Damn (fine) Yankee

Geoff and Brad Clerk call Flotsam, their Yankee One-Design, a “thoroughbred.” Designed in 1937 and built in 1963 by their great uncle, Alameda boat builder John Linderman, the class website says Flotsam incorporated fir full-length planks, laminated oak frames, and bronze reinforcements where necessary and desirable.

Geoff and Brad’s dad had chartered the boat in the late 60’s, and they were thrilled to be able to purchase her in January of 2004. Determined to keep the boat traditional and confident of the boat’s soundness, the Clerks made few changes.

One change they did agree on: new Pineapple Sails. They knew the folks at Pineapple Sails would listen to their concerns and respect the boat’s traditional rig, while designing and building quality sails with performance in mind.

Powered by Pineapples, Flotsam has placed first in the Alameda Interclub Series two years running and won the Marconi II division of last month’s Jessica Cup.

Traditional boat or modern, race or cruise, big boat or small – we pay attention and we get it right, making sails right here in Alameda. Give us a call.

YOUR DEALER FOR: Musto foul weather gear, Dubarry footwear and Headfoil 2

Sails in need of repair may be dropped off at:
West Marine in Oakland, Alameda, Richmond or Berkeley;
or Svendsen’s in Alameda.

Offering Choices, Not Compromises

Cool New Boats

**Wauquiez 47 Pilot Saloon**

NEW FOR 2006

The first U.S. boat will be available for viewing on the West Coast for a few weeks before going cruising.

**Island Packet 440**

2 Sold to Bay Area Clients

The ultimate bluewater cruiser. The new 440 is a solid, no nonsense, go anywhere cruising boat. Island Packet prides itself in providing the highest quality construction standards in the industry, boat by boat.

**Island Packet 445**

At Our Docks

One of our few remaining 2005 models and priced to move. A great liveaboard bluewater cruiser with rock solid construction and superb finish.

**Beneteau 523**

At Our Docks

This beautiful and swift Farr designed offshore cruiser has all the elegance, detail and amenities you expect from Beneteau.

**Beneteau Swift Trawler 42**

In Stock

Beneteau has been building offshore power boats since 1918. The new Swift 42 cruises at 22 and hits 28 if you are in a hurry. Elegant and fast.

Copyright 2005 Latitude 38 Publishing Co., Inc.

Latitude 38 welcomes editorial contributions in the form of stories, anecdotes, photographs – anything but poems, please. We gotta draw the line somewhere. Articles with the best chance at publication must 1) pertain to a West Coast or universal sailing audience, 2) be accompanied by a variety of pertinent, in-focus digital images (preferable) or color or black and white prints with identification of all boats, situations and people therein; and 3) be legible. These days, we prefer to receive both text and photos electronically, but if you send by mail, anything you want back must be accompanied by a self-addressed, stamped envelope. Submissions not accompanied by an SASE will not be returned. We also advise that you not send original photographs or negatives unless we specifically request them; copies will work just fine. Notification time varies with our workload, but generally runs four to six weeks. Please don't contact us before then by phone or mail. Send all electronic submissions to editors@latitude38.com, and all snail mail submissions to Latitude 38 editorial department, 15 Lockert Ave., Mill Valley, CA 94941. For more specific information, request writers' guidelines from the above address or see www.latitude38.com/writers.htm.

November, 2005 • Latitude 38 • Page 7
MULTIPLE STYLES AND FINISHES
Winches available in aluminum, polished bronze, chrome and stainless steel, in 1-, 2-, 3-speed and self-tailers. Powered electric or hydraulic.

POWER-GRIP JAWS
Self-tailing jaws are shaped for easy line entry and optimum grip. Under line pressure, the spring-loaded upper jaw adjusts to accept a variety of line sizes. Teeth grip evenly with or without load.

ADJUSTABLE STRIPPER ARM
Stripper arm adjusts to multiple positions after winch is mounted. Sculpted to smoothly feed line into self-tailing jaws.

HIGH-STRENGTH ROLLER BEARINGS
17-4PH stainless steel roller bearings ride in a high-strength plastic cage. Low-friction plastic eliminates corrosion between bearings and cage. The wide-diameter center stem allows room for more bearings, reducing the load for a more efficient winch.

LOAD-CARRYING GEARS
Load-carrying gears and pins are 17-4PH stainless steel for strength and durability.

SUBSCRIPTIONS
- Enclosed is $30.00 for one year
  Third Class Postage (Delivery time 2-3 weeks; Postal Service will not forward third class, so you must make address change with us in writing.)
- Enclosed is $55.00 for one year

TAYANA 53 PERFORMANCE DECK SALOON

Designed by
Robb Ladd

Tayana Models:
37 • 42 • 48
52 • 55/58
64 • 65

Tayana Yachts is proud to introduce the 1st of it's new designs for fast performance cruising yachts. With a Kevlar reinforced hull, twin steering stations, fin performance keel and spade rudder, this blue water yacht will place Tayana in the forefront of world yacht production. The interior will offer a beautifully finished raised saloon for optimal viewing, 3 or 4 custom staterooms and spacious storage.

OUR BROKERAGE LISTINGS – TAKE A LOOK!

November, 2005 • Latitude 38 • Page 15
Along with a great place to berth your boat, San Leandro Marina offers you a wealth of recreational opportunities...

- 27 holes of championship golf
- A waterfront hotel
- Fine dining at 2 restaurants overlooking the water
- 40 acres of shoreline park and picnic sites
- 300 acres of tidal wetlands on the Bay Trail
- 2 active yacht clubs
36' CS, 1986, $59,900. If you're looking for a 'turn key' vessel to cruise the Bay and beyond, you've found it. Updated electronics, furling main by Hood and Harken roller furler for headsail. Boat hauled and painted and new standing rigging in 2004.

38' Ingrid Cutter Rig, 1989
$90,000
A superior ocean passage-maker, her full keel gives her directional stability, second to none. Currently on the hard, this yacht is undergoing an extensive refit.

39' Ocean Alexander Sedan, 1986
$169,000
Professionally maintained, this spacious 39-ft yacht offers the comforts and amenities of a yacht twice its size. Everything considered – age, size and style – this Ocean Alexander is practically perfect. Hauled and surveyed in 2004.

27' Ericson, 1977
$12,500
A great day sailer for San Francisco Bay, but features accommodations for fun overnight trips. An excellent value – make offers!

35' Viking Express, 1985
$149,000
Viking's entry into the Express market. Offers an exceptionally stable ride into headseas. Set up as the ultimate fishing boat, this vessel underwent a major refit in 2004 & 2005 where virtually every system was checked, repaired or replaced with new.

47' Nova CPMY, 1992
$198,000
Safe, economical, comfortable offshore yacht, perfect for the Northwest in summer and Mexico in winter. August 2004 hull survey and January 2005 engine and generator survey.

34' Californian LRC, 1982 $69,000
Enjoy a day on the Bay or just sit at the dock and enjoy the views. This is the perfect weekender for someone looking to spend some time in the City. Twin diesel engines also make this a great Long Range Cruiser.

36' Ocean Alexander 39, 1986
$59,900
A tough, practical sportfishing platform. This boat also has overnight accommodations in the forward V-berth with convertible dinette. Enclosed marine head. Good storage in cabin below deck. Offers function and comfort for your fishing adventures.

47' Nova CPMY, 1992
$198,000
Safe, economical, comfortable offshore yacht, perfect for the Northwest in summer and Mexico in winter. August 2004 hull survey and January 2005 engine and generator survey.

34' Californian LRC, 1982 $69,000
Enjoy a day on the Bay or just sit at the dock and enjoy the views. This is the perfect weekender for someone looking to spend some time in the City. Twin diesel engines also make this a great Long Range Cruiser.
Bonita G II has just returned from cruising in Mexico and is ready to go again. She’s now available due to a change in owner’s lifestyle. In preparation for resale, $30,000 was spent in upgrades and maintenance items. She will serve you well as a great coastal cruiser or liveaboard. **$229,000**

55’ OUTREMER 55-L CAT, ’00 $539,000
Her high-tensile carbon mast with Kevlar rigging and long waterline make her motion at sea smooth and efficient.

36’ UNION POLARIS, ’79 $70,500
Island Trader is a fully equipped cruising vessel with full keel, canoe stern and cutter rig – a proven bluewater passagemaker.

35’ CHEOY LEE, ’80 $55,000
We have motivated sellers who are ready to pass this jewel along to someone who’ll care as much for her as they did.

25’ SEAWARD, ’00 $49,000
Her sweet lines are addicting to the eye and her practical features makes her an irresistible temptation. Trailer included.

54’ OUTREMER 55-L CAT, ’00 $539,000
Her high-tensile carbon mast with Kevlar rigging and long waterline make her motion at sea smooth and efficient.

48’ MAPLE LEAF, ’78 $159,900
An excellent bluewater boat for a cruising couple or family. Sabbatical has already circumnavigated the globe.

27’ NOR’SE AFT COCKPIT, ’78 $69,900
This Lyle Hess design is a rare gem with beautiful lines and a serious offshore pocket cruiser in top condition. Trailer included.

45’ HUNTER PASSAGE 450 CC, 1999
43’ JEANNEAU DECK SALON, 2002

THE NAME IS BOND: After a glorious christening party at KKMI last month the Swan 601 Moneypenny is now headed to Florida for the winter where she’ll race against other 601s for the very first time. The development of a one-design class such as the Swan 601 doesn’t happen overnight…so too is the building of a yacht of such detail and beauty. With an active fleet now racing in Europe it’s very exciting to see the Swan 601 Class now taking shape in the USA. For photos of her christening…visit www.KKMI.com.

SOLD & HAPPY: Are you thinking of selling your boat? Have you been a past client at KKMI? If you’ve answered yes to the above then you owe it to yourself to call Graham Macmillan, KKMI’s yacht listing manager. Over the past year KKMI’s Yacht Brokerage has been very busy and they are looking to represent other owners of yachts they’ve serviced in the past. One reason for such success is their ability to support what KKMI sells…and vice versa. Buying a second hand yacht can be a worrisome experience, but not so when you have the backing of KKMI. They’ll be there for you over the long term.

LOOKING GOOD FOR 70: Last month the schooner Santana celebrated her 70th birthday with a party that by all accounts observed she has never looked better. It was a joyous event attended by past and present owners, family and friends. Also present were representatives of the original owner of Santana, W.L. Stewart II, with three generations of family sailors and the tradition continued with her rechristening by Sarah and Erica Kaplan. For more information and pictures of the event please visit www.thesantana.com.

MORE THAN JUST CLASS: The New York Yacht Club has developed a new One-Design Class and the St. Francis Yacht Club has been asked to join the fleet. With 25 yachts already sold, it’s been declared a winner. With plans in place for this yacht to sail in Europe, the new Swan 42 Class is destined to become an international one-design…which is very exciting. St. Francis Commodore Doug Holm is hosting a cocktail reception Thursday, November 17, 2005, at 6:00 pm, where you’ll also be able to meet the Rear Commodore of the NYYC and learn about this new exciting new yacht. Contact erica@kkmi.com for more information.

Change a life.
Donate your boat.

Support local and regional programs for children and young adults through the charitable donation of your boat.

The Pacific Marine foundation is a 501(c)(3) non-profit organization funding regional programs such as Northwest Youth Services, Sea Scouts, Boys & Girls Clubs, and local public school education foundations. A substantial tax savings and the possibility of a partial cash sale makes a charitable donation a very attractive alternative for any owner who is considering selling their well-found power or sailing yacht.

Mariner’s Mentor

“I’ve owned our sailing school and charter business since 1979. People come to us from all over the world because Santa Cruz is a challenging place to learn to sail. It takes a lot to keep our fleet running, and I’ve relied on West Marine since I started the business. You go into West Marine and it’s like going into a candy store! They have everything I want. Rigging parts to head parts to electronics, you name it, we buy it there. We send our students there, and they get addicted to it, too.”

— Capt. Marc Kraft

Captains License Course

U.S. Coast Guard Approved
We are the ONLY sailing school in San Francisco Bay that can offer these courses with on site testing. OUPV (6 pax) Nov. 19 to Dec.10th & 100 TON (Nov.19 - Dec. 18th) This schedule is work friendly. Classes are on weekends and 2 week nights. Call Michael for complete information.

School of the Year

Why do people choose Modern Sailing Academy? We have the most experienced instructors on the Bay. All of our instructors hold a US Coast Guard 100 Ton (or greater) Master's Licenses, representing decades of sailing experience. A leader in safety. Modern Sailing & West Marine staged the largest COB event in history. Sailors from all over the world participated in this 4 day event. Many of the findings will be published in your favorite sailing magazine.

Upcoming Trips with John Connolly

Australia - Whitsundays 2006
The Whitsunday Islands off Australia's East Coast are a mecca for cruisers, with 74 islands, consistent breeze and abundant marine life. Our trips will begin and end at Shute Harbour on the mainland, just a few hours sail from Hamilton Island. February is summer on this side of the equator, so temperatures stay in the low 80s with lots of sunshine. We will be cruising on a luxury Beneteau 50. This trip will offer CBC and ACC certifications. $2250 person/ $4050 cabin
Leg 1: Feb 9 - 19  Leg 2: Feb 23 to Mar 4

Greece & Turkey 2006
The Dodecanese group of islands (14 in all) are on the eastern edge of the Greek Isles in the Aegean Sea. Ancient harbors, peaceful anchorages, and abundant history make this a fascinating place to sail. Both legs will also feature stopovers in Turkey. This trip will offer CBC and ACC certifications. Our yacht for this trip will be a Bavaria 50. $2375 person/ $4275 cabin
Leg 1: May 6 - 16  Leg 2: May 19 - 29

Nov. 5 — Volvo Ocean Race begins with an in-port race at Sanxenxo, Spain. Leg One (6,400 miles from Vigo to Cape Town) follows on Nov. 12. Follow the wet and wild action at www.volvooceanrace.org.

Nov. 15, 1985 — It was Twenty Years Ago Today, from an article titled, Santa Cruz Sweep to Cabo:
Santa Cruz yacht designer Bill Lee had every reason to be in great spirits after Long Beach YC’s second race to Cabo San Lucas last month. For not only had the Santa Cruz 70 Blondie made a clean sweep, but her elapsed time of 3 days, 3 hours and 45 minutes for the 750-mile course smashed the old record by 15 hours. Making it all the better is that the former record had been established by Saga, one of the Nelson/Marek 68s that are the downwind rivals of the SC 70s.

Lee had even more to be cheerful about. Second in IOR-A and fleet was Kathmandu, another SC 70. And that’s not all. Third in IOR-A and third in the 47-boat fleet was the only other SC 70 in existence, Citius. Left in the corrected time dust in the respective order were two Nelson/Marek 68s, a Peterson 66, Ragtime, Merlin and five MacGregor 65s.

In Mexican races and TransPacs, of course, half the bragging rights go with the order of finish. It was Blondie, Citius, the good old Spencer 62 Ragtime, the MacGregor 65 Joss, and Kathmandu.

For Lee, the sweep was no doubt all the more savory for the long time it had been coming. Last spring Blondie had been beaten in Newport Harbor YC’s Cabo Race, even though some of her crew and competitors thought she may have been the fastest boat on the course. Then in this year’s dicey do-we-go-north-or-south TransPac, the SC 70s were skunked by their Nelson/Marek 68 rivals. The result was that even though Blondie and Kathmandu had beaten the N/M 68s in the Big Boat Series, and that Kathmandu had won the early maxi sled Cal Cup, some were wondering if Lee had lost the downwind maxi magic he first staked out nine years ago with Merlin. After this Cabo Race it doesn’t appear that way at all.

The irony of it all is that Lee wasn’t even supposed to go on the race. Tom Blackaller had organized the effort from day one, with Ann Arbor’s Bill Martin as charterer. Martin owns the 1983 Admiral’s Cupper Stars & Stripes; he’s also owned an SC 27 for years.

Lee and his wife Lu had only gone down to Long Beach on Friday, the day of the PHRF start, to go on Blondie’s practice sail and to watch the IOR start the next day. During the trial sail it became apparent the boat had a good crew, but few of them were familiar with a Blondie-type boat. So at 7:30 p.m. the night before the race, Bill and Lu signed on for Martin as tacticians. “Now we’re down here in Cabo without clothes, money, or papers,” he joked over the phone from Cabo San Lucas.

Blondie’s record-smashing crew consisted of Tom Blackaller, Bill Martin, Jack Halterman, Zan Drejes, John Beery, Buz Cox, Bill Elliot, Rodney Pimental, Barton Beck, Chuck Beek, and Lu and Bill Lee.

Nov. 18-19, 1995 — Ten Years After, from a Racing Sheet item titled “San Francisco YC Midwinters”: 

What is Reliable in a Storm and Steers Better Than Your Under Deck Autopilot?

A Monitor Windvane – and it Will Do It For 1/2 the Price!

The first weekend of the San Francisco YC Midwinters, held on November 18-19, was one of frustrating extremes. On Saturday, the 37-boat fleet — slightly bigger than before due to lots of new divisions — enjoyed a 15-mile twice-around windward/leeward in a 12-knot westerly. While the big boats, especially the ’99 Raters’, had a fine time, the course proved too long for the smaller boats, many of whom DNFed as the wind faded. The next day, the fleet dutifully assembled again on the Hard Knox course for the 1 p.m. start — only to encounter heavy fog, no wind, and ultimately the dreaded three shotgun blasts.

“You can’t control the weather,” shrugged race chairman Tim Russell, who did an otherwise fine job of bringing this low-key series up a few notches. Ironically, the sharp eyes of the race committee spotted the Russell-driven J/35 Fever among the gaggle of premature starters in the first start — and Russell neglected to exonerate himself. “It would have been rude to win the regatta in my position anyway,” joked Tim.

Shoreside, the yacht club provided a nice spread of food and free beer on Saturday afternoon. The results weren’t posted until well into the evening, and when they were it was the source of much discussion. Using Jake Van Heeckeren’s still-evolving ORCA (Observed Results Computer Analyzed) scoring system, the course length was bumped after the fact from 15 to 17.5 miles — effectively giving more time to little boats. “It’s the fairest handicap system yet,” claimed Van Heeckeren. “It uses five statistical regressions to come up with an implied course length based on elapsed times and given ratings. The longer course reflects the 3.7-knot ebb tide, which you see favors. . . ”

Jake proceeded to rapidly lose us from there, but we sense he might be onto something worthwhile. Not everyone was quite as sure, but according to Van Heeckeren, only one owner was seriously bent out of shape about the new ‘black box’ scoring system. “People resist change,” mused Jake. “Anything they can’t understand, they tend to automatically reject.”

**Nov. 19-20 —** Pre-Holiday Regatta for PHRF boats and one design classes fielding five or more entries. SFYC, (415) 789-5647.

**Dec. 11-16 —** 2005 Corum Melges 24 World Championship out of the Ocean Reef Club in Key Largo, FL. Local sailors heading down include Philippe Kahn (who has drafted Russell Coutts to do tactics), 16-year-old Shark Kahn (who stunned the yachting world by winning the event in 2003), Seadon Wijsen, and Jeff Littfin. Info, www.2005corumm24worlds.com.

**Jan. 28 —** Three Bridge Fiasco, one of the oddest and most entertaining races ever invented. Details, www.sfbaysss.org.

**Feb. 21-24 —** San Diego-P.V. Race, a 1,000-mile downwind race followed by MEXORC. See www.sdyc.org for more.

The New J/124!

_The J Boats crew will unveil the new 41’ J/124, built for the joy of sailing!_

**INTRODUCTION**

From its large destroyer wheel to the fine teak joiner work and Ultra-leather or suede upholstery below, or simply by the smooth, graceful way it slides through the water, the new J/124 is every bit a sailing yacht...in the best sense of the word. One that is a joy to sail in all conditions with minimal crew and with rare need to employ the auxiliary diesel engine.

Yet, J/124s focus on shorthanded sailing qualities doesn't preclude many days of offshore coastal sailing. Her balanced dimensions are hallmarks of seaworthiness. J/124 is a true escape...away from all the trappings and chores of home. Little-used amenities and complex cruising systems are discouraged where possible. But, all the important stuff is there: An adequate galley and chart table; the accessible top-loading icebox; 6 feet of headroom; three separate sleeping areas; a dodger for all-weather protection; and a cockpit made secure with 14’’ high backrests and seats that are long enough to sleep on.

The high-tech composite hull evolves from Js that have dominated IRC competition in Europe over the past three years. The Hall Spars mast and ACC rudder are carbon fiber. Easiest configuration of all is the optional and removable Hoyt self-tacking jib boom with roller furling jib. If the joy of sailing is a priority...that feel of acceleration and response of a good boat...but you still want to enjoy some overnight comfort on those yacht club cruises, then this is the J for you.

WHAT'S THE DEAL IN AQUATIC PARK?

I have long — meaning the three years that I've been sailing here — been under the impression that motoring inside Aquatic Park in San Francisco is strictly forbidden. One may sail in and anchor, but in order to protect the swimmers for whom the cove is reserved, using an engine is prohibited.

I've anchored in Aquatic three times this summer, and each time boats have motored right in. On more than one occasion, they nearly mowed down a swimmer or two, in flagrant disregard for the rules.

I saw the worst incident this past Sunday, when two Catalina designs motored right in, proceeded to rev their engines to high rpms in both forward and reverse — apparently because they were having trouble maneuvering into a good position to anchor. Seizing the moral high ground, I yelled at them as forcefully as I could, but they ignored me. As we weighed anchored and sailed out of Aquatic Park, they screamed a surprisingly long and varied string of obscenities at us.

So I have several questions, some of them admittedly rhetorical. First, is it true that motoring isn't allowed in Aquatic Park? Second, if so, who, if anyone, enforces the rule? Third, is the park patrolled at all? And finally, wouldn't these particular sailors be happier in smoke-belching, heavy-metal blaring, floating lounges rather than the sailboats they bought?

John Furman
San Francisco

John — According to Bill Doll, former Harbormaster and current Curator of Small Boats at the San Francisco Maritime National Historical Park, you were in error yelling at the other skippers. As the National Park folks interpret the sign, only motorized vessels are prohibited. Since rowing and sailing vessels are capable of other means of propulsion, they are permitted — even sailboats with their engines on. In fact, Doll says it's prudent for sailors to use their motors in the cove because the strong winds and currents make for difficult maneuvering under sail alone. We have to admit, it seems like a little bit of a tortured interpretation to us, but we'll go with it. For one thing, it's easier for a swimmer to hear a sailboat with her motor on than when she's just sailing.

While it's true that people swim everywhere in Aquatic Park, even directly across the entrance, Doll says there has never been an incident between a sailboat and a swimmer — although there have been between powerboats and swimmers. Aquatic Park is apparently a popular place for sailboats to anchor for lunch. There are no moorings, but the park is hoping they might get some in a year or two. All but powerboats are permitted to anchor for 24 hours. If a longer stay is required, a request may be made to Harbormaster John Muir — he's a distant relation of you-know-who — at (415) 859-6786. Aquatic Park is not

patrolled on a regular basis.

We have tremendous respect for the Bay swimmers, so we encourage anyone who takes their boat into Aquatic Park to be extremely careful. If you see a swimmer, please give him/her plenty of room, for that kind of swimming is as much a meditation as it is exercise, and you don't want to ruin it for them.

---

LETTERS

AQUATIC PARK

Latitude rocks! And I have been reading it for 25 years. This is the first time I've written in, however. My question is, when anchored at Aquatic Park on the San Francisco waterfront in front of Ghirardelli Square, where in the heck is the most appropriate place to take your dinghy and go ashore? We went ashore a few times, but never without being told we weren't supposed to be there. It seems like such a wonderful place to go ashore and have a drink or dinner. Am I missing something?

Renee DeMar
Sausalito

Renee — It's a real problem. The aforementioned Bill Doll says there is no place to securely leave your dinghy when going ashore for dinner. You're perfectly welcome to pull your dinghy up on the sand, but you won't be permitted to chain it to any of the lightposts. We're not sure why, but they've stopped mariners who have tried it. During the day, you can leave your dinghy at the junction of the Hyde Street Pier and the sandy beach — but only until 5 p.m. After that, there's no access. So that's not much help if you want to go out for dinner.

---

AN EXTRA VAGANT CRUISING LIFESTYLE ON $3/DAY

You said that you'd love to get reports from veteran cruisers on how much it costs them to cruise in Mexico. So I'm adding my two cent's worth — although my costs will probably establish a baseline.

I cruised Mexico for one year, then spent about another 10 years cruising through Hawaii, Samoa, Fiji, Tonga, Tuvalu, Kiribati, Micronesia, the Philippines, Malaysia, Singapore, and Thailand. This was from 1984 to 1995. While in Mexico, and during the five years I spent crossing the Pacific, I averaged spending one dollar a day — this included maintaining my boat — the 26-ft cat Peregrine that I'd built — and all the various fees. I frequently had less than $100 to my name while cruising.

After reaching the Philippines, I flew back to California and worked as a substitute teacher for six months. Thanks to my
Choosing the right sailing school is about more than just taking a class. Sailing will open up a whole new world for you. New friends — New adventures. You want to find an institution that gives you the lifestyle as well as the sport. OCSC pioneered the sailing campus concept 25 years ago. Our focus is to provide you with instant access to every element of the sport without requiring boat ownership. At OCSC you will learn from the top professional instructors in the country. They know how to make learning fun and you’ll be certified to sail boats anywhere in the world. You have a fleet of boats to choose from ranging from day sailors to state of the art performance yachts. OCSC’s extraordinary location, world-class waterfront facility and full calendar of social and educational activities compare with any yacht club. And most important, you’ll be welcomed into a community where you’ll make friends who share your passion. Please call, click or visit our campus anytime. We look forward to meeting you.

November, 2005 • Latitude 38 • Page 41
newly earned wealth, I was able to cruise extravagantly in Southeast Asia for five more years. By ‘extravagant’, I mean that I never cooked my own meals, drank too much, and so forth. During this five-year period, I lived on $3/day, everything included.

In my opinion, having too much money can actually be an obstacle to cruising enjoyment. When I went cruising on a very small budget, the once gray life I’d been living in California became more colorful and vivid than I ever could have imagined.

I’m just finishing construction of a new boat, a replica of an ancient Polynesian catamaran, and will start cruising again in Mexico this year.

Glenn Tieman
Formerly of Peregrine, 26-ft cat
Oxnard, California

Readers — Glenn is further proof that the biggest impediment to going cruising is not so much money as desire. Of course, the younger a person is, the easier it is for them to cruise on a small boat and small budget.

In the December issue we’ll be publishing an article by Tieman about his unusual cruise. By the way, he spent just $14,000 on materials for his new 38-ft cat, which he’s set to launch and take off cruising on in the near future.

WE CAN’T LIVE THAT CHEAPLY

I want to thank you for your informative and encouraging information in response to my letter asking how much it really costs — boat parts and maintenance not included — to cruise Mexico. We greatly appreciate the extensive information and we’ve had lots of fun showing the responses to all of our friends. And we were delighted to see the follow-up responses from other experienced cruisers.

However, I doubt if we could really live in Mexico on $3/day — unless the country has free happy hours!

Gary Barnett
Seattle, Washington

Gary — For readers who might have missed the larger discussion, we at Latitude think the typical cruising couple in Mexico spends between $1,000 and $2,000/month, which affords them a very pleasant life with lots of meals out and other pleasures. As always, marina slips and lots of drinks and meals in tourist bars and restaurants can bust any cruising budget.

SHOULD WEATHER INFO BE PRIVATIZED?

I've just received a response from Senator Diane Feinstein to my letter opposing U.S. Senator Rick Santorum's (Rep.-PA) National Weather Services Duties Act of 2005, which would basically privatize weather information, the data for which has already been paid for by taxpayers. Her response was noncommittal. She said that she understood my concerns, but didn't say she was opposed to the legislation. That wasn't at all satisfying to me. The only useful information I got is that Senator Feinstein is not on the Commerce, Science, and Transportation Committee currently considering the bill, but that she will "keep [my] comments in mind" should the bill reach the Senate floor.

Jeff Hoffman
San Francisco

Jeff — For what it's worth, the proposed legislation didn't just come out of nowhere, but was in response to the National Weather Service last year repealing its policy against competing with private weather forecasters. According to Santorum, the NWS expanded into areas already served by the commercial weather industry, 14 companies of which are — surprise, surprise, — based in his state of Pennsylvania.

Generally speaking, the government tries not to compete with private business. And even in the marine realm, there has been a precedent of the government getting out of competition with private enterprise. If you're old enough, you'll remember that the Coast Guard used to provide mariners with AAA-type 'boatside assistance' for when mariners ran out of gas, had a dead battery, and so forth. But then private tow companies argued that it was unfair for government to interfere with their providing those services on a for-profit basis. After a brief uproar, the Coast Guard indeed stopped providing that kind of assistance, and the gap was filled by various local and national 'tow boat' organizations. It actually seems to have worked out quite well.

There are clearly cases, though, when the U.S. government has competed, and continues to compete with, private enterprise. For example, the U.S. Post Office is in direct competition with FedEx and other companies for the express mail market.

However, there is a fundamental difference between the Coast Guard getting out of the boatside assistance business and the NWS being asked not to compete with private weather services. The difference is that we taxpayers have already paid for all the expensive stuff, which is collecting and analyzing the data. The private weather companies just want to avail themselves of the taxpayer-provided information, slap their brand on it, and try to market it back to us. It would be analogous to the tow boat companies saying they wanted to be given the Coast Guard vessels and personnel, and all the funding necessary to operate that service under their brand. That obviously would have been ridiculous — which is why we believe that Santorum's proposed bill is also ridiculous, and when and if there's a vote on it, reasonable legislators like Sen. Feinstein will vote it down.

Then again, we wonder if this isn't all a tempest in a teapot. For even if the NWS couldn't compete with private weather products, we think there would be such tremendous competition that it would be offered free all over the Internet. Even right now tremendous weather products are easily available free. For example, in less than a minute we went to www.buoyweather.com, where we learned that at Cape Horn it was blowing 35 to 40 knots with 15 to 23 foot seas at 9 second intervals. It cost us nothing. And if we wanted to pay $29/year, we could get
Great Sails
Great Service!

☑ Certified Quality
All North Quality Sail Service meets North Manufacturing Blue Book Quality Standards for construction and materials... even if your sail was made by another sailmaker.

☑ Custom Sail Washing
North soaks sails in a proprietary solution instead of tumble washing. The result is less wear and a cleaner sail (tough stains are pressure washed).

☑ Expert Upgrades
- Expert Recuts and Reshaping
- Furling & Reefing Systems
- FullBatten™ Upgrades... and more!
All performed by experienced experts who get it right!

seven-day forecasts for any lat-long position on earth.

So while we’re against Santorum’s legislation in principle, and will encourage everyone to fight it, we’re not going to lose any sleep over it. By the way, check out the free part of www.buoyweather.com — it’s terrific fun and extremely informative.

BIG WAVES SURPRISED THE FLEET AT AVALON

For the October 14 to 16 weekend, my wife and I decided we’d like to take our boat from Corona del Mar to Avalon. We’d been to that part of Catalina many times, and were very much looking forward to another weekend at our local paradise. As always, I checked the weather, and noticed that there was a 20% chance of thunderstorms on Sunday. The forecast didn’t cause me too much concern, as the winds were predicted to be light. Since both my wife and I are experienced sailors, we had no qualms about the trip and arrived at Avalon early on Friday.

It was a lovely weekend — until about 5 a.m. on Sunday, when I was awakened by the dreaded sound of strong northeast winds whistling through the rigging. Those familiar with Avalon know that these winds and the seas they create pour right into the normally sheltered anchorage, and have a long history of creating extensive damage.

We were on mooring #187 and pitching heavily in the swell. To make a long story shorter, that morning turned out to be a dreaded experience — and arguably the most stressful of my life with boats. The swells were four to six feet, close together, and accompanied by winds in the low 20s. All the boats in the harbor were hobby-horsing violently.

I tuned in to VHF 12 to hear the Avalon Harbor Department dispatcher calmly, patiently and professionally handle the dozens of calls from frightened mariners. There were lots of problems, as boats were tearing loose from their moorings, tenders were drifting up on rocky shorelines, and waves crashed against the seawall next to Armstrong’s restaurant, exploding two stories into the air. In addition, boats were banging into each other and equipment was being lost overboard.

Even though it was early in the morning, several Harbor Patrol boats responded to the panicked boatowners. I watched in disbelief as some of them braved the dangerous conditions to jump onto the floating dinghy docks that had torn loose from in front of the Tuna Club. I saw a female patrol officer expertly get on to one of these floating docks and help her
Nelson’s flagship, VICTORY, shortly after breaking through the line of the combined fleets of France and Spain at the Battle of Trafalgar on October 21st, 1805. His remarkable and brilliant victory changed the course of history. Although outnumbered by almost two-to-one, Nelson was victorious without losing a single British ship. Unfortunately, he was mortally wounded. Legend has it that to preserve his body for the return voyage to England, it was placed in a large cask of Pusser’s Rum. Since then, Pusser’s has been known to the Royal Navy as Nelson’s Blood and still is today.

