!

We woke up a little worse for wear, which proved to be a recurring theme, but The Moorings sent out a guy to fix the outboard and we soon set sail for Banyan Beach, which is said to be one of the top 10 beaches in the world. Sure enough, it was a spectacular white sand beach and the water was warmer than the day before.

The next morning we were off to Great Guana Cay. We had a fantastic sail despite beating to weather all the way. As we approached our destination, we slowed down and flipped on the engine to drop the sails. But I neglected to ask anyone to pull the dinghy up short, and promptly ran over the painter, severing it! Thankfully, my ‘first mate’ immediately jumped in to rescue the inflatable — thereby earning his first mate status!

Unfortunately the dinghy’s gas tank was still aboard the mothership. We soon had him back aboard safely though. After finally mooring in Settlement Harbour, we learned that Cap’n Matt aboard Calusa had also run over and severed his painter! What are the odds?

That night we all headed in to Nipper’s for their famous Sunday Pig Roast — delicious! There, we soon met the ‘Fire in Da Hole guy’ who was walking around giving out shots of his namesake rum to everyone there. It proved to be a tough gig, though, because by the end of the night he had to be carried out of the place. (We weren’t too far behind).

We awoke the next morning to find that our sister boat was aground on her mooring! To give the tide time to rise enough to get Calusa floating again, we all piled onto my boat and headed to uninhabited Spoils Bank Cay for a beach barbecue. Tip: The key to a beach barbecue on a windy day is to find as much protection as possible, and bring your detachable barbecue from the boat to avoid sand getting in your food.

After a fine lunch on that beautiful beach, followed by a bit of exploration, we sailed back and dropped off our refugees, then set sail for Hope Town on Elbow Cay in time for a rising tide — a necessity there due to the channel’s ‘skinny water’. After checking the tide charts, we decided to stay two nights because you could only leave on a rising tide, which, in our case, would have meant leaving early the next morning or after dark — neither was ideal.

In the morning we rented golf carts and tooled around Tahiti Beach, which was wonderful for shelling near the shallows, then set out on a pub crawl, vowing to have the house drink at every bar we passed. First, a piña colada at Sea Spray; Cap’n Jason awaits a dowsing; pyramiding at Tahiti Beach; Anna checks the depth.
night was at Pete's Pub, a great place that reminded us of Foxy's Taboo on Jost Van Dyke in the BVI, and they had the same stupid and infuriating ring game that we'd played at another beach bar on Jost called the Soggy Dollar. I lost miserably, but the meal was delicious. On the way home through the anchorage we couldn't find our boat, but soon discovered the Calusa crew had pulled a prank by turning off our anchor light! We vowed to get them back.

Thursday morning arrived: Thanksgiving Day in the Bahamas. What could be better? We set sail for White Sound, but on the way it started getting very shallow off Tiloo Cay near Lubber's Quarters. Suddenly we were aground! I felt like a total failure. "Will we ever get out of here?" I remember thinking. "Will I get charged? Is a hull damaged?" I was literally sick to my stomach. Out of shame, I decided not to radio Calusa. It was still two hours before low tide.

Exploration of the surrounding area by dinghy revealed shallows everywhere. So, in textbook fashion, we tried kedging out an anchor in deep water so we wouldn't drift farther into the shallows. After a few hours of waiting for the tide to rise, I realized it might be close to dark by the time we got off. We were also having a head blockage problem, so I called The Moorings and they said they'd send somebody out.

After a few hours I heard David's South African accent over the VHF (the guy who'd given us our briefing at the charter base). He told us he had just helped another boat out near White Sound and he was on his way to us. A sense of calm came over me. When he arrived and told us the other stranded boat was Calusa, my crew and I erupted into a wild celebration. "We both ran aground! I am not alone! And Calusa is still ahead of us on the grounding scorecard, two to one!" With that, David shared a Bahamian proverb: "If you haven't run aground in the Bahamas, you aren't trying hard enough!"

Then the fun started. We set the anchor off on its own, tied to a finder so we could retrieve it later. Then

David towed us afloat and told us to head west, but we quickly ran aground again. He towed us afloat again, told us to head north, but we ran aground yet again. About this point we learned that David is an expert sailor, but had only been in the Bahamas for three weeks and didn't know the waters at all! We also learned he had sailed with my wife's family in South Africa during the Cape Town to Rio Race. Small world!

While trying to get us afloat again, I tripped a line and my starboard engine seized. 'Don't worry,' David said, 'I won't tell the other boat you did this.' We then figured out it was a line from his boat. I quickly retorted, 'Don't worry, I won't tell The Moorings that you did this!'

My first mate jumped in, cut away the line and we were back in business. He thus secured first mate status regardless of whatever else he did or did not do during the rest of the charter!

By this time it was dark. David tied his boat off to ours and piloted us through the night and into White Sound Harbor. We shared some war stories with the Calusa crew while David fixed our head. As a thank you for all his help, we invited him to join us for Thanksgiving dinner and drinks at the Sea Spray. During that wonderful evening, he let us in on a few harmless pranks, one of which we executed the next morning: We secretly pulled the electrical leads off the spark plugs of Calusa's dinghy outboard, and later took fiendish pleasure watching their frustrated attempts to start it.

We were so worn out from the grounding incidents — and wary of repeating them — that we decided to stay in White Sound another day and night. That led to more Turtle Racer cocktails and playing

Captain Jason, his wife Anne-Marie (far left) and their fun-loving crew were excellent patrons at every bar they visited.

followed by — and this is where things went awry — five very potent Turtle Racers at On Da Beach, combined with hours of frolicking in the waves of the Atlantic. We eventually arrived at a bar and grill called Captain Jack's where we were taught a game called "American Cornhole" — not what you think, I assure you. It's an innocent bean bag game not unlike horseshoes. We played against a guy named Jack and were frequently given free appetizers, which I thought was strange. But eventually I realized we were playing against the Captain Jack!

We left very early Wednesday morning at high tide headed for Sandy Cay to do some snorkeling and have another fabulous beach barbecue. Out on the nearby reef we saw turtles and tons of fish — a great time.

We then dinghied over to Pelican Cay to a beautiful white sand beach with the clearest water we had ever seen — truly stunning! It was a great place to bide our time while waiting for high tide so we could get into Little Harbor for the night. The chart shows a median depth over the bar of only 3.5 feet. Dinner that
WORLD OF CHARTERING

in the waves at On Da Beach.

Sadly, the next morning we had to hustle back to the charter base at Marsh Harbor and turn in our boats. After fueling up, they had me back the boat into the tightest spot I have ever seen. The cat certification class I’d taken back in the Bay at Club Nautique really helped me through this.

We capped off this fabulous trip with a luxurious night at the Abaco Beach Resort, where we scrubbed off a week’s worth of grime, and my wife and I enjoyed a ‘date night’ together.

I learned a lot on this trip, but the most important thing was that there are two types of sailors: those who have run aground, and those who are going to run aground! I know which type I am. What type are you?

— Jason Canter

Jason — Sounds like there were some lessons learned and brain cells burned on that cruise! Many thanks for your report. We’ll be sending you some Latitude ‘swag’ as a thank you.

— Ed.

As we said in our opening article, give kids specific shipboard duties — even swabbing — and they’ll feel like they’re part of the team effort.

Charter Notes

As fall approaches, we’re finally seeing some concrete indications that the economy is improving. The stock market has been cautiously rising and housing values have finally begun to inch their way upward also. Hopefully, this means consumer confidence will rebound before too long.

The downside to that, however, is that the super deals offered these days on everything from houses to yacht charters may shrink or disappear. Right now, however, charter operators are offering deeply discounted rates — we’ve seen as much as 35% off rack rates — plus other incentives, and airfares to many prime destinations are still substantially less that a couple of years ago.

If you can travel on relatively short notice, you should be aware that end-of-summer and fall charter rates — before additional discounts — are already a bargain in the Eastern Caribbean and elsewhere. So if you’ve been putting off that much-needed getaway, it might be time to reconsider. There’s no telling how long the current ‘bargain window’ will be open.

Likewise, if you’re planning a mid-winter sailing vacation, we’d urge you to lock in the airfare and your boat of choice soon, while rates are still flexible. Or should we say, too good to pass up.

Renaissance — CT-37
Paul and Judy DeMeir
Sailing With A Dog In Mexico
(Scappoose, Oregon)

My wife and I sailed down Baja and to mainland Mexico last season with Sam the Seadog, our very mellow and highly agile 24-lb Puggle. When we checked in with the port captain in Ensenada, we brought Puggle’s required International Health Certificate. But even though Sam was with us, we were not asked for it.

We spent a month in La Paz and Mazatlan, and almost two months on Banderas Bay. There were some inconveniences because of Sam. For example, we were usually limited to sidewalk seating at restaurants, and when my wife shopped at grocery stores Sam and I had to wait outside. Sam was allowed on all the local buses, but was not normally permitted on the first class buses that run between the cities. The exception was when we were in La Cruz and had the local bus drop us off on the main highway heading north. A cross-country bus stopped for us and took us to a great open-air market in Rincon de Guayabitos, which is north of Sayulita.

We had planned to stay at Paradise Marina, but after visiting and being told to leave Sam outside the mall and restaurant by the marina, we decided to pass on the Paradise Resort complex. The marina at La Cruz was more dog-friendly, so we stayed for about seven weeks before having Renaissance hauled at Opequimar for the summer.

Our biggest hassle was finding a dog-friendly hotel room in Puerto Vallarta while the boat was hauled and before we flew home. I checked out a few pet-friendly hotel websites, but all the listings turned us down — even when they claimed to be pet-friendly. We finally did find a little hotel in Bucerias — the one with an English bookstore — that accepted us. The cab to the airport from there was only $20. It’s much easier to find hotels in the United States that accept small dogs like Sam.

When we arrived in San Francisco, Customs wasn’t at all interested in how many bottles of tequila I’d brought back, but they did take away the Zip-Loc bag with Sam’s dog food. They said they were worried that it might be contaminated. We’d brought enough food to feed him until we got to Oregon. By the way, Customs didn’t check the health certificate we got for Sam from the vet in La Cruz. Judy and I agree that having Sam with us was one of the great joys of our cruise. When you are with your spouse 24/7, having a four-legged comedian onboard is great entertainment.

Daydream — Selestra 50
Wayne Wilson and Susan Leader
Suwarrow Atoll
(Ladysmith, B.C.)

We’ve just arrived in Pago Pago, American Samoa, after spending three-and-a-half wonderful weeks at Suwarrow. Also known as Suwarrow National Park, the atoll is part of the Cook Islands. If you take the northern route from Bora Bora to Samoa, Suwarrow is conveniently located along the way. Our stay at Suwarrow in July was nothing short of spectacular. In fact, if the season hadn’t rushed us along, we’d still be there.

In good light, the entrance into the lagoon at Suwarrow is surprisingly easy, as it’s wide, deep and there’s a maximum current — which is almost always ebbing — of three knots. The charts also appear to be accurate. The park ranger has put a buoy on South Reef, but given the severity of storms during tropical cyclone season, it’s unlikely to be in the right place next year.

Cruisers are required to anchor on the west side of Anchorage Island. While it’s protected from the prevailing trades, most of it is 50 feet deep or more, and there are lots of coral heads just waiting to foul your chain. If you allow a little time to untangle your rode before leaving, it’s usually not a problem. But it can be interesting to see where the boats end up after big windshifts.

John is the park ranger, and a nicer guy couldn’t have been found for the job. He lives on Suwarrow with his wife Veronica and their four wonderful boys, all of whom enhanced our visit and who gave us unique insight into rustic island life. Because John and his family stay at Suwarrow for six months at a time without reprovisioning, gifts of fresh fruit, veggies and meat are understandably appreciated. Nobody should feel obligated to bring such food, but those who do will likely see their favor returned.
IN LATITUDES

in fresh fish. As John is a consummate fisherman. In fact, he fishes most days, and is happy to take you along if you'd like to improve your skills.

John and Veronica were kind enough to welcome us all into their home to visit, play games, and learn about Cook Island life. They also hosted social gatherings for cruisers. During periods of settled weather, John arranged day-trips to the surrounding islands. Veronica is a bit shy, but once you get to know her, you'll never forget her infectious laugh and her kindness. She taught Susan some local palm frond weaving techniques, especially how to make palm frond boxes.

Because Suwarrow is a national park, there is a one-time entrance fee of $50, and some rules have to be observed. The most important rule is that spear fishing is not allowed in the lagoon. John feels very strongly about this rule, and for good reason. There are many sharks in the area, and they are instantly drawn to injured fish. Since his kids and visitors swim in the lagoon almost every day, the last thing he wants is a shark attack. In addition, John asks that all fish parts be dumped on the pass side of Anchorage Island, since the sharks like them as well. Most days the kids host a small gut-dumping ceremony at about 5 p.m. This is well worth seeing, as sharks ranging from two to seven feet boil the surface just a few feet from shore. Usually you'll see black tips, white tips and a few bigger and more aggressive grey sharks.

John tells us that most of the island rules were suggested by cruisers over the years, so some may reflect the pet peeves of long gone sailors. However, John enforces them in a very rational way, so if there is some issue that seems to require a little rule-bending, it's possible to discuss it with him.

One of the rules is that you must obtain permission to anchor anywhere except Anchorage island. This anchorage provides good protection in tradewind weather, but when there was a forecast for a blow from the south and southwest, the crews of Daydream and Whisper asked for permission to move to the Seven Islands area on the east side of the atoll. John gave us permission, but asked us to be as careful as possible around the coral, to try not to disturb the nesting birds on the islands, and to remember not to spear any fish.

Although anchoring a keelboat among dense coral pillars that rise straight up from 30 feet down was challenging, our stay at Seven Islands was a highlight. The water visibility in the area was approximately 100 feet, and the coral formations are the most fantastic we've seen anywhere in the world. Plus, the fish are friendly and the sharks timid. Needless to say, we enjoyed every minute we spent snorkeling.