Forbes chooses Pusser’s®:
“One of the World’s 10 Remarkable Rums”

Forbes writes, “Pusser’s is still made in the same way it was at the time of Trafalgar – in wooden pot-stills as opposed to modern industrial column-stills. This results in the most full-flavored, intense rum available anywhere.” This is what makes Pusser’s the best navy rum or dark rum in the world. There’s no magic about it.

Pusser’s Navy Rum is the same Admixture rum that was issued daily on board British warships from about 1640 until July 31st, 1970 when the custom was stopped. There was a great outcry from the Jack tars (sailors), and many left the navy because of it. It was Churchill who said, “It takes an endless amount of history to make even a little tradition”. In spite of this, the Pusser’s tradition was cast aside like a piece of flotsam and jetsam until Charles Tobias came along in 1979. He persuaded the Admiralty to give him the formula and the commercial rights to Pusser’s. In return, and on his insistence, the Royal Navy Sailor’s Fund – and numerous other naval charities – benefit substantially from the sales of Pusser’s Rum.

Pusser’s is also the father of grog. Real grog is Pusser’s Rum, dark cane sugar, water and fresh lime juice. There was an Admiral by the name of Vernon in charge of the West Indies Station. He was much loved by his men who had named him affectionately Old Grog on account of the program cloak he often wore. In his days, the sailors received a pint a day of Pusser’s Rum, neat, that is straight up. He was much concerned with what he called the svinish vice of drunkenness caused by the men drinking so much neat rum at one time. Drunkenness was common, discipline vital, and punishment brutal for the insubordination caused by the drinking. Thus, on August 20th, 1740, he ordered that the men’s rum should be diluted with two parts water to one of rum, and that sugar and lime juice be added “to make it more palatable to them”. The men were furious that he should have diluted their daily tot, and thus the mixture grog contemptuously from the name they’d already given him. Unwittingly, Vernon had probably created the world’s first cocktail: grog!

In the hard long days of wooden sailing ships and iron men engaged in eyeball-to-eyeball combat, a good tot of rum before battle could make a big difference. Thus it became customary to “Splice the Main Brace!” (a double rum issue) before battle, and always after victory. This crusty, old term is another piece of the Pusser’s Rum tradition. The main brace was the largest and heaviest piece of rigging on the ship; on VICTORY, Nelson’s flagship, it was 20-inches in diameter. Sometimes in battle, it was badly damaged, which could lead to a disastrous collapse of all the masts and rigging. Splicing it was the most difficult of all rigging tasks, and so to those who spliced it went a double issue of Pusser’s Rum. In the last 100 years or so, to say to a friend, “Let’s splice the main brace!” is to say, “Let’s have a drink!”.

Navy Rums are the most flavorful, and PUSSER’S is the original navy rum. It’s the world’s only rum that is still handcrafted in the inefficient old way in wooden pot-stills as all navy rums were until about 125 years ago. Today, every other rum comes from modern industrial metal stills that are low on cost and short on flavor. As a matter of fact, many popular rum brands have to add flavoring to increase their rum taste. By contrast, Pusser’s is all natural. If you enjoy real things, including real rum in lieu of spiced-up or flavored neutral spirit that may be legally called rum, then you’ll find Pusser’s very special. Its handcrafted distillation produces an unsurpassed flavor that sets it apart from every other rum.

PUSSEY'S costs a little more because it's substantially more expensive to distill in wood than in metal. But we think you and your friends will find the difference worth every penny. For more information, including how to find it near you, visit:

partner, who was in his boat, tow it away. I also watched as two other harbor patrol boats corralled a powerboat that had broken loose from her mooring. They then guided the boat, much to the relief of the distraught owner, out to open water so she could return to Dana Point. All this was happening in what I estimate were six-foot seas inside Avalon Harbor. It was a nightmare.

When there seemed to be a break in the weather at 1 p.m., my wife and I decided to make a dash for open water. I called and asked for assistance in getting our sailboat off her mooring, as I was concerned that the quartering swell would push me into a neighboring powerboat. The officer arrived and expertly and cheerfully led us into an area where I could safely motor out to open water.

I wanted to use Latitude as a forum to recognize the heroic efforts of all the Avalon Harbor Department officers on that Sunday.

John Richard
Jack’s Place
Newport Beach

John — Avalon Harbor officials concede that October 16 was indeed a nasty day in the harbor, and that the mooring you were on was in one of the hardest hit areas. They also noted that this weather and bad swell direction had not been forecast, and therefore had caught them by surprise. But as you note, they responded quickly and skilfully.

From now through March is the most active time of year for the northeasterly Santa Ana winds that are such a threat to Avalon and the rest of the face of Catalina. Some years there aren’t very many Santa Anas and/or they are weak, but other years there are lots of them and they’re strong. Last year was a pretty bad one for Santa Anas, and quite a few boats and tenders were lost on the shore in Avalon Harbor and along the face of the island. The most dramatic loss occurred when the backwash of a wave poured into the cockpit of a 60-ft sportfishing boat at a mooring in Avalon Harbor. She sank at the spot almost immediately.

We have a lot of admiration for the skill and attitude of folks of the Avalon Harbor Department, as they demonstrate that a government-operated — in this case the City of Avalon — marine facility can be superbly run. In fact, it wouldn’t hurt for a couple of state legislators from Hawaii to fly over and see what a well-run marine facility looks like — and maybe poach some of the Avalon staff to replace the current folks overseeing the unintentional destruction of the Ala Wai Yacht Harbor.

ELECTRICAL STORM AT CATALINA

Catalina doesn’t get electrical storms in the summer — at least that’s what I thought until the early morning hours of September 20, when we were aboard our Baba 30 Always Lucky at the A-7 mooring at Emerald Bay, just west of Two Harbors.

The evening before, my wife Linda and I had been sipping cocktails in the cockpit, enjoying the sight of lightning flashes in the distant clouds. The storm appeared to be many miles to the southeast and of no threat to us. So we retired, with our two cats, to the V-berth and didn’t give the weather another thought.

My sleep was interrupted at 3 a.m. by loud thunder and a heavy downpour. The flash of nearby lightning shook me into the realization that we were in real danger. Coming up into the cockpit, I saw the flashes just beyond Indian Rock, about a mile away. It was frightening.

With our aluminum mast sticking up some 40 feet above

part because it’s nasty stuff, but also because we’re not used to it, unless we cruise to places like Costa Rica, Nicaragua, and Panama, where wicked lightning storms are an almost daily event during the wet season. They are also common on the East Coast of the United States. In fact, our friend Morgan Wells got hit by a bolt while taking some folks around the Chesapeake. He lived.

We’re not lightning dissipation experts, but it’s our understanding that lightning wants to get right to the water in the shortest path possible. As such, we like attaching big battery cables from the base of the shrouds to the water — and then staying away from all metal. Your V-berth was probably the safest place you could have been.

WE’VE ENJOYED THE BANTER
I just wanted to let you know how much my husband and I enjoyed reading the banter in recent issues about sailboat names — and to thank you. He’s been wanting to christen our boat Blow Me, but I think the idea has finally blown over.

Debbie Morelli
San Jose

Debbie — We’re not prudes, but for both your sakes, we hope your husband’s original choice for a boat name is indeed history. If he’s really stumped, we suggest the Debbie M, which has a nice ring to it. But asking your spouse to name a boat after you doesn’t always work. Melanie Craft, Larry Ellison’s wife, told reporters that she suggested Larry name his new 450-ft motoryacht after her. It was a non-starter. “He shot that idea down right away,” she said.

⇑⇓

THEY MADE HIM PUT DUCT TAPE OVER THE NAME
With regard to the subject of boat names and good taste, I hope you can stand one more. As a lad back in the mid-‘60s, I recall that Skip Allan — who went on to an illustrious career as a helmsman, shorthanded sailor, and cruiser — used to race a yellow 505 he’d christened Lemon Douche. They wouldn’t let him race in the Mid-Winters at the staid Los Angeles YC unless he put duct tape over the name. I thought it was funny then, and I still do today. I think any 505 sailor would agree. Bottoms up!

Bill Huber
Northern California

⇑⇓

SOME THOUGHT IT WAS IN POOR TASTE
There’s a sailboat in Santa Barbara Harbor’s Marina 2 owned by a witty linguistics instructor at UC Santa Barbara. Of course, the name on the transom had to be Cunning Linguist. While most people got quite a chuckle over the name, there were a few who thought it was in, uhh, poor taste.

There’s another boat named Pisagna, a word one won’t find in any Italian dictionary. It was quite entertaining to be monitoring the VHF and hearing the vessel hailing another station, e.g., “Coast Guard Group Channel Islands, Pisagna . . . Channel 16”.

Juan Richard Posa
Northern California

TONY WAS THERE — LITERALLY — FOR US
Over the summer we made a trip to Monterey with a few other boats from the Oakland YC. While motoring home in a light wind, our motor faltered and died about four hours north of Santa Cruz. After several attempts to restart the engine, I raised sail and headed back towards Santa Cruz, hoping to be able to find someone there to look at our engine. Sailing
THE FINEST SAILS BEGIN WITH THE BEST SAILCLOTH

Our patented woven Vectran® sailcloth performs like the laminates with the durability of Dacron®, especially in roller furling applications. In fact, Vectran® is lighter, lower stretch, and retains its shape over a longer life than any sailcloth we’ve ever offered to cruising sailors. That’s because Hood Vectran® is woven, not laminated to Mylar® film. And you can be sure that each sail we roll out is built by hand, with the same care and craftsmanship that has been the Hood hallmark for 50 years.

To discuss your sailcloth needs – whether our state-of-the-art Vectran® or our soft, tight-weave Dacron® – give us a call today.

companions on another boat were from Santa Cruz, and suggested that I look up 'Tony', a mechanic working out of his dinghy at the harbor. They didn't know his last name or have a phone number, but assured us that "everyone knows Tony."

After sailing for about 30 minutes, I tried the motor again, and it ran well the rest of the way to Santa Cruz. Several times I was tempted to turn north and continue the trip back home, but decided not to risk the engine stopping again. On approaching the harbor, I called ahead for docking instructions and to get Tony's number. I was assigned a slip, but nobody in the harbor office knew who Tony was. However, as we motored into the harbor, a dinghy pulled alongside, and a guy with a friendly face said, "Hi, I'm Tony." He helped us dock our boat.

We told him we wanted him to check out our engine so we'd feel confident heading north the next day. He checked our engine, and ended up replacing fuel filters, as well as tightening and bleeding fuel lines. He also went through the whole process with me, making sure that I'd know how to do it, too. He was done in less than an hour, and only billed us his minimum service charge. In addition, he called us when we got home to make sure we didn't have any further problems.

We're sure glad we found him — or more accurately, he found us. His full name is Tony Munda, he monitors 16 and 9, but can also be reached at (831) 419-8112.

AVOID EXCESSIVE HYPERVENTILATION

My wife and I are active coastal cruisers. We've spent three years in Mexico, and a year in Costa Rica and Panama. We cruise with a powerboat but — don't tell anyone — we'd seriously consider a sailing cat if we could afford one. We're also avid readers of Latitude.

I read your item about 'shallow water blackouts', which can happen when free-diving, a sport that is becoming more popular with cruisers. I'm an avid free-diver and a member of the Long Beach Neptunes, which is a group of free-divers who spear fish while breath-hold diving. We shun the use of scuba while hunting.

I've lost three friends to this insidious condition which you correctly referred to as 'shallow water blackout'. As you pointed out, it is a serious consideration for dedicated free-divers. It generally — and I would like to stress the word generally — affects accomplished free-divers who are fairly new to the sport, in good physical condition, and who have a strong competitive nature.

However, the real culprit in SWB may very well be the act of hyperventilating just prior to the dive. As most of us know, hyperventilating will extend the length of a breath-hold dive. If one can stay down longer, it's logical to conclude that one may also be diving deeper. Length of dive and depth of dive affect the onset of SWB.

A breath-hold diver's desire to breathe while underwater is not triggered by a lack of oxygen, as might be expected. The urge to take a breath is caused by a buildup of carbon dioxide. Hyperventilating does not cause your body to take on more oxygen, but rather lowers the amount of carbon dioxide that is normally present in your lungs. By lowering the level of this gas in your system, you effectively postpone your desire to breathe. While postponing the desire to breathe, your body runs out of oxygen, you pass out underwater and drown.

Unfortunately, there are no warning signs for the onset of this syndrome — nothing tells your body it’s time to breathe. Some even suggest that it could be a pleasant way to die as there is no gasping for a breath of air.

When I first started free-diving, I would hyperventilate — 20 to 25 exhalations. It worked, as I could dive longer and deeper after excessive hyperventilating. Dives to 60 and 70 feet were possible, though difficult. I knew there was some risk involved, but all the good divers did it. As I got older and less inclined to take risks — maybe that’s part of getting older — I realized how foolish it was to hyperventilate excessively. I now make three shallow exhalations prior to a dive. I don’t dive as deep or stay down as long, but my comfort level with the sport is much greater. It’s probably smarter to avoid hyperventilating completely, but a little risk in life is an acceptable trade off if it allows me to enjoy a sport that I’m passionate about.

Your advice about diving with a buddy is certainly prudent. The only diver I know of who survived SWB did so because of his alert diving companion. However, free-divers, especially those who spear fish, tend to go their separate ways, even when diving with a buddy. The only way buddy diving will work is if your buddy stays on the surface and does nothing but watch the descending diver. This practice will only work if the water visibility is greater than the depth to which you are diving. Unfortunately, spearfishing is a macho sport. The guys and gals — there are a few very accomplished gals who shoot fish — are reluctant to ask their diving companion to stand guard while they hunt.

My humble advice for cruisers who free-dive is to avoid excessive and deep hyperventilating. And, if you feel safer diving with a companion, understand that the surface safety-diver, your buddy, must keep you in visual contact during the entire dive.

Here’s the good news: Casual snorkelers, such as most cruisers, generally have nothing to fear from SWB. Keep up the good work, you do a great service to the cruising community — even us powerboaters!

Tom Blandford
Imagine Me and You
Two Harbors, Catalina Island

Tom — Thanks for sharing your expertise.
As for sailing cats, it’s a shame they are so expensive, because we truly believe that they make better powerboats — more spacious, stable, economical, and fun — than ‘real’ powerboats. And when the conditions are right, they are so fun and easy to sail.

† CREW NEEDED IN MONTEREY

Here’s my problem. I’m an avid sailor, I have years of experience, have owned four different boats, and own a tried and true, well-found boat at present. But I have no crew! I’ve taught quite a few people how to sail, some at their request and some by invitation, but all have either moved, retired, changed hobbies or died. I berthed my boat at Sierra Point in Brisbane for the last eight years, but when I moved down to Monterey — I finally got a slip — I lost more crew. I know you run the Crew List every spring, but can’t wait until it comes out. Can you get the word out?

Anybody out there care to sail Monterey Bay? Guys, gals, couples — it doesn’t matter. I just want to go sailing and want some company. Email me at donfly@sbcglobal.net or call Don at (831) 663-0208 or 596-2903.

P.S. I’ve been a fan of your great mag since about the time it started, and would like to be one of the many people to say

congrats on your success. Back then did you ever imagine that it would turn out like this?

Don Fleischer
Cal 36, Whispering St
Monterey

Don — Normally we’d have shuttled your request off to the Classy Classifieds, but since you’re down in Monterey, we’re going to make an exception just this one time.

When we started Latitude in 1977, we determined that we’d never be able to sell more than 14 pages of ads, and that the magazine would never be more than 48 pages. Obviously, we didn’t have any idea what we were doing, but we did have — and still do have — a lot of passion. We owe our success to an informed and intelligent readership, and a terrific, hard-working staff.

‡ I DESPERATELY NEED TO CHANGE THAT NUMBER

Help! I’m on the Crew List — and very happy with the results. But my phone number changed, and I desperately want to change the number that is shown online on your website. I’m getting hits on my email address, and they are paying off, but I realize that I am not getting the phone calls and why.

Please, please change the phone number. Here is my info:

Men To Crew On A Cruising Boat. dave.berke@sbcglobal.net. David Berke, 40, (408) 406-7872, exp 3/wants 1,2,3,4,5,8/offers 1,2,3,4,7,8 (dive master, private pilot). My new cell number is: 408-458-6044.

Here’s an idea of how the Crew List has worked for me over the years. My first hit got me aboard the N/M 56 LeJour for the ‘01 Ha-Ha, which was great. I’m currently aboard the F/P 56 cat Dolce Vita, which I sail on the Bay and will be taking south to Mexico this month. Mai, the owner, got my name from the Crew List. By the time this issue hits the streets, I will have flown to Rome to board the Bruce Roberts 58 Amor Fati. The San Diego owners got my name from the Crew List, flew to San Jose to meet me, shook hands, and away we go. I plan to sail from Rome to San Diego via the Panama Canal.

Dave Berke
San Jose

‡ OUR SHELTIE GOT AROUND . . . THE WORLD

In response to the letter from Andrew Hartman, who was wondering if he should take his sheltie cruising with him, we think the answer is ‘yes’.

Our family of five, with our sheltie Hogan, departed San Diego in 1997 on a circumnavigation which we completed in 2001. Hogan was a wonderful addition to the crew as the security chief, watch companion and ice breaker for the crew of Windflower! I’m not sure, but he may just be the first sheltie to have circumnavigated on a private sailboat. True, we didn’t go to New Zealand due to restrictions, and never planned to stop off in Hawaii anyway, but overall, he never caused us to feel as if we missed out on a single thing. During our cruise, we never stayed at a marina and only Med-moored a couple of times.

Being a family boat, we pretty much had someone on the boat all the time. We did take a couple of inland trips in Mexico and Greece, but easily found helpful locals to watch after him and the boat while we travelled a bit. Hogan was a ‘boat dog’ from two years on, and stayed on the boat full time even in
Do you have an adventurous spirit? Have you ever wanted to see first-hand the rich marine life described by John Steinbeck in *The Log From the Sea of Cortéz*? Do you relish the idea of a hands-on experience of sailing with fellow shipmates along the rugged California coastline as Richard Henry Dana did in *Two Years before the Mast*?

Then join us for Adventures Seaward! Sail aboard the 82’ classic schooner SEAWARD as she journeys along the California and Baja coasts and into Mexico’s ‘Secret Sea’, the Sea of Cortéz.

Learn traditional & modern seamanship from professional mariners
Explore pristine islands & shorelines  ★ Discover abundant marine life  ★ Dine on delicious meals & the fresh catch  ★ Enjoy the warm hospitality of the real Mexico ★

Adventures Seaward will take place aboard the staysail schooner **SEAWARD**. Built in 1988 to the highest standards and well-equipped for blue-water cruising, the 82’ US Coast Guard-inspected vessel boasts a sturdy steel hull, beautiful wooden decks and comfortably appointed below decks.

**SEAWARD** is the flagship of Call of the Sea, a nonprofit educational organization dedicated to connecting people to the sea through the experience of sailing traditional vessels.

Leading Adventures Seaward is Captain Alan Olson, who has taught sail training with Call of the Sea for over 20 years. In addition to expeditions in the Atlantic Ocean and throughout the Pacific as far away as China, this will be his 11th journey to Mexico. Captain Olson holds a US Coast Guard 100-ton Master’s License.

San Diego. He got plenty of exercise running up and down the decks — and spinning circles, herding all the dinghies going by to get a good look at the nutcase on Windflower. He understood that the front deck was his 'backyard', learned to hold it in bad weather just like the rest of us, and wore his safety harness whenever he went forward at sea. We could have taken him off the boat in most places, but we didn’t want him to contract foreign bugs and so forth. Besides, he was a fish out of water on land.

After arriving back in San Diego, he passed away doing what he loved best — being with his people. After careful consideration, and since the kids are all grown up, we added a new member to our crew. Yep, a sheltie named Salty. He’ll be seeing you out there as we plan to escape again in 2007.

Caryn, Gary and Salty Burger

San Diego

CRUISING IS LIKE STARTING A RELATIONSHIP OVER

With the start of a new cruising season, we aboard Pizzazz — who have been out for quite a few years now — would like to share some thoughts on relationships. Cruisers spend lots of time preparing their boats, but many don’t prepare for what sometimes is the darker side of cruising — the stress cruising can put on relationships. We don’t care how long you’ve been married, when you live together 24/7 in a relatively small space, the changes are huge. It’s almost like starting a new relationship, as there are so many new things that you’ll learn about each other.

We think relationships are like bank accounts, and that you’ve got to start making deposits so when there is the inevitable withdrawal, the relationship won’t be bankrupted. To our way of thinking, the key to happiness afloat is simple: having a strong relationship by constantly making deposits and limiting withdrawals.

You make deposits by building your spouse or partner’s confidence, spending special time together alone and ashore, remembering cards and gifts for birthdays and anniversaries, taking romantic walks on the beach, saying “I love you,” encouraging visits home, and so forth. Withdrawals would be anything that scares or causes stress for a spouse — usually the woman. These would include yelling, criticism, fighting, rough passages, wet dinghy rides or landings, dragging anchor at night, having too many guests over, a dinghy that isn’t reliable, and so forth.

As such, if you’ve had big withdrawals — such as a rough passage followed by a dinghy dump in the surf — you have to remember to slow down and make some huge deposits. So many of the withdrawals are weather-related that we recommend trying to become an expert on the weather. Your relationship is worth it! Other withdrawals can be rectified by just spending some real money. Get a bigger anchor so you won’t drag. In fact, get the really big one! Get a good dinghy that keeps you both dry in most conditions, and have it powered by a reliable outboard that’s easy for her to start.

In a lot of instances, men can help reduce their spouse or partner’s stress and fear by getting them involved in everything. Knowledge and experience build confidence and pride. For example, Lourae always steers our boat in tight quarters, such as at the fuel dock or in marinas, because she can back up like an expert. She’s an expert because she practiced by backing up every time we weighed anchor.

Cruising is all about potential for couples. The potential to destroy a relationship, or the potential to develop a closer and more loving relationship than ever. It should be a priority.
The new J/65 will be the flagship of almost any cruising fleet she joins and will be a real head-turner when she decides to strap on the racing sails and go for the silver.

– George Day, Bluewater Sailing

Into a luxury yacht market populated by vessels more distinguished by interior appointments and professional crew than sailing qualities, J/Boats introduces the fast new J/65 cruising/racing sloop that will be more fun for its owners to sail. The first J/65 has been delivered and is being commissioned in San Diego.

Hull #1 is optimized for ‘high performance global cruising’, with an extensive systems package (AC/heat/genset/inverter, etc.), bow thruster, hydraulic winches, hydraulic furler/windlass package, and a 9-ft draft all-purpose keel. Hull #2 is optimized for distance racing with all the creature comforts of elegant cruising including electric winches and heads, a full, warm, cherry-wood interior, a custom-made wine locker, and LCD video and stereo throughout. To add to performance, her ends and deck have been done in strong, lightweight carbon.

Staying true to the philosophy that comfort at sea translates into comfort at the dock, J/65’s interior delivers both on style and function. There are three private cabins, a large main salon, a large navigation station, spacious galley and an abundance of storage. This ocean-proven layout allows secure fore and aft crew movement below, even in rough conditions. Owner customization of the interior layout is contemplated within the confines of the structural/systems layout.

As with all J/Boats, the J/65 has been designed for exceptional sailing performance whether racing or cruising while offering accommodations for couples and families who want to have fun enjoying days or weeks at sea.

A J/65 will not sit still for long… call for an appointment to view the flagship of the J/Boat fleet.
and with a little bit of effort, every couple can do it.

Lourae & Randy Kenoffel
Pizazz, Beneteau 500
San Francisco / Caribbean

Lourae — We think it’s hard to generalize when it comes to cruising relationships — except to say that if one person is miserable, the relationship and the cruising aren’t going to be so hot. So we agree that at the start of a first cruise, couples need to be particularly supportive of each other. And if anything, the man should be particularly aware of this, because going cruising was probably his dream.

Because of the importance of couples getting along, we asked Aphrodite, the goddess of love who was born from sea foam, to share her Seven Suggestions For Sailors Who Don’t Want To End Up Single:

1) The smaller the boat, the better the man needs to treat the woman. She’s not looking for prestige, but personal space.
2) Every woman must have some private space on the boat that is hers alone. Be generous with it — perhaps an entire quarter berth. And then keep your dirty underwear and greasy tools out of that area.
3) Keep it clean. The only thing women hate more than a dirty boat is a filthy head.
4) Keep yourself clean. Women also appreciate a clean and well-groomed partner.
5) The woman gets to choose how much she wants to participate in the operation and maintenance of the boat. Don’t whine if she declines in those areas, because ‘singlehanding’ isn’t that bad if it still includes companionship and sex.
6) The woman gets to opt out of any passage she wishes, for whatever reason she wishes. If she’d rather fly home to spend time with family and friends while you sail the boat from Mexico to the Marquesas, support her wish.
7) Women like to be taken out to dinner, visit the salon, occasionally stay in a hotel, and feel like they can fl

LETTERS

DON’T CRUISE SOUTH WITHOUT WIFI!

You absolutely have to tell all the cruisers to get their WiFi going before cruising south to Mexico. Here’s why: Right now the man should be particularly aware of this, because going cruising was probably his dream.

If whoever you’re calling back home doesn’t have Skype, you can call their phone — but that costs you 20 cents a minute, albeit anywhere in the world. All you need is access to WiFi.

P.S. No, I don’t have any stock in Skype (www.skype.com).

††THE STATE’S REFUSAL TO SUPPORT THE ALA WAI

In the September issue, you mentioned that there are 200 slips in ruins at Oahu’s Keiki State Marina alone. According to a marine surveyor who has worked here on the island for 30 years, there are currently more than 800 State of Hawaii-owned and administered slips that are “unusable.”

Unusable? Hell, a huge number of them haven’t even existed for years — as you can see from the accompanying photo. Imagine how much revenue those slips — along with all the other slips that are currently rented at only $3.50 per foot — would have generated and would currently be generating if they had been properly maintained and rented at the market rate of $10/foot. It boggles the mind.

You also wondered what the real problem is with state-administered slips over here. It’s always money and politics — which, of course, are inseparable. Who benefits by keeping the state harbor system in its deplorable condition, and who would ‘suffer’ under privatization? Among the biggest beneficiaries are the liveaboards and slip renters — including wealthy ones with political clout — who pay far below market rents and, of course, don’t want to lose their incredible deal.

The operators of private marinas benefit because dilapidated state marinas insure that their expensive marinas stay full.

Also benefiting are all the government employees who administer the dirty, dilapidated harbors, as they are guaranteed high-paying jobs and generous government benefits for life.

And let’s not forget the politicians who are kept in office by campaign contributions from special interest groups that benefit from this broken system. These legislators have no reason to buck the status quo, and indeed would ‘suffer’ the most under some form of privatization.

Yesterday I spoke with a state senator who, in his words, has been “working on the problem for six years.” He explained that the State of Hawaii government employees’ union is so powerful that they basically control the state legislature, and they will not allow any form of privatization to take place. They fear for their jobs.

According to the senator, the only solution is to elect legislators who cannot be coerced, intimidated, frightened or bought — the last is my word — by the state employees’ union. Know any? Now accepting applications. Until then, what used to be the hub of the Pacific for mariners of all sorts will sadly just be an armpit.

Robby Coleman
Kapolei, Hawaii

Readers — Here’s what Ray Pendleton, the boating columnist for the Honolulu Star-Bulletin, wrote about the situation on October 9:
LETTERS

“... according to [Hawaii’s] Division of Boating and Ocean Recreation’s administrator Richard Rice, the state has authorized funding of capital improvement projects of $1 million for Kahului, $1.8 million for Keeaumoku, $2.7 million for Hilo and $700,000 for Waianae. Whereas the Ala Wai Harbor, which has been described as DOBOR’s “cash cow” for its contributions to the Boating Special Fund, continues to deteriorate at an alarming rate with no reconstruction funding in sight. Could partisanship pork barrel politics have anything to do with the harbor’s lack of funding? After all, Sen. Gordon Trimble (R, Downtown-Waikiki) and Rep. Galen Fox (R, Waikiki, Ala Moana), who represent the district, are both in the legislature’s minority party. I’d like to think not, but how else to logically explain our state’s seemingly irrational refusal to maintain a marina in the heart of the most populated real estate in Hawaii? The Ala Wai should be as much of a first-class facility — as well as a world-class destination — as the hotels in the adjacent Waikiki Beach.”

Some Government Marinas Do a Fine Job

I’m an employee of a city-run harbor, and would like to respond to Paul Kaplan’s letter in the September issue that marinas would be better served if they were operated by the private sector. It should be noted that many marinas operated by county and city governments do a fine job. A visit to Brisbane, Santa Cruz Harbor, South Beach Harbor in San Francisco, or those run by San Mateo County would provide good examples.

Certainly government operations can be run well or poorly — 9/11 versus New Orleans — and certainly they encounter problems that privately run operations would not. San Francisco Marina has problems not because the staff ignore problems — quite the contrary — but because they continually run up against politically well-connected neighbors, boatowners and tenants who are against development and fee increases. Privately run marinas can just as easily slip into disrepair. In fact, there’s evidence of this if one looks around.

The problem is not always the government, as many free market advocates would argue.

Larry White
Northern California

Larry — Based on our travels by boat, we agree that many government-operated marinas are well run. Generally speaking, they don’t seem to be quite as efficiently run as private marinas, but generally the rates are lower for comparable facilities.

But some government marinas really are very poorly run — the most glaring example of which, of course, is the broken-down Ala Wai Yacht Harbor in Honolulu. Of all the prominent marinas in the world, it’s the most pathetic. While we don’t think the Ala Wai has ever had really inspired staff, the main source of their problems is the state legislature and the government agency that controls the harbors. Citizens of Hawaii should be furious with their state legislators, not only because they are failing mariners, but because they are failing taxpayers by starving what should be a cash cow for the state.

“Doesn’t Get Away from the Dock Too Often”

I’m tempted to think that Bobby Rohrer’s “Doesn’t get away from the dock too often” letter, referring to Sig Baardsen, and the publishing of it, are a joke. After all, the Baardsen’s recently completed a 13-year circumnavigation aboard their Offshore 40 yawl Mary T. By the way, Sig said the trip was “too short!” I won’t go into details about their voyage, but suffice
Thinking About Selling Your Boat?

it to say that they are skilled and knowledgeable sailors.

Pete Kantor
Offshore 40, Tsuritsa
Ensenada, Mexico

Readers — To refresh everyone’s memory, a few months ago, Baardsen wrote a letter critical of the Ha-Ha, in which he said, "The consensus here [in La Paz] doubts that the U.S. West Coast ‘graduates’ a class of 150 competent new skippers each year, yet the Baja Ha-Ha brings 150 neophytes down each year. It is commendable that you want to introduce so many people to cruising. On the other hand, it’s courting disaster. Having met some of the late arrivals here, I have to agree with the negative opinion others have of the event.”

To which Rohrer responded: “As a member of the Ha-Ha Class of ’04, I find Sigmund Baardsen’s negative comments about that event to be all wet. What an education I got from the Ha-Ha — followed by the Run to Paradise to Banderas Bay, Philo’s for Thanksgiving, Rick’s in Zihua for Christmas, the Banderas Bay Regatta, and then putting two boats on the hard at Marina Seca! What experience and knowledge I gained. I also love La Paz — but won’t be influenced by someone who doesn’t get away from the dock too often.”

Obviously Baardsen had gotten away from the dock plenty of times — something that can’t be said for most of the so-called sailing ‘experts’ in La Paz. However, as the following letter indicates, Baardsen had a change of heart about the Ha-Ha.

SEEING MORE CLEARLY AWAY FROM LA PAZ

I stand corrected regarding my negative comments on the Baja Ha-Ha. I just met Lori Warner, the skipper and owner of Wild Rose. Lori and her crew were well served by the Baja Ha-Ha. While at sea, one of her crewmembers was stricken with a life-threatening health emergency. His life was saved by an air-ambulance evacuation from Turtle Bay, arranged with the help of the Baja Ha-Ha — and Profligate in particular.

Lori set me straight — in no uncertain terms — that:
1) The Baja Ha-Ha is not responsible for all of, or even part of, the twits sailing in Baja California. On the contrary, the Baja Ha-Ha makes a great effort to prepare people for the trip and further cruising.
2) My letter to Latitude was insulting to you, your staff, and friends.
3) I had antagonized hundreds of people who enjoyed a good experience in the Baja Ha-Ha.
4) I completely obscured my point that the Baja California coast can be hazardous and requires more thorough preparation than is sometimes seen.

I am away from La Paz at Puerto de Illusion, and see things more clearly now. Please accept my apology.