We ended up spending several days at this alternate anchorage while the wind blew from the south and southwest. While there, it was our good fortune to witness a near total eclipse of the sun. The end of the eclipse coincided with sunset, so we had the unique experience of watching the sun — which looked like a crescent moon on its back — descend into the sea. We were even able to snap a startling photograph of the two tips of the

John and Veronica, who along with their four sons, manage Suwarrow. The hosts couldn't be more friendly or helpful.
sun’s ‘crescent’ setting simultaneously.

There’s also an old steel shipwreck on the outer reef near the Seven Islands. The wreck is sitting in about three inches of water at low tide approximately 500 feet from the outer edge of the reef. We marvel at the force of the waves required to move it that far. The Seven Islands area is about three miles from Anchorage Island, so it’s within dinghy range during calm conditions, or John may arrange a trip on his boat if several people want to go.

If you ever get to Suwarrow, don’t forget to ask John’s kids if they’ll find you a coconut crab. Since these crabs are endangered, you can’t eat them, but John and Veronica’s eight year-old twins were happy to find us one so we could take some great photos. These monstrosities are big and colorful, and have pincers that are powerful enough to crush your finger. They look like a wild combination of lobster and crab outfitted in tie-dye colors. After the crab’s photo shoot, we released him, and he disappeared up a coconut palm in record time.

Suwarrow has a reputation for having lots of aggressive sharks. We saw plenty of sharks, but didn’t see any that were aggressive. The ones in the main anchorage are used to humans, so it was normal to have two to six of the black tip reef sharks cruising lazily by our boat. When you went for a swim, they let us close in on them a bit before turning away. While we never felt threatened.

Even though you may have sailed the oceans for decades, it’s highly unlikely that you’ve seen a sunset as unique as this one.

we didn’t take our eyes off of them. If one headed toward us, we would always swim directly at it.

We know sharks can be dangerous, because when John’s boys caught a fish from the dinghy, one of the ‘friendly’ little sharks took about a five-pound bite out of it as a ‘shark tax’ before it could be landed.

One day the crews of Whisper and Daydream were snorkeling near Entrance Island, when 10-year old Timothy from Whisper noticed an unusual lump out near the outer reef. After a long slog through knee and thigh-deep water, we reached the lump, which turned out to be a 51-ft long sperm whale, with a beam of only six feet and a draft of 10 feet. From the condition of the flesh, we estimated that it had only been on the reef about two days. The find was reported to John, who gave us permission to attempt to remove the whale’s lower jaw for transport back to Rarotonga. So the next morning, John’s son Jeremiah, Scott from Whisper, and Wayne from Daydream headed out early the next morning with wood saws, fillet knives, and an axe, and returned to the whale. A jar of Vick’s VapoRub was also brought along to combat the stench of the rotting whale meat, which had gotten worse in just one day.

In wasn’t an ideal working environment, as large surf frequently came over the reef and threatened to push us under the whale or down its throat. But after seven hours of hard work, we managed to remove a significant part — 250 pounds — of the whale’s jaw. The water around the whale varied in depth from one to four feet depending on the tide, but for some reason no sharks were attracted to the bloody mess. Jeremiah pointed out there were shark bites on the whale that must have been inflicted while he was adrift, leading us to believe that the whale had died prior to grounding on the reef.

Returning the jaw to park headquarters at Anchorage island proved much more difficult than expected because the park’s backup boat, an aluminum dinghy named Boring that was carrying the jaw, was suffering from several leaks. Between the dinghy filling up with blood, the incoming seawater, the incredible perfume, and the near-constant bailing, it was a pretty exciting four miles of motoring back across the atoll.

The jaw is now ashore near the park headquarters, and we expect the flesh will rot out over the next several months. That means it will be possible for John to take the bones and teeth to Rarotonga at the end of the season. We stank so badly after the operation that we briefly considered lighting ourselves on fire to get rid of the smell, but settled for multiple baths.

We had originally planned to stay at Suwarrow for a week, but one day turned into the next with new and interesting things to do every time we turned around. Before we knew it, three weeks had passed. There are still a number of beautiful reefs that we didn’t have time to snorkel, and some electrical work on park headquarters that we would have liked to complete. But eventually we were dipping the same onion over and over to make coffee, and decided that it really was time to go. Having become such good
IN LATITUDES

he’s had crew — other than for 10 days — since starting his circumnavigation in ’05. The former Singlehanded TransPac participant has now sailed to six of the seven continents in the world — he’s in no hurry to sail to Antarctica — with the 29-footer he completed from a kit in the early ’80s. His Atlantic crossing was made much easier by the weather guidance of the well-known Canadian Herb Hilgenberg of Southbound.

From Jack’s blog:
“...My emotions at being back on the European continent, where I was born, are so numerous I don’t know where to begin. There were lots of them at Suwarrow, but none aggressive. Above right; What was left of a tuna after the sharks hit.

friends with John and Veronica and the kids, and knowing it’s unlikely that we’ll ever see them again, it was hard to leave. We now think that Suwarrow is the most interesting place that we have been to in the South Pacific, and recommend it to everyone.

— wayne and susan 08/05/09

Fleetwood — Naja 29
Jack Van Ommen
Crossing The Atlantic (Gig Harbor, Washington)

Jack reports that he made it from Beaufort, North Carolina, to Loctudy, France, in a total of 38 sailing days. He took 8 days for the 600 miles to Bermuda, 18 days for the 1,800-mile passage to the Azores, and 12 days from the Azores to France. He described the second leg as “a very nice sail.” His last leg across the Atlantic is the first time he’s had crew — other than for 10 days — since starting his circumnavigation in ’05. The former Singlehanded TransPac participant has now sailed to six of the seven continents in the world — he’s in no hurry to sail to Antarctica — with the 29-footer he completed from a kit in the early ’80s. His Atlantic crossing was made much easier by the weather guidance of the well-known Canadian Herb Hilgenberg of Southbound.

From Jack’s blog:
“...My emotions at being back on the European continent, where I was born, are so numerous I don’t know where to begin. France has always been one of my favorite countries, and was one of my sales territories in the late ’60s when I sold wood for Weyerhauser out of the Brussels office. The architecture, the smells, the language, the ba-

The French port of Loctudy, Jack’s landfall on the European continent, was crowded with the colorful fishing fleet.
A small corner of the marina had been allocated for dinghy landing, making visits to the city convenient for those of us anchored out. The marina was a bit ramshackle, and lacking any sort of breakwater or wave attenuator, it afforded no more protection than the anchorage. We were told that it would cost nearly $200, plus power and water, to berth there for just one night! And it wasn’t even high season. Someone was definitely capitalizing on the closure of the 500-meter long Grand Harbour quay, which normally offers free berthing to visiting yachts.

Siracusa was once considered the most beautiful city of the ancient world, and we thought it lived up to that reputation. Along its narrow marble streets are an impressive array of buildings, many of which have been beautifully restored, and which showcase the varying architectural styles of its long history. Staking out a table at a café on the Piazza, we enjoyed an Italian coffee and some excellent people-watching. It was a Saturday, and at least four groups of newlyweds and their wedding parties came down to the Piazza to have wedding photos taken in front of the town’s spectacular Duomo. It was quite the fashion show!

The next day we found the local market, which is located on a street at the edge of the Old Town. There on a street lined with crumbling buildings, were stalls with vendors hawking fruits and vegetables, cheeses and sausages, meats and fish, herbs and spices, and clothing and homewares. It was loud and crowded, and all the different aromas combined into an olfactory assault. The market probably hasn’t changed much in hundreds of years. We picked up some provisions, including some fresh tuna and swordfish caught in the nearby Strait of Messina.

We returned to town for dinner at Il Cenacolo, a lovely garden restaurant that filled with locals shortly after we arrived. We enjoyed an incredible meal of fish soup and beef goulash, two of the local specialties. The prices were very reasonable, and the portions so huge we couldn’t finish them.

The fuel dock at Siracusa was all but inaccessible to a boat Moonshadow’s length, so we continued north to Augusta to take on diesel. It was Sunday, so nobody was at the fuel dock. One of the local men rang up the proprietor of the fuel service, who came down to turn the pump on. She catered to the local fishing fleet, so didn’t have the ability to process a credit card purchase. But she was kind enough to drive me up to an ATM machine — the only one in town — so I could pull out some cash. She even made us an espresso while we were pumping diesel.

While we were swimming and bathing off the swim step, I managed to whack my melon on the emergency rudder gudgeon, opening up an inch-and-a-half cut just below my hairline. Dr. Merima applied butterfly bandages, after which I self-prescribed two martinis to ease the pain. Another boat bite and battle scar.

The wind was light the next morning, so we motored up the east coast of Sicily towards the enclave of Taormina. It was an uncharacteristically clear day, so along the way we were able to see the whole of Mt. Etna. As we approached
Taormina, we saw an unusually large mega-yacht at anchor. It looked a bit familiar, and as I drew closer, I recognized her as Tatoosh, owned by Paul Allen, the 'other' co-founder of Microsoft. Tatoosh is about 200 feet long, and has the full complement of toys — including a 40-ft powerboat and a 40-ft sailboat strapped to her side, and a helicopter aft. We anchored between Tatoosh and several other megayachts at the foot of the cliff below Taormina, so there went the neighborhood.

— george 08/20/09

Readers — George is uncharacteristically off on the length of Tatoosh, which is actually 420-ft. She might be more than 100 feet shorter than Roman Abramovich’s new Eclipse, but she’s still a big one.

time for an American-owned boat.

Teri had raced in Southern California for many years aboard Melges 24s, J/105s and other boats, and a few years ago did the TransPac aboard the Olson 40 Uproarious. It’s not surprising that she met Greg at a racing event, nor that they were eventually married aboard Teri’s Grand Banks 32 at Catalina’s Cherry Cove. Since returning home, Teri has become “the girl behind the scenes” at Dickson Racing, which is managing John MacLaurin’s new 69-ft Pendragon VI.

So what kind of boat did these experienced sailors pick for their circumnavigation? A ’02 South Carolina-built Beneteau 473 designed by Group Finot of France. If you’re thinking, 'Isn’t the ‘Bennie 473’ one of the most common charter boats in the world?' you would be right. In which case, Greg and Teri either made a questionable choice, or today’s off-the-shelf charter boats are pretty damn good for ocean cruising.

According to Greg and Teri, it’s the latter. “She’s been an excellent boat, and we had no major problems with the hull, rig or anything else," says Greg. Not that it surprised them. Back in ’04, the couple did the 600-mile Sydney-to-Hobart Race, perhaps the world’s consistently nasty middle distance race aboard a mini maxi Helsal II. The ’04 race turned out to be so rough that the 100-ft maxi Skandia had to be abandoned, all the ribs were broken on the 90-ft Nicorette when she crossed the finish line first, and the mini maxi the Weegers were on broke and had to drop out. But, the Weegers took note, all five of the Bennie 473s in the race not only finished, but did well in the standings.

So when the couple came across a used...
owner's version rather than a charter version of the 473, they didn’t hesitate. “When you know what you want,” says Teri. “You just get it.” The original owner of Greetings had installed a Fisher-Panda generator and a Spectra watermaker prior to a cruise to Tahiti, but she was otherwise pretty much stock. After buying her, the Weegers did little more than replace the extra water tankage with extra fuel capacity — something they would be glad they did.

When we were told that a boat, name and type unknown, had just completed a three-year trip around the world and was now moored along the fairway at Catalina’s Isthmus Cove, we figured we’d have no trouble picking her out. But when we looked at the 10 or so possibilities, we didn’t see one that even remotely fit the bill. None had a windvane, solar panels, jerry jugs or other accessories found on almost all cruising boats. Indeed, despite a three-year, two-month circumnavigation, Greetings looked just like the four or five sisterships that had sailed over from the mainland for the weekend.

The Weegers didn’t outfit Greetings like a typical cruising boat for two reasons. First, Greg doesn’t care for the “jerry jugs on the rail look.” Second, the couple didn’t think of themselves as cruisers, but rather as sailors with a specific goal. “We were on a mission to sail around the world before my now 13-year-old daughter Sierra was of age to start high school,” says Teri. “We envy the cruisers, and wished we could have been out there for a couple of more years, but that’s not possible at this point in our lives.”

According to Greg, among accessories that were key to the success of their circumnavigation were the 75-hp Yanmar turbo — which is an option to the standard Westerbeke diesel — that ”performed flawlessly”; the Fisher-Panda generator that worked reasonably well, the Raymarine autopilot that was so reliable that they never had to pull out the spare, and the standard refriger/freezer that still works fine today. Indeed, it seemed as though the biggest work the couple did on the boat was to replace the cushions in Panama just before coming home. Even so, both the interior and exterior of the boat are in fine condition.

The couple started their adventure in March of ’06 with a 21-day nonstop shot to the Marquesas. “It would be the best sailing of our entire trip,” says Greg. They were met in French Polynesia by Sierra, who would periodically join them for a total of about one third of the trip. The vivacious Sierra claims that by the time the trip was over, she’d become something of an authority on the airlines of the world. She rates Qantas at the top of the heap.

After arriving in the Marquesas, the Weegers had a pretty standard hip hop across the South Pacific to New Zealand. When Greetings arrived, Greg jumped headlong into the extremely active Auckland racing scene. “He hooked up with the Dickson family, both Roy, who is Chris’s dad, and Chris, former BMW Oracle helmsman, who thanks to smart property investments is now one of the wealthiest people in Auckland,” says Teri. “Greg raced almost every single day, including in the New Zealand Match Racing Championships, which are a big thing.”

After five months in New Zealand, which would be their longest stop anywhere, Greg and Teri continued on up to New Caledonia, through the Torres Straits to Darwin, then up to Timor and Indonesia. It will no doubt surprise some readers, but like many other circumnavigators, the Weegers found Indonesia, which has the largest Muslim popula-

Sierra’s fair skin made her a favorite in Indonesia.

Forget seeing orangutans behind bars, having the opportunity to visit with them in the wild was a real “pinch me” moment.

IN LATITUDES

because it's mostly Hindu. "While the Indonesians on all the other islands are very nice and friendly," remembers Teri, "they are sort of beige compared to the colorful people and culture of Bali.