Sigmund Baardsen
Mary T, Offshore 40
Baja California

Sigmund — Apology accepted, with no hard feelings whatsoever. Lord knows that we’ve said and written enough things that we would like to take back.

To recount that rescue, Phil Hendrix, crewmember aboard Wild Rose, was coughing up blood and was quite ill during the second half of the first leg to Turtle Bay. When the Grand Poobah received the news, he put out a call for a doctor, several hands, and a boat to rush north to help. Doctors Roy Verdery and George Rab of the just-arrived Pearson 36 Jelly Bean, agreed to help, as did Profligate crewman Roberto Sutherland. Dave Lenartz quickly volunteered the use of his Maxum 4600
SAFETY WITH A TWIST

Why a Garhauer Radar Tower?
Rather than depend on high maintenance gimbal mechanisms, a large knurled knob quickly levels your radome to the tack you’re on. Whether you are cruising coastal or offshore, we have the tower to meet your needs. Call us today to discuss the best solution for your boat.

All stainless steel: Not powder coated, our towers are polished stainless steel, designed with quality marine materials and built in the USA. All radar towers come with a 10 year unconditional guarantee.

Free technical/installation support: You are only a phone call away from a helpful and knowledgable representative.

Each all stainless steel radar tower kit comes complete with:
- Polished stainless steel pole
- Radar plate matched to your radome model
- All mounting hardware
- Pivoting or fixed base and backing plate
- 6 to 1 engine hoist with yacht braid

Great price: Because Garhauer sells only direct to our customers, we are able to offer top quality gear for a lot less than elsewhere.

motoryacht, Megabyte, one of the few powerboats in the event. They immediately charged north, had a rendezvous, and in the darkness managed to transfer the very ill Hendrix to the powerboat. He was then rushed to the tiny clinic at Turtle Bay, where Dr. Jesus Moreno managed to stabilize him and gave him medication. Hendrix seemed to make a remarkable recovery — until the drugs wore off. With Hendrix in very bad shape again the next morning, Banjo Andy, the Assistant Poobah, spent the day arranging to get Hendrix flown out on a stretcher with his passport strapped to his chest. Hendrix did make it out of Mexico and survived — although his doctor says his offshore sailing days are done. It was a great Ha-Ha team effort, involving members of crews from about six boats.

Speaking as the Grand Poobah of the Ha-Ha, the only thing that offends us a little is when somebody who hasn’t done the event criticizes it. While we certainly understand that the Ha-Ha may not be for everyone, we know for sure it’s brought much happiness — and quite a bit of cruising education — to thousands of sailors. From the bottom of our heart, we believe it’s the best possible first step for prudent and prepared first-time cruisers.

We hope to cross paths with you in Mexico this season, Sig, as we’d love to hear about your long circumnavigation.

SAILING PSYCHOLOGY 101

In a recent ‘Lectronic, you indicated surprise when a woman told you she didn’t want to do the Ha-Ha because she was worried about excessive drinking. And then later that evening you saw her smashed.

It’s a basic principle of human nature that people are most worried about other people committing the offenses they feel — possibly subconsciously — they will commit. The most common example is a cheating spouse accusing their own spouse of cheating. Likewise, pickpockets are careful not to get their pockets picked, and parents who got into one form of trouble or another as youngsters worry most about their own children experiencing the same pitfalls.

Sure, she was worried about some drunk hitting her boat — because she was really worried that she’d get drunk and be the one who drove into someone else’s boat.

Eric Artman

Laid up in Bay Area backwaters and left to rot. Some were burned to salvage the metal in them. The Alameda Estuary, Benicia and Richardson Bay were the final resting places of many fine old vessels that had outlived their usefulness. The *Galilee* was one of those vessels.

She was a freight-carrying sailing ship. My memory tells me that at one time she held a record for making the fastest passage from the West Coast to Tahiti with a cargo of lumber. I believe that record was never beaten by a commercial vessel under sail. When her useful life was over, she was grounded, stern to, opposite the foot of Napa Street in Sausalito. As a young man, I remember that her transom was prominently visible to everyone who drove by on Bridgeway. People lived aboard her, as was evidenced by the flower pots on her stern. As years went by, she gradually became more decrepit.

At some point her history became of interest to, I'm guessing, the San Francisco Maritime Museum, under the direction of Karl Kortum. This was before the museum was turned over to the National Park Service. About 18 feet of her stern was salvaged and removed to Fort Mason, where it can be seen propped up against a retaining wall in the lower area near the piers. From her scantlings, it is obvious that she was a fairly large vessel, possibly on the order of the C.A. Thayer. In fact, she could possibly have been one of the coastal lumber schooners. That could explain the cargo she was carrying to Tahiti.

By the time I first saw her, her rig was already gone. This was many years ago, so indeed, many of the details have probably been lost “in the mists of time.”

Remo Patri

The 'Old Sailor From Sonoma'

**LETTERS**

In the October 14 *Lectronic*, you queried readers as to whether they would prefer to cruise in ‘primitive’ areas or more ‘First World’ areas. It would be difficult for Jane and me to pick one over the other as the absolute. Each has its attractions and both have a downside.

One of the many wonderful things about cruising is that the choice of one style of cruising doesn’t necessarily preclude the other. In that regard, Mexico comes to mind. You want a vibrant big city with art, music, theater, upscale restaurants, and all the rest? Puerto Vallarta and Mazatlan have it all. You want remote, quiet anchorages in a pristine paradise? Beautiful Y-Cove on Isla Carmen in the Sea of Cortez is waiting and almost empty.

Furthermore, the opposite kinds of cruising experiences don’t have to be that far apart in Mexico. For example, we frequented a perfectly protected little anchorage that we had all to ourselves for weeks, in a setting without any visible sign of development. Yet it was just a short distance from a major...

DO IT ONCE – DO IT RIGHT… Call Tom Today
LETTERS

Mexican city that is one of the most popular cruiser stops on the mainland. Oddly enough, the anchorage is rarely visited by other cruisers because they are busy headed somewhere else.

When Jane and I headed south in August of ‘01 aboard our Morgan 38, we had visions of idyllic South Sea islands on our horizon, but Mexico so seduced us that we never continued on. Going farther south would have taken us to brown water, bad food, and a constant battle against mildew. The South Pacific route to simplicity takes you a very long way from those complexities that alternately plague and ease one’s life.

As for the Caribbean, it offers extraordinary beauty, a bazillion charter boats, and way too many cruise ships. The Med? Well, just take a lot of money. The transportation in that part of the world might be inexpensive, but the last time I was on the Cote d’Azur, a cup of coffee was seven bucks.

Perhaps the best idea is to pick the style of cruising that suits you best, and make it your focus. With all the money saved living a primitive cruising life in Vanuatu and Fiji, one could always fly somewhere for a quick fix of crowds and culture. If, on the other hand, one prefers the advantages of urban life and their budget will support it, then perhaps it might be sufficient to allow an occasional charter getaway to ‘paradise’.

Now where did I leave that lottery ticket?

Jimmie Zinn
Dry Martini, Morgan 38
Pt. Richmond

Jimmie — It really isn’t an ‘either or’ proposition, is it? Not with Ensenada Grande so close to La Paz, Yelapa so close to Puerto Vallarta, the Perlas Islands so close to Panama City, the San Blas Islands so close to Cartagena, and Ile Fourchue so close to St. Martin.

For what it’s worth, First World cruising doesn’t have to be that expensive — not even in the Med. You might remember that two years ago Mark Harker took his Manhattan Beach-based Hunter 466 Wanderlust around the western Med, and reportedly lived happily on only $500 to $700 a month. That’s not bad at all, particularly since you could have somebody watch your boat on the hook in the Calanques near Marseilles, take the afternoon TGV to Paris — just 3 hours and 15 minutes — for dinner, and still be back on the boat that night. And with the

proliferation of Easyjet and other low-cost airlines in Europe, you could be anchored in one of the coves between Nice and Monte Carlo — St. Jean Cap Ferrat is fabulous and free — and catch a low-cost flight that would leave you in London, Dublin, Edinburgh, Amsterdam, Paris, Geneva, Vienna or a host of other great cities in less than two hours. And if you believe Easyjet’s website, round trips can cost as little as — we’re not making this up — $50. Alternating between a quiet cove in the warm Cote d’Azur and the cool of Dublin or Edinburgh has a great appeal for us.

By the way, after years of extremely expensive domestic flights in Mexico because of the near monopolies by Mexicana and Aero Mexico, it has been reported that as many as five low-cost carriers will be flying domestic routes in Mexico within the next year or so. These might make for some great inexpensive cruiser trips inland — not to mention home to the States via Tijuana.

I ALWAYS LOOK FORWARD TO THE NEXT BIG CITY

In the October 14 ‘Lectronic, the editor posed an interesting question — What stirs your imagination the most, the thought of cruising in primitive areas, or cruising in the first world or urban areas where there are many examples of human achievement?’

I’ve had a taste of both styles of cruising and, like the editor of ‘Lectronic, always look forward to the big cities — particularly coastal cities which, for centuries, have welcomed seafarers. After crewing on deliveries to Tokyo, Manila and New England, I started hitchhiking full time starting in ’96 from Darwin. I loved looking in on remote islands in the Banda Sea and all through Indonesia. There were great people living simple lives. But what a thrill it was to sail into Jakarta, and then into Singapore! My favorite was Cochin, India, the ‘Queen of the Arabian Sea’, followed by Aden and Yemen. And although it’s not on the coast, a short train ride to Cairo topped the long list of stops in the Red Sea.

After finally buying my own boat — a C&C 34 — in Cyprus, my favorite stop in the Med was Barcelona. I kept the boat there for four years, cruising the western Med, but always returning to that great city. When heading out across the Atlantic, I was frustrated that I had to pass up Casablanca, but it had no safe port facilities.

I found the Windwards to be like a bad trip to Disneyland, so I was thrilled to get to Venezuela. From the coast, it’s just a short bus ride to Caracas, which is fabulous. My boat is currently in Cartagena, Colombia, and I can’t wait to get back to her in February. I think I’ll do some cruising around the western Caribbean, but I’ll probably find myself right back in Cartagena, the most enchanting city I’ve found so far.

I haven’t done the South Pacific, so who knows, maybe I’m saving the best for last. But I guess I’m with the editor of ‘Lectronic, I like to get away, but I’m always looking forward to the next big city — and the older the better.

Fred Reynolds
San Francisco

Fred — Interesting response. By the way, if you’ve got photos and a good memory, we’d love to have a Changes article — even if it was somewhat dated — on Cochin. It’s our understanding that cruising India is almost impossible because of the suffocating bureaucracy.

For what it’s worth, boats do stop at Casablanca. Alameda’s Jim Drake, who was running Big O for us at the time, pulled in there to escape a gale on his way to the Canaries and the

**LETTERS**

start of the ARC. And we've subsequently had other reports of boats that called there. At last word, Casablanca wasn't exactly set up to welcome yachts, but they were stopping. And no, it doesn't look anything like the movie.

**WHY DIDN'T THEY JUST RIDE IT OUT?**

I can't quite get an answer to why Blair and Marian Thomson — as reported in the October 5 *Lectronic Latitude* — reluctantly abandoned their Vancouver-based 40-ft sloop *DragonSpirit* due to extreme weather conditions off Eureka. She wasn't sinking at the time, and was reportedly afloat days later when they were offering a reward to anyone who found her.

Okay, let’s assume that the weather was indeed absolute crap, and they'd had no way of knowing that the conditions they were going to run into would be so bad — which is hard to believe, but I guess it could happen. Since they were already hove-to, why didn't they just batten down the hatches and ride it out?

It seems to me that if they were prepared for a circum-navigating, they'd have the requisite sea anchor, liferaft, and other storm gear. So why abandon a floating vessel?

"Rookies," is the answer I got, in various forms, from my dockmates. But that still doesn't explain why.

Susan Harmon
Sea Gem
Alameda

Susan — We assume that the explanation is probably quite simple — the Coast Guard agreed with the Thomsons that they did the right thing by getting off their boat. We weren't there, of course, so we don't know exactly how bad the weather was. Maybe it wasn't so bad and the Thomsons were just in over their heads. On the other hand, there is considerable documentation that it can be a very dangerous stretch of coast. John Neal of Mahina Tiare told us that his first sail down from the Pacific Northwest was the roughest of his more than 200,000 ocean miles — including several roundings of Cape Horn. And in just the month of July a few years back, four private sailboats were lost in that vicinity. We also recall that Gene Haynes’ Alameda-based NorWest 33 pitchpoled in about that same area. His wife Dotty suffered a punctured lung and nearly died. Other mariners have died.

Being hove-to sounds like a simple and neat solution in textbooks, but if the sea conditions are really bad and the boat doesn't respond well to such a tactic, in real life it can be a different story. After all, plenty of hove-to boats have been rolled, and crewmembers in hove-to boats have been flung headlong from one side of the cabin to the other.

In addition, we understand that this was the couples' first real offshore passage, and they'd been in the rough weather for quite some time. So we presume that they were extremely cold, fatigued, and frightened — as we bet you and your dockmates would have been. Sure, the couple might have been rough weather 'rookies', but we don't think that's any reason to look down on them. After all, what sailor hasn't been a rookie at one time?

We're delighted that the Thomsons are safe and sound, and until there is evidence to suggest otherwise, we assume they did the right thing by getting off their boat. We hope they can recover *DragonSpirit* and resume their dream cruise, for it's likely they could sail around the world without encountering such adverse conditions at sea again.
DO YOU WANT TO SAVE A LOT OF MONEY REFITTING YOUR BOAT?

If you are considering an extensive refit, consider Port Townsend Shipwrights Co-op located in the Port of Port Townsend in Washington. Since 1981, employee owned PTSC has been serving the commercial and pleasure boat fleets of Puget Sound and SE Alaska. We specialize in all aspects of boat repair and construction: structural and fine woodworking, metal fabrication, ABYC electrical, repowering, plumbing and hydraulics, even wooden spar construction and traditional coatings. 70- or 330-ton travelifts, owned and operated by the Port of Port Townsend are available to safely deliver your boat to our facility.

Our basic yard rate is only $50 per hour

Round-trip trucking for a 40-ft sailboat 12-ft beam max to Port Townsend currently is about $5,500.*

We competently manage larger projects or simply ready your boat for the season, and you can keep those savings in the bank. Call us; we’d enjoy discussing your project.

LETTERS

By the way, despite all the improvements in weather forecasting, forecasts are not guarantees. The Coastie Group Commander at Humboldt Bay once told us that one day it can unexpectedly blow 60 knots to the north of Cape Mendocino and be calm to the south of it, and the next day unexpectedly blow 60 knots on the south of the Cape and be calm on the north side. “You never know what to expect up here,” he said.

WORRIED ABOUT CAPE MENDOCINO

Way up here in the white swirling Arctic wastes of Vancouver, Canada, Latitude is one of our oracles, our mystic marine guru. There’s so much information — often learned the hard way — freely exchanged between mariners of all sorts in your pages. Just fantastic!

Next year I shall be sailing my 50-ft cat down to visit you all in San Francisco while on my way to the South Pacific. I was wondering if any of your readers might recommend some info that would guide me past the area of Cape Mendocino. Up here we have heard ghastly tales of epic horror in that area, where sailors were driven mad by fear, with blood, guts and veins in their teeth. It’s all a bit unsettling. According to reports that filter back, undersea mountains create waves the size of Wal-Marts, and boats come apart like cheap British motor cars.

I must confess, I’d considered just trucking my damn boat down the Eye 5, but as she’s a 50-ft catamaran, we might be in for a bit of bother picking up our Egg Muck Muffins at the McDonald’s drive-through window. So any advice as to how to stand clear of danger and discomfort on this hideously perilous area would be most welcome.

Iain Young

Master of the catamaran Earthlight, 50-ft Cat

Vancouver, Canada

Iain — The reports you’ve heard are correct. Pt. Mendocino can be a very nasty area — as can the entire coast from Juan de Fuca to San Francisco and even Pt. Conception. But if you allow yourself plenty of time, you can pick good weather windows. This doesn’t guarantee a safe passage, of course, but it improves your odds.

If you haven’t spent much time in the ocean or in heavy winds with your cat, know that you want to reef the main early — much earlier than with a monohull. Because if you wait too long, there’s no way you’re going to be able to get it down. The sailors on the maxi cat Playstation found that out when they got caught with their full main up in 60 knots. You also might employ the strategy that Chris Bridge of the Corona del Mar-based Outremer 55 cat Cheval used when sailing the often-rough downwind passage from the Eastern Caribbean to Panama. He and his single crewmember never put the main up at all, alternating between a small spinnaker and small jib. He still averaged nearly 200 miles a day.

By the way, if anybody sees Chris, Carolyn and their rascal kids aboard Cheval in the South Pacific, tell them we’d love to get an email.

DRIVING AT NIGHT IS DANGEROUS

Driving on Mexican highways at night won’t lead to a certain death — contrary to what was reported in a letter last month. But it will multiply the chances by orders of magnitude.

In Mexico, it’s not uncommon for vehicles to travel at night at walking speed with no lights, for buses to pass other vehicles on blind corners and hilltops, for cattle to wander along the centerline, and for drunks to hit you head-on in

For optimum performance and safety, read the Owner’s Manual before operating your Honda Marine product. Always wear a personal flotation device while boating.
The Dump Donkey:
A lazy boater who doesn’t use pumpout stations. This jackass ruins everyone’s day on the water.

Don’t be a party pooper. Dump at the pump.
LETTERS

But the worst is when there are a couple of trucks stopped on either side of the road miles from the nearest headlight or crossroad. They would be there so the gang of murderous carjackers, with pipes and clubs, can attack you. You’re left with the decision to either speed on or run one or more of the potential attackers down — probably fatally — or stop and see what the gathering in the night might hold for a foreign driver.

Of course, any accident will be settled in criminal court, and the driver in the head-on with the drunk will go to jail — perhaps for days — before being taken to the hospital. I guess it’s all how you look at it, because Russian roulette is safe too — most of the time.

The Mexican government has specifically warned about continued car jackings on specific sections of the free highways. But be serious, driving at night on Mexican highways can be extremely risky.

What’s Become of the Pacific Seafarers Net?

Greetings from us vets of the ’96 Ha-Ha and ’99 Puddle Jump aboard the Hans Christian 41 Laughing Buddha. We’re still wandering about the South Pacific, currently on passage from Vanuatu to Cairns, Australia.

We noted that in the last week or so — we’re writing in late September — that the Pacific Seafarer’s Net seems to have gone off the air. We hope this is a temporary thing.

For those who don’t know, the Pacific Seafarer’s Net has a history of being very professionally run by a group of network controllers who are all Ham radio operators and who are all using their own equipment and funds. The controllers operate from many locations, including the Pacific Northwest, California, Arizona, Wisconsin, Hawaii, Australia, and New Zealand. They had integrated their behind-the-scenes action with the web, and include YOTREPS details as well.

Recently the website had been upgraded to include not only the position reports of boats on passage, but streaming audio of the net session as well. The net controllers would not only take your contact details, but when available many could make a phone patch — collect from their station — to your folks at home. There was no charge at your end, you just had to have a licensed Ham operator onboard and you were able to participate. It was quite a nice feature for friends and family back home, and a special treat for birthday calls and
BRISBANE MARINA AT SIERRA POINT

(650) 583-6975
www.ci.brisbane.ca.us • harbormaster@ci.brisbane.ca.us
Open 7 days a week: Monday-Saturday 8am-5pm, Sunday 8am-4:30pm
such.

Has someone pulled the plug? Did all controllers hang up their mikes and headphones? Has traffic been so light that some of the regulars are just taking a break?

A few other Hams have been trying to fill in — in the true spirit of amateur radio. Unfortunately, their coverage has been thin and some lack the really big rigs and rotating beam antennas needed to pick out some of the lighter signals.

We're just thinking there might be some story here.

Jim and Nancy Hegland
Laughing Buddha, Hans Christian 41
Fort Walton, Florida

Jim and Nancy — For a short time the net was in jeopardy based on a combination of controller burnout and the lack of new blood. It's back up and running, apparently with more help on the way. We'll have a more detailed report in the next issue.

⇑⇓

A CLIPPER 32 FOR THE SEA OF CORTEZ?
A friend and I just graduated college, and are planning to sail the Sea of Cortez from January 1 until May 1. We are currently in the process of buying our boat for the trip. We recently found a Clipper Marine 32 sloop for sale in San Carlos, and on first inspection she seemed like the perfect boat for us.

But after reading some of your responses to letters about this design, it seems that you have a somewhat negative perception of her seaworthiness. Our plan is to do strictly coastal cruising around San Carlos, and hopefully make a crossing to sail in Bahia Conception for several weeks before coming back across to San Carlos. We would have the boat surveyed before we bought her, but would still like your opinion on whether she would be suitable for our desired purpose.

Jesse Diller
Fort Collins, Colorado

Jesse — We would have preferred it if you'd written in and said, "We have X bucks to spend on a boat for a five-month cruise this winter in the Sea of Cortez. Any suggestions?" And, it would have helped if you explained how much you know about boats and sailing in open water.

Although we often used to see a guy sail a dark blue Clipper Marine 32 on windy days on San Francisco Bay, it's also true that: 1) We believe Clipper 32s are among the least robust over 30-ft sailboats ever built, and 2) we would not like to be caught aboard one during a Norther in the Sea of Cortez. This is not to say that you might not have a safe and wonderful time with such a boat, especially if you're good sailors, the boat is in great shape, and you're very careful not to get caught in rough weather. The sailing experience is the most important thing.

You didn't ask, but if we bought a boat in San Carlos on January 1, the first thing we'd do is sail our butts down to Banderas Bay, where the air and water are warm — and where there are a lot more attractive and eligible young women for a couple of young guys like you. After all, you don't want to spend half your cruise not being able to swim because the water is too cold. And by March, you could sail back up to the Sea of Cortez and still have plenty of time to enjoy that beautiful area during its best time of year.

Andros Islands in the Bahamas, and people are fleeing the Keys. We also got sideswiped in August, again by surprise, by Katrina when she was a modest Category 1 hurricane. Rita may be a Category 2 by the time she gets to Key West, with sustained winds of 83 knots. If she lingers, we will get a nice thrashing.

Originally from Santa Cruz, Layne and I did the 1998 Ha-Ha with our Gemini 105 cat Miki G, cruised to Florida, and eventually took up residence in Key West. I now work as a dispatcher for the police department. We’re already getting our usual quota of panicked calls from people who don’t have hurricane plans, but this time we have Katrina’s handiwork in the back of our minds as we cut down coconuts, attach storm shutters and shut off propane tanks.

Mariners in Key West got beaten up by hurricane Dennis a while back, and then by Katrina last month, and now we’re looking at northerly and westerly winds from Rita as she churns down on the Keys. As such, we can expect more than a few boats to end up sinking or getting washed off their moorings and anchors.

Jerry, a former colleague of mine, died in Dennis. A retired lawyer who lived aboard in a funky marina on Stock Island, he decided to stay aboard when Dennis, a relatively modest Category 1 hurricane, sideswiped Key West. His boat sank so fast that his body was found trapped under the overhead in the forepeak — essentially he died in his bunk. His mother lives in a house 80 miles away, and, had he taken refuge there, my friend would still be alive today.

I always urge everyone to get off their boats before a hurricane hits, no matter how modest it looks. Layne — who is a teacher these days — and I talk frequently about what our retirement plans might be after we’ve fed the cruising kitty. We’re forced to the conclusion that it will probably be in a moveable home that sits out the hurricane season in Panama or Venezuela. It’s just one more reason to keep saving to sail away — permanently!

Michael Beattie
Miki G, Gemini 105
Key West
formerly of hurricane-free Santa Cruz

Readers — As this letter is getting ready to go to the printer, it’s late in October, and the Beatties and others in Key West are seemingly days away from getting whacked again, this time by Hurricane Wilma.

WHAT’S THE FORMULA?
As you know, the covers are stripped off the halyards to save weight afloat on many racing boats. Of course, this results in the need to replace halyards more frequently, as the core is exposed to the elements.

I’m wondering if there’s a computer program which can

compute the relationship between the weight saved in the mast to the weight no longer needed on the rail to have the same stability? I would love to program in the height of my mast, the weight of the cover that would be removed, the beam of the boat, and have the computer tell me whether it's worth it to take the covers off. Then, once and for all, I would know whether this costly practice is truly efficient or only saves about as much as the over-stuffed wallets of some rail meat.

Dean Dietrich

It would be very complicated to get the exact answer because you'd be eliminating weight along the entire length of the mast, so you'd need to do a lot of measuring and weighing in different configurations. Fortunately, naval architect Tom Wylie was able to give us a good rule of thumb: "One pound aloft — meaning 40% of the way up the mast — while sailing upwind is equivalent to five pounds in the keel or 2.5 pounds of rail meat." So if you could save 100 pounds of weight by removing the cores — which, of course, you couldn't — you could eliminate one 250-pounder on the rail without any loss of performance.

"It's one of the safer ways to make a boat a little faster upwind," concluded Wylie, "but it's certainly not cost effective for most sailors."

SHIPPING A BOAT TO MEXICO

I was wondering if you knew of the approximate cost to have a sailboat transferred from Los Angeles to San Carlos for a summer of sailing in the Sea of Cortez. I have a 41-ft boat. I'm wondering if it would make sense to do this instead of making the long sail down the Pacific coast of California and Baja.

Lance Ignatowicz

It wouldn't make any sense to us, because sailing your boat from L.A. to Cabo would be a much faster, cheaper, and a hell of a lot more fun way to get your boat to the Sea of Cortez than trucking her.

If you wanted to truck your boat from L.A. to the Sea of Cortez, you'd have to have her hauled, the mast unstepped, and the both of them trucked to Tucson. Once there, your boat and mast would have to be transferred to a Marina Seca truck, driven to San Carlos, then relaunched and the mast resteped. From start to finish, it could easily take a couple of weeks, require a lot of work on your part, and probably cost $5,000 with everything included.

The alternative is the almost-certain all downwind sailing trip from L.A. to Cabo, which you should be able to do in six or seven days — assuming you don't stop at any of the great anchorages along the way. A sailing trip from L.A. to Cabo should be looked upon as a wonderful opportunity, not something to be gotten out of the way.

And remember, you’re going to have to get the boat back to L.A., too. Would you really want to go through all the time and expense of having the boat trucked twice?

"I know of hundreds of people who have sailed their boats to the Sea of Cortez and had them trucked home from San Carlos — because it makes a lot of sense. We don’t know of anyone who has done the opposite."

Your #1 Source for High Performance Marine Apparel
A Bigger Boat letter by the folks who had a very long passage to the Marquesas with their heavy displacement Dreadnought 32. You suggested, among other things, that rather than getting a bigger boat, they might have had a considerably faster passage if they had honed their sailing skills.

I think you were right on every point you made — including the one that racing is the fastest way to learn how to get the most out of a boat. As such, I’ll hopefully know at a glance what all the fine adjustments are that have to be made. One more season will make me a better sailor, and in the long run, a happier boatowner.

Bobby Rohrer
Elusive
San Carlos

Bobby — Some people are perfectly content to just mosey along — and there’s nothing wrong with that. But there are real advantages in becoming a much better sailor — faster passages, more confidence when the weather turns crappy, and more fun. It’s just speculation on our part, but we think a good sailor could get 33% more performance out of a boat off-the-wind, and 100% better performance upwind, over someone who didn’t care or know how to sail better.

POSITIVE WE MAYBE FIGURED IT OUT — AGAIN!

Thanks for publishing the October Changes about our trip from Huatulco to El Salvador. We’re sending an update because we’ve finally found the reason why our diesel stopped and then wouldn’t run.

You might remember that at first, we thought we’d run out of fuel. Then we thought it was air in the fuel lines. By the end of our article, we thought that we’d just needed to heat the glow plugs before starting.

Since sending the article, we discovered that the engine still wouldn’t start. We’ve replaced the fuel shut-off solenoid, which we thought was the problem. Then I cleaned all the connections to the instruments, ignition, and start switch, and also the terminal strip from the instrument wiring harness to the engine. The engine still wouldn’t start.

Then I discovered that if I jumpered a wire between the glow plug solenoid and the fuel shut-off solenoid, the engine started right up. Feeling very confident, I replaced the wire from the ignition switch to the fuel shut-off solenoid. But then engine wouldn’t start again!

So I wired in a replacement ignition switch — and the engine started right up! At least we don’t have that problem to deal with while underway again. After all we’ve been through, I’m absolutely positive we may have found the answer.

We’ll be leaving Bahia del Sol, El Salvador on the 27th of October, heading to Nicaragua, then Costa Rica.

Frank Nitte and Shirley Duffield
Windsong, Islander Freeport 36
Bahia del Sol, El Salvador

Frank and Shirley — After seven false solutions, you’ve got to be getting close.

MORE ON DRIVING IN MEXICO

Last month you published my letter about liking to drive in Mexico at night. I’d like to add a few more thoughts — and a warning.

*de Vehículos*. You fill out the page, print it out, and present it at Kilometer 21 on the other side of the border, and you’ll quickly be presented with a permit and sticker. When you leave Mexico, you must turn them in.

I also wanted to point out how important it is to drive defensively, and slowly, when passing through towns. The roads have these half cannon balls implanted in the asphalt that must be driven over very slowly — or your dental fillings will be knocked loose. Signs reading *Vibradores* or *Topes* means slow down, speed bumps ahead.

Everyone also needs to know that the legal ramifications of getting into an accident are severe, and can include jail time until the authorities are convinced you have insurance. Therefore, an inexpensive legal binder to your insurance policy that will provide you with a lawyer to expedite your release is a cheap price to pay should the situation get ugly. The best insurance, however, is to simply drive exceedingly slow, being prepared to stop in any circumstance before an accident occurs. Should you find yourself behind a slow-moving truck, turn on your turn signal, and wait for the truck ahead of you to turn on his signal — his indication that it’s safe to pass.

The highway system in Mexico is divided into two parts, *Cuota*, which are toll roads, and *Libre*, or free roads. *Cuotas* usually have two lanes, each way. *Libres* are either one or two-lane highways. The toll road must be exited in order to go into a town to find a place to eat or sleep, while the free road will take you through the town, allowing you the opportunity to grab a bite to eat and a chance to stretch your legs. Everyone I have discussed this with in Mexico prefers the free road to the toll roads. Just take it slow when you are going through the towns and watch the signs.

**SAME LAST NAME, SAME KETCH**

I’m writing in response to Frank Holland’s October inquiry about his Formosa 51 ketch. By sheer coincidence, we have the same last name — and I’ve had a Formosa 51 sistership for 20 years. *Latitude*’s response and analysis of the Formosa 51s was pretty much right on. I have managed to get on top of the varnishing problem by not varnishing at all. Instead, I put down a coat of Smith’s Penetrating Epoxy and used a Canadian product called Tufshield on top of that. I put this finish on the mast 14 years ago and have never had to take them down again. I use one or two coats of Cetol on the teak decks because it looks better. It’s no longer slippery after a brief period of use, but keeps its good looks for six months or so. It’s also easy to scuff up when preparing to apply another coat.

The spars were rotten on our boat when we bought her — and a lawsuit resulted in our recovering money — so we were inspired to go through the boat thoroughly looking for and eliminating dry-rot. We did find some, but not much.

The wiring has been O.K. The metal does tend to be Taiwanese stainless steel, the surface of which rusts. Although it’s easily wiped off with a scrubber pad, it’s nonetheless a pain. When we had the masts down, we had all the turnbuckles, fittings, and tanks dye-penetrant tested. They were fine.

As for current problems, we have small leaks in two of the original water tanks, a problem rumored to be common on all Formosas. I was able to take care of a similar problem in the fuel tank several years ago with a chemical liner on the inside of the tank.
The chief mate of the Pequod was Starbuck, though born on an icy coast, seemed well adapted to endure hot latitudes... He was by no means ill-looking; quite the contrary. His pure tight skin was an excellent fit; and closely wrapped up in it. Starbuck seemed prepared to endure for long ages to come, and to endure always, as now; for be it Polar snow or torrid sun, like a patent chronometer, his interior vitality was warranted to do well in all climates.

— Herman Melville, 'Moby Dick', Chapter XXVI
Letters

Naturally, I also have some small leaks in the teak decks that I have to get after. The decks look good, though. Generally, the boat feels very safe and indeed has been.

She had a lot of small blisters when we first hauled her out. But after popping, drying, filling, and putting on several coats of Proline Epoxy, almost all were taken care of.

I have the boat rigged for singlehanding, with a roller-furling main and staysail, so she's easy to sail — after the 20 minutes that it takes to get all the sails set. She's not a racing boat, and I admit that we don't tack a lot. Nonetheless, we've sailed our Formosa all over San Francisco Bay, the Delta, up to Fort Bragg, regularly to the Farallones, and numerous times to the Channel Islands. She really is a comfortable sea boat.

Anyway, cousin Frank, good luck with your Formosa 51!