Greetings then crossed the Flores Sea to Borneo, so Greg, Teri and Sierra could travel up the Mahakam River to visit with the orangutans. "Seeing them after a hike into the thick jungle was truly a 'pinch yourself' moment," says Teri.

"After the South Pacific and Indonesia, Singapore, our next stop, was a big change," says Greg. "Everything worked and it was so multicultural." It was also much more expensive. "Whereas a slip in Malaysia might cost $12/night," says Greg, "slips at Raffles Marina in Singapore — where facilities are great and your every need is catered to — were $80 a night.

Latitude often reports how inexpensive it can be to cruise — and it surely can be if you're thrifty. But there are also cruisers who figure that if they only have three years, they are going to see it all and do it all rather than be frugal. The Weegers are among the latter group, and figured they spent about $80,000 a year. Things that jacked up their expenses were airline tickets, and while in places like Thailand, using the boat as a base from which to tour Malaysia and other nearby countries. "We loved Thailand and Malaysia — the latter another Muslim country — but found them to be much more sophisticated than we expected," says Greg. Boat insurance made another considerable dent. "That cost about $9,000 a year," says Teri.

Fawn, Teri's 28-year-old daughter, was working at a Club Med in Thailand when they arrived, so it was only natural that they spent quite a few months at this stopping point. "While in Phuket," Sierra says, "we enjoyed the most delicious Chinese food ever. And, in fact, two of the three best Italian meals we had were in Thailand rather than Italy. Not every country is the best at doing their own cuisine!"

Teri has what seems to us to be a curious take on the dangers posed by pirates on the approach to the Red Sea. "We were in a convoy with three other boats that kept within half a mile of each other," she remembers. "We passed through the worst area on April 4, 2007, and were just 10 miles away when that 129-ft French luxury yacht was seized by pirates. Once we got further along, the delivery skipper of another boat told us that he'd been chased, and the next week five more boats had pirate incidents. But I'd go through again without worrying, because I don't think pirates care about boats as small as ours. In fact, I think we'd have a greater chance of being crime victims here in the United States."

Greg laughed and said, "During the trip we had two surfboards and a kayak out on deck at all times, and were not religious about locking our boat. Nonetheless, we never had anything stolen — until we got back to Long Beach and discovered somebody had taken the nozzle to our those!"

Indeed, the Weegers were quick to blow off many of the fears some cruisers — or at least their friends and relatives — have about cruising. "We heard stories of boats being assessed big fines and the worst weather to hit the Weegers wasn't at sea, but while tied up at Queen's Way Marina in Gibraltar. They abandoned their boat!"

There's a great big world out there, and you get see a lot of it on a circumnavigation. From above right: Who needs the pyramids with this tower in Cairo? Kids are curious everywhere. Singapore. A hungry monkey in Southeast Asia. FedEx in the Sudan. Muslim women have yet to be liberated. The towering dirt walls of the Corinth Canal.
having to deal with crooked officials in places like Indonesia," says Teri, "but we never experienced any of it. In fact, the officials couldn't have been nicer. It wasn't long before we stopped listening to the reports and rumors being passed along by cruisers, and ignored the cruising guides, too. There just isn't the drama out there that lots of people would like you to believe. We found that if you travel with good humor and humility, use common sense and are nice, you won't have a problem."

Prior to taking off, the couple had decided that when they got to Muslim countries, they'd tell everyone they were Canadians, thinking it would make them less likely targets. "We soon discovered that people love Americans — even Muslims in places like the Sudan, Oman and Egypt." Not everyone may like American foreign policy, but most everyone loves Americans because we're friendlier than most and tip better. That's not to say there weren't a couple of incidents that initially left them wondering. For example, while stopped on their way up the Red Sea, some fishermen — "big guys" — boarded their boat without asking permission. "They were nice enough," remembers Teri, "and panneditoned that they wanted two of the lobster that we had. Not sure what to do, we gave them the lobster. A couple of days later they returned, and we figured they might want something more. But no, they returned with two lobster to pay us back. We think they were just hungry the first time they visited us."

Teri says that they had enough bad weather during the trip to tell some good stories, but not enough to ever be frightened. For example, they were hit with a tramanta near the end of their passage from Sardinia to Barcelona, when the wind quickly kicked up from 14 knots to 50-knot gusts. Curiously, the only time they felt the need to abandon their boat because of weather was when they were tied up to the dock! It happened at Queen's Quay Marina in Gibraltar in October of '08. Wind gusts of up to 80 knots were reported at the nearby airport, which had to shut down operations. Over at the marina, docklines were snapping. It got so bad that Greg removed halyards to use as back up docklines. "We packed up all our passports and important documents and got off the boat because it was so dangerous," Teri remembers.

The Med turned out to be something of a disappointment to the Weegers. They picked up Sierra in Greece in early June along with Brooke, her 27-year old sister. They then covered some 1,500 miles of culture-studded waters in just three months. It was such a dash that while they did stop at wild Ibiza, they didn't even have time to get off the boat.

"The marinas were very crowded and incredibly expensive in the Med," says Greg. "I think it would be better to do the Med by land, particularly since the wind either doesn't blow at all or it's too windy to sail," says Teri.

Three years has long been considered the normal amount of time needed to do a circumnavigation. The Weegers feel it should be more like six years. Part of the reason is that large chunks of time have to be set aside to wait out seasons of bad weather. "We had to spend five months in New Zealand, four months in Thailand, and two months in the Canaries," says Greg. That was 11 months out of 38 merely waiting for the seasons to change.

A long time racer, Greg says he's spent a lot of time working on performance polars. "For this trip," he laughs, "I made a set of cruising polars. If we weren't making 5.5 knots toward our destination, we turned on the engine. We had to because we were on a schedule. As a result, we actually spent more time with the engine on than we did under sail only."

The Weegers' second best passage of the circumnavigation was the 19-day downwind crossing from the Canaries to Grenada. Small wonder there, as west across the Atlantic in the tropics is almost always good.

Greg didn't go overboard equipping the boat with spares, but did carry a spare autopilot, spare alternator, and spare engine impellers, filters, hoses and the like. "It's easy to get stuff shipped to you quickly," he says. "For instance, we lost the radar between Aruba and Panama's San Blas Islands. It only took us three days to get a replacement. Ironically, it seems like Mexico is the only place where it's hard to get stuff shipped."

There are only two things the couple would change if they could do the trip over. "I'd have davits for the dinghy," says Greg. "And we'd take three more years," says Teri.

What did they miss most about Cali-
“California surfing,” says Greg. “There’s nowhere else like Huntington Beach, because there’s always something to ride.” He’s also missing work. “If anyone needs someone in a supervisory position on a school or other public project, I’m their guy.”

Cruise Notes:

“Does your dog do foredeck? We met one that does,” write Eveleyn and Terry Drew of Santa Cruz and the St. Lucia-based Kirie Feeling 446 Aquarelle. “I was sitting in our dinghy near the starting line of the second race of the Bequia Easter Regatta earlier this year,” reports Evelyn, “when I saw the 45-ft, 16-ton Hogfish Maximus headed right at me. When they got alarmingly close, I found myself looking up at their dog, Bequia, who was peering over the foredeck down at me. ‘Don’t worry,’ shouted skipper Christopher Morejohne, ‘I haven’t hit a boat yet!’ Chris, his wife Rachel, daughter Lilly, and their dog Bequia race the boat themselves. Chris built the boat in the Bahamas, and she’s rather unusual thanks to having a flat bottom with internal lead ballast and water storage, and a daggerboard that allows her to draw as little as two feet. I was briefly told that Bequia never falls overboard, but wasn’t able to learn much more, as a furious Chris took off looking for his cherished hand-built dinghy. It, along with their outboard, had been stolen from the dock of the Frangipani Hotel during the after-race party the night before.”

The Bequia Easter Regatta is one of the bigger sailing events in the Caribbean, and attracted a total of 50 boats this year, including everything from the local double-enders and J/24s to an 80-footer. Among the participants was Don Radelcliffe of the Santa Cruz-based Beneteau First 456 Klondike, who seems as though he has been out cruising forever with his wife Katie. Radelcliffe won the Singlehanded Race handily, as the only other entry dropped out. If it seems incredibly late to be reporting on an Easter Regatta, you’re correct, and we apologize for having not gotten to it earlier.

“I just finished a 10-day trip around the north end of Vancouver Island aboard Evening Star, a C&C 43 owned by my friends Dave and Mary Utley of Bainbridge Island, Washington,” reports Mike Currie of the "highly modified" Poulsbo, Washington-based Newport 30 Voyager. “I had never been around this part of the island before, and really enjoyed the trip. We saw lots of fog and wildlife, and while we did have some rain, we had a surprisingly limited amount of wind. The accompanying photo of a whale coming out of the water was one of those special and lucky moments. I took it while we were motoring around the north side of the Brooks Peninsula. I thought I saw a log in the water and veered to port to miss it. But when we got to within about 80 feet of the ‘log’, it disappeared — to be replaced by a very large humpback whale coming out of the water and heading directly toward our bow! The whale jumped three more times behind us, then waved goodbye with a flipper. The weather may not be always conducive to shirt-sleeve sailing up here, but the wildlife is something else.”

And it’s no croc! “After an eight-hour trip north of Townsville on the Queensland Coast of northeast Australia, we dropped the hook at Little Pioneer Bay, Orpheus Island,” report Chay, Katie

As this warning sign suggests, man-eating crocs are a threat from just north of Brisbane all the way to the tip of Cape York.
and son Jamie McWilliam of the San Diego-based Kelly-Peterson 46 Esprit, vets of the ’03 Ha-Ha. "Despite a pretty strong current and a little bit of sea, we managed to clean a good portion of the bottom of the boat. Unfortunately, Chay got seasick in the process. It may sound funny, but it’s not uncommon for cruisers to get sick while underwater cleaning the bottom of their boat when it’s rough. The job had to be done, however, as Esprit’s bottom had developed a mini forest that was slowing her way down. Since we were headed further north along the Queensland coast, and would soon be in crocodile country, the job couldn’t wait. Two days later, we were heading for Hinchinbrook Channel, which we had to reach at high tide if we were going to not hit bottom. We anchored behind little Haycock Island, which is about a third of the way up the channel. It’s sort of like being on a jungle river ride at Disneyland or Tenacatita Bay — except instead of being in the dinghy, we were on our 46-foot sailboat. We hear the tropical birds talking here, just like in the old Tarzan movies. But we have to be extra careful around here, as it’s known to be home to large ‘salties’ — the big saltwater crocodiles that enjoy dining on humans. We raise our dinghy out of the water every night, not because we’re worried about it being stolen, but because the locals tell us that crocs sometimes use inflatables at teething rings!"

It’s often been said that sailors are safer in mid-ocean than near shore. That was certainly the case one night in August, when an out-of-control speedboat slammed into two Pacific Puddle Jump boats that were moored at the Bora Bora YC — normally, one of the most tranquil places imaginable. The first boat hit was the Cape Mendocino-based Nor Sea 31 Eva, sailed by skipper Michael Traum and his dad, Gerald.

"We were below, sitting at the settee,” recalls Michael. 'I heard the launch coming fast through the anchorage. I could tell he was going to come close to us, and I thought, ‘Another crazy pangero planing through a crowded anchorage at night.’ (The Traums had been in the La Cruz, Mexico, anchorage in February of ’07 when a pangero slammed into an anchored sailboat and was killed.) ‘Then wham! The impact was intense, as it heeled us over and spun us around a bit. Some items that had stayed in place
IN LATITUDES

for all our ocean passages were knocked off the shelves.”

The sturdy cruiser was holed near the rub rail, but is certainly repairable. By the time Mike and his dad scrambled up on deck, the driver had restarted his powerful outboard and tore off into the blackness. Seconds later, however, the lightweight speedboat T-boned the Seattle-based Baba 40 **Yohelah**, notching its bow over the heavily laid-up cruiser’s caprail. The driver, who is suspected to have been drunk, was launched into the small boat’s windshield, badly lacerating his arm.

At this writing, the process of repairing both boats has begun, and the French gendarmes are completing their investigation. Rob and Teresa have been impressed by the professionalism of the local authorities and want to stress that “The Bora Bora Yacht Club is not a dangerous place to moor. This was hopefully a very isolated incident by a single person using exceptionally bad judgment.”

“For cruisers who might be looking for an alternative to the usual inflatable or RIB dinghy, we suggest they consider a Walker Bay rigid dinghy,” suggest Ken and Katie Stuber of the Honolulu-based Bristol 32 **Sand Dollar**, which is currently at Majuro in the Marshall Islands. “We bought our 8-ft model second-hand for a couple of hundred dollars several years ago, and we think it’s been one of our best cruising purchases. Since we use ours as a work boat, we bought the gaff rig sail kit for it, then tricked it out with a boom and vang. The boat’s light weight — only about 50 pounds — makes it easy to get on deck or up a beach. The hull is just about indestructible, and is impervious to just about anything — including UV rays. Our Walker Bay rows, sails and tows very well. We don’t have an outboard motor, but we’ve seen them motor very well with a small outboard. If you feel that you need extra stability, you can add one of their tube options. Ours stores very nicely on our foredeck.”

If we’re not mistaken, this is the same Ken Stuber who did the first Ha-Ha in ’94 aboard the Olympic Valley-based Bristol

How have cruising boats in the South Pacific changed in the last nine years? According to Steve and Dorothy Darden, former Tiburon residents who have been cruising the higher latitudes of the Pacific for the last 12 years aboard their M&M 52 catamaran Adagio, “cruising boats are an average of 10 to 15 feet longer, many more of them are catamarans, and the longer monohulls have bow thrusters.” Last month the couple sailed 3,623 miles in 23 days from Hawaii to New Caledonia, having a short time before sailed from San Francisco to Hawaii. “The first question officials asked us when we tied up at the visitors pontoon in Port de Moselle Marina, Noumea, was if we had swine flu. There are 600 confirmed cases in New Caledonia. Quarantine took most of our meat, fruits and vegetables — except for carrots — but left enough for two nights’ dinner because we had arrived on a holiday weekend. We’d gotten hit by a nasty squall as we short tacked up Canal Woodin to the marina, but have had beautiful weather since. Our French language skills are most useful, as most of the tradesmen only speak a little English. The staff in the harbormaster’s office bends over backwards to be helpful, and there are yacht services companies available to assist. We are enjoying numerous festivals and special events while we make boat repairs. We will motorsail south to the Isle of Pines while we wait for a new main sail to be shipped to us from New Zealand.”