Ted Holland
Earendil, Formosa 51 ketch
Santa Cruz

Ted — Enjoying the same boat for 20 years is a darn good recommendation.

††Canadian Rocks Have Changed Positions

I'm glad you noticed the "grounded boats in Canada." Who would have thought, but yes, we are running out of water up here. And yes, our boats are high and dry. Did you see any snow-capped mountains in your photos? No. We are becoming the New Mexico of the North!

The cause of our dehydration is global warming which, as every scientist knows, evaporates seawater! The effect of this evaporation is that, not only have our rocks moved from their charted positions, but chart data has been recalibrated, causing untold numbers of groundings.

The cause of global warming? We already know the answer. When Americans and Canadians stop driving idiot vehicles like the Hummer, and when Americans and Canadians turn off the air-conditioners, then maybe our waters will return to their original charted depths. Have a good day, but to be safe, keep your depthsounder on.

Malcolm Wilkinson
Vancouver, Canada

Malcolm — We're confused. Pacific Islanders claim they are about to lose their homes because of rising ocean levels, but you're telling us that Canadian waters are getting shallower from evaporation. One of you must be wrong. But in any event, how could evaporation move rocks from their charted positions?

We're all for greater energy efficiency and conservation, but given the hundreds of millions of people who are coming out of poverty and eager to become active consumers, many environmentalists are coming around to embrace nuclear power as the only possible solution. We're not sure what to think about this ourselves. What do you think?

Star from Camelot.
A million bucks for a 22-ft boat? A really old, wooden sailboat? Maybe not, but that's what the most recent owner was hoping to get for **Flash II**, a Star boat that once belonged to John F. Kennedy and his brother, Joe. The brothers bought the 1930-built boat in 1934 and sailed it often near their seaside retreat in Hyannis Port. (JFK is said to have been a good sailor in his youth. He won a race in the Atlantic Coast Championship with **Flash II** when he was only 19, and later sailed it to victory for Harvard in the 1938 MacMillan Cup in Annapolis.)

Jack took sole possession of the boat in 1940 and sold her for $300 in 1942, just before heading off to war. You know the rest of that story.

The most recent owner and a 'silent' partner purchased the boat in 1996 for a reported $19,800, and put almost that much more into a complete restoration, hoping to recoup the investment by auctioning the boat off for her historic value. Toward that end, **Flash II** was included in an auction of Kennedy memorabilia in 1998, where bidding for the boat reached $800,000. Hoping for around $1.2 million, the owners turned it down.

They should have taken the money and run. Last October, a federal sting operation implicated the non-silent owner in drug dealings, and the boat — which the government claims was restored with drug money — was seized in Marblehead. **Flash II** is now slated to be part of a Kennedy lot at a Sotheby's auction in February. Profits from the sale of the boat will be split between the government and the silent partner. It's estimated the boat could go for as much as $500,000.

**Tatt's all, folks.**

For the first time in 30 years, the Coast Guard has put new regulations on how many tattoos a prospective recruit can have. With the military ever more image-conscious — and some new recruits looking like Ray Bradbury's Illustrated Man with their arms and legs totally covered with artwork — the time has finally come, for the Coasties at least, to draw the line. The new limit for potential recruits is 25% of exposed limbs. Anyone with more than that will be turned away. Since the policy went into effect this past summer, Coast Guard officials say they have recruited 1,600 new people — and turned away 26. There are similar bans on body piercing, branding and "other forms of skin art."

Tattoos, of course, date way back. Westerners were likely first exposed to the idea in the 18th Century when their sailors returned home from exotic South Pacific ports sporting ‘tribal’ markings. For a long time, sailors continued to be the main demographic for body art. Now — God help us — it’s fashionable.

Today, an estimated 1 in 8 Americans has at least one tattoo. And in 2002, ‘tattoo/tattoos’ was the second most requested search item in a popular search engine beating out, among others, Britney Spears, marijuana — even sex!

**What’s in a name?**

One thing we never tire of asking people is where their boat names came from. Why? Well, think about it: the only things most people get to name in life are kids and pets. And those are often influenced by factors beyond the namer's control. Not boats. People tend to name boats what they want. (Not always, of course, but often.) As such, we feel that boat names can be a real glance into someone’s personality. We've done articles on this subject before and we feel another coming on. So if your boat has an interesting name, and an interesting story, we'd like to hear about it. Drop an email to johnr@latitude38.com with the particulars, and please include a phone number in case we have to get back to you.

November, 2005 • Latitude 38 • Page 97
LOOSE LIPS

Latitude goes Hollywood.

Catherine, the Set Decorating Coordinator of a now-filming movie called You, Me and Dupree, called last month. “We would like permission to use Latitude 38 magazine as set dressing in the movie,” she said.

Serving as the magazine’s agent, we tried our best to get it a speaking role, or at least equal billing with stars Owen Wilson, Kate Hudson, Matt Dillon and Michael Douglas. But we’re no Mike Ovitz. So we settled for telling her of course they could use the magazine as a prop, and the best of luck with their endeavor.

You, Me and Dupree is due in theaters next August. We forgot to ask what it’s about, so after Catherine hung up we looked it up on the Internet. The plot: “A best man (Wilson) stays on as a house guest with the newlyweds, much to the couple’s annoyance.”

Famous floaters.

Depending on your line of work, ‘floaters’ can mean a number of different things. That’s what our eye doctor calls those little dots in our vision from not wearing welding goggles in our youth. Some rescue agencies refer to dead bodies as floaters. To some, ‘floaters’ means people who circulate at parties or official functions. To guys like Dr. Curtis Ebbesmeyer, ‘floaters’ are something of a living. His vocation is studying ocean currents, and one of the ways to do that is to track ‘floaters’ — in this case, basically anything that floats — as these items make their ways down coastlines and across oceans.

His avocation is also floaters. For the last decade, Ebbesmeyer, who is based in Seattle, has put out a quarterly newsletter called Beachcombers Alert! In it, he offers analysis of different things that drift on the current (often gloves or shoes or toys which have spilled out of containers dropped by ships), and offers hypotheses on how different flotsam ends up where it ends up. (As far as bigger stuff, we’ve worked with him a few times to analyze drift patterns of lost or abandoned sailboats.) The newsletter has also awakened a fringe element of people who walk the beaches of the world, find all manner of odd flotsam and jetsam, and write in about it.

In the latest issue (October-December, 2005), Dr. E’s research has turned up the world’s best-traveled buoys. These are navigational aids that have been pulled loose, usually by storms, and drifted far and wide. Here are a few examples:

* A storm tore a 10-ton buoy loose off Port Royal, South Carolina in 1971. A year and a month later, it was recovered five miles off the Orkney Islands, which are north of Scotland. Drift distance: 4,000 miles.
* In 1921, a buoy anchored off present-day Somalia in

East Africa was dislodged by strong current. It turned up in 1925 off Walvis Bay, Namibia — which is 1,000 miles up the coast of West Africa — having rounded the Cape of Good Hope in its travels. Drift distance: at least 4,300 miles.

* In case you ever get on Jeopardy and they have a ‘buoys’ category, the all-time drift winner is a gas-lit buoy which broke its moorings off Cape Indio, at the mouth of the River Plate in Argentina (the easternmost tip of that country), in July 1918. Five years later, it was found at Cervantes, Western Australia, about 100 miles north of Fremantle. During its travels, the buoy had made two circuits of Antarctica. Drift distance: 20,000 miles.

Subscriptions to Beachcombers’ Alert! run $15 for a year. For more information, contact Beachcombers’ Alert, 6306 21st Ave. NE, Seattle, WA 98115. Got an interesting floater or floater story of your own? Let Dr. Curt know about it at curtisebbesmeyer@comcast.net.

California saga.

While many manufacturers have fled the Golden State, Saga Yachts of Canada is ‘outsourcing’ their boat manufacturing to California boat builder Pacific Seacraft. The reason: strengthening of the Canadian dollar has begun eating into profits.

“The increasing value of the Canadian dollar seriously affected the revenue and was starting to erode margins,” said company president Allan Poole. “Like many Ontario manufacturers, we have had to seek alternative sources. This move allows us to continue providing a high-quality product at a good value price.” Geoff Emery, president of Pacific Seacraft, which is headquartered in Fullerton, called the deal “a great fit for both companies.”

Pacific Seacraft has been building quality cruising yachts for nearly 30 years.

Capsize investigation concluded.

A National Transportation Safety Board investigation has revealed that the capsize and sinking of the tour boat Ethan Allen on Lake George on October 2 — which killed 20 of 47 mostly elderly passengers aboard — was likely due to uneven weight distribution and overloading. Some of the weight shifting may have been due to a wake the boat encountered. According to survivors, whole benches full of people slid sharply to one side just before it flipped. Tragically, many of the drownings were apparently due to passengers being trapped inside by the boat’s large observation windows. This is the first accident of this kind for the Ethan Allen or her sisterships, which have been operating on Lake George since 1979.

Which is a great way to segue into a safety reminder for all boaters. According to Coast Guard statistics, capsizes are a major cause of both deaths and injuries on the water. In 2004, 393 vessels were reported capsized, resulting in 229 injuries and 184 fatalities. The stats don’t break down into ‘sail’ or ‘power’, although we’re guessing that sailors are much more attuned to weight trim than powerboaters. But the message is clear: be careful out there.

Holiday traditions.

The actual date of the first Thanksgiving in 1621 is not known, although it’s thought to have occurred in early October. So why do we celebrate it on the fourth Thursday in November? Because when it was first declared a national holiday in 1863, that’s when Abraham Lincoln decided it should be held. But why so late, and why a Thursday? Some historians and theologians think Lincoln chose that day because November 21, 1620 — a Thursday — is the day that the Mayflower first dropped anchor off Cape Cod.

Kite-powered sailboats. Kite-assisted ships. The idea seems a bit 'out there', doesn’t it? Then again, whoever imagined a decade ago that kiteboarders would one day render windsurfers old hat?

Dave Culp probably thought it. When we first talked to him about 15 years ago, he used to skitter across local waters in a contraption that looked like a lawn chair strapped to a pair of water skis. Power came from a forerunner to the type of kites used today by the board guys. Culp’s avocation turned to vocation when he founded Kiteship, an outfit in Martinez that makes and markets large kites for both recreational boats and, he hopes, big ships.

One of Kiteship's kites underwent testing on the Bay last month. On a breezy Thursday afternoon, the TransPac 52 Flash set a 3,000-square-foot kite and — with no other sails up — went scooting across the Bay at a consistent 10 knots, with surges to 12 knots in 15-18 apparent.

The first thing you notice about kite-sailed boats — besides the kite flying 50 or yards or more out in front of the boat — is that the boat doesn’t heel. That’s because the three control lines are attached to the front of the boat at deck level. (An additional launch/retrieval line is rigged at the hounds, but it’s not under tension when the kite is flying.) There’s no pull on the top of the mast, so no heel. In fact, technically speaking, you don’t need a mast at all.

Another thing you notice is that the kite has a lifting effect on the bow of the boat. In other words, it not only pulls the boat forward, it pulls the bow up slightly, too.

It takes only two crew to control the kite and, most times, it can be re-launched from the water if it goes in.

Flash boat captain Will Paxton was intrigued enough to possibly use the sail at the Great Pumpkin Regatta the last weekend of the month. (Kite sails are reportedly legal sails in PHRF racing.) Although they may not be suitable for round-the-buoys, he also sees the possibility of kite sails becoming part of the inventory for ocean racing — and thinks a smaller version would be killer on an Express 27 doing the Ditch Run.

"Instead of sailing in [the windshadow of] the trees, you could get the sail 300 feet up, where all the wind is."

But perhaps the biggest benefactor of the kite technology, in Paxton's opinion, would be older, heavy-displacement boats. Where the ultralight Flash sails her best in hot angles downwind, an old leadmine going DDW could really shine with this technology, especially with the added bonus of the upward pull on the bow.

Changing channels for a minute, much has been written about sail-assisted power for merchant ships lately, and several shipping concerns are reportedly spending millions on R&D. Culp’s pitch to them is: forget the masts and booms and spars and rigging — and use simple-to-rig and stow kites. Seeing the kite on Flash in action, it starts making sense. (Getting interested? Log onto www.kiteship.com for more.)

Back to sailboats. There are two other significant events involving kites worth mentioning. The first is that Larry Ellison and his crew tried this technology on their BMW Oracle America’s Cup yacht at a break in the 2002 competition. They reportedly liked it, too. (The use was strictly an experiment and never used in competition.) The second event happened after the 48-ft trimaran Alacrity dismasted in the 2004 Heineken regatta. It just so happened that among the crew was a guy named Dave Culp. So instead of staying in St. Maarten to await a new mast, the crew sailed her home with a kite — and no mast.

There is still lots to be learned about sailing with kites. They look pretty cool and seem to work pretty well on certain boats in certain conditions. It's still hard to imagine them in common usage, but like we said earlier, where in the world did all these kite-flying boardheads come from, anyway?
hard acts to follow

You have to hand it to Ernesto Bertarelli and Larry Ellison. After the last America's Cup, the winner (Bertarelli) and the Challenger of Record for the 2007 Cup (Ellison) came up with a plan. Rather than three months of intensive racing every three or four years—a poor return for sponsorship dollars, not to mention public interest—they organized a series of ‘lead-up’ events, called ‘Acts’. These Acts, 13 in all, would be spaced out over three years and several different venues. They would offer both traditional America’s Cup match racing and fleet racing. And to really keep the teams pumped and discourage sandbagging, during the latter Acts boats could actually earn points that could then be carried over to the Louis Vuitton Challenger Series, which starts in April of 2007. The Cup races themselves start June 23.

A preview of this idea was held in San Francisco Bay in September, 2003. It was called the Moet Cup, and was sponsored by the Golden Gate YC, home club for Ellison’s BMW Oracle Racing syndicate. Only Ellison and Bertarelli’s Cup-winning Alinghi showed up. But it was nevertheless quite a show, with shoreside announcers, souvenir tents,—even the Auld Mug itself was there, in a glass case flanked by burly guys in uniforms.

Even though the racing was just ‘for show’, we thought it was pretty neat, and said as much in a feature article. Overall, though, public reception was cool. Americans just aren’t interested in sailing as a spectator sport. The road show fared slightly better with Joe Public at a repeat performance in Newport, Rhode Island, the next spring. But hey, that was the home of America’s Cup racing for 132 years.

In Europe, the reception for the Acts has been nothing short of astounding. At the most recent event, Acts 8 and 9 in Trapani, Sicily, continued on outside column of next sightings page

cattin’ about

That black cat you might have seen prowling the Bay the last few months is Tuki, a ProSail 40 that recently set a new record in the Jazz Cup. She may look like a brand new grin machine, but in fact was built 17 years ago and sailed as Randy Smythe’s Super Lube in the Salem ProSail series. This ambitious three-race circuit for professional sailors had venues in Newport, Rhode Island, San Francisco, and Miami. The event got a lot of ink on these pages, as much for the fact that Tom Blackaller became an instant convert to the speedy 40-footers as anything else. Smythe and his four-man crew won both the ‘88 and ‘89 contests with this boat. Blackaller took second in ‘88 and died a week before the ‘89 race. (Cam Lewis skippered his renamed TomCat in ‘89, also taking second.) The series itself died soon after that, at least on this side of the pond. We seem to recall the ProSail circuit might have hung on a few more years in Europe.

Tuki’s owner is Roger Barnett, but more often than not, former Farr 40 owner Peter Stoneberg can be found at the helm. Look for Tuki to smash more records this
coming season, starting with the informal Great Pumpkin pursuit race course on October 30. The black cat sports an orange kite, an appropriate combination for a Halloween regatta!

TomCat, repainted bright yellow, was out and about a few years ago, but we haven’t seen her in a long time. Anyone know what happened to the rest of these boats?

three quarters of the city came down to check out the action. And kept coming throughout the 10 days the event was in town. They actually rearranged the Trapani school year so kids could go down to the water to watch with their parents.

Admittedly, now that the 12 Cup syndicates are all entered and sailing, it is much more of a show — particularly the fleet racing.

The schedule for 2005 looked like this: Acts 4-5, Valencia, Spain, June 16-26; Acts 6-7, Malmo, Sweden, August 25-September 4; Acts 8-9, September 29-October 9. At each venue, the ‘even’ numbered Acts were a week of match races; the ‘odd’ Acts represented three days of fleet racing. Another nice feature — no hiding of appendages is allowed until next year, and the boats were all displayed in the open so visitors could see them, even if it was behind compound fences.

The racing at all venues was, by all accounts, spectacular. There were at least a few days of decent breeze at each stop and — as one would expect — superb crew work by the top teams, and a few big upsets by up-and-comers. When the spray had cleared last month, it was no big surprise to see that the top teams were still Alinghi, BMW Oracle Racing and Emirates Team New Zealand. There were nevertheless surprises: Prada’s strong fourth place showing, Desafio Espana’s come-from-behind fifth, and a marked improvement by France’s Dawn Riley-led K-Challenge — which, on the last day of match racing, with a really old boat (FRA 60, veteran of the 2000 Cup wars), became the first to beat Alinghi, which beforehand had been undefeated in the match racing Acts.

Somewhat confusingly, Alinghi does not earn any points from the Acts, since they are the defending syndicate and will obviously not
participate in the challenger series. Once you eliminate them, **BMW Oracle** rises to the top of the Challenger leaderboard at this point in the game. They carry over 4 points toward 2007, while ETNZ and the other ‘middle’ teams are happy with 3 or 2. But even the also-rans earn a point apiece for just showing up. (See [www.americascup.com](http://www.americascup.com) if you’re interested on exactly how the Acts are scored.)

Speaking of ‘this point in the game’ — where exactly are we vis-a-vis the ‘real’ America’s Cup racing?

All syndicates save South Africa’s Team Shosholoza have been sailing old ‘version 4’ boats. The South Africans launched the first new IACC yacht last year (RSA 83) and started racing her in Valencia in June. A few others, such as Sweden’s Victory Challenge, have converted version 4 boats to the new version 5 configuration and were sailing those in Trapani. Most of the other syndicates were still racing their own old boats, or someone else’s. **K-Challenge** leased New Zealand’s two 2000 boats (including Cup winner NZL 60), but sailed France’s 2000 boats in the Trapani races. Spain’s **Desafio Espanol 2007** is sailing the two boats used by Seattle’s **OneWorld** syndicate in 2003 (repainted a retina-searing Kermit-the-Frog green). **Mascalzone Latino-Capitalia** is using Dennis Conner’s old USA 66 and USA 77 from ’03. Somewhat oddly, **Mascalzone**’s 2003 boat was being sailed by **United Internet Germany**, which likes it so much they’re going to convert it to a version 5 boat. **China-Team** inherited Frances’ 2003 **Le Defi** syndicate lock, stock and both boats. Even the [ledefi.com](http://ledefi.com) website now takes you to China’s site. And so it goes.

All the Acts from here on out will take place in the America’s Cup venue off Valencia. Acts 10 through 12 will take place next May through July. Act 14 (there is no 13 — sailors are a superstitious lot, you know), a fleet race, will kick off in early April, 2007. The actual Challenger Series begins April 18.
**in uniform**

may or may not make it home for Christmas, please let us know. We don’t need serial numbers, but name, rank and the boat he or she normally sails on would be cool. If you can tell us where in the world the person is, that would be better. (But don’t break any ‘classified’ rules; we don’t want to get anyone in trouble.) If you have photos of the person — either in uniform, sailing or both — please forward copies by mail or email.

In the December issue, we will compile the names and photos of all our ‘fighting sailors’ into a tribute, and a thank you,

**midwinter delight**

Back East, the sailing season has ended. People have hauled their boats, pickled the engines and put them undercover until next spring. On this coast, sailors just keep on sailing. There are a few who even look forward to winter for its generally lighter breeze, less crowded water — and more dock space at Sam’s.

Even racing barely skips a beat. In fact, in some fleets, there are more participants in the winter than in the summer. Consider some of the attractions of midwinter racing:

* There’s generally less breeze and its therefore not as hard on gear. (Just to be straight on this — it can also howl as hard as any summer gear-buster.)

* Midwinter race series often generate more camaraderie. Several of them are weekend-long affairs with a nice party on Saturday night.

* Believe it or not, midwinter races can be warmer than summer
midwinters — cont’d

events. We’ve taken our foulies off more in the winter than summer. (Again, it can also be colder than a witch’s . . . well, you know.)

* Midwinter racing can be more cerebral — the wind is generally lighter and the currents stronger. It’s more of a thinking man’s game.

* Competition can be excellent. Many regular summer competitors keep their skills honed with midwinter racing, and the larger fleets (CYC, BYC, GGYC, etc.) can be as competitive as any summer event.

* Midwinter racing has been a convenient conduit for those new to sailboat racing to ease into the action. Spinnaker handling is a lot easier to learn in light air than heavy.

* If it’s raining and/or blowing a full gale on race day — stay home. Hey, it’s only the midwinters, not the America’s Cup!

* The races are generally short, lasting two to three hours most of the time — which puts you home well before dark.

* You don’t have to get up at the crack of dawn to race the midwinters for the simple reason that there’s usually no wind until around noon. Some crews just meet for a big brunch beforehand, and many don’t bother to pack lunches.

* You don’t have to sail every weekend. Most midwinter racing consists of one Saturday a month through March. If you want more, consider Corinthian YC’s two weekend-long events in January and February, which come complete with raft ups and parties. If you want to race every weekend, just enter more than one series.

* Screaming and protests are — again, generally speaking — rarer during midwinter races. Like we said, it ain’t the America’s Cup, so why feed the ulcers?

* Much better chance of getting your picture in Latitude than during the summer, when our cameras are often seduced by the big, glitzy boats. In the winter, we tend to photograph more real people. (On that count, if you see a guy on a powerboat with a camera, be sure to smile and wave!)

* Venues vary from the main Bay to the Estuary to Santa Cruz to Lake Merritt, and from big boats to special midwinter events for small boats — something for everybody.

How does one get started in midwinter racing? Like Woody Allen observed, “80% of success in life is just showing up.” If you’re just starting out racing, our advice is simply to sign up with the club closest to you. If you’re a bit timid about racing, choose an Estuary or South Bay venue, which are generally kinder, gentler series. For the best competition, sign up with one of the larger

sailors in

ham licenses will no longer need to pass a Morse Code test. For you younger folks

midwinters — cont’d

clubs for central Bay racing. Entry fees range from $50 to around $75 for the whole series, and you will need a PHRF certificate (call YRA at 771-9500 for how to get one if you don’t have it already). Don’t have a boat or not quite ready to race your own? Drop by the club on race day and make it known you’re available. Like we said, the low-key, friendly atmosphere in winter will almost surely get you a ride.

Midwinter race dates and hosting yacht clubs can be found in the Calendar section of this issue, or get online. Almost all clubs these days have websites with entry information for all their yearly events. Give ’em a shout — and we’ll see you out there!

The agony and ecstasy of midwinter racing. Above, waiting for wind at a BYC start. Below, sailing downwind up the Bay in a brisk Northerly at a CYC Mids.
quest II comes back to life

“What’s she worth?” It’s a question we’ve been asked lots of times over the years. While we sometimes have a general idea of a yacht’s worth if we’re semi-familiar with the type of boat or fleet, we’re not yacht brokers. (Well, actually one of us was for a while about 25 years ago). So we usually refer the questioner to someone who is.

But determining worth is not always easy for brokers, either, espe-

morse no

who don’t know what Morse code is, remember in the movie Titanic when the guys in the radio room were tapping out a bunch of ‘dits’ and ‘dahs’? That’s Morse code. (For you older moviegoers, when the poor bums trapped in sunken submarines started banging on the hull with

Comin’ and goin’ — Champion of Champions competitors (left) shared some of the same race course with Masters Regatta participants (center and right) last month. It might look like a nautical game of ‘chicken’ out there, but close calls are rare.
more — cont’d

wrenches, that was also Morse code.)

Thanks to SSB, Satphones and other improvements in communication, Morse code is no longer needed except in unusual cases. Thus its elimination in licensing, Many applicants considered it a form of legalized hazing anyway.

quest — cont’d

pecially if the boat is something other than your typical Catalina 27 or Ericson 35. The market for some East Coast designs can be ‘specialized’. Foreign-built hulls even moreso. But if you really want to flummox brokers, call up and tell them you have a 65-ft steel schooner that your father built up in the Delta, and watch them not come running.

That was the situation the children of John and Pat Walsh found themselves in earlier this year. Their father had passed away in 2002 and left them the boat he had built and launched in 1988. They didn’t sail, didn’t know much more about the boat and, oh yes, she’d been sitting, largely untenanted, at her dock on Bethel Island for three years.

“What’s she worth?” they asked.

One broker estimated $25,000. Another reportedly recommended she be “taken to the breakers.” Bill Hersey of Mason Yachts in Sausalito decided to go up and have a look.

What he found and what he felt were similar to what we found and felt when we first met the Walshes in 1991: A cruising boat that was so robust, so unique, and so far ahead of its time that, frankly, we’d rather go through a typhoon aboard her than the Navy destroyer we served on.

Fortunately, Hersey was just what Quest II needed: someone who recognized what an incredible boat she was and, more importantly, someone who could figure out how everything worked, and get it working again. (Bill’s background includes a virtual lifetime of racing, doing deliveries and cruising, including several years in the South Seas aboard his own steel boat, the 76-ft ketch Suvatar.)

“John Walsh had it all up here,” says Hersey, pointing to his head. “Beyond simple sketches here and there in the files, there were no instructions for any of the boat’s systems.”

And this boat has systems. Among them — all unique, in our experience, in a sailboat of this size — a compressed air system, which allows the use of pneumatic tools (safer and simpler than electric tools); a pneumatic fuel transfer system whereby you can switch fuel between, ahem, 16 separate fuel tanks to trim the boat; a rain catchment system designed into the main cabin; a crow’s nest on the foremast from which you can drive the boat via remote control; a machine shop complete with lathe; and unheard-of corrosion control measures. The latter include triple-coating on every exposed surface with a heavy epoxy barrier coat and — get this — square tube framing that was hooked up to a vacuum pump, evacuated of air, injected with nitrogen, and welded shut. No oxygen, no rust. Although the boat had been sitting at the dock for three years, Hersey found next to no rust anywhere. And remember, this is a steel boat.

The list goes on and on. In 1991, Walsh told us he showed the boat to a lawyer friend, and the guy said, “I think you’ve got about 50 patents here!”

What did all this cost? “We stopped counting at $3.5 million,” Walsh once said.

Perhaps the only thing more unique than Quest II was Walsh himself. Australian by birth, he gravitated to the sea at an early age. He was, at various times, a merchant mariner, engineer and, for most of his last four decades, an internationally known big ship surveyor who listed Aristotle Onassis among his clients. In other words, Walsh had spent a lifetime continued on outside column of next sightings page
looking at what worked and what didn’t. And he integrated a lot of what did into Quest II. (The first Quest was a 40-ft wooden ketch he built in Australia in the 1940s.)

Walsh moved to the Bay Area in the early ’70s, and with his second wife, Pat, bought Bethel Harbor on Bethel Island in the Delta. One of the main purposes was to start building Quest II, but between the operation of the harbor and his continuing freelance survey work, which took him all over the world, the years started slipping by. Finally, in 1978, Walsh, who was then in his late 50s, began work on the modified Al Mason design that would become Quest II. It took 10 years to complete the boat, which was launched in 1988.

The first happy ending to this story is that Walsh got to enjoy his
quest — cont’d

creation. After launch, John and Pat ‘sea-trialed’ the boat by sailing to Mexico and spending a year cruising the Sea of Cortez. (Although they often sailed with friends, Quest’s staysail schooner rig with roller furling on all sails allowed John and Pat to easily sail the boat themselves.) She returned to Bethel Island for some additional fitting out,
quest — cont’d

then in 1991 headed south and west for an extended cruise of the South Pacific, Australia and New Zealand. On the outbound leg from Sydney in December, 1998, Quest encountered some ferocious weather. The Walshes shortened sail and continued to Hobart without incident. Only after arrival did they hear that the Sydney-Hobart racing fleet had been decimated by the same storm — 6 sailors dead, 55 rescued and 5 boats sunk.

Quest returned to Bethel Island in 2000, then headed north to explore the Pacific Northwest and Canada for six months. John and Pat departed the Bay again in 2001, this time bound for the Antarctic Peninsula via Chile. But John fell ill along the way, and they returned

where the buoys aren’t

When Tom Ochs felt a bump as he was racing his sailboat out of Mare Island Strait and into Carquinez Strait, he didn’t think much of it. Things that go bump in the water are part and parcel of racing at the gateway to the Delta. A few minutes later, however, he looked below and saw his bilge boards floating.

Using “two bilge pumps and a cordless vac” to keep ahead of the influx, he nursed his Shock 35 Somewhere in Time back to...
**VOLVO TEAMS AT A GLANCE**

**ABN Amro 1** (Netherlands, skipper: Mike Sanderson) — ABN Amro, an international banking conglomerate, is backing two boats in this race. This is the professionally-crewed one. As the first VO-70 launched (in January), this syndicate has been practicing longer than anyone.

**ABN Amro 2** (Netherlands, skipper: Sebastian Josse) — The 'JV' boat. None of the crew are older than 30, and all were selected via tryouts. Lots of enthusiasm, but little experience.

**Brasil 1** (Brazil, skipper: Torben Grael) — This team is well-funded and skippered by five-time Olympic gold medalist Grael. The navigator is Adrienne Calahan, the only woman in this year’s race.

**Ericsson Racing Team** (Sweden, skipper: Neal McDonald) — A Farr boat and sistership to Pirates. McDonald skippered the second place boat, Assa Abloy, in the last Volvo.

**Movistar** (Spain, skipper: Bouve Bekking) — Last spring, this boat and crew took off on ‘seatrials’ to Rio de Janeiro, along the way posting a new monohull 24-hour record of 530 miles. With some 18,000 miles under the keel, they have by far the most time ‘in the saddle’ of any syndicate.

**Premier Challenge** (Australia, skipper: Grant Wharrington) — Financial troubles seem to have hamstrung this effort from the start. They are definitely the dark horse of the fleet.

**Pirates of the Caribbean** (USA, skipper: Paul Cayard) — This first American entry in the Volvo since 1997, the boat the crew calls The Black Pearl started late (the last 70 launched, only last August), but has lots of things going for it, including a former winning skipper and spare-no-expense backing from Disney, who will use the boat and race to promote the sequel to Disney, who will use the boat and race to promote the sequel.

---

**quest — cont’d**

all aboard for the volvo

If you think the holidays are a busy time for shoppers and retailers, you should see the beehives of activity at the compounds for the seven entries in the upcoming Volvo Ocean Race, the round-the-world crewed event which starts November 5 in Sanxenxo, Spain. As this was written, two weeks before the start, it was hard to tell who was more exhausted, the crews sea-trialing the boats or the shore crews doing last minute modifications and final prep on them. In many ways, it will be a relief to finally start and have a little time to relax.

Well, at least for the shore crews. There’s not going to be much downtime aboard the Volvo 70s, all brand new boats built just for this race. In case you’re just tuning in, the 70s replace the former Volvo 60 class and, unlike their water ballasted predecessors, employ every go-fast trick in the book including water ballast, canting keels and forward canards (daggerboards). They are faster, more powerful and more difficult boats to sail — and will do so with two less crew than the 60s (10, down from 12).

At a press conference last month, Paul Cayard, skipper of the last-minute entry Pirates of the Caribbean (the boat was just launched in August) addressed some of the new technology, differences between the new and old boats (he won the ’97-’98 version of this race on the VO-60 EF Language), and what it’s going to take to win. Here are some excerpts from that event.

On the physicality of the new boats: “These boats are very physical. They are basically the same size and complexity of America’s Cup boats — but those boats are sailed by 17 people and they only have to do it for two hours a day. We have to sail this thing for 24 hours for 3 weeks with 10 people. So this is a gymnasium. You want to go to the gym? Sign up for one of these.”

On the technology: “It’s the future of sailing, the canting keel and canards. I think we’re going to learn a lot as we do the race. We’ve been experimenting recently with the board up, board down, half a board, what angle do you need . . . ? There’s just a lot to be learned.”

On the learning curve: “Right now, everybody’s operating at probably 30% of the potential of this class. By the time the race is over, the winners will be at 75 or 80%. Anytime you run a game that is brand new, the biggest gains are the first time you run the game, whether it’s Formula 1 cars or sailboats. So I think the team that wins this race will be the team that can constantly evolve and improve their boat toward...
volvo — cont’d

that 80% figure."

On the biggest competition: "I think the obvious thing to say is that Movistar and ABN Amro have got the most time in the boats and they should be first and second when we race inshore. They should have a lot of things sorted out."

On the disadvantages of starting late: "Starting last is not the ideal way to prepare for a race like this, and it’s further complicated by the fact that we have a new class of boat. A realistic aspiration is to have the Pirates competitive by Rio. The strategy is not to fall too far behind in the first three legs while we develop the potential of our boat. But I wouldn’t be doing this race if I didn’t think we could win."

The race course for the Volvo is 33,000 miles long. There are nine

missing buoy

the Vallejo Yacht Club, then arranged an emergency haulout at Vallejo Boatworks next door. What he saw that evening in late June gave him the willies: a 2-foot gash below the waterline.

What caused the near-sinking was the wreckage of G "1," the minor light at the entrance to Mare Island Strait. (A minor light sits on a permanent structure affixed to the bottom or the shore, and its location is precise, as opposed to a buoy, which moves around with the tides and currents.) In August, 2004, the light,
attached to a piling embedded in the bottom, was carried away. It was rebuilt in December, but disappeared again in February 2005.

This time, it might be awhile before it gets put back in place. In the meantime, a lighted buoy, G “WR1” does double duty — substituting as the channel marker, and also marking the wreckage of the fixed light.

The wreckage lies just below the surface, and uncovers at very low tides.

legs: **Leg 1** — Vigo, Spain, to Cape Town (6,400 miles); **Leg 2** — Cape Town to Melbourne 6,100 miles); **Leg 3** — Melbourne to Wellington (1,450 miles); **Leg 4** — Wellington to Rio (6,700 miles); **Leg 5** — Rio to Baltimore/Annapolis (5,000 miles); **Leg 6** — Baltimore/Annapolis to New York (400 miles); **Leg 7** — New York to Portsmouth (3,200 miles); **Leg 8** — Portsmouth to Rotterdam (1,500 miles); **Leg 9** — Rotterdam to Gothenburg, Sweden.

Like the boats, this is a completely new course. Scoring for the ocean legs will be high-point (the first of the seven boats to finish each leg gets 7 points), with extra ‘bonus points’ awarded for passing through five optional ‘gates’ along the way. Also new this time: there will be in-port fleet racing at some of the venues which counts in the overall stand-
volvo — cont’d

ings. Winners of these outings get half a point for every boat they beat (so the top boat would get 3.5 points), which amounts to about 20% of the total score. As mentioned last month, the buoy racing angle had led to some interesting strategies, one of which is to bring in special personnel just for the buoy races. Bay Area superstar John Kostecki is one of these ‘hired guns.’ Kostecki, winning skipper of the last Volvo (aboard the VO-60 illbruck) will sail for the Swedish Ericsson team on the in-port races only. As mentioned last month, the other major Bay Area player in this year’s Volvo is Stan Honey, who will bring his considerable navigation skills to the Dutch ABN Amro Team.

Good luck to all the teams. We’ll be following the Volvo in these pages as well as periodically in Lectronic Latitude (www.latitude38.com). In the meantime, check in for the latest updates at the race website, www.volvooceanrace.com.

missing buoy

That’s unusual said Chief Petty Officer Steve Elsasser, who is the Coast Guard’s officer in charge of aids to navigation in the Bay Area. “Ninety percent of the time,” he said “when an aid gets struck, it falls all the way down.”

‘G-1’ is not alone. Elsasser said there are 10 such casualties in the Bay Area, each one costing $20,000 to $40,000 to restore. The work is usually let to civilian contractors, but the current Coast Guard budget for such repairs is fully committed, so the restoration will have to wait.
big tri to try for hawaii record

By the time you read this, one of the biggest, fastest boats on the planet will have arrived in San Diego to start prepping for an attempt on the TransPac record. She is the 120-ft trimaran *Geronimo* which arrived stateside fresh off setting a new round-Australia record in July.

If you’ve followed the maxi-multihull circuit at all, you will know that *Geronimo* is the brainchild of flamboyant Frenchman Olivier de Kersauson. Highlights of his resume include no fewer than six attempts with two different boats (*Geronimo* is one of them) at the Trophee Jules Verne — the nonstop round-the-world sailing record. He succeeded once, in 1997, and held the record for five years.

If this is old news to you, you will also know that de Kersauson has an almost fanatical obsession about bettering any sailing record set by countryman Bruno Peyron. He hasn’t come out and said it, but we think it’s one of the main reasons he will try for the TransPac record. The current mark for the 2,215-mile course from Los Angeles to Honolulu (not 20,215 as noted in the *Geronimo* website) is 5 days, 9 hours, 18 minutes, set by Peyron in 1997 aboard what, by modern standards, is an old, small crude boat: the 86-ft catamaran *Explorer*. *Geronimo*, launched in 2001, is a second generation maxi-multi — bigger, faster and better funded by sponsors Cap Gemini-Schneider Electric.

With any sort of wind at all, and assuming the boat doesn’t break, the TransPac course record doesn’t stand a snowball’s chance. The crew of *Geronimo* could sleep the whole way over and still beat *Explorer’s* mark. (And just to clarify, this will be a single-boat attempt and not part of any organized race.)

We think that would be a great thing, because it might encourage other maxi-boats to come to the West Coast for a whack at it themselves. Particularly Peyron, who launched the world’s first and so far only third-generation maxi, the 120-ft cat *Orange II*, just last year. Almost right out of the box, she set a new day’s run record of 706.2 miles in 24 hours, and earlier this year she obliterated the Jules Verne course in 50 days, 16 hours, 20 minutes. At the moment, she is the fastest oceangoing sailboat ever built.

Kersauson has not announced a date for *Geronimo’s* TransPac record attempt, but has said that there will likely be several Americans among the crew. We’ll let you know more when we do.
short sightings

BAY AREA — The Bay Area, along with much of the sports world, was in mourning last month over the unexpected death of beloved sportscaster Bill King. King, 78, died in a San Leandro hospital on October 18 of a pulmonary embolism — a blood clot which developed after surgery the previous week to repair an artificial hip.

“Bill King was a man of many passions,” noted fellow sportscaster and former NFL coach John Madden. “Painting, fine dining, ballet, anything he did, he really got into it.” One of the things he really got into, for a number of years, was sailing. While the sports world will long remember Bill for the color and class he added to basketball’s Warriors, football’s Raiders and baseball’s Oakland A’s, there are some, including Bill’s family, who will remember the passion he once had for sailing.

“In the ’60s, we were living on a 32-ft yawl named Hurricane in Sau-

Old dogs, new tricks — action was hot and heavy at the Masters Regatta (skippers over 60, crew over 45) last month. Read all about this annual homage to sailing’s elders later in this issue.

three hour tour

The Polar Challenge is an annual shorthanded race which departs Sydney Harbor, goes around a line of longitude, and back again. Total distance: 24 miles.

During the last one in July, the 46-ft cat Incinerator capsized. The crew were rescued by the Australian Coast Guard, but the boat could not be recovered at the time and later could not be found. Last month, a ship ran across her and took the photos at right. Interestingly, she was flipped upright again at some point. And with no plans for recovery, that’s appar-
salito before anyone had even invented the term ‘liveaboard,’” says John Stephens, a well-known local rigger now working with South Beach Riggers in Sausalito. John’s mother moved the family (including sister Kathleen) aboard after marrying King. There was rarely a dull moment with a stepfather like Bill King around. John remembers going to games with Bill and meeting guys like Wilt Chamberlain.

On the sailing side, King sold the little yawl and in 1970 bought Varuna, a beautiful 44-ft Alden ketch. John remembers sailing that boat all over the place. “There were trips to Hawaii, to Canada . . . lots of daysailing. When we were kids, the annual vacation was to gunkhole down the coast — Santa Cruz, Moss Landing, Monterey, Stillwater Cove, then back up to the Delta. We did that for years.”

As other work and other passions took hold, King didn’t sail as much. “I can understand why most people wouldn’t know about Bill’s sailing,” says Stephens. “That boat hasn’t left the slip in 20 years.”

Our condolences to John Stephens and the rest of the King family.

SOMEBEYWHERE OUT THERE — Dragon Spirit, an O’Day 40, remains missing in action at this writing.

Blair and Marian Thomson headed out of Victoria, BC, on September 14, bound for San Francisco on the first leg of an intended cruise around the world. As is often the case with boats traversing this route, it was feast-or-famine wind-wise. The first few days, there was virtually no wind at all. Then it filled in to an ideal 15 knots for a day. Then it started blowing, really hard. By September 20, the Thomsons and their crew, Bev and Dave Carter of Nanaimo, were about 50 miles NW of Eureka, hove to in 35-40 knots with gusts to 50 and 15-20 ft occasionally-breaking seas. As conditions continued to worsen, the boat was unable to maintain a hove-to position and kept falling off to lie abeam. The forecast indicated these conditions would last another three or four days.

The Thomsons and Carters, exhausted and feeling their lives were at risk, finally put out a mayday. They were rescued about 6 p.m. by a Coast Guard helicopter and flown to Eureka.

Thomson had buttoned the boat up and intended to retrieve her when the weather finally abated. With assistance from the Coasties, they plotted a likely drift pattern for Dragon Spirit in the hope of locating her by air.

Two expensive days of air searching turned up nothing.

On October 6, the research vessel Nord Sound sighted Dragon Spirit 500 miles almost due west of Point Conception. Her stormsail was still up and she looked to be in good shape (photo above). Unfortunately, the expense of recovering — or even refining — a boat out that far was prohibitive.

We were unable to reach the Thomsons directly before pressstime, but learned through contact Ron Kolody of Vancouver’s Blue Water Cruising Association that they still hope to recover the boat. Their best strategy now seems to be to wait until she shows up again closer to land. That will most likely be near Hawaii sometime in December.

In the meantime, anyone with any further information on the boat is asked to contact Ron at ve7bgk@arrl.net or the Coast Guard at (707) 839-6113.

'The Chamberlin 46 'Incinerator' (above, shortly after launch in 2004) flipped near Sydney in July. She was spotted last month some 800 miles away (center and right), upright, dismanted and sporting her very own ecosystem.'
Thanksgiving at the Silverwood home in San Diego is going to be a particularly poignant holiday this year. Emerald Jane took it all in stride, each passage seeming to reconfirm what a good choice she had been. The only real problems they had for the first two years were those any cruising boat has — a glitchy autopilot, a generator that gave up the ghost, etc. John says it was wonderful to see the kids adapt to the cruising life and get in tune with the boat. In fact, by the time they reached the Pacific, then 8-year-old Jack was one of the best helmsmen aboard.

For John Silverwood, a 50-year-old real estate developer, the dream began in Florida in March of 2003 when he took possession of a Lagoon 55 catamaran named Emerald Jane. He’d checked out the larger, newer Lagoon 57s at the Miami Boat Show, but had chosen the 1991-built 55 because, as a forerunner to the 57, she was built extra heavily using extensive kevlar and epoxy along with carbon fiber. She proved an excellent choice for Silverwood, his wife Jean, 47, and their four growing children: Ben, 13, Amelia, 12, Jack, 7, and Camille, 3. After purchase, John sailed the boat from Florida to Long Island Sound, and after a brief visit with Jean’s family there in September, the family took off down the East Coast for the beginning of a several-year cruise. The short-term goal was Australia, with a loose plan to continue on around the world.

The first years of the cruise were a dream come true for John and Jean: visits with many friends and relatives at stops along the East Coast and Caribbean, scuba diving in the Virgins, stops at the site in St. Vincent where much of Pirates of the Caribbean was filmed — and the tiny island in the Little Tobago Cays where Johnny Depp’s ‘Captain Jack Sparrow’ was marooned. Silverwood could even look back and chuckle at his mistake of leaving Aruba for Panama and getting caught in a terrific storm. “It wasn’t until after the fact that I read in Jimmy Cornell’s book that I should have waited. That particular passage is one of only two places in the book where he actually uses the word ‘notorious!’”

John and Jean Silverwood.

Adding to the fun the whole way strike up a friendship with the nice folks aboard the London-registered 67-ft ketch Fruity Fruits — because of her name. But it was impossible not to like Steffan and Carolyne Van Zwaim and their twin teenagers, Stephanie and Jason. Once Steffan explained that Fruity Fruits is a European expression meaning ‘abundance’, they all had a big laugh about it.

It turned out the crew of Fruity Fruits were in Norfolk preparing for a November crossing to Bermuda, so the two boats agreed to meet up there. Then the next stop, and the next. After awhile, as the friendship deepened between both the adults and children, the Silverwoods and

Below, better days. ‘Emerald Jane’ (with Ben, Camille and Jack on the tramp) at anchor in Moorea.
Van Zwaains began planning almost every passage and destination around ending up together. And so it went, on through the Caribbean, Panama and into and across the Pacific.

In January, 2005, John and his family left Emerald Jane at the Careenage in Raiatea and flew home to San Diego. The idea was to 'recharge the batteries' and put the kids back in school for a semester — not to mention give Jean a break from home schooling!

John flew back to Raiatea in early June to complete some maintenance on the boat. When the rest of the Silverwoods arrived several weeks later, she was ready to go. On the morning of June 24, they cast off the lines and headed west: destination, Australia.

John Silverwood is about as experienced a cruising sailor as you'll ever meet. He has sailed since he was 11, starting in Skipjacks on the Chesapeake. When he was 19, he bought a 36-ft yawl and sailed her down the East Coast to Florida, the Bahamas, Jamaica and Mexico. He made similar passages in a later Ohlson 36, and then a 31-ft Brown Searanner trimaran that he built himself. Since moving to San Diego in 1985, the Silverwoods have sailed mostly charter boats out of San Diego Yacht Charters.

With all his cruising background, Silverwood is a careful navigator. He notices things like when his GPS put one South Seas island six miles away from its charted position. So when Manuae Atoll in the Society Group loomed into view just before sunset on the 25th, he double-checked its position, then altered course a little south so as to give the place an extra-wide, extra-safe pass.

As darkness fell that Saturday, the second night out, they were sailing almost dead downwind under jib alone (the main had been dropped earlier in the day due to a troublesome pin in the boom gooseneck). Under autopilot, Jane was making about 7 knots in 15-18 knots of breeze with 8-foot following seas. The radar was on, the skies were overcast, there was no moon, and when darkness came, it was complete.

Emerald Jane hit the reef about 7 o'clock. John and Jean were below. The only warning they had was a slight thump a second before the big cat came to a loud, grinding halt. John says you could feel parts of the boat starting to break almost immediately. Within seconds, both hulls were flooding. Within minutes, he knew the boat was lost.

That doesn't mean he didn't try to save her. One of the engines had been running when she hit (to charge the fridge) and he quickly got the other going. But the swells from behind were relentless, pushing the boat ever farther onto the coral, and she wouldn't back off under full power — even after he cut the genoa sheets. Worse, the waves made quick work of Jane's 14-ft inflatable dinghy, breaking it loose from its davits aft and jamming it and its outboard irretrievably under the boat.

Panic ensued for a few moments until John assured his family that they would be okay, and started giving out assignments. Jean managed to get off a single mayday on the SSB before all the electronics on the boat went dead. They couldn't find the handheld VHF
either side of the boat as their beams flashed. A reef as far to Jean's left. She looked after the smaller kids. John set about assessing the situation while John activated the EPIRB. Then he and Ben dropped it out of commission permanently. The Silverwoods' last phone was proved ineffective, as reception was spotty in mid-Pacific. The Iridium phone proved ineffective, as reception was spotty in mid-Pacific. The phone was dropped, putting it out of commission. The Silverwoods' last phone was proved ineffective, as reception was spotty in mid-Pacific. The phone was dropped, putting it out of commission. The Silverwoods' last phone was proved ineffective, as reception was spotty in mid-Pacific. The phone was dropped, putting it out of commission.

The next thing John knew, he was looking over the side, where the raft could be used. He didn't believe he would reach. Silverwood didn't know if the raft to the net in front of the boat because the coral was too dangerous to go below anymore. Everyone was preparing to abandon the boat, but that decision was made too late. reef was visible. For another, Ben spotted an area about 200 yards from the boat that looked relatively dry, with no waves breaking on it. He gathered his younger brother and sisters together, had them grab cushions and other items to sit on, and walked them over the reef to that safe area. Once they were as settled as they could be, he returned to the boat.

The next order of business was to get John off the boat, which continued to distintegrate around them. Just moving around on the broken, lurching boat was difficult. Add in broken bulkheads and jagged, flailing bimini supports and staying aboard was becoming an increasingly dangerous proposition.

The mast fell because the structure involving the headstay had failed. John’s sure it was lost headstay tension, because both of the bows were actually breaking off. When the capshrouds started pulling the mast backwards at the truck, the deck-mounted mast base shot forward. In addition to hitting John, the mast had wedged the Switlik raft in place on the forward net (and popped its inflatable canopy). But the continual breakup of the boat finally ‘freed’ the raft.

Because there was still water around the boat, and the wave action was lessened by the outgoing tide, Jean and Ben formulated a plan to float the raft aft alongside the boat to where John lay, then get him into it. It worked, although waves capsized it once, dumping the raft’s provision bag. They righted the raft, got John into it, said their good-byes to Emerald Jane — and began walking over the reef to where the kids were, towing the dinghy and being careful it didn’t get popped.

Upon arrival near the kids, they found a small, protected pool in the reef where they could park the raft so it could float safely and not hit the coral. Amelia, now 14, was charged with keeping the raft in place. Although John never lost consciousness through the whole ordeal, by this time he was cold and shocky, so Jean got some of his clothes off, as well as most of hers and 5-year-old Camille’s, and they wedged in next to John to try to warm him up.

Meanwhile, Ben and brother Jack, now 9, used glow sticks to search the reef for useable flotsam. The family had eaten dinner right before the boat hit the reef, so none of them were really hungry, but Ben knew John was dehydrated and needed fluids. He was able to recover some water and a Diet Coke from the reef.

Sunrise at 6 a.m. revealed the full extent of their plight. They were about seven miles SSW of Manuae Atoll proper (estimated position: 16°35’S, 154°40’W), and the reef they hit stretched as far as they could see in either direction. First light also revealed, way off in the distance, a multi-engine jet. It turned out to be a French military aircraft that was responding to their EPIRB signal. Ben again fired flares, and the plane immediately changed course and passed low over them.

As mentioned, the Silverwoods were without a radio. But as soon as they were spotted, the plane radioed the atoll. Manuae is a turtle sanctuary, and no one is supposed to live ashore, but it was well known that a Polynesian fisherman and his family had set up housekeeping there. Luckily, he had a radio. It was an emotional moment for the Silverwood family when the man and three of his teenage sons appeared in their 20-ft open boat.

The ride to Manuae took 45 minutes. When they arrived about 9:30 a.m., they were greeted by the man’s wife, Diane (the only name Jean recalls) and the rest of his 16 children — really! Although the Polynesian family spoke no English and the Silverwoods spoke no French, important matters like getting the shipwrecked cruisers fed and into dry clothes were taken care of. Diane even gave them necklaces made of black pearls. “Their generosity was unbelievable,” says Jean.

At noon, a large French military helicopter landed. Along with a pilot and co-pilot, there was a doctor and nurse aboard, as well as a rescue diver. John
was given morphine and hooked up to IVs, then all six Silverwoods were loaded into the helo and flown to Bora Bora. (The helo had taken off from Tahiti but refueled at Bora Bora.) In order to get John to the hospital in Tahiti as quickly as possible, in Bora Bora, he and Jean were transferred to a small military jet. The kids — looked after by Ben and the helo crew — followed later in the helicopter.

The full impact of John’s injury did not hit Jean Silverwood until they arrived in Tahiti about 4:30 p.m. She knew the injury to his leg was very serious, even life-threatening. But it wasn’t until they landed and she was trying to converse with the pilots and ambulance personnel — again, few of whom knew more than basic English — that she really became alarmed. “Everyone was telling me, ‘It’s okay, it’s okay’, but you could see on their faces that they didn’t mean it,” she remembers. Then one nurse, doubtless trying to help, communicated that the tourniquet was bad for John’s heart and John’s entire leg. . . “Off! Off!”

Communications improved upon arrival at the hospital, where an official from the U.S. Consulate was there to meet them. But the news he translated didn’t seem much better. The leg wound was severely infected, which was putting off surgery until the next day. A cut on Ben’s head was treated with a full head wrap, which amused everyone.

Animation’ (their name for ICU), that his injuries had been saved, and that he was doing well. From that point, it was basically logistics on how to get home. No attempts were made to return to the wreck site to salvage anything from Emerald Jane for the simple fact that, by the time they flew over in the helicopter, there was almost nothing left of the boat. “At best, 20 percent of the boat was left,” says John. John spent the next 10 days in the hospital in Tahiti, with the exception of an afternoon when he appeared in a wheelchair at an awards ceremony for the helicopter crew who had rescued his family. On July 7, he began a ‘hospital-hospital’ transfer aboard a commercial jet bound for California. (Jean was thrilled to find that this was covered by the family’s Platinum Mastercard under a plan called ‘evacuation and repatriation’. It included a U.S. nurse being flown down to accompany John. The plan is apparently not available under the Gold Mastercard.)

From LAX, an ambulance took John to Scripps Memorial Hospital in La Jolla, where he stayed for two more weeks. Among the work done to him was a second amputation — this time above the knee — to make the eventual fitting and use of a prosthetic easier. Infection, always a problem in massive wounds, necessitated a third major surgery to once again clean the wound and ‘irrigate’ the bone with antibiotics.

The Silverwood family at an awards ceremony held for their rescuers in Tahiti. Ben, at left, is up for a medal of his own. He will receive the Honor Medal with Crossed Palms, the Boy Scout equivalent to the Medal of Honor.

John finally went home on July 25, exactly a month to the day after Emerald Jane hit the reef. Friends had been staying in the Silverwood’s house, so the move back home was accomplished quickly and easily.

At this writing, the kids are back in school and the shore-bound family routines are in place. But things are still far from normal. When we began our interviews with John in September, he had just started fittings and physical therapy for his prosthetic leg — a painful process that can take up to six months. He was also having trouble with feelings of guilt for putting his family in such a dire situation. Before we started talking, he had not discussed it much with anyone outside the family.

So what did go wrong that day? John and Jean admit that they are still mystified. According to the charts they had, they were clear of any reefs in that particular area and, as mentioned, had swung slightly south when Manuae was sighted in order to give any fringing coral a wide berth. The only thing John can figure out is that they might have been set north by current. With the autopilot steering an almost due-west course (though not tied into the GPS), they could well have been pushed several miles north over the course of June 24-25, especially after being slowed down by the broken pin in the boom gooseneck.

What’s next for the Silverwoods? For the foreseeable future, they plan to settle back into life ashore. John needs to get well physically and mentally. In the longer term, there will certainly be more sailing in local Southern California waters. Way out on the horizon, the possibility of cruising again is definitely there (although young Jack stipulates, “Not around any reefs!”) They are still in daily email contact with Fruity Fruits and other cruisers they met along the way.

“I’m really taking things day by day,” says John. “But yeah, I do catch myself thinking about it. You know: cat or monohull, the best way to run sheets, that sort of thing. I guess I can’t help it. It’s in my blood.”

Jack London Square Marina
An Almar Marina

Location, Location, Location. Imagine your boat in one of the most desirable locations in San Francisco Bay, Jack London Square. Here you will find yourself within walking distance of several fine restaurants like Scott’s Seafood, Yoshi’s and El Pescatorí. Enjoy the Arts and Crafts Saturdays on the promenade or the Farmers Market on Sundays. Take in a movie at the cinema two blocks from your slip and on the way browse the many specialty shops throughout Jack London Square. It’s all just steps from the marina. Because Jack London Square Marina is an Almar Marina, you can enjoy reciprocal privileges with all of Almar’s California marinas. Call today, mention this ad and be our guest for the weekend. See for yourself the benefits of a great location. Slips are now available in Jack London Square for boat sizes 36’ to 75’.

Call us at 800.675.3625 for more information about all of the Oakland Marinas. The Oakland Marinas consist of four marinas in the Oakland Estuary from Jack London Square to Coast Guard Island.

www.oaklandmarinas.com

Almar is the largest operator of salt water marinas on the West Coast. With thirteen facilities situated in the most desirable locations, Almar Marinas provide a wide range of services and programs that few marinas can offer. Some of these programs include: monthly boating seminars, boat handling classes, navigation courses, and organized outings to beautiful local anchorages. Each marina offers wireless high speed internet access, which can be used with your reciprocal privileges at any of Almar’s California marinas. To see what a difference this makes, visit one of our marinas this weekend. With thousands of slips in convenient locations, let us find one for you.
Two hundred 'friends and family' attended a special birthday celebration last month. The guest of honor was the 55-ft schooner Santana, one of the most revered classic yachts on the West Coast — to both sailors and nonsailors. And therein lies a story.

It was way back in 1934 that California oilman W.L. Stewart walked into the offices of Sparkman and Stephens and commissioned a state-of-the-art racing schooner. The way the story is told, Olin Stephens — at 25 already showing the glow of genius that in a few years would give the world such legendary craft as Stormy Weather, Bolero and Ranger (and had already given it Dorade, launched in 1930) — tried to convince Stewart that yawls were the way of the future. But oilmen can be stubborn — it had to be a schooner, Stewart insisted. So a schooner it was.

Santana was built at the Wilmington Boat Works in San Pedro of mahogany over oak frames. She was launched on October 24, 1935, and almost immediately showed both the pedigree — and the foresight — of her designer. Santana showed her heels to most other schooners of the day, but in her first major ocean race, the 1936 TransPac, Santana took second in division and overall — to Dorade. Undaunted, Stewart put her on the deck of one of his tankers (a stunt unprecedented at the time) and shipped her to Newport, Rhode Island for the 1939 Bermuda Race. She won the schooner division, but overall honors went to Baruna, another S&S yawl.

Stewart sold the boat the next year. (He later went back to Sparkman and Stephens, this time listened to Olin, and got the world-beater he wanted, the 67-ft yawl Chubasco.)

The next phase of Santana's life made her more enduringly famous than if she'd won every race she ever entered. It is known among Santana-philes as "the Hollywood connection."

The boat's second owner was Charles Isaacs, a San Diego millionaire who was married to Eva Gabor. He sold her two years later to actor George Brent, who finally did what Stewart's pride wouldn't let him — change her to a yawl. The boat's original mainmast was moved forward to become her 'new' mainmast. It was a tad on the short side compared with other yawls of the day, so she was still no racing grayhound in Southern California. But it proved ideal in later years when she came north to San Francisco Bay.

But let's not get ahead of ourselves. Continuing what had become something of a Tinseltown tradition, Brent sold her to Ray Milland in 1944. He didn't even have her a year. Dick Powell and June Allyson were next, owning her barely a year — making it an even 5 owners in her first 10 years.

It was Santana's sixth owner who cemented her legend. In December of 1945, Humphrey Bogart acquired the boat. Without taking away from the many other owners who have sailed, preserved and loved Santana over the years, the decade that Bogart and his wife Lauren Bacall owned the boat is the era that stands out in most people's minds when you mention Santana. Owners may come and owners may go, but Santana will forever be best known as 'Bogie's boat'.
Bogart was an enthusiastic sailor and racer, spending upwards of 45 weekend a year on the boat and campaigning her all around Southern California. He also spent many a weekend aboard Santana at Catalina, drinking with friends and dining on illegally-caught lobster. Although Ms. Bacall sometimes came along, he is said to have preferred stag cruises. “The trouble with having dames along,” he once observed, “is that you can’t pee over the side.”

When Bogart died in 1957, a model of Santana was displayed in place of his casket at his memorial service, as stipulated in his will.

Even though, by that time, Santana was getting a bit long in the tooth for racing. The CCA rule under which she’d competed for so long was giving way to IOR, an inhospitable environment for old, full-keel wood boats.

Solari did a few Mexico races and Big Boat Series with her, and though podium finishes were rare, she still acquitted herself well against such then-new gold-platers as Audacious and Kialoa II. The twilight of her racing career came in the late ’60s when Solari took her back to the East Coast for the ‘68 Bermuda Race. Hopelessly outclassed by newer craft, Santana turned in a forgettable performance. But she was not forgotten. When a crewman showed up at a tiny boatyard in Hamilton Cove to have one of Santana’s cracked spreaders repaired, the grizzled old proprietor asked what boat he’d come down on.

“Santana,” came the reply. “She’s an old timer. You wouldn’t know her.”

The old guy climbed up into a dusty loft above the shop and came down with a familiar-looking piece of wood.

“Here’s the spreader I replaced when Santana was down in ’38,” he said.

If Solari was the last owner to seriously campaign the boat as a racer, she did more sailing under her next owner than any that had come before: Charlie Peet departed the Bay in 1971 and sailed her around the world with his wife, local sailmaker Jim Leech, and an ever-changing crew of characters.

She returned in 1973 and Peet sold her to — if you’re counting — her 11th owner, drama therapist Lloyd Carter. Carter had her only a few months before putting her on the market once again. The old girl could hardly have found two better owners at that point than twin brothers Tom and Ted Eden, lifelong sailors and owners of a San Francisco architectural firm.

The Edens had the vision to treat Santana like the royalty she had become. Although the boat had never been allowed to deteriorate like so many once-grand yachts, the years had taken their toll. So the first order of business was a complete refit, done largely by the brothers themselves along with the new boat captain, Ralph Lucas. Once the total

Erica (left) and Sarah hit the bottle at 'Santana's 70th birthday and rechristening celebration.
SANTANA'S SEVENTIETH

The 70th birthday and rechristening party came about for lots of reasons. One was simply to celebrate one of the grand dames of West Coast sailing. Another was to note her rebirth as a schooner. Yet another was to thank the many people who contributed countless hours to the restoration. Still another was to celebrate all the people who have been touched by this great boat over the years. Wherever she goes, they come down to the docks, many in frail condition and supported with a cane. They thank the Kaplans for preserving the boat, tell their tales and, for a fleeting moment, become teenagers again, prancing the decks as Santana broad reaches for home.

Among the invitees were relatives and descendants of everyone from W.L. Stewart first homed Santana — and a few old timers still remembered her! Another was almost the Ensenada race, until the wind quit and they bailed due to crew commitments ashore. Santana returned to the Bay in August.

The time someone noticed, she had flooded to deck level. She was quickly pumped out, but all the machinery, electronics and upholstery were ruined.

Enter Paul and Chrissy Kaplan, longtime Bay Area sailors, owners of multiple boats over the years, and currently the 'Kaplan' half of KKMI — Keefe-Kaplan Maritime, Inc., the Richmond boatyard that Paul runs with partner Ken Keefe.

One peek under the canvas cover was all it took for Santana to cast her spell. In August, 1998, Santana was towed across the Bay to Richmond and put 'under the knife' once again. Little did anyone suspect at the time it would be her last voyage as a yawl.

Eight months and about a billion man-hours later, the completely refurbished Santana went sailing again. And when we say 'refurbished', the Bugattis at Pebble Beach don't get this level of attention. The interior was virtually gutted and completely rebuilt. She got a new engine, new cockpit, new deck — and new look. To everyone's amazement (and many's dismay), Kaplan had converted her back to a schooner. "As far as I know, we're the only ones who have ever gone 'backwards' with a restoration," laughs Paul. Significantly, her mainmast once again remained her mainmast — the original spar was moved back into its original position, complete with the original 1897 gold $10 coin under the step.

Despite the naysayers, the Kaplans could not be happier with the schooner rig. "We could sail her as a yawl by ourselves, but she would not have been as easy," notes Paul. "With the staysail schooner sailplan, instead of a few big sails, you have several smaller ones, which makes her easy for two of us to sail."

Of course, that's rarely the normal state of affairs. Most often when the boat goes out, it's with a bunch of friends and family aboard.

Like some of her former owners, the Kaplans enjoy 'reliving the old days' with Santana. That's one of the reasons that last spring, they sailed out the Gate and headed for Southern California. (The other reason was to escape the rains in Northern California, but that plan went awry when SoCal experienced one of its wettest springs in history.) What they didn't expect — or at least expect so much of — was the reception the boat got everywhere she stopped. One highlight was attending opening day at the Los Angeles Yacht Club, where old W.L. Stewart first homed Santana — and a few old timers still remembered her!

Lauren Bacall turned 81 in September. Happy birthday to both great ladies!

In the Wake of the Zaca
A DOCUMENTARY BY LUTHER GREENE

Few sailing vessels are surrounded by more myth and legend than the yacht Zaca. Launched on the eve of the great depression, the 118’ gaff-rigged topsail schooner has sailed through 75 years of history from one remarkable adventure to the next. Zaca has served as a luxury yacht, scientific research vessel, navy patrol boat, and party boat for Hollywood swashbuckler Errol Flynn. Nine years in the making, this documentary film offers a riveting window into the past as seen through the eyes of this historic ship and the survivors of those who sailed on her.

OPEN SATURDAYS by appointment
Is a port tack start better than sex? That question was asked — and answered — in the lighthearted after-dinner speeches on Saturday night at the 27th International Masters Regatta, sponsored by Dry Creek Vineyard and hosted by St. Francis YC on October 14-16. The annual J/105 regatta/reunion attracted 13 prominent Master skippers this year, all over 60, along with their slightly younger crews, all over 45. Given the advanced age of the crowd, the port tack vs. sex debate seemed particularly relevant, and raged on all weekend.