“We left Florida 18 months ago, took the ‘Thorny Path’ through the islands to the Eastern Caribbean, and then spent hurricane season in Trinidad,” report the Hagen family of the Rico, Colorado Prout 37 Snowgoose catamaran Toucan. The Hagen family includes parents Mike and Mary, and children Noah, 11, Lydia, 8, and Ava, 5. “We then traveled up the Magareo River in Venezuela, which turned out to be a really beautiful trip. Further travels took us to Cartagena, Colombia, and Panama’s San Blas Islands. We later sailed back to Cartagena to put Toucan on the hard while we returned to the Colorado mountains to work. It was a great trip, and we met lots of other ‘kid boats’. We’ll be headed back to Toucan in the spring — and might even enroll the kids in school in Cartagena.”

“We’re retired and currently spending hurricane season in the Dominican Republic aboard our boat,” write Randy
and Ellen Hasness of the Washington, D.C.-based Island Packet 370 Kwanesum. "We’re corresponding members of the Oakland YC, and about six years ago were transferred to D.C. So we sold our Bay Area-based Wauquiez 33 Moonglade, and bought a brand new Island Packet on the East Coast. We’re headed back to the Bay Area the slow way."

A Swiss couple’s 35-day ordeal finally came to an end last month, as Avatar, their 37-ft sloop, was successfully towed the final 17 miles to Pago Pago by a U.S. Fish & Game boat. A day after setting sail from Bora Bora, Avatar’s rudder snapped off, and the couple’s attempts to jury-rig a replacement were unsuccessful. With no means of returning upwind to French Polynesian waters, the pair, Beat and Lola, last names not known, were left with no alternative but to drift with the prevailing current until they reached landfall somewhere downwind. Fortunately, they had some good luck, as Samoa was 1,000 miles directly downwind. "Avatar was amusingly out-of-control on the end of the tow line," says cruiser Wayne Wilson, who went along on the Fish & Game boat to tow the stricken boat in. "When Beat and Lola hung several hundred feet of line off the stern with ventilated jerry jugs attached, it helped a little, but it still broke the tow line five or six times. Avatar would surf down a wave, suddenly turn 90 degrees, then stop. When this happened, the tow line would go slack, then slam taut again, jerking the tow boat backwards." Despite enduring this painfully slow process for eight hours, the Fish & Game crew never uttered a cranky word all day long.

"The Puesta del Sol Marina in Nicaragua is very nice, but isolated," reports 'Avatar' on the tow line near the end of their 35-day broken rudder ordeal from Bora Bora to Samoa. It was no fun at all.

September, 2009 • Latitude 38 • Page 165
William Nokes of the Brookings, Oregon-based Gulfstar 41 Someday. “So every Wednesday they send a van to Chinandega so all the folks on boats can sightsee and do their major shopping. A visit to Chinandega would be a good primer for anyone planning to drive in Rome or Mexico City, as the drivers are awful. Horns are the only accessory anyone seems to need on cars there, as nobody seems to bother using the steering wheel, brakes — or common courtesy. Drivers are constantly trying to go faster than everyone else, and are always willing to make life-threatening moves to pass a car ahead — even if they’ll immediately be stuck behind another car. It’s all about this being the first generation of Nicaraguans who have driven, so they have no guidance from the previous generation and are still learning about the deadly consequences of bad driving from experience. Fortunately, most drive little Hyundais, which weigh less than a horse and do less damage. Chinandega was a fine town, with well-organized and fully stocked stores. I’ve found that both El Salvador and Nicaragua have better stores than can be found in southern Mexico. Even the Wal-Mart stores in Mexican cities south of P.V. were horribly disorganized and had incompetent help — although very friendly help. Contra-

stantly — only those who remember the early 80s will get the pun — the stores in El Salvador and Nicaragua actually have stocked shelves and are organized in a logical manner. Plus, the employees know what items they carry. In fact, shopping in San Salvador and Chinandega isn’t much different that shopping in similar sized cities in the U.S.

Viva a new revolution in Nicaragua? Two years into his presidential term, Daniel Ortega, the leader of the Sandinista Nationalist movement in ’80s, is being harshly criticized by former close associates and brothers-in-arms for having become distant and dictatorial. Over 70% of Nicaraguans say they have become poorer and less hopeful since Ortega took office.

We at Latitude think now would be a great time to sail to Cuba. It’s not because the Obama Administration has reversed the Treasury Department’s silly prohibition against “trading with the enemy”, but rather — as we predicted — has gone back to the Clinton Administration’s policy of not enforcing...
that law. Some 270 Americans in two groups travelled by air to Cuba in July. When they returned to the States at either Buffalo, New York, or McAllen, Texas, they demanded to be charged with breaking the law. The Treasury Department refused. Hilariously, Treasury Department spokesperson Marti West said, "As a general matter, should laws be obeyed? Yes. Should laws be enforced? Yes. But we're a government of limited resources and we have to make priorities." Busting Americans for travelling to where they want to travel is obviously not a top priority. West did note that fines of up to $250,000 per infraction are still possible. But let's face it, with the Obama Administration bogged down in health care, cap and trade, and awful unemployment figures, the last thing they are going to want to do is infuriate the base by coming across as regressive. And if by some remote chance you did get charged for taking your boat to Cuba, there would still be plenty of upside — you'd be seen as an international martyr for liberty, and would be asked to do all the talk shows and write a book. But still, a word of warning to keep expectations low. Cuba isn't even semi-developed and the poverty will shock you. So if you're going for adventure, that's one thing, but if you go hoping for any kind of luxury or comfort, you'll be bummed.

"We haven't communicated for a few years," write John and Cynthia Tindle, and Mattie, their "famous boat dog" of the San Diego-based Jeanneau 45 Utopia. "Old Mexico hands may recall that the couple cruised Mexico for three years prior to buying a different boat and taking up Caribbean sailing in '02. "We always miss the Wanderer and Dona de Mallorca when we're in St. Barths, but we're still loving it here. We noticed that a few months ago you ran a photo of Darwin, the boat dog on the Tobago 35 Irie. We'd like to know if they ran into any problems with Darwin in Antigua or on their way farther south. They can reach us at jtindle3@aol.com. I would appreciate it."

After 11 years of cruising, both in Mexico and the Caribbean, Mattie still doesn't appear to be suffering from an excessive amount of stress.
Here’s What To Do:

**Write your ad.** Indicate category. Remember price and contact info. We make final placement determination.

**Count the words.** Anything with a space before and after counts as one word. We will spell-check, abbreviate, edit, as necessary.

**Mail your ad** with check or money order, deliver to our office; OR, for the best – and most exposure – of your classified ad...