Fortunately, the real question of the weekend — who's the hottest Master these days? — was more easily answered. San Diego sailing legend Malin Burnham, a 77-year-old retired real estate baron and former Star and America’s Cup player, led the regatta wire-to-wire, capturing his third Masters title in the last six years. Sailing with local talents Chris Boome (main/tactics), John Claude (trim), John Ravizza (pit), and Joe McCoy (bow), Burnham never strayed off the podium, finishing with a 1,2,3,1,3 record to beat runner-up Bruce Munro by five points. “Malin is a natural sailor, totally smooth,” marveled Boome. “He’s also a complete gentleman on the boat, a real pleasure to sail with.”

Burnham put the fleet on notice from the beginning, winning the opener on Friday afternoon aboard Donkey Jack with owner Scott Sellers aboard. Rod Johnstone, who had Sailing World editor John Burnham on tactics, withdrew from that blustery race after crewmember Bill Boatwright was thrown into a stanchion during an accidental jibe (he required ten stitches in his cheek). Three kites — all old 77-square meter ones rather than the owners’ bigger and newer 89s — also blew up, and a jib ripped. With a chilly westerly touching 28 knots and gear already failing on the borrowed boats, regatta chairman Pax Davis wisely called off the second race.

A keg of beer and a case of Dry Creek...
Take a number, get in line — The fleet stacked up rounding Anita Rock against the ebb on Sunday. Photos by Leslie Richter.

wine magically appeared on the dock as the slightly battered fleet pulled in, and the story-telling and teasing began. Davis, a true-blue Cal supporter, spread the rumor that Burnham and Sellers were being protested for advertising (they flew a Stanford flag after the race, as four of their crew went to The Farm), to no avail. The party eventually drifted inside, and many of the Masters spent the evening upstairs at the elegant black-tie America’s Cup Hall of Fame Induction Ceremony honoring Fritz Jewett, Jack Sutphen, and the late Alan Payne.

As if to make up for Friday’s excess, the Bay was on its best behavior for Saturday’s three races. Burnham, sailing Advantage 3, was once again the low-point boat of the day with just six points, while regular Master attendee Bruce Munro — sailing with Jim Coggan, Paul Heineken, Gordie Nash, and Randy Smith — emerged as the series runner-up with nine points for the day. Scorpio owner John Siegel, helped by a bullet in the second race on Saturday, was third overall at the end of the long day. Dave Irish, with Yachtsman of the Year Kevin Burnham calling the shots, was also up in the mix until their kite vaporized in a puff, sending them in early with a DNF in the third race.

Following the traditional Saturday night dinner, the racing resumed after a one-hour postponement on Sunday. Burnham, sailing Jupiter and loosely covering Munro all day, took a third to easily win the regatta. Munro held steady in second, while Laser guru Dick Tillman — sailing with fellow Laser aficionados Peter Vessela and Tracy Usher, along with Matt Carter and John Hourihan — won the last race by 100 yards to leap-frog into third overall. Bob Mosbacher, sailing with a crew of talented Texans, including recent J/105 national champ Glenn Darden, was fourth, while Siegel chocked with a 12th place in the last race.
But the Masters has always been about more than just beating each other up on the race course — most everyone connected with the event has won enough races to last a lifetime, and comes to the regatta mainly for the friendships and camaraderie. It’s a celebration of the sailing life, and it has become one of our favorite regattas over the years. The heart and soul of the regatta revolves around the Saturday night dinner, where each Master is given the floor for a few minutes to reminisce, tell jokes, or whatever.

Here are some random quotes from this year’s speeches:

Don Trask: “We’ve got two commodores on our boat, Doug Holm (StFYC) and Wendy Miller (SFYC). It didn’t help much!”

Ian Bruce: “35 years ago today, I spent 72 hours fiberglassing up the first Laser.

I put the hull and deck together at 5 a.m., and drove all night to Wisconsin to deliver the 'Weekender', as it was initially called, to Hans Fogh, who debuted it in the America’s Tea Cup Regatta. Hans won his class, and three months later the boat was displayed at the New York Boat Show.”

Dean Dietrich: “Is a port tack start better than sex? After a lively discussion,
Masters, cont’ — The Class of 2005, back row from left: Mosbacher, Irish, Burnham, Trask, Munro, Siegel, Johnstone, and Fogh. Front, from left: Jennings, Dietrich, Tillman, Harken, and Bruce. Three-time winner John Jennings (‘Jupiter’) was off the pace this year; Bruce Munro (center) and his second place gang; regatta hosts Nancy and Don Trask with the Masters trophy; a colorful quartet.

my crew concluded we need to conduct further research on both subjects.”

Peter Harken: “We got face-planted so many times today, I began to wonder, ‘Am I charging these people too much for my equipment?’ At least with iceboats, when things go wrong, you can step out of the boat and into the closest bar.”

Dave Irish: “I don’t sail any regatta I like more than the Masters.”

John Jennings: “This year’s racing has been like my golf game — one birdie and a bunch of triple bogies!”

Rod Johnstone: “It’s fun to get my family together and sail this regatta in a boat I designed. It was also fun to see Arbitrage again, which used to be my boat, Ragtime. And it’s nice to be back here — I proposed to my wife Lucia on Mt. Tam in October, 1971.”

Hans Fogh: “I had a hip replacement at the end of June, and am just happy to be here!”

Bob Mosbacher: “I’m a Texan by choice and the oldest guy here, even older than Malin. I hope when I grow up, I’ll get invited back to the Masters.”

Dick Tillman: “Some of the most pleasant sailing experiences I’ve ever had are the result of the people in this room.”

John Siegel, who successfully port-tacked the fleet on Saturday: “Yes, Dean, port tacking the fleet is indeed better
Excellent sailors named Burnham, from left — John, Malin, and Kevin. The two younger guys aren't related to Malin, but wish they were!

At the Sunday afternoon awards ceremony, Burnham, a gracious winner, addressed the crowd again. "I don't sail much anymore, and this is the only regatta I do now," he stated. "I'm just the chairman of the board, and do what my guys tell me to do, so they deserve this (the crystal keeper) as much as I do. Accordingly, I've commissioned the yacht club to reproduce this trophy four more times, so everyone on my crew gets one."

It was a classy way to end a classy regatta. Kudos and thanks to the folks behind the scenes who continue to make the Masters one of the best and most fun

2005 MASTERS — 1) Malin Burnham, San Diego, 10 points; 2) Bruce Munro, San Francisco, 15; 3) Dick Tillman, Syracuse, IN, 24; 4) Bob Mosbacher, Houston, 31; 5) John Siegel, San Francisco, 33; 6) Dave Irish, Harbor Springs, MI, 33; 7) Rod Johnstone, Stonington, CT, 35; 8) John Jennings, St. Petersburg, FL, 36; 9) Hans Fogh, Toronto, 37; 10) Peter Harken, Pewaukee, WI, 41; 11) Dean Dietrich, Tiburon, 53; 12) Don Trask, Lake Norman, NC, 54; 13) Ian Bruce, LaSalle, Quebec, 55. (13 boats)

NOW OFFERING NEW CRUISING SAILS!
Arrgh! Let’s get something straight before next year’s Buccaneer Days at Catalina’s Two Harbors — a buccaneer is not exactly a pirate. Here’s the tale:

Around 1630, some Frenchmen who’d been driven off the island of St. Kitts by the Brits went to Hispaniola, which today is the shared home of Haiti and the Dominican Republic. They survived by hunting wild cattle and selling the hides to the Dutch traders — and picked up a little beer money by poaching livestock.

They were called boucaniers because they’d adapted the Arawak Indian method of cooking meat on wooden frames — known as boucans — so the meat was preserved and could be eaten later. The cooking method was known as baricoa and — no kidding — is where the word ‘barbecue’ came from. The islanders and English settlers began to use the term buccaneer to describe the Caribbean pirates of the 1660s, because they used the same method of cooking and preserving meat. The technical difference between pirates and buccaneers is that the former only marauded at sea, while the latter robbed, stole, and killed on land and sea.

It wasn’t difficult to form a buccaneer group, as there were large numbers of non-conformists, runaway slaves, failed planters, and ordinary criminals from which to draw on. All such bands needed to get started was a boat — which could be stolen — and some weapons. Buccaneers developed a reputation for being independent, adventurous, and criminal — but having a form of justice within their own group.

After the initial bases at Hispaniola and later Isla Tortuga, the buccaneers also established themselves near Port Royal, Jamaica. All three places made for ideal bases because they had great ports and rugged and lush mountains nearby in which to hide. In the early years, the Brits allowed the buccaneers to base out of Port Royal itself — and even commissioned them to attack ships belonging to the hated Spanish, French, and Dutch.

Perhaps the most feared of all buccaneers was Montebars the Exterminator. The Gascon captain recruited a mostly Indian crew, who had a passionate hatred of the Spanish because of all the Indians they’d slaughtered in the New World. Montebars is said to have liked to drink the blood of his victims — while it was still warm and tasty. Legend has it that the Exterminator buried a massive treasure at the tiny and then sparsely populated island of St. Barth. Today’s
visitors to the island by boat don’t even bother looking for the treasure, having amassed even larger ones by starting and running the likes of Oracle, Microsoft, SAP, Netscape, Revlon, Victoria’s Secret, and such. The Exterminator’s treasure has never been found.

Having first been a nuisance, by the late 17th century the buccaneers had made and changed history. They had fought battles for the English, impacted trade routes, and won many territorial disputes in the Caribbean. Ultimately, however, they were put down by the French and English governments.

Buccaneers then pretty much faded out of history until 1989, when their Southern California descendants, real or imagined, decided to reconvene for Buccaneer Days at Two Harbors. The event has been going strong every October since, but the numbers were never as great as this year. Officials report that every one of the 720 moorings was taken, and 15% of those had boats rafted up. In addition, there were 166 boats anchored out, making for a total of about 1,000 buccaneer boats! Aye, no pirate or wench
wanted to miss this end-of-the-season shindig. Those who didn’t have boats came over on special ferries.

These being marginally more civilized times, there were a number of organized activities and competitions for children and adults ashore on Saturday afternoon. Unfortunately, we can’t tell you anything about them. You see, we’d gone to the patio bar at 1 p.m. for a glass of lemonade, but it was so packed with men and women decked out in their best buccaneer and wench outfits that we couldn’t claw our way out until nearly midnight.

Ours was a cruel fate, to be sure, what with all the heaving bosoms on prominent display. But our suffering didn’t compare to that of the bartenders. If you figure there were five buccaneers or wenches per boat, everybody had five drinks, and there were 1,000 boats, that’s about 25,000 drinks. And that was just on Friday night when folks were getting a head start. Saturday was even busier. The pouring arms of some bartenders became so sore and weak that ship’s carpenters had to cut off the use-
less limbs with rusty saws. In true buccaneer tradition, the arms were barbecued and passed off as pork.

There was a run on the supplies in the Buccaneer General Store, of course. They quickly ran out of extra-large push-up bras for women and the new line of Johnny Depp eye make-up for men. Some buccaneers complained there wasn’t a drop of Jack to be found after midnight. The Buccaneer Buffet the next morning had to be shut down early because they ran out of food. With diesel selling at 4.90 doubloons/gallon, there wasn’t much interest — at least not as much interest as in the two naked wenches from the Trixx Sea, who were towed through Cherry Cove by a guy in a dinghy. Hey, they were flailing around in the water and looked as though they needed help.

For the number of people and the amount of liquor consumed, there were very few problems. Sure, there were the expected minor squabbles in the bar, a couple of people puked in places they shouldn’t have, and one wench sat on her buccaneer boyfriend’s lap and ‘pleasured’ herself in plain view. The funniest story was told by an amorous couple who decided to have sex against the side of the little red schoolhouse up the road. The thrusting of the buccaneer’s sword, so to speak, set off the motion-sensor light on the side of the building — illuminating about a half dozen other couples in conjugal states. At least that’s the way they told the story.

All in all, it was a great time for all the pirates and wenches, and a great job done by the staff of Two Harbors. Owed particular praise are the shoreboats drivers, who after midnight not only had to deal with inebriated passengers, but a harbor bottom crawling with scuba divers getting an early start on lobster season.

Two divers died, but neither because of being hit by a boat.

You now know the difference between a buccaneer and a pirate, and where and when Buccaneer Days are held. See you there next year — just don’t be a voyeur by not showing up in the proper attire!

Avoid Rocks, Shoals, Excessive Costs and Taxes!
Greatness is not in where we stand, but in what direction we are moving. We must sail sometimes with the wind and sometimes against it — but sail we must and not drift, nor lie at anchor. — Oliver Wendell Holmes, 1841-1935

On that Holmes-spun note, welcome back to our annual three-part salute to San Francisco Bay’s summer sailing champions. This month, we’ll profile the winners of the Handicap Divisions Association (HDA) and the Ocean Yacht Racing Association (OYRA), as well as the winners of the J/105 fleet, the toughest and most prestigious one design class on the Bay. Following tradition, next month we’ll introduce the rest of the keelboat one design champs, and, in January, we’ll wrap it up with a sampling of woody and dinghy winners, and anything else that comes to mind.

Unfortunately, at the risk of putting a damper on the celebration, it’s hard to ignore the fact that the Yacht Racing Association (YRA) continues to lose members at a fairly alarming rate. Between aging skippers, crew problems and the economy, the attendance of YRA Season Racers was down to 296 boats this year, a 14.7% decline from 2004, noted HDA president Gerry Brown. “In HDA we had 81 boats sign up for the season, but averaged only 32 boats on the line. HDA plans to revise the format for 2006 to encourage more participation, so watch for announcements.”

Last year, HDA had 104 boats, of which 43 qualified (i.e., sailed at least half the 10 races). With just 18 boats qualifying this summer, some drastic measures may be in order to reverse HDA’s downward spiral. One possible solution being bandied about is to make the Second Half Opener a non-counter (like the Vallejo Race), and then compress the HDA schedule into four high-quality events in the spring and four more in the fall, with trophies for each mini-series as well as overall. “Any and all suggestions about improving HDA are always welcome,” said Brown, who can be reached at gerry_brown@cashette.com.

The OYRA numbers aren’t particularly encouraging, either. Last year, 90 boats entered and 16 qualified. This year, 70 boats signed up and, in a mixed message, 23 qualified. Some of the 12 races on the OYRA schedule continue to be popular...
Tough hombres — Mark Halman’s Hobie 33 ‘Sleeping Dragon’, with Bob Fricke crewing, was the outstanding boat in OYRA this summer. They won SHS with just 8 points, a perfect score! Photo ‘Latitude’/rob.

and well-attended (Lightship I and II, Spinny Cup, Farallones), but others are simply fading away (perhaps OYRA, like HDA, should consider paring back a little and concentrate on what’s working). In 2006, the Windjammers Race will return to the lineup as a counter and, hopefully, the new and interminable 10-minute gap between starters (created, we’re told, for “safety reasons”) will revert to the usual 5-minute intervals. "We’re polling every one of our racers to see what they want," said OYRA president Richard Calabrese. "Please contact me at richardcalabrese@netzero.com if you have any ideas about how to increase attendance in local ocean racing."

Meanwhile, on a more positive note, the J/105s remain healthy and happy, continuing to field a large and incredibly competitive fleet (see www.sfj105.org).

Enough background — turn the page and meet our first crop of 2005 season champions. Many of them are familiar faces, as winning sailboat races is habit-forming once you get the hang of it. Holmes, who probably didn’t know a jib from a jibe, put it more eloquently: "Man’s mind, once stretched by a new idea, never regains its original dimensions."

Congratulations to all skippers and crews whose names appear in these pages. On with the show! — latitude / rkm

HDA:

HDA-M — 1) Latin Lass, Catalina 27, Bill Chapman, BYC; 2) MyToy, Ranger 26, David Adams, TYC; 3) Hippo, Smith 24, Mark Wommack, EYC. (10 entered; 3 qualified)

SPORTBOAT — 1) Jazzy, 1D-35, Bob Turnbull, SBYC; 2) No Name, Ultimate 24, Peter Cook, SSS; 3) Sand Dollar, Mumm 30, Erich Bauer, StkSC. (7 entered; 2 qualified)

OYRA:

IOR WARHORSE — 1) Samiko, Peterson 43, Dexter Bailey, CPYC; 2) Great Fun, Davidson 50, Stan Gilros, CYC; 3) Tiger Beetle, NM 45, Rob Macfarlane, SSS. (7 entered; 4 qualified)

PHRO-1A — 1) Cipango, Andrews 56, Rob & Bob Barton, GGYC; 2) Surfer Girl, SC 50, Mike Travis, RYC; 3) Emily Carr, SC 50, Ray Minehan, CYC. (7 entered; 3 qualified)
SEASON CHAMPIONS, PART I —

HDA-G
Farr 38 mod.
Mintaka 4

Gerry Brown
Berkeley YC

“Sometimes I think my crew is an unfair advantage,” mused Gerry Brown, a retired Sunnyvale computer programmer. “We make few mistakes, and are very consistent with boatspeed — our worst HDA race this year was a third.”

The Mintaka 4 lineup, which hasn’t changed much over the years, is Tom Ranweiler, a 24-year veteran, Bruno Carnovale (23 years), Henry Melin (22), Joe ’Rocky’ Rockmore (17), Dave DiFalco (4), and freshman Bob Gardner (2). DiFalco, a retired Sunnyvale computer programmer, and others like him often repair the Mintaka 4, and are continually dependent on the skills of crew members.

The Benny 36.7 Mistral was second again, while the steadily improving Elan 40 Tupelo Honey, which won the Second Half, was third. “They’ll be the boat to beat next year,” figured Brown.

HDA-J
Farr 36
Petard

Buck (left)/Newell
Corinthian YC

Petard (ex-Lovelace) was built in 1976 in New Zealand of cold-molded kauri wood, and debuted at the Clipper Cup. Alamo resident Keith Buck, a now-retired engineer, bought her in 1982, adding a new Bob Smith rudder in ’92 and a taller mast off Sweet Okole in ’94. Petard — a classic boat name — has won well over 100 trophies over the years, and shows no sign of slowing down.

A few years ago, Buck brought in his nephew Andy Newell as a partner. They split the driver and tactician roles, with Buck doing 60-70% of the driving. “I’ve learned how much fun it is to fix sails, engines, and other boat stuff,” laughed Newell, who owns a San Jose ice cream vending company and began sailing with Buck as a kid on the first Petard, a Tuna 22. “One of the crew, upon learning of our new partnership, asked, ‘Which part of the boat is yours?’ to which Keith replied, ‘whichever part is broken!’”

Petard, which does particularly well in heavy air, normally sails with 8-10 crew for each race, and literally never had the same cast twice over 35 days of sailing in 2005. Dozens of people crewed, including Gary Cobb, George Konstadiniidis, Bob Walden, Julio McWilliams, Mark Schieble, Bruce Boles, Elizabeth McLachlan, Shirley Vaughan, Jeff Raby, and Joe McGovern.

In addition to winning HDA-J, Petard also came in fourth in OYRA-II. “We sail a very full season,” allowed Newell.

HDA-K
Wylie Gemini Twin
Encore

Andy Hall
Encinal YC

For the second year in a row, Andy Hall, owner of a small chemical mixing company in Oakland, and his loyal Encore crew had the best record in HDA. After discarding two third-place finishes, they finished the season with a perfect 8-point score — despite a much stiffer PHRF rating this year (135, from 144). “Our edge is a really steady crew, each with at least 25 years of sailing experience on the Bay,” said Hall. “Tactics are done by consensus, and there are seldom disagreements. We all love sailing together on Encore, and are continually impressed by what a sweet sailing boat it is.” Hall’s regulars consisted of Barry Dauphine, Tom Bliss, Ron DeBlasi, Chris Penn, and Arnie Quan. Also crewing occasionally were Tom Conlon, Jim Nations, Nat Penn, and Rico Kramer.

Encore’s closest competitor, the WylieCat 30 Silkye, was AWOL for most of the HDA season, off doing other races and/or hobbled by a broken boom. In search of better competition, Hall is petitioning to get Encore accepted into the SF-30s next summer, arguably a better fit for his boat than the HDA-K hodgepodge. If that move is thwarted, the crew’s Plan B may be to sail Encore’s big sister, the Wylie 40 Lois Lane, in the Warhorse Division. Tom Bliss, Encore’s main trimmer, is almost finished restoring Lois and eager to get it out racing. “There’s something special about Wylie boats,” said Hall. “They love to sail!”

2) Harp, Catalina 38, Mike Mannix, IYC; 3) Two Scoops, Express 34, Chris Longaker, RYC. (16 entered; 6 qualified)

2) Mer Tranquille, Jeanneau Sun Odyssey 34.5, Larry Moraes, SYC; 3) Silkye, WylieCat 30, Steve Seall/John Skinner, RYC. (9 entered; 4 qualified)
Joseph Ferrie
Berkeley YC

"About eight years ago, my wife gave me sailing lessons at OCSC," said Joe Ferrie, a Berkeley resident and computer programmer at Oracle. "She hasn't seen me since!" Ferrie has owned the 1984 J/29 Bay Loon (ex J-Spot), his first boat, since 2001, and has been racing it in HDA for the last three years.

Bay Loon's first two seasons, both in HDA-J, weren't particularly memorable, other than dismasting in last year's Second Half Opener. This year, with a sturdy new Ballenger double-spreader rig and many other upgrades, Ferrie won the SF-30 class, his first season title. "We started off slowly, and I didn't think we had a chance to win the series," said Ferrie. "But we started sailing faster and making fewer mistakes. The biggest thrill was winning the Second Half Opener."

Ferrie does the tactics on Bay Loon, while Stephane Plibon drives and Steve Fisher trims main. "Those two guys are why we were so fast," he claimed. Other Loonatics were Casper Thijssen, Eric Mayer, Mark Welther, Jeff Adams, David Kao, and Mark Sutton, with "critical substitutions" from Max Thompson, Andrei Kao, and Mark Sutton.

The SF-30s are in a rebuilding mode after losing faxis, Tortuga, and Jeannette this year. "It's a really fun fleet — good close competition, yet everyone is very friendly," claimed Ferrie. "If your boat rates 117-141, and is between 9-10 meters long, you should give us a call!"

2) Abba-Zaba, Tartan Ten, Charles Pick, SFYC; 3) Shameless, Capo 3 mod., George Ellison, BYC. (12 entered; 2 qualified)

Pohl (left)/DeVries
StFYC/EYC

Summer Moon co-owners Tony Pohl and Mike DeVries (aka, 'Felix' and 'Oscaar', respectively) were going to skip the OYRA season due to work and family commitments when their crew came to the rescue. "We have to thank Bob Bergholt and Paul Rosenthal for volunteering to take on the logistics and organization this year," said Pohl, a CPA. "Without them, we would have spent the year in the berth, not in the ocean."

Also helping out were Bill Odger, Scott Parker, Christine Boudreau, Ken Moore, and Morgan Gieger. The team made every start, taking this tough division with a race to spare. "Though the fleet was down a bit in size from past years, the competition was much tougher," claimed DeVries, an investor and technology consultant. "Our consistency and Paul's tactics were what kept us in the hunt."

Other than the first two races, breezes in the ocean were generally light to moderate this summer — nice weather, but not the surfing conditions that SM loves. "Fortunately, we upgraded our sail inventory and got some tuning help from Dave Hodges, which really improved our upwind performance," said DeVries.

"I can't believe that more boats don't sign up for OYRA!" stated Pohl. "We get more racing, less milling around, better sailing, and better rides. The racing is also more tactical and offers much wider 'passing lanes' than the standard Cityfront sausage. Come join the fun!"

2) Auspice, Schumacher 40, Jim Coggan, SFYC; 3) Eclipse, Express 37, Mark Dowdy, SFYC. (17 entered; 5 qualified)

The Quanci Family
Richmond YC

Jim Quanci, an Autodesk executive, and wife Mary Lovely bought Green Buffalo in 2003 with the objective of doing the 2006 Pacific Cup with their kids, Andrew, 14, and Stephen, 12. With help from old friend Frank Ansak, they completely restored their 1967 boat — blister job, rudder, tanks, electronics, rigging, Pineapple Sails, you name it — before debuting it in OYRA this summer.

Old friend Wayne Gesing came out of retirement to reinforce the family crew, which was also augmented by cameo appearances from Ansak, John and Merissa Paulling, and Paul Conley. "Mary and I have done 16 Pac Cup crossings between us, noted Quanci. "The kids are tired of watching us sail away, so the deal was they'd get to race to Hawaii if they did a full ocean season. John Paulling and his daughter Merissa will join us — three adults and three teenagers, a classic Pac Cup program. It'll be safe and fun, and maybe we'll even bring home a trophy!"

Hopefully, the Quancis will find more competition in the Pac Cup, as PHRO-II was gutted by carnage (Chorus dismasted, Cassiopeia developed hull-to-deck joint problems) and no-shows. Only True North and Green Buffalo made all the races, with the latter taking seven bullets along the way. "I've lost track of the number of 'mature' sailors I've met these last two years who sailed on the Buffalo when they were younger," noted Quanci. "Lots of good sea stories!"

2) True North, Baltic 42, Jeff Dunnivant, SYC; 3) Cassiopeia, Islander 36, Kit Wiegman, LGYC. (9 entered; 2 qualified)

November, 2005 • Latitude 38 • Page 147
SEASON CHAMPIONS, PART I

OYRA-MORA
Mancebo 31
Bloom County

Tony Basso
SSS

_Bloom County_ was designed and built in 1984 as a MORA boat by former Bay Area naval architect Dave Mancebo. Tony Basso, an electrician from Half Moon Bay, began sailing with the original owners, Carl and Mark Ondry, in 1988 (“back when MORA was big!”) and has been crewing on the boat and using it ever since. About three years ago, he came up with the money to buy it outright. “It’s like a really good mountain bike in the ocean,” said Basso. “Grippy tires, lots of gears, and good control across the range.”

After skipping the first two races, Basso reeled off seven straight bullets to win this depleted fleet with ease. BC generally sailed with 5 or 6 crew, with Basso running the foredeck and tweaking sails while his various friends steered. The crew includes three generations of Ondrys (Mark’s 11-year-old son Justin may have been the youngest sailor in OYRA), mainstay Greg McCuen, and friends from the Mercury fleet, notably Dave West, Jim Bradley, John Hansen and Dave Custodio. Basso’s “ferocious” Tibetan Spaniel, Kate, didn’t do any of the races, but enjoys daysailing.

Keys to victory included three new Pineapple sails and keeping the boat light and uncluttered. “We need more boats in MORA, especially one design fleets,” noted Basso. “The ocean isn’t as abrasive to the gear as the Bay, the food is better, and everyone gets to drive!”

2) _Relentless_. Sydney 32, Arnold Zipfel, RYC; 3) _Euridice II_. Ross 30, George Biery, BYC. (13 entered; 4 qualified)

OYRA-SHS
Hobie 33
Sleeping Dragon

Halman (left)/Fricke
Richmond YC

“The ocean was just great this year!” claimed Oakland’s Mark Halman, a retired semiconductor engineer turned stay-at-home-dad for his 8 and 11-year-old kids. “We had the whole spectrum of wind and sea conditions — there was never a dull moment!”

Halman, one of the most accomplished shorthanders on the Bay, ran away with both the OYRA-SHS and SSS singlehanded season championships again. He and longtime crew Bob Fricke, a Mountain View dentist, crushed all comers in OYRA-SHS, racking up 8 bullets and throwing out a 2 and a DNS in the last race — by far the most dominant performance in OYRA this year.

“With just two of us aboard, we were always busy finessing the boat along,” explained Halman. “On heavy days, we’d pound our way upwind, wishing we were on a heavy displacement boat until it was time to turn for home. Downwind is a different story on a Hobie 33, especially when you’re sailing without a full crew. The boat just takes off!”

Halman loves to tinker with his 1985 Hobie 33, building his own carbon fiber boom and spinnaker pole, as well as patent pending ‘jib lifters’ to help with shorthanded tacking. “Last fall I upgraded the rudder bearings on my four-year-old carbon shaft rudder,” he said. “I made a pair of self-aligning bushings and the rudder is now incredibly friction-free — no need for two hands on the tiller any more!”

J/105
US 35
Good Timin'

Perkins/Wilson Syndicate
St. Francis YC

The _Good Timin’_ juggernaut steamrolled the J/105 fleet again, winning their sixth straight season championship, this time by 23 points over runner-up _Aquavit_. The three partners — Chris Perkins (above, with sons Johnnie, left, and Charlie), younger brother Phil Perkins, and Dave Wilson — are now 6-for-6 in this hardball fleet, an unprecedented accomplishment.

“Good boat prep. great sails, and a talented, consistent crew are the keys,” claimed Chris, the primary helmsman this year. “We’re not always the fastest or best-sailed boat, but in a series, we can usually grind ’em down — though the fleet is improving every year!”

The GT crew consisted of John Collins, Aimée LeRoy, Dennis George, Jon Perkins, Darren Ward, Nadine Franczyk and other fill-ins. A highlight was the Aldo Alessio Regatta, which Phil won without the other two partners and the regular crew. “He stepped up and knocked it out of the park, launching us in the season scores,” noted Chris. The team’s lowlight was shrimpin’ their kite in the Big Boat Series, a move that cost them 16 places.

“I know some people would like to see us move on to another class,” said Chris. “But where else can you get 30+ good boats on the line? We love this design and the fleet, and will probably do this until either our wives won’t let us, or we’re too old to get over the lifelines!”

2) _Aquavit_. Tim Russell, SFYC; 3) _Donkey Jack_. Scott Sellers/Rolf Kaiser/Eric Ryan, STFYC; 4) _Wind Dance_. Jeff Littlin/Steve Pugh, STFYC. (47 boats)

Imagine NOT having the hassle of taking your fenders ON and OFF every time you go in and out of your slip? Are you tired of having them constantly riding up on the docks, and getting your hull marked up or worse? Paying for expensive hull rub-outs or repairs? We have great news for you. HMS is now manufacturing a new style of Dock Bumper. A bumper that uses no staples, screws, bolts or nails to attach. Not only is the new style of bumper extremely durable, it is also removable so you can take it with you if you move. Now available in three mounting formats to meet your docking needs.

As many globe-trotting sailors will tell you, one of the most remarkable things about the modern phenomenon of cruising is how the shared common experience of life at sea tends to level the playing field between sailors from wildly different walks of life. Humbled by the forces of nature and the ever-present challenges of Murphy’s Law, the divisions created by material wealth and social status ashore are often blurred, almost beyond distinction, within the international cruising community.

Whether they’re sailing aboard bargain-priced ‘plastic classics’ or custom-built, multi-million-dollar yachts, all cruisers share the same breeze and arrive at the same sun-soaked anchorages. And folks who might never have crossed paths in their pre-cruising lives often become fast friends.

The annual Baja Ha-Ha cruisers rally (from San Diego to Cabo San Lucas) offers a two-week introduction to the wonderful realm of cruising. And, like cruising long-term, it typically yields personal challenges, fond memories and lasting friendships for all who participate.

As you read this, the 12th annual Ha-Ha is well underway, with the fleet due to arrive at Cabo on November 10. While some will continue cruising indefinitely, many others will (regrettably) return home shortly afterwards. Nevertheless, they will have fulfilled the common goal of completing an 800-mile offshore voyage while escaping the rat race, perhaps even recapturing a bit of their lost youth.

During the Ha-Ha, Harry Winters and Marion Koelstra will be along as crew. Marion Koelstra will be along as crew. During the Ha-Ha, Harry Winters and Marion Koelstra will be along as crew.

Pieter & Claire Heerema
Medemblik, The Netherlands
Since The Netherlands has a proud maritime history, it’s no surprise that a number of Dutch folks have done the Ha-Ha before, but this may be the first time that an entry has ever been based there.

Pieter, a lifelong sailor, showed Claire the ropes after they were married a few years ago. Soon they set off along Europe’s west coast and across to the Caribbean. After wintering there, it was up to Florida, where their extended-transom Swan was shipped via Dockwise — one of Pieter’s former employers — to Vancouver. Next, they sailed up to Alaska and back before continuing south.

During the Ha-Ha, Harry Winters and Marion Koelstra will be along as crew.

Ciao Bella — Cavalier 39
Jim Florence, Ventura, CA
Built to a Robert Salthouse design, Ciao Bella is one of several New Zealand-built boats in this year’s Rally. We know that the expression ciao bella is the Italian equivalent of “Hey, good-lookin’!” but we’re curious to know if Jim gave his boat name an Italian flair due to his last name — Florence, get it?

In any case, we know very little about either Jim or his crewman, Tom Faia, except that they’re hoping their Ha-Ha experience will be “lighthearted and fun, with plenty of new people to meet.” As to their post-Rally plans: “We’re not sure yet!” That’s okay. Over-planning within the realm of sailing is usually a bad idea.

Despite winter snows at Big Bear Lake, Ken and Dottie practiced sipping margaritas aboard their trawler ‘Dreamweaver’.

Claire and Pieter of the Dutch entry ‘Escapade’ have recently explored Alaskan waters.
They are both aerospace wizards, and Roger can tell you stories about flying fighters during his stint in the Marine Corps.

After reaching the Cape, they intend to leave Palapa in Cabo until Christmas, then sail to Mazatlan and have her trucked home from there.

Crewing on the trip south will be Andrew and Sherry Hansen.

La Lynn — Aries 32
Ken Wood, San Francisco, CA
“Boats have been part of my life since junior high school,” recalls Ken, “when I built my first row boat out of a single sheet of plywood.”

Tobé and Roger of Palapa have downshifted from aerospace to go-slow cruising.

A professional forester, Ken has lived a full life during his 60 years, especially considering that he survived a bout with polio at age two. Because the effects of the dreaded disease still plague him somewhat, he approaches his proposed circumnavigation as a mission: to inform people everywhere about polio.

Joining Ken on the Ha-Ha — and perhaps beyond — will be his longtime friend Robert Ross, a salty character who’s been around boats all his life, including many days of fishing off Alaska.

Tenacious — La Fitte 44
David Dodds & Maureen Sullivan
Alameda, CA
“The kids need to see more of the world than a shopping mall before they’re 18,” says David. So he and Maureen have packed up their son Justin, 17, and daughter Katherine, 15, thrown off the docklines and are heading to the sunny climes of Mexico for some real-world education.

David and Maureen dated at Cal during the ‘80s, eventually parting ways. Then, 20 years later, they got together again in Colorado, where they learned to sail “on the Continental Divide.” The couple now intends to sail Mexican waters until spring, then either bash home along the coast or take the Clipper Route via Hawaii.

By the way, this may be the only Ha-Ha boat with an officially designated “moral officer”: Master Duke (Maureen’s dog).

Interlude — Morgan 382
Don & Peggy Cox, Marina del Rey
Sometimes you find romance when you least expect to. We’re told that Don and Peggy first met during an Around Catalina race: “We fell in love on the backside of the island, trying to get around it in very little wind.”

Fast forward a few decades and here they are about to set sail for Mexico on an open-ended cruise. They are happy to report that they’ve recently achieved the status of “semi-retirement” (he is an engineer and she works as a “background actor”).

During the Rally, Rick Toomin and Tom O’Connor will be along as crew.

Sea Ya — Seawind 1000 cat
Joe Weathers, San Diego, CA
It’s pretty surprising to have two boats entered in the Ha-Ha named Sea Ya, but then last year there two named Con ti Partiro. Go figure.

Having seen a lot during his career as an insurance agent, Joe has some sage advice for fellow Ha-Ha’ers: “The road of life can be long and lumpy. Bring lots of beer.”

During his 35-year sailing career, Joe has chalked up more ocean miles than he can count, including the 1976 Tahiti TransPac and the 1980 Pacific Cup. This time out his ultimate destination is yet to be determined. Crew for the Ha-Ha will be Joe’s son Wayne, David Scardigli and Jeff Obertelli.

Increscent Moon — Tayana 42
Barbara & Cori Frum, Alameda, CA
Barbara and Cori think of this trip as a “radical sabbatical,” as they’ve sold their home and retired early in order to
BAJA HA-HA XII PROFILES, PT III

Roland and Debbie of 'Timshel' are outta here.
Having swapped Roland’s mules for a sailboat, we’d be that the couple’s professions will both be huge assets during their travels: he is a mechanic/millwright and she is an R.N.

Nellie Juan — Sabre 42
Ken & Judy Pendleton, Seward, AK
Talk about an unusual profession. Now retired, Ken was a landscape architect in Alaska. Guess he must have worked with the hardiest of plant species. In any case, he and Judy, a financial analyst, are happy to be taking a break from the chilly north country in hopes of breaking a sweat and garnering a tan in the tropics.

Through 25 years of sailing, they’ve done a good deal of coastal cruising, but all of it has been in the Pacific Northwest. So this trip, and their eventual voyage to either the South Pacific or Hawaii, should be quite an adjustment. Friends Kevin and Jeanne Walker will crew to the Cape.

Meralee — Atkins 32
The Lee Family, St. David, AZ
Just because this classic 32-footer is small, doesn’t mean the Lees aren’t bringing along plenty of toys. Among them are a hookah diving rig and a Hobie Wave (a mini-Hobie Cat) — seriously! Perhaps those items were needed to convince Eric and Sue’s son Ryan, 12, to come along.

Amazingly, this couple has owned 11 boats during their 13 years of sailing together. They picked this one up just a few months ago, proving — we suppose — that it doesn’t take years of preparation to get ready for a Ha-Ha. Footnote: We’re not certain, but this is probably the only ferro-cement boat in this year’s rally — don’t play chicken with her!

King’s Quest — Taya 48
Lynn & Stella King
San Francisco, CA
We had a good laugh while reading Lynn and Stella’s entry application, “This is a great boat for two people to cruise as long as they wash!” Turns out we just read their handwriting incorrectly: “as long as they wish.” Then again, the former statement is probably also true!

Now both retired, Lynn, a former engineer, and Stella, a former realtor, have been sailing together for three decades, but this is their first trip south of Ensenada. This time they expect to spend at least one season exploring Mexican waters, and their late-model 48-footer is certainly fitted out for comfortable cruising. Her amenities include air conditioning and a washer/dryer.

Brujo — Greenpeace 33
Phil McRee & Donna Baron
Juneau, AK
Undoubtedly one of the more unusual vessels in this year’s event, Brujo was ‘homebuilt’ by Phil at the U. of Alaska Marine Tech Center in Juneau. Her hull is steel and her cabin is aluminum. Unlike probably any other Ha-Ha boat, she is ballasted by twin bilge keels. Since each contains 6,000 lbs of lead, hopefully she’ll be plenty stable on the open ocean.

Much of the boat is composed of recycled materials: her metal mast and boom came from a Sitka pulp mill; her galvanized bow sprit was formerly a light pole, found in a junkyard; and “everything from props to winches” was bought used from Minney’s Yacht Surplus in California.

Alaskans like Donna and Phil think outside the box. They built Brujo themselves.

Costa Mesa.

Donna and Phil — who once worked as a bush pilot — certainly sound like fascinating folks. In the spring they’ll take Brujo west to the South Pacific.

Checkmate — Freya 39
Bernie Kreten, Sausalito, CA
On his entry forms, Bernie, who is a patent attorney by profession, made a statement that many of us can relate to: “People ask me if I am afraid of dying at sea. But I am more afraid of dying at my office desk!” No wonder he’s pulled the plug on his career early, and is now heading off to unknown adventures in Mexico, the Caribbean and the Med.

Having taken up sailing nearly 20 years ago, Bernie bought this well-found cruiser less than three years ago. Mike Besche and George Louis will join him on the run to the Cape.

Centurion — Mariner 31
Charles Phillips, Chula Vista, CA
We have no idea what Charles’ line of work was before retiring, but at age 61...
Buying their 40-footer gave the Reemeyers the ‘Perfect Excuse’ to go cruising.

he looks fit as a fiddle — the sort of guy you’d like to have around when there’s a piano to be moved.

Although he’s been sailing for 30 years, to his credit he still has the humility to admit that he’s “still just a novice.” He’s owned this vintage 31-footer — his third boat — for 13 years.

Fritz Grabhorn will crew to the Cape. Afterwards, Centurion will cruise the Sea of Cortez.

Perfect Excuse — Hunter 410
The Reemeyer Family
Vancouver, BC

Fred and his wife Paulli bought this boat just four months ago. We’re not sure, though, if they fell in love with the boat itself, or if the name simply attracted them. “Because of her name, buying her gave us the ‘perfect excuse’ to take a year off.” From their perspective as north country residents, this year of cruising will translate as “a year of summer.” They are very much looking forward to it.

Flushing out the crew list will be son Rob, 12, and daughter Jessica, 10. The family’s post-rally cruising plan is loose. They’ll spend Christmas at Rincon de Guayabitos, then, they say, “We’ll go where the wind takes us.”

Buying their 40-footer gave the Reemeyers the ‘Perfect Excuse’ to go cruising.

Britannia — CS 36
Larry & Marjorie Zedaker
Emeryville, CA

Larry and Marjorie have experienced their own manifestation of the ‘global economy’ concept. As Larry explains, “This is a Canadian boat with a British name, which I, an American, purchased from a Frenchman, in order to cruise in Mexico!”

Having paid their dues in the trenches — they were both school teachers — Larry and Marjorie “hope to unwind and stay flexible” after the Ha-Ha. Like many other entrants, they’ll cruise Mexico’s Pacific coast this winter, then reassess in the spring. Eventually, they hope to sail or ship Britannia to the Pacific Northwest for a different style of cruising.

Sand Dollar — Crealock 34
Don Pratten, Seattle, WA

Shortly after Don’s younger brother had a stroke, he realized that time may be running out for his long-anticipated cruising adventures. “After no more than 10 minutes of deliberation, I decided to chuck it all and go cruising!”

That was two years ago, and in the interim he bought this late-’80s 34-footer, sold his dental practice, rented out his house, put his possessions in storage and took off to explore Alaskan waters before heading south.

Robert McFadden will crew at least as far as Cabo.

New Paige — Nordhavn 40
The Allard Family, Sidney, BC

Although Roger grew up around boats in northern New Brunswick, after moving to the Canadian prairies and marrying a “prairie girl” (Joan), boating was a distant memory.

For some reason, though, about six years ago Roger’s interest in boating reemerged. He bought a sailboat and introduced Joan to the sport. “She loved the water,” he recalls, “but wasn’t so sure about sailing.” So once he got the idea to go cruising, it was decided that a comfortable motor yacht would be their best option.

Now, as Roger puts it, “We’re indulging ourselves in our mid-life crises, and dragging our daughter along. She loves it.” In fact, daughter Kimberly, 7, is listed on their crew roster as First Mate.

Aquarius — Olympic 47
The Ribkoff Family
Hood River, OR

Mark (aka Dad) began his sailing career at age 10, and we’re told that “whatever sports use the wind and water appeal to him.” Having mastered windsurfing, his latest is kiteboarding. Heidi (Mom) began even younger — at age 7 — when she crewed (albeit somewhat reluctantly) for her dad. She now also windsurfs.

Could the ‘Aquarius’ crew be staging a protest against Captain Mark?

However, they both renewed their enthusiasm for (keelboat) sailing six years ago with the purchase of a 30-footer. Then, just a few months ago, they upgraded to this roomy Ted Brewer-designed 47-footer which will take them and their kids, Matthew, 16, and Jessica, 13, on a grand Mexican adventure this year. The kids apparently weren’t too sure about this unconventional idea, but they warmed up to it when they realized they’d get to miss a year of school.

Sandpiper — CT 42
Roger & Margaret Brindle
Sausalito, CA

“In a way,” explains Roger, “two generations of dreams will be coming true when we cross the starting line.” You see, this boat is named after a vessel that Roger’s father owned when he was born, the nameplate of which resides in this Sandpiper’s salon. Sadly, Roger’s dad never got to realize his cruising dreams, but Margaret and Roger are now on their way, after a false start last year.

Both are retired school teachers who’ve had fulfilling and diversified careers, including two years together
in the Peace Corps stationed in the Dominican Republic. The Ha-Ha’s starting date holds special significance for them, as it was exactly 40 years ago to the day that they first met at a Halloween Party. We’re curious to know how each was dressed!

**Second Wind — C&C 48**  
Bill Heumann & Marjorie Menz  
Juneau, AK

“I once asked a National Geographic Society cartographer why they made maps of the U.S. with Alaska in a box near Baja California,” recalls Bill. The answer: “We know you Alaskans really want to be down near the Baja!” According to Bill and Marjorie, there’s a lot of truth to that — they’re certainly ready after spending much of their lives in rainy Southeast Alaska. As Marjorie says, “I’ll do anything to get into sun country!”

Apparently the cruising bug bit this couple just two years ago, but it bit hard. Marjorie learned to sail only after they bought this sturdy 49-footer. Now, however, they’ve apparently perfected their skills, as they intend to head for the South Pacific this spring or next. Marjorie’s son Keith Gorsuch and his lady Allison Armstrong will crew on the Rally.

**Dream On — Fast Passage 39**  
Bruce & Laurie Garretson  
Seattle, WA

“Laurie must be a saint,” says Bruce, “because knowing how much fun I had on the 2003 Ha-Ha, she let me talk her into quitting her 20-year position as a school librarian, selling the house, packing up the dog and the cat and setting off on this adventure in downsizing, loose plans and overall craziness!”

Although he’s a lifelong sailor, he just bought this boat last January, then fitted her out with “all new goodies,” and was ready to go, when his crew dropped out recently due to health and work complications. No matter, Steve is determined to find new crew and complete the Ha-Ha this year, after yearning to do so for a decade.

In addition to a variety of bareboat charter trips overseas, Steve has plenty...
— RUNNING FROM THE RAT RACE

of offshore sailing under his belt, including trips to Hawaii, British Columbia and the Channel Islands. Post rally plans are yet to be determined.

Ramble on Rose — Caliber 40
Micheal McNamer & Ceacy Hart
Davis, CA

"It’s time to live the dream," say Michael and Ceacy. "After raising a blended family of six children, we decided to broaden our horizons by learning to sail."

That was 10 years ago, and today, after living aboard for two years, they’re heading out with a boatful of toys for at least one season of tropical bliss. On board are “a guitar, a bass, a sea kayak and gear to make cappuccinos sans electricity!” What else could they possibly need, right?

Crewing on the trip south will be David Younkman.

Crosswave — J/120
Eugenie Russell, San Francisco, CA

This entry is unique to the fleet, as this fast J/120 is being delivered — via the Ha-Ha — to her new seasonal home at Nuevo Vallarta’s J/World facility, located at the Paradise Village Resort and Marina.

J/World’s manager, Wayne Zittel, bought the boat just a couple of months ago to add to his existing Mexican fleet of three J/80s. But for some reason his sailing instructor, Eugenie Russell, and her crew get to have all the fun out on the ocean while Wayne drives down with a truckload of gear.

Eugenie is a native of Brittany, France, and thus has sailing in her blood. Although only 31, she’s already done a great deal of offshore sailing and racing. Others on her crew are Tammy Summer, Michael Wright, John Knudson, Mark Fagan and Kellie Markey.

Elizabeth — Islander 33
Ernesto Zavala, National City, CA

Every entrant is undoubtedly busy as heck during the weeks leading up to the Ha-Ha. Some, like Ernesto, are apparently so busy they don’t have time to tell us much about themselves. That often inspires us to make up whatever we want about their entry. But we’ll resist the temptation this time.

What we can tell you is that Ernesto, at age 36, is one of the younger captain’s in this year’s fleet. He learned to sail in his mid-20s, and has done previous ocean passages in the Pacific. Friends Joaquin Lam and Marco Apodaca will crew aboard Elizabeth during the Rally.

Dreamweaver — Savega 41 trawler
Ken & Dottie Saville
Big Bear Lake, CA

Within a fleet this size, there are many
boats that have unique distinctions, but we're pretty sure this is the only one which was built at 8,500 feet above sea level. Ever since the fall of '98, when Ken and Dottie decided to convert a 22-year-old fishing boat into an oceangoing trawler on their 40-acre ranch at Big Bear Lake, they've frequently been heard to ask, "What were we thinking?"

Today, though, the countless hours of hard work are finally paying off. Now, they have a new favorite expression: "May our adventures take us to where only our dreams have dared to go!"

Adie and Joanne Salzer will crew to the Cape. Although they're powerboating this time, for the record, they and the Savilles are all longtime sailors.

**Lady Joanne — Morgan O/I 41**
The Fornias Family, Tujunga, CA
This is the second trusty old Out-Island 41 in the fleet — the other being Bronco, owned by Nels Torberson. Vince and his wife Joanne would be wise to pick Nels' brains before the rally, as he's found ways to coax more speed out of Bronco than even her designer would believe.

Eleven years ago Vince and Joanne made a previous pilgrimage to Mexico, nonstop from Redondo Beach to Mazatlan aboard a LaFitte 44. This time the trip should be a bit more relaxed, as they'll have the help of their daughter... that is, "First Mate" Mariluz, 9, and veteran Coast Guardsman Larry Beane.

After the Rally, *Lady Joanne* will head to P.V. with the Rally to Paradise.

**Living Water — Island Packet 38**
Terry & Regina Heil
San Francisco, CA
According to Terry, there's little worry of Living Water sinking, no matter what happens. "Regina has ordered enough Click Clack storage containers to keep the boat afloat even if we get holed in route."

Terry, a software developer, says he's taking a 'halftime' break in his career. He and Regina, a former trainer, artist and glassblower, intend to be out for two or three years. One place that's high on their list of must-see stopovers is the San Blas Islands, off the Caribbean coast of Panama. Terry previously visited them years ago during a training cruise with the Orange Coast College School of Sailing and Seamanship.

**Calpurnia — Beneteau 461**
The Read Family, Houston, TX
Some parents wait until their kids are adolescents before taking them cruising. Not Mark and Amy. Perhaps their idea in bringing along 15-month-old Robert is to get him used to life on the sea before he's
old enough to vocalize his complaints. In any case, we wish them the best of luck on their cruise to the Cape. Since buying this boat — their first — a year ago, they've done a shakedown trip to Alaska, then forged south along the rowdy Pacific coast, all without a mutiny. The rest should be a cakewalk.

Post-Rally plans are "yet to be determined." But, as Mark notes, if they don’t get young Robert back home by Christmas, “one of his grandmothers has a kidnapping plan prearranged with the CIA!”

Impulse — Dragonfly 1200 tri George Cathey, San Francisco, CA

"We hope to add a little ‘Yo, Ho, Ho’ to the Ha-Ha," says George, a software executive. We’re not sure if that means he and his crew, Dominique Fredregill and Todd Malone, plan to pillage and plunder, or perhaps just toast each sunset with a tot of rum.

In any case, heading downwind on this innovative 40-ft tri should be a fast, sweet ride. Among the notable features of the Dragonfly design is its "swing wing" function, where the ama struts compress, shrinking the boat’s overall beam for docking.

Having bashed north once before, George is looking forward to sailing like a gentleman (never to weather), and will continue on to Mazatlan and P.V. before heading home in the spring.

Hoofbeats — Beneteau 41
Tony & Sharon Matthews
Dana Point, CA

"You plan for a hundred years," says Tony, "but you don’t know what will happen in the next moment." Perhaps that’s why he and Sharon are seizing the opportunity to get away now, while there’s nothing to stop them. As to their post-Rally cruising plans, they are leaving their options wide open.

Joining them on the trip south will be “navigator” Jonathan Bowie (age 15), Paul Sullivan and Sheri Meehles.

Talofa — Custom 97-ft Schooner
Cactus & Betsy Bryan, La Paz, MX

There has never been a vessel in the Ha-Ha quite like Talofa. Then again, there’s never been an owner named Cactus either.

As reported in the July 2005 edition of Latitude 38, Talofa’s construction was begun in the 1920s by a pair of brothers who intended to use her to retrieve a cache of ‘treasure’ they’d stumbled onto in the Solomon Islands during WWI. Sadly, the brothers never fulfilled their

dream, but after years of neglect in a half-finished state, Talofa's construction was finally completed, and she eventually made a 10,000-mile South Pacific circuit. Later, however, she languished again until Cactus and Betsy bought her in May, 2004 with the idea of using her for hands-on sail training and adventure sailing programs, primarily in the Sea of Cortez.

Having thoroughly refit her, the Bryans are now returning to their La Paz homeport for the second time this year, having sailed north last spring to participate in a series of tall ship festivities along the West Coast. (Check out www.bajaschoonercruises.com or www.talofa.fullship.com for more info on Talofa's offerings.)

**Morning Light — Explorer 45**  
The Thomas Family  
San Diego, CA

“After sailing the 2000 Ha-Ha as crew aboard Luna Sea II,” explains Scott, “Kelli and I finished a ‘circumnavigation’ of America by Harley, and got married.” Next, they spent five months taking their boat — "the wrong way" — from San Diego to the San Juans, and commuter cruised up there for several years.

Having brought Morning Light back to SoCal at the end of last year, they're ready for their next adventure, this time with their nine-year-old daughter Coral along. We're told she's just been promoted from swab to second mate. According to Scott their only firm plan after reaching Cabo is "to buy a T-shirt that says 'Kiss my ass, I'm on vacation.'"

**Sooner Magic — Beneteau 477**  
Garland Bell, Oklahoma City, OK

While in his mid-20s, Garland got into sailing aboard his father's pop-top boat. He also found it useful for wining and dining his ladyfriends. "That boat is long since gone, but I ended up marrying the second date that I took aboard." Now, 20 years and four daughters later he muses, "I guess you could say that sailing has been very, very good to me!"

Over the years, Garland, a real estate developer, has done lots of serious racing and has taken his family on at least 10 Caribbean bareboat charters. But he and his family have always wanted their own cruiser, and this, apparently was the year to make that leap. They bought this big Beneteau just two months ago and have quickly equipped her to join this southern migration.

Jim Taylor, Walter Smith and Alan Weaver will make up the Ha-Ha crew.

**Both-and World — Catalina 42**  
Kevin Collins, San Diego, CA

“It’s all about the adventure,” says Kevin, who works as a real estate broker.

---

**Las Hadas**

- Spaces from 20-100’ long
- Each space comes with its own mooring
- 62 private spaces available
- Double breakwater
- Dry marina storage
- Port Clearance
- Water and power supply (30 & 50 amp)
- Controlled access to dock
- Private swimming beach right next to your vessel
- Internet
- Laundry room
- Showers
- Diesel & gas station
- Parking
- 24-hour security
- Picnic area
- Restaurant (boat service)
- Launch ramp

Col. Mexico
He and a boatload of buddies are heading south “for the experience, education and adventure.” They are Dan Foster, John Masterson, William Hardy and James Jellison.

Unfortunately, long-term cruising is not on the agenda this time ‘round for Kevin and the boys — somebody’s gotta work, right? So this 42-footer will be delivered back to San Diego after the Rally. What does the name mean? We have no friggin’ idea.

**Gitane — Catalina 36**
Louise Orion & Ivo Waher
Berkeley, CA

Here’s evidence that *Latitude’s Classy Classifieds* are worth the investment: Ivo and Louise met via a crew ad in November, 2004, and a year later are on the verge of setting out on an open-ended cruise.

Having sold her software business last year, Louise decided to sail around the world. But just to be sure she liked being at sea, she logged 10,000 miles on other people’s boats. After finding an ideal bluewater cruiser, *Gitane* (which means gypsy woman), she found Ivo, who appears to be a prince among sailors: “He has an Extra Ham license, speaks five languages and can fix anything!”

They plan to spend this season in Mexico, then sell *Gitane* and go cruising long-term on Ivo’s 45-ft cutter.

**God Speed — Pearson 44**
Leonard Wahlquist & Beth Smith
San Pedro, CA

We’re told that Leonard has given up stock car dirt track racing in order to pursue his sailing interests. On a good day out on the water, he probably won’t experience the same adrenal thrills, but on a bad day, he just might!

Since they started fantasizing about doing the Ha-Ha five years ago, they’ve traded boats twice, finally settling on this Pearson Countess. “We figured this one is big enough so we won’t kill each other!” Leonard and Beth’s cruising itinerary is uncertain, but having left careers in construction and graphic arts, respectively, they’re under no pressure to return home anytime soon.

**Nasiiya — Allaire 34**
David & Jason Cowley
San Diego, CA

“Let the adventure begin!” says David. Having begun their sailing careers just five years ago, he and his adult son Jason have made lots of weekend trips to Catalina, but this will be their first real offshore cruise, and they’re rarin’ to go. David is yet another computer programmer who has retired young.

We don’t know much more about this duo or their vintage boat, except that David claims she is “French built, with...”
BAJA HA-HA XII PROFILES, PT III

no interior space.” Sounds cozy. Hopefully the close quarters will enhance the father/son bonding.

**Carpe Vita — Advantage 44 cat**
Mike & Mary McCluskey
Eugene, OR

“Baja Ha-Ha, Mexico, Galapagos, Tahiti, New Zealand — the world is now our home and the course is our choosing!” say Mike and Mary.

She was actually raised aboard an Alden schooner, but it was Mike who had dreams of cruising many years ago. For Mary, memories of leaky decks, heavy sails and her continually seasick mother made the idea less than attractive. Years later, however, after raising a family and succeeding in their careers — he in public works, she in symphony education — she gave in. No doubt the stability and sophistication of this modern cat helped seal the deal.

**NonSeaMay — Beneteau 510**
Bill & Nancy Hardesty, Benicia, CA

After completing two previous Ha-Has, Bill and Nancy have one wish: “We hope there will be more wind than in 1997 or 2000, but not so much that we’re going too fast — we don’t want to impact our tuna fishing!” Although they originally wanted to see the Mexican mainland this year, that will have to wait, as they’re planning to head north after the Rally to Ensenada’s Baja Naval for some boat repairs.

**Moontide — Lagoon 470 cat**
Bill Lilly & Linda Laffey
Long Beach, CA

Bill is yet another longtime monohull racer who has downshifted into catamaran cruising mode. Prior to ‘converting’ he showed his sailing prowess in the TransPac, SORC, America’s Cup trials, and transatlantic races. But these days he’s mellowed substantially.

“Aboard our cat, we plan on getting all the way to Cabo without spilling a single glass of wine,” say Bill and Linda. But after viewing their equipment list it seems to be a miracle that she moves at all. It includes: two air conditioners, an icemaker, two refrigerators, a freezer, a washer/dryer... and “too many bottles of wine.” Moontide will be based out of La Paz this season, so Bill and Linda can commuter cruise aboard her. DeAnne

**Aquagen & MyT-Gen Kits**

AquaGen Remote S/S Panel
12 V DC GENERATOR
WATERMAKER KIT

Sparkling fresh water, power, and refrigeration from the seven seas.

Aquagen & MyT-Gen Kits combine the quality, simplicity and reliability of the AquaMarine, Inc., watermakers with the durability of Kubota marine 12 volt diesel gensets. They are compact, low fuel consumption, capable of producing up to 150 amps, and 62 GPH fresh water. Make water, refrigeration, charge batteries all within the same duty cycle. A hydraulic pump may be added to run a dive compressor, windlass, small bow thruster, or emergency bilge pump. Ideal for long-term cruisers or weekend wanderers.

We custom build our systems to fit your needs. Electric, hydraulic, or belt driven kits are available. All AquaMarine, Inc. kits have expandability built into them. Visit our Web site for more information.

— RUNNING FROM THE RAT RACE

Trigg will crew to the Cape.

**Bold Endeavour — Endeavour 42**
Johannes Figel, Ventura, CA

Ever since Johannes, an electrical engineer born in Switzerland, observed sailboats plying the waters of Moorea many years ago, he’s had the dream of arriving there under sail on his own boat. Doing the Ha-Ha is the first major step toward that end.

Because he has limited sailing experience, however, he’s wisely hired professional skipper Leonard Wohlsdorf to ease him in to offshore sailing. A highly experienced Swiss friend, Franziska Wey, will also come along for the ride.

Hopefully Johannes’ cruising dreams will be more vivid than ever by the time he reaches the Cape.

**Rhapsodie — Marquesas 53**
Caren Edwards
Santa Barbara, CA

Plenty of guys stay working while their wives take time off... to have a baby, go back to school, etc. But, to go cruising without him? Sounds a bit harsh.

Johannes of ‘Bold Endeavour’ may soon fulfill his dream of sailing into Moorea’s lagoon.

No worries, though. In the Edwards’ world, this is just a casual jaunt. Many Latitude readers will recall our July 2004 interview with Caren and her husband Sam about the five-year cruise they’d recently completed with their kids, all over the Pacific Basin. A lifelong sailor, Caren says, ‘I’ve never sailed in the company of 100 boats, as we usually like a lot of space. But we couldn’t pass up a great party!’

Joining her on the Rally will be Chris Connors, Mark McNulty, Edo Colligan and Larry Boyle.

**Capricorn — Formosa 46**
Michael & Hans Geilhufe
Palo Alto, CA

“After 20 years of sailing the Bay and two years of overhauling Capricorn, the skipper is ready for the next cruising adventure,” explains Michael. This big sloop is his first and only boat, which he’s owned for 26 years.

During that time, one of the ‘adventures’ that he least likes to recall is the time his anchor shackle parted in the Cojo anchorage, and Capricorn almost ended up on the beach. That’s not the sort of adventure brother Hans signed up for. Together, they’ll continue to the Canal, then eventually cross to the Med.

**Bad Kitty — Nauticat 40**
Larry & Mary Clark, San Diego, CA

Ah ha! We get it, Bad Kitty = Nauticat! Clever. At first we thought perhaps this 40-footer had a habit of veering off course to chase birds, or that she made annoying sounds in the middle of the night.

BERTHING at OYSTER COVE

can make boating easier, more convenient and more enjoyable!

- Berths 30 feet to 60 feet

OYSTER COVE MARINA
385 OYSTER POINT BOULEVARD #8A, SOUTH SAN FRANCISCO
(650) 952-5540
Larry and his crew — Don Heather and Gary and Nancy Clark — will be cruising in comfort aboard this late-'80s pilothouse sloop, as she is set up for easy sailing with electric winches, a furling jib and main, not to mention many creature comforts below decks. Unfortunately, as Larry knows, being an engineer, “it will all break down” when Murphy’s Law decides to manifest itself!

Bad Kitty will be stored in Mexico this year, then Larry and his wife Mary will be back to claim her and continue cruising next year.

Raireva — Dreadnought 32
Marek Nowicki & Helen Chien
San Pedro, CA

The Dreadnought 32 isn’t the most famous sailboat design in the world, but this sturdy little cruiser has taken plenty of sailors to much-dreamed-about destinations, including Harry Heckel, who, at age 87, became the oldest person to solo circumnavigate earlier this year.

At this point Marek and Helen’s plans aren’t so far-reaching, but you never know. Both are educators who have apparently had enough of kids and classrooms, for a while anyway. Post-Rally, they’ll continue south, “exploring the Mexican mainland, Honduras, El Salvador and hmm. . . who knows?”

Ocean Eyes — Buchanan 55
The Hiatt Family, Sun Valley, ID

Let’s get one thing clear: Betsy is the captain, and Greg is the navigator aboard this New Zealand-built steel ketch. Perhaps that’s because Betsy has been sailing since she was a kid, while Greg has been at it for ‘only’ 20 years. Their 12-year-old son Franck will also be along in the role of “scallywag.” For them, the Ha-Ha is but a small step in an extensive, two-year circuit of the Pacific Basin. Having begun in Seattle, they intend to explore Central America, then head out to the Galapagos, on to French Polynesia, New Zealand and Australia before circling back to the Pacific Northwest.

Far Country — Valiant 40
Gordon & Vlasta Hanson
Sausalito, CA

For some Ha-Ha entrants, the Ha-Ha is the greatest adventure of their lives. But for guys like Gordo, as he is called by friends, this will be just one in a long line of extremely adventurous undertakings. During his stint in the Coast Guard he went to both Antarctica and the Arctic aboard an icebreaker, and also served as a helo rescue pilot. In a later incarnation, he somehow morphed himself into a Silicon Valley lawyer.

Gordo’s wife Vlasta points out that...
The Fuller Family
Millennium Falcon — 60-ft Schooner
Michael Ganahl & Leslie Hardy
San Francisco, CA

As you might imagine. Millennium Falcon is the first and only three master ever to do the Ha-Ha. While the sail plan of this Ted Brewer-designed schooner may seem like overkill for a 60-footer, she is certainly a beautiful sight, gliding along over the blue Pacific — especially when flying her massive masthead spinnaker. The boat and her owners have done both the 2000 and 2001 Ha-Has.

Although Michael has sailed all his life, Leslie didn’t become a serious convert until she had to wave good-bye to him as he sailed off to Hawaii on the Pacific Cup. Since then, the couple has sailed extensively offshore, including restaurants for having the stamina face double handling day and night — while simultaneously keeping three youngsters amused out on the ocean. But then Carl himself learned to sail at age 5 and Kary’s been sailing since her mid-20s, so they could probably do it blindfolded.

Mistress — Swan 53
Tom & Monique Lafleur
San Diego, CA

Many Ha-Ha’ers might want to say “Thanks!” to Tom although they’ve never even met him. You see, although he’s officially retired from a career in telecommunications, he operates one of WinLink’s SSB email gateways which many cruisers utilize.

Both Tom and his sister Monique are long time sailors who have done extensive cruising and racing in Mexico, the Caribbean and elsewhere. Their post-Ha-Ha plans include spending Christmas in Acapulco, and possibly doing MEXORC and the Banderas Bay Regatta.