Submit your ad safely online with Visa, MasterCard or AmEx at: www.latitude38.com

Ad will be posted online within two business days, appear in the next issue of the magazine, and remain online until the following issue is released.

**Deadline is ALWAYS the 18th at 5 pm** for ad to appear in the next issue.

Due to our short lead time, deadlines are very strict and include weekends & holidays.

Sorry, but...

- No ads accepted by phone
- No ads without payments
- No billing arrangements
- No verification of receipt
- We reserve the right to refuse poor quality photos or illegible ads.

**WHAT’S IN A DEADLINE?** Our Classified Deadline has always been the 18th of the month, and it’s still pretty much a brick wall if you want to get your ad into the magazine. But it’s not so important anymore when it comes to getting exposure for your ad. With our new system, your ad gets posted to our website within a day or so of submission. Then it appears in the next issue of the magazine. So you’re much better off if you submit or renew your ad early in the month. That way your ad begins to work for you immediately. There’s no reason to wait for the last minute.

**DINGHIES, LIFERAFTS AND ROWBOATS**

http://sites.google.com/site/sprintsport/port23/laserpico or tanyak@gmail.com (415) 994-3500.

ADVERTISER’S INDEX - cont’d
Custom Steel Pilothouse LRC 63 (1976)
Ready-to-go global cruiser just completed $100,000 maintenance/upgrade service. Twin 185hp Perkins for economy and dual gensets. Three cabins + crew’s quarters. Asking $389,000

Swan 53 (1987)
Mistress has been exceptionally well maintained by a professional crew and is a beautiful Swan 53. Her factory-installed aft companionway makes her much more accessible than the standard 53. She has a new teak deck and is in excellent shape. Sale Pending

Sydney 36 CR (2006) w/fractional rig, 4 swept-back spreaders, non-overlapping head sail, high aspect ratio & very long waterline. Competitive IRCracer. Fitted w/all factory options incl. electric winches, ideal for short-handed sailing. Consider trade such as ‘picnic’ style powerboat. Encore’s fast, fun & easy to sail. $279,000

Beneteau First 40.7 (2001)
*White Dove* has just won the 2008 West Coast IRC Championship and is in top condition. Asking $160,000

DeVries 86’ Motor Vessel (1949/1999)
‘Elegant’, ‘Exceptional’, ‘Exquisite’ are just a few words that easily characterize this vessel. *MV Far Niente* clearly defines the term ‘Classic Motor Yacht’. Asking $1,950,000

Custom Steel Pilothouse LRC 63 (1976)
Ready-to-go global cruiser just completed $100,000 maintenance/upgrade service. Twin 185hp Perkins for economy and dual gensets. Three cabins + crew’s quarters. Asking $389,000

Little Harbor 51 (1996)
A very comfortable Ted Hood designed pilothouse with full stand-up headroom and 360° visibility. Set up for shorthanded sailing and superbly maintained by an experienced owner. Asking $669,000

Sydney 36 CR (2006) w/fractional rig, 4 swept-back spreaders, non-overlapping head sail, high aspect ratio & very long waterline. Competitive IRCracer. Fitted w/all factory options incl. electric winches, ideal for short-handed sailing. Consider trade such as ‘picnic’ style powerboat. Encore’s fast, fun & easy to sail. $279,000

Herreshoff ‘Mobjack’ Ketch (1989) This classic wooden ketch took more than 8 years to complete. Exceptionally well maintained w/a very comfortable and appointed interior layout, she has excellent sailing characteristics for cruising in all weather conditions. $180,000

Beneteau First 40.7 (2001)
*White Dove* has just won the 2008 West Coast IRC Championship and is in top condition. Asking $160,000

See at: www.marottayachts.com

43' HANS CHRISTIAN, 1978
Classic offered for sale by original owner. New teak decks (this was a $40,000 job alone!), Awlgripped hull, updated interior, optional larger diesel and Telstar performance keel. $179,000

See at: www.marottayachts.com

45' HUNTER 450, 1998
All the amenities with two spacious staterooms, two heads, and HUGE comfortable salon. Transferable Sausalito Yacht Harbor slip. $169,500

See at: www.marottayachts.com

38' HANS CHRISTIAN, 1984
Great shape and extensively updated, epoxy barrier coated bottom, stunning professionally maintained brightwork, low time on Yanmar diesel, heavy duty offshore dodger, much more. $134,900

See at: www.marottayachts.com

48' C&C LANDFALL PILOTHOUSE CUTTER, 1980
Spacious raised salon performance cruiser that’s competitively priced and lying in a transferable Sausalito slip. $129,500

See at: www.marottayachts.com

38' HANS CHRISTIAN, 1979
Shows well inside and out with the Burmese teak interior in particular showing beautifully. Hull recently buffed and waxed. Teak decks in fine shape as well. $99,000

See at: www.marottayachts.com

37' HUNTER 376, 1999
Very spacious, light and airy, this vessel shows as new; must see to appreciate. Out-of-country owners motivated; offers encouraged. Sausalito Yacht Harbor slip can be arranged. $99,000

See at: www.marottayachts.com

50' GULFSTAR KETCH 1977
Extensively refit for a cruise that was never taken — new sails, rigging, electronics, stainless steel parts, hatches, refinished interior, etc., etc. $79,000

See at: www.marottayachts.com

41' MORGAN OUT ISLAND, 1979
Center cockpit ketch. Never cruised and fresh water kept, she shows much newer than actual age. Note all new stainless steel parts. $79,000

See at: www.marottayachts.com

43' BENETEAU, 1989
Most competitively priced Beneteau of this size on the market. $70,000

See at: www.marottayachts.com

39' CAL, 1982
Boat’s Bristol, shows MUCH newer than actual age, nicest Cal we’ve ever seen. $69,500

See at: www.marottayachts.com

38' INGRID, 1984
Clean, never cruised one owner example with low time on diesel engine (only 155 hours), custom finished interior, much more. $69,500

See at: www.marottayachts.com

43' HANS CHRISTIAN, 1978
Shows well inside and out with the Burmese teak interior in particular showing beautifully. Hull recently buffed and waxed. Teak decks in fine shape as well. $99,000

See at: www.marottayachts.com

50' GULFSTAR KETCH 1977
Extensively refit for a cruise that was never taken — new sails, rigging, electronics, stainless steel parts, hatches, refinished interior, etc., etc. $79,000

See at: www.marottayachts.com

41' MORGAN OUT ISLAND, 1979
Center cockpit ketch. Never cruised and fresh water kept, she shows much newer than actual age. Note all new stainless steel parts. $79,000

See at: www.marottayachts.com

43' BENETEAU, 1989

ELECTRONICS MECHANICS RIGGING

540 West Cutting Blvd is the ‘Boathouse’. Fall Seminars are now scheduled, visit kkmi.com for details.

I have used several boat yards in the Bay Area over the years and KKMI is heads above the rest. Having a project manager and staff that communicates what they are doing, meeting project timelines, making suggestions, and continually keeping you aware of budget, all while doing great work, made this my best experience by far. They pay attention to the small details that really matter to you as a boat owner.

Mark Tucker, Hans Christian 33 ‘Sabbatical’