They’ll be joined on the Ha-Ha by Daniela Ambrosi and Marc Rosenfeld.

since she grew up in a cornfield in Illinois, it’s no wonder she’s still getting used to “this sailing thing.” A dental hygienist, she is in charge of keeping the crew smiling. Also aboard will be Ron Mori. Far Country will cruise during the winter, then sit out the summer on the hard in San Carlos.

We wonder if Carl and Kary will give their girls spinnaker lessons aboard ‘Rocket’.

Rocket — SC 50
The Fuller Family
Newport Beach, CA

“I can’t believe that our family of girls has agreed to live aboard our racing boat” says Carl. He and his wife Kary have campaigned Rocket in a variety of races since buying her a year ago. But now they’ve decided to switch lanes radically and spend a year cruising Mexican waters with their three daughters, Sally, 10; Kappy, 8; and Seneca, 7.

We’ve gotta salute these young parents for having the stamina to face double handling day and night — while simultaneously keeping three youngsters amused out on the ocean. But then Carl himself learned to sail at age 5 and Kary’s been sailing since her mid-20s, so they could probably do it blindfolded.

two major Pacific crossings aboard the SC 52 Prufrock, owned by Leslie’s sister and brother-in-law, Diana and Jim Free-land. The Freelands will now reciprocate, by crewing aboard Falcon during the Rally.

**Summer Wine — Catalina 42**
Walt Gonzales, Dana Point, CA

“If you’re interested in cruising,” says Walt, “this is the best way to start.” Like many Ha-Ha skippers before him, Walt first did the Ha-Ha as crew — he enjoyed it, but vowed to return again at the helm of his own boat.

Perhaps due to his skills as a human resources manager (now retired), he’s assembled a boatload of talented crew, including three female racers, two of whom are licensed captains. They are: Suzie and Ron Campbell, Barbara and Floyd Sanford and Annette Cook. Summer Wine will return to Dana Point after the Rally.

**Marilee — Beneteau 47**
Mike Collins, San Diego, CA

This is one boat that we assume is well indemnified — Mike makes his living as an insurance agent.

He’s nicknamed the boatload of buds traveling with him the “Cripple Creek Crew,” as two of the five have been on cruisers for the past six months. On the all-guy roster are: Bob Macomber, Thomas Todd, John Chambers and Tom Stanford. They’ve all raced and taken U.S. Power Squadron classes together, so hopefully there will be no surprises, personality-wise.

Mike says he’s anxious to “Hurry up and slow down,” and his planned winter in Mexico should be just what the doctor ordered.

**Lonely Wind — Jaguar 27**
James & Patricia Murray
San Diego, CA

“I have been waiting a lifetime for an adventure like this one to come my way,” says James, a retired contractor. He and Patricia, a former teacher, were both enthusiastically planning for this year’s event when she made the horrible mistake of seeing the movie The Piano. (For the uninitiated, it’s about a shipwreck.)

Having overcome the initial paranoia which followed, they’re now rarin’ to go again, with the help of crewman Reggie Lewis, a longtime sailor. Lonely Wind is undoubtedly unique within this fleet, as she is a British-built shoal-draft design. The Murrays will cruise through the Sea of Cortez after the Rally, and eventually trailer their sloop home from San Carlos.

**Cadence — Fast Passage 39**
John Murphy, Sausalito, CA

We’re happy to see Dr. John re-up for another Ha-Ha, as he, more than any other entrant we can think of, deserves to have a bit more Ha-Ha fun. You see, he finally completed Ha-Ha XI last year after suffering three false starts in previous years due to various breakdowns. The worst was a blown engine just days before the start.

This year, we hope Lady Luck will be riding aboard Cadence again — although we don’t see her listed on John’s crew roster. In fact it will be an all-guy crew this year: Brent Beatty, Nathan Sackler and ‘Lachy’ Lachlan. After the Rally,
Cadence will continue south to P.V., then eventually do some gunkholing in the Sea of Cortez and whale watching in Mag Bay before returning home again.

**Southern Cross — Beneteau 461**
*Caston & Laurin Dalon*
*Long Beach, CA*

"My favorite saying," says Caston, "is ‘Make your dreams come true!’" And that’s exactly what he’s doing by joining the Ha-Ha — he says it’s the sort of adventure he’s been dreaming of doing his whole life.

For him, the trip will be particularly sweet, as he’ll be sharing watches with his newlywed bride, Laurin. They intend to stretch their cruise into an extended honeymoon of at least a year by continuing south along the Central American coast to Panama.

We don’t know much about Laurin, but we’d bet she’s the active, outdoor type. She’d have to be in order to keep up with Caston, who is into all sorts of extreme sports. Hopefully this trip will galvanize, rather than test, their love for each other.

---

**Laurelai — Islander 36**
*Ken Wilson, Terminal Is., CA*

The way we understand the practice of shanghaiing, it’s usually a means of acquiring crew rather than a captain. In this case, though, it seems that Ken, a retired judge, was coaxed and prodded into committing to the Ha-Ha by First Mate David Houtrouw, after his buddy Gary Cook lost his spot on another boat. So the three will now be sailing together to the Cape, hopefully without any of them needing to be persuaded by a belaying pin.

After the Rally, Ken’s only stated plan is to “go wherever the wind blows.”

**Scarlett — CS 40**
*Russ & Jane Eichner, Benicia, CA*

Every time we see Russ and Jane, they seem to be smiling. Perhaps that’s because the only time we see them they’re either doing the Ha-Ha or are just about to. They’ve both made the trip twice before, but the first time they were on different boats.

Somehow they met during the 2003 Ha-Ha, and their chance acquaintance quickly turned into one of the hottest romances of that event. They were married aboard Scarlett later that year.

One of the hobbies they both share is a love of scuba diving. In fact, Jane is a certified instructor, so it’s no surprise that this sleek 40-footer now carries "tons of dive gear and a compressor." As to their post-Rally plans, either they haven’t decided or perhaps they just don’t want the entire readership of *Lat 38* to know.
BAJA HA-HA XII PROFILES, PT III

_Narnie O'Shea — Hunter 466_  
Tom & Darlene Pinkerton  
San Diego, CA

We have no idea whom this boat was named for, but it’s a safe bet that he or she was Irish. No doubt there’s a long-winded tale to tell about it — and possibly also a fiddle tune as well.

In any case, Tom explains that for both he and Darlene, doing the Ha-Ha is “a first step toward gunkholing in the Sea of Cortez off and on until early spring.” In other words, they plan to base Narnie in La Paz for the winter, ’commuting’ down occasionally for some sunny R&R.

Joining them on the baja run will be Steve and DJ McLaughlin.

_Pacific Enterprise — Colvin 52_  
Bob Lee, Seattle, WA

More than 1,000 boats have done the Ha-Ha over the years, representing a vast diversity of hull designs and rig types, but we can’t recall there ever being a Chinese junk rig. Until now, that is. Pacific Enterprise, which was built of steel in the late 70s, carries a traditional lug rig.

She may look a bit odd, but she’s a proven ocean cruiser, having sailed to Mexico before with her previous owner, who built her. And Bob, a retired Naval and airline pilot, brought her south from Canada recently without major problems. He’s been sailing since the ’60s and has owned this boat for four years. His Ha-Ha crew is yet to be announced.

After the Ha-Ha Bob will do a little cruising in the Sea of Cortez, then look for a safe harbor to leave her in during the ’06 hurricane season.

_Kabuki — Westsail 32_  
Ross Novak, Fairbanks, AK

Nearly a month after the ‘official’ entry deadline, Ha-Ha applications were still trickling in. Kabuki was the very last. “Dear Grand Poobah,” he wrote, “obviously this entry is a bit late, but deadlines are so linear and confining. And where has linear thinking ever gotten us?” Hmm. . .

We don’t know Ross, but we’d bet he is quite a character. He bought this sturdy little Westsail just five months ago and began prepping for the Ha-Ha. But prior to that he spent more than four years in Sub-Saharan Africa mining for gold. (Believe it or not, Ross is not the first gold miner to have entered the Ha-Ha.) After the Rally, he plans to cruise Mexico until spring, then ‘jump the puddle’ to the South Pacific.

Sailing with Ross will be Matt Young, a young Aussie who has served as an officer aboard both the sail training ship Young Endeavor and HM Bark Endeavor, a globe-trotting replica of Captain Cook’s famous ship.

**Having finally completed the task of profiling each and every Ha-Ha entry, we’re going to lie down now, rub Tiger Balm into our typing fingers and dream about sun-kissed beaches, flying fish and billowing spinnakers.**

If you aren’t lucky enough to be among this year’s phalanx of Ha-Ha sailors, fear not. There’s always next year. And it’s not too soon to start preparing. Look for a complete wrap-up on Ha-Ha XII in our December issue.

— latitude/aet

marina@paradisevillagegroup.com
With reports this month on the Paige/Logan Regatta; a trio of women’s regattas; the Yankee Cup and Champion of Champions; the Melges 24 PCCs; the SSS Vallejo 1-2; the Jessica Cup; the Folkboat Internationals; and the usual assortment of box scores and race notes.

Paige/Logan Regatta

French sailors Rohart Xavier and crew Pascal Rambeau, the reigning Star world champs, had never sailed on San Francisco Bay until the Calvin Paige Regatta, hosted by St. Francis YC on October 22-23. “With the Worlds here next year, we thought we’d better fly over and look around,” said Xavier. “It was a very important practice. We learned a lot — this is a difficult place to figure out with the winds, current, and fog!”

Five different Star luminaries each won races — Andy Horton, Jeff Madrigali, Marc Pickel, Andy MacDonald, and Erik Lidecis — but in the end, it was Rohart and Rambeau, sponsored by Banque Populaire, who won the regatta with a steady 2,2,2,(3),3 record. The French duo, who took a bronze in Stars at the Athens Olympics and won the Worlds in 2003 and 2005, beat runner-up Jeff Madrigali race and a costly 10th in the last race relegated him to second, still a great showing. Former German Olympian Marc Pickel beat out Erik Lidecis on the tiebreaker for third. San Diego Star legend Mark Reynolds, reunited with former crew Hal Haenel, was second going into Sunday’s racing, but stumbled with a BFD (one of four boats ‘black flag disqualified’ in race four) and a 15th to finish an uncharacteristic seventh overall.

Doug Baird, who has campaigned eight different Mercuries over the last 52 years, won the concurrent Joe Logan Regatta again with seeming ease over a 12-boat fleet. Sailing Axon, a Nunes-built Mercury he spent 11 years restoring, with regular crew Jim ‘JT’ Taylor on Saturday and David Demarest on Sunday, Baird put together a 3,1,3,2 string to beat runners-up Jim Bradley and Pax Davis. Baird has been almost unbeatable this year in Mercuries, winning most of the regattas except the Nationals (SoCal sailor Mike Burch, who finished fifth in the Logan, won that title this year).
“Girls just wanna have fun — On board the new N/M 36 ‘Quiver’ during the Joan Storer Regatta. Inset, Storer class winners, from left: Duffy Jolley, Sarah Deeds, and Eva Rommel.”

A barbecue and silent auction followed the Storer racing, raising about $2,000 for the new Bay Area Youth Sailing (BAYS) organization. It’s noteworthy that all three of these women’s sailing events have charity angles — other regattas take note!

**WOMAN SKIPPERS (SYC; Oct 1; 3 races):**

- **SPINNAKER** — 1) Vitrum, Catalina 470, Julie Moore, 4 points; 2) Jose Cuervo, J/105, Stephanie Magruder, 6. (5 boats)
- **BIG NON-SPINNAKER (< 145)** — 1) Q, Schumacher 40, Janice Stil, 4 points; 2) Jarien, J/35, Teresa Boyer, 5; 3) Quicksilver, C&C 39, Elaine Robinette, 10. (7 boats)
- **LITTLE NON-SPINNAKER (> 145)** — 1) Ka-Nina, Catalina 34, Erin Stypulkoski, 5 points; 2) Youngster, IOD, Chris Sidner, 7. (5 boats)

**SANTANA 22** — 1) Inshallah, Shirley Bates, 6 points; 2) Elaine, Leah Pepe, 7. (4 boats)

**LINDA ELIAS MEMORIAL (LBYC; Oct. 15-16):**

**JOAN STORER (TibYC; Oct. 22; 2.5 races):**

- **MOORE 24** — 1) Sunshine, Duffy Jolley, 5 points; 2) E-9, Lesa Kinney, 5. (4 boats)
- **DIV. I** — 1) Keala, Wylie Wabbit, Sarah Deeds, 2 points; 2) Q, Schumacher 40, Ashley Perrin, 4; 3) Quiver, N/M 36 mod., Leslie Norris, 8. (5 boats)
- **DIV. II** — 1) Elaine, Santana 22, Eva Rommel, 4 points; 2) Wind Dance, Cal 2-27, Monique Domis, 4; 3) Red Hawk, Hawkfarm, Shirley Vaughn, 5. (5 boats)

**Yankee Cup and Champion of Champions**

The annual season-ending showdown for HDA (Yankee Cup) and ODCA (Champion of Champions) racers took place in increasingly breezy conditions on the Cityfront on Saturday, Oct. 15. The Island YC race committee ran three quick windward/leeward races off the Golden Gate VC race platform, with the awards ceremony immediately following. A total of 17 boats — all season champions — participated.

The Yankee Cup came down to the wire, with four different boats each win-
Yankee Cup/Champions, clockwise from upper left — The Catalina 38 ‘Harp’; the 1D-35 ‘Jazzy’; the Elan 40 ‘Tupelo Honey’; start of the first Y-Cup race; ‘Hoot’ skipper Andy Macfie (left) accepts the C-of-C trophy from ODCA president Pat Broderick; ‘Petard’ and ‘Hoot’ leave the windward mark.

ring a race — the ID-35 Jazzy won the first one by three seconds over the Elan 40 Tupelo Honey; the Farr 38 Mintaka and Tupelo Honey tied for first in the second; and the Catalina 38 Harp won the windy third race. After some initial scoring problems involving the ratings of Harp and Encore, the Cup was eventually awarded to Gerry Brown’s Mintaka 4, which won with a 5, 1.5, 2 record. Brown, who is also the president of HDA, was quick to point out, "If Tupelo Honey hadn’t been DSQed for going through the start/finish line in the third race, they would have won."

The Yankee Cup victory capped another great year for Brown and his loyal crew (Tom Ranweiler, Bruno Carnovale, Joe Rockmore, Dave DiFalco, and Bob Gardner). Mintaka also had Hoot crew Conrad Holbrook aboard for the first race, as they gave him a ride to the starting area, but then couldn’t wait for Hoot to show up. “Win or lose, the Yankee Cup is always fun,” said Brown. “There’s no entry fee, and arguably the racing isn’t the best due to throwing everyone into just one division — the big boats have the
Yankee Cup/Champion of Champions, cont’d — The ODCA fleet beats upwind, with ‘Max’ leading ‘Hoot’ and ‘Goose’. Yankee Cup winner (and HDA president) Gerry Brown won the Yankee Cup; the Antrim 27 ‘Max’ plays catch-up. All photos latitude/rob and jr, except as noted.

advantage of sailing in clear air the whole time. But it’s kind of a victory lap for all the class winners, and a nice opportunity to get together socially at the end of the season.”

Andy Macfie’s Olson 30 Hoot did make the first start, and went on to dominate the Champion of Champions fleet with three bullets. The diminutive Santana 22 Bonito was a distant second, while the Antrim 27 Max, which OCSed the first race, was lucky to still take third on a tiebreaker with the Olson 25 Hamburger Haus and the Catalina 30 Goose.

YANKEE CUP (HDA) — 1) Mintaka 4, Farr 38, 8.5 points; 2) Jazzy, 1D-35, Bob Turnbull, 8; 3) Encore, Wylie 31, Andy Hall, 11.5; 4) Harp, Catalina 38, Mike Mannix, 13; 5) Tupelo Honey, Elan 40, Gerard Sheridan, 14.5; 6) Bay Loon, J29, Joseph Ferrie, 15.5; 7) Shameless, Capo 30 mod., George Ellison/Harry Macartney, 16; 8) Petard, Farr 36, Keith Buck, 24; 9) No Name, Ultimate 24, Peter Cook, 24; 10) Mer Tranquille, Jeanneau Sun Odyssey 34.2, Larry Moraes, 31. (10 boats)

Melges 24 PCCs
Newport Beach amateur sailor Bruce Ayres beat up a 24-boat fleet to win the Carloan.com Melges 24 Pacific Coast Championship, hosted by SFYC on September 24-25. Sailing with Don Smith, John Pinkney, and Dave Shelton, Ayres topped the fleet with a 2,1,1,6,4 record. Defending champion Shark Kahn, sailing with Jeff Madrigali, Brian Hutchinson, and Brian Lee, finished second, two points back. Indicative of the depth of the fleet, four different skippers won races — Ayres had two bullets, and one each went to Kahn, Don Jesberg, and Matt McQueen.

All racing occurred on the Berkeley Circle in winds ranging from 8-22 knots. Boats came from as far away as Seattle and San Diego for the PCCs, one of several warm-up regattas leading up to the 2005 Corum Melges 24 World Championship in Key Largo, FL, on December 11-16. At least 10 West Coast teams are expected to do the Worlds, including Ayres, both Kahns, Argyle Campbell, Dave Ullman, Seadon Wijsen, and Don Jesberg.

1) Monsoon, Bruce Ayres, NYHC, 14 points; 2) Pegasus 492, Shark Kahn, Waikiki YC, 16; 3) Ego, Don Jesberg, SFYC, 22; 4) #397, Shawn Bennett, NoYC, 24; 5) Pareto Optimal, Seadon Wijsen, StFYC, 29; 6) Personal Puff, Dan Hauserman, Tahoe YC, 41; 7) Go Dogs Go, Pepe Parsons, SCYC, 41; 8) Pegasus 575, Philippe Kahn, Waikiki YC, 43; 9) Caliente, Matt McQueen, LBYC, 46; 10) Break/N Wind, Matt MacGregor, CYC, 52; 11) #180, Doug Forster, SFYC, 52; 12) Smokin’, Kevin Clark, EYC, 58; 13) Tinseltown Rebellion, Cam Lewis, MPYC/RYC, 62; 14) Derivative, Hunt/Surber, CoYC, 64; 15) Shriek Express, Nigel Donnelly, TISC, 80. (24 boats; 5 races; no throwouts; www.sfyc.org)

Vallejo 1-2 Race
The final event on the Singlehanded Sailing Society’s 2005 schedule was the Vallejo 1-2 Race, held in fine shorthanding weather on October 15-16. Forty-one boats sailed up to Vallejo singlehanded on Saturday, and then retraced their steps the next day doublehanded. “It’s a fun format, a nice way to end the season,” said
THE RACING

SSS official Jeff Berman. “It’s also one of the most social races we hold, with most people gathering at Vallejo YC for dinner on Saturday night.”

Al Germaine was the overall winner of the mellow race up in his Moore 24 Hurricane, while Dave Hodges and crew Scott Parker won Sunday’s slow race overall with the Farr 38 Timber Wolf. Germaine ended up winning the weekend overall, beating Jim Fair’s Merit 25 Chesapeake on a tiebreaker. After seven races (3BF, Farallones, In-the-bay, HMB, LongPac, East Bay-Estuary, and the Vallejo 1-2), two familiar faces — Mark Halman (Sleeping Dragon, Hobie 33) and Greg Nelson (Starbuck, Black Swo) — were crowned the SSS singlehanded doublehanded champions, respectively.

The 2006 SSS season will get underway on January 28 with the always-zany Three Bridge Fiasco. See www.sfbayyss.org for details.

BEER CAN SERIES FINAL RESULTS

Div. II (faster than 170; shorter than 29 feet)

1) Tugboat, Newport 30, Thomas Collins; 2) Windsong, International Folkboat, Paul Harris; 3) Jayhawk, Coronado 25, Peter McCool (5 boats). (Only the top three places in the Spring and Fall series were invited to sail in this championship race on October 7.)

Bay View BC Monday Nights

1) Turtle, Newport 33, Tom Collins; 2) Windsong, International Folkboat, Paul Harris; 3) Jayhawk, Coronado 25, Peter McCool (5 boats). (Only the top three places in the Spring and Fall series were invited to sail in this championship race on October 7.)

Benicia YC Thursday Nights

Div. A (c 121) — 1) Blue Fin, Santana 35, Guy Benjamin, 24.13 points; 2) Tout Suite, Beneteau 40.7, Tim Merril, 40.25; 3) Bear Naked, Wylie 34, Noble Griswold, 40.25 (6 boats)

Div. B (c 121) — 1) Stolen, J/24, Deborah Lyons, 20.13 points; 2) Kellia, Hunter 33.5, Mike Weaver, 42.25; 3) War whoop, Contessa 33, Chuck Hooper, 65; 4) Sunset Strait, J/24, Grant Harless, 65 (11 boats)

Berkely YC Friday Nights

Div. I (170 and above) — 1) Roseanna Donna, Cal 20, Pete Dennis/Hattan Clifton, 16 wins; 2) Latin Lass, Catalina 27, Bill Chapman, 11 wins; 3) (tie)

Div. II (faster than 170; shorter than 29 feet)

1) Tugboat, Newport 30, Thomas Collins; 2) Windsong, International Folkboat, Paul Harris; 3) Jayhawk, Coronado 25, Peter McCool (5 boats). (Only the top three places in the Spring and Fall series were invited to sail in this championship race on October 7.)

Div. II (faster than 170; shorter than 29 feet)

1) Boogie Woogie, Ranger 33, Michael Yovino-Young, 11 wins; 2) Flexi Flyer, Sovereil 33, Mitch Wells, 5 wins; 3) (tie) Jeannette, Frers 40, Henry King, 3 wins, and Third Rock, Echells, Mike Maloney, 3 wins. (26 races, 3 divisions, approx. 50 boats; 20 boats won at least one race. Scoring is ‘horse race’ style, i.e., only first place counts.)

Corinthian YC Friday Nights

Spinaker I — 1) Yucca, 8-Meter, Hank Eason, 22 points; 2) Faster Horses, Doug Holm, 23; 3) Abigail Morgan, Express 20, Ron Kell, 24; 4) Astrum, Farr 40, Mary Coleman, 25; 5) Psycho Puppy, Melges 24, Dave Holscher, 26; 6) JR, Moore 24, Rich Korman, 29; 7) Little Wing, Mumma 36, John Kerslake, 32; 8) Flashman, Moore 24, Daniel Perrin, 45. (25 boats)

J/105 — 1) Sabretooth, Mike Eagan, 9 points; 2) Tiburon, Steve Stroud, 13; 3) Lulu, Don Wienen, 27.
The 'other' Yankee Cup — Terry Klaus' beautiful Herreshoff '50 'Brigadoon' won the gaffor trophy at the Jessica Cup for the sixth time.

Jeal, who has won the last few local Folkboat season championships, sailed Polperro with his wife Susan Parker and tactician Bren Meyer. "We were a little slow in the beginning, but came on strong at the end," said Jeal, a San Francisco steel fabricator. "We thought we could do well, but weren't sure how we stacked up against the Europeans, all of whom had to come in fifth.

There were 6 boats, while the visitors were assigned a borrowed boat for the week via a pre-regatta lottery. The racing occurred in a variety of conditions on three venues — the Cityfront, Harding/Knox, and the Berkeley Circle.

The social part of the regatta was also varied and fun, highlighted by the Angel Island Cruise on Wednesday, a layday. "It was a great regatta, both on and off the water," claimed Jeal. "Everyone had a good time. It was so much fun that one guy — Fred Anderson, a Knorr owner who crewed for a Brit team — decided to get back to his roots, and is currently purchasing a Folkboat!"

See www.sfbayfolkboats.org for full results, pictures, and more.

1) Peter Jeal, USA, 29 points; 2) Svend Svendsen, USA, 40; 3) Eric Kaiser, USA, 48; 4) Per Buch, DEN, 57; 5) Christoph Nielsen, GER, 60; 6) Roni Saksi, FIN, 60; 7) Don Wilson, USA, 62; 8) Nils Rasmussen, DEN, 71; 9) Danielle Dignan, USA, 74; 10) Bill DuMoulin, USA, 78; 11) Donald Bratt, SWE, 79; 12) Bill Madison, USA, 82; 13) Joachim Bleifuss, GER, 84; 14) Finn Hartvig, DEN, 86; 15) Lars-Gunnar Lindberg, SWE, 94; 16) Richard Webb, GB, 94; 17) Ed Welch, USA, 96; 18) Michael Goebel, USA,

BEER CAN SERIES FINAL RESULTS

6. (7 boats)

NON-SPINNAKER — 1) Albacore, Santana 22.
THE RACING

Box Scores

Nothing but the facts, ma’am. Here’s the straight dope, mercifully without editorial comment, on a dozen or so other regattas which occurred last month:

1D-35 WEST COAST CHAMPIONSHIP (CYC of Seattle; 9/30-10/2):
1) Shrek, John Hoag/Bob Pistay, 22 points; 2) Extreme, Michael Goldfarb/Mark Brink, Seattle, 34; 3) Tabasco, John Wylie/Seadon Wijesin, San Diego, 42; 4) Sweet Sensation, Gary Fanger/Mario Yovkov, San Francisco, 42; 5) Midsummer, Stig Osterberg/Brian Huse, Seattle, 44. (9 boats; 9 races; no throwouts; www.cycseattle.org)

TOTALLY DINGHY REGATTA (RYC; Sept. 24-25):
SNIPE — 1) David & Susan Odell, 5 points; 2) Pacyk Davis, 12; 3) Nabil Shahin, 17; 4) Vince Casalaina/Sherry Eldridge, 21. (9 boats)
BYTE — 1) Trish Moratorio, 6 points; 2) Dan Ouellet, 6; 3) Dan Roberts, 12; 4) Jeff Nelson, 17; 5) Jim Parker, 19; 6) Karen Knowles, 24. (13 boats)
OPTI — 1) Alex Delle Cese, 4 points; 2) Lauren Cefali, 8; 3) Kaylaa Baab, 11. (8 boats)
LASER — 1) Tom Burden, 12 points; 2) Walt Spevak, 13; 3) Simon Bel, 19; 4) Colin Brochard, 20; 5) Skip Shaprio, 23; 6) Tim Prince, 33. (15 boats)

NICE folks — Peter Jeal (above), wife Susan — 1) Packy Davis, 12; 2) Bill Riess, 7. (5 boats)

NON-SPINNAKER (< 151) — 1) Peter Lowry/Tony Castruccio, Day Sailor, 7 points; 2) Gil Wooley, Contender, 16; 3) Jerry White, Contender, 29; 4) Kirk Tarrow/Fred Schmidt, I-14, 35; 5) Eduardo Grissetti, Day Sailor, 36; 6) Bill Flock ‘Chris’, Day Sailor, 39. (12 boats)
CORONADO 15 — 1) Dave Rambaugh/ Jeff Stokes, 6 points; 2) Steve Fishman, 9; 3) Adam Guest, 16. (7 boats)

WALLACE CUP (OYC; Oct. 1; 9.5 miles):
1) Bergman/Oberon/Smith, 10. (5 boats)
2) Canivet/Kit Wiegman, 15; 3) Ron Tostenson/Rusty Groen/Terry White, 9 points; 2) Colin Moore/Guillaume Canivet/Kel Wiegman, 15; 3) Ron Tostenson/Rusty Canada/Scott Tipper, 22; 4) Marceline Therrien/Gary Sadamori/Brad VanVechten, 22. (9 boats)

FINN — 1) Bradley Nieuwstad, 5 points; 2) Charles Heimer, 10. (5 boats)

(6 races; 1 throwout; www.richmondyc.org)

ALAMEDA INTERCLUB SERIES (final):
BIG SPINNAKER (> 174) — 1) Uno, WylieCat 30, Steve Wonner, 10 points; 2) Crittin II, WylieCat 30, Bill West, 10; 3) Peggy Sue, Laser 28, John Davis, 15. (7 boats)

WYLIE WABBIT — 1) Kim Desenberg/John Groen/Terry White, 9 points; 2) Colin Moore/Guillaume Canivet/Kel Wiegman, 15; 3) Ron Tostenson/Rusty Canada/Scott Tipper, 22; 4) Marceline Therrien/Gary Sadamori/Brad VanVechten, 22. (9 boats)

FINN — 1) Bradley Nieuwstad, 5 points; 2) Charles Heimer, 10. (5 boats)

(FDD 1 throwout)

South Beach YC Friday Nights
1D-35 — 1) Jazzy, Bob Turnbull, 21 points; 2) Zsa Zsa, Gary Fanger, 33; 3) Great Sensation, Rodney Hagebols, 39. (5 boats)

BEER CAN SERIES FINAL RESULTS

Mark Playsted, 5 points; 2) Georgia, Custom 40, Lucie Mewes, 10. (5 boats)
(Second half only; 5 races; 1 throwout)

STFYC Thursday Night Kite Series
1) Anthony Chavez, 10 points; 2) Chip Wasson, 13; 3) Nils Stoclechner, 21; 4) Geoff Heddington, 28; 5) Marcelo Segura, 34; 6) Steve Gibson, 34. (13 kites; 10 races; 3 throwouts)

St. Francis YC Friday Night Windsurfing Series
1) Bill Weir, 8 points; 2) Jean Rathile, 19; 3) Ail Mire, 20; 4) Ben Barber, 24; 5) Eric Christianson, 29; 6) Soheil Zahedi, 42; 7) Bill Russell, 45; 8) Chris Radkowski, 57; 9) Steve Bodner, 68; 10) Jim Kinakis, 69. (22 boards; 10 races; 3 throwouts)

Oakland YC Sweet Sixteen Series (Wednesday Nights)
DIV. I (< 151) — 1) Golden Moon, Express 37, Kame & Sarah Richard, 7 points; 2) Elan, Express 37, Bill Riess, 7. (5 boats)
5.5 METERS — 1) Alert, Richard Humphrey, 5 points; 2) Sausie, Steve Hatchinson, 12. (4 boats)
DIV. II (> 151) — 1) Betwitched, Merit 25, Laura-ine Salmon, 6 points; 2) Dire Straits, J24, Dawn Chesney, 7. (5 boats)
180-RATERS — 1) Lelo Too, Tartan Ten, Emile Carles, 5 points; 2) Joanna, Irwin 30, Martin Jemo, 10. (4 boats)
NON-SPINNAKER (< 151) — 1) Green Onion, AE-28, John Tuma, 5 points; 2) Diana, Islander 36, Steve Zevaneve, 9. (4 boats)
NON-SPINNAKER (> 151) — 1) Cat Walk, Ariel 26, Scott Wall, 7 points; 2) Pearl, Ranger 23, Michael Law, 8; 3) Cheap Therapy, Cal 20, Darrell Caraway, 15. (7 boats)
(15 races; 2 throwouts)

Sausalito YC Sunset Series (Tuesday Nights)
J/105 — 1) LuLu, Don Weneke, 8 points; 2) Jose Cuervo, Sam Hock, 11. (4 boats)
SPINNAKER — 1) Lynx, WylieCat 30, Steve Overton, 4 points; 2) Vitrum, Catalina 470, Dale Fleming, 9; 3) Nina, Olson 29, Rob MacDonald, 13. (5 boats)
NON-SPINNAKER (> 157) — 1) Tom Cat, Islander 36, Barry Stomp, 5 points; 2) Youngster,IOD, Ron Young, 8; 3) Quicksilver, C&C 41, Carl Robinet, 15; 4) Jazzbeau, Ericsson 34, James Parret, 16. (9 boats)
NON-SPINNAKER (> 151) — 1) Elaine, Santana 22, Pat Broderick, 12 points; 2) Tackful, Santana 22, Frank Lawler, 9; 3) Roebot, Catalina 30, Rod Decker, 15; 4) Losfers Glory, Tartan 30, Charlie Holmquist, 15. (13 boats)
(second half only; 5 races; 1 throwout)

West YC Friday Nights
1D-35 — 1) Jazzy, Bob Turnbull, 21 points; 2) Cheque, Beneteau 35s5, Kevin Wilkinson, 26; 3) Fat Bob, Catalina 38, Bob Lugani, 30. (7 boats)
DIV. V (non-spin < 121) — 1) Rollover, Catalina 34, Lynn Guerra, 16 points; 2) Stink Eye, Laser 28, Jonathan Gutfot, 25; 3) Animal Crackers, Olson 25, John

COLLEGIATE RANKINGS (as of Oct. 19):

ETCHELLS SEASON CHAMPIONSHIP (final):
1) Peter Vessella, 42 points; 2) Craig Healy, 105; 3) Andrew Whittome, 150; 4) Jim Gregory, 160; 5) Wayne Clough, 172; 6) Chuck Eaton, 200; 7) Mike LaPort, 228; 8) Bill Melbostad, 230; 9) Jeff Mosely, 233; 10) Vorn Nett/Myron Erickson, 245. (20 boats; 35 races; www.sfetchells.org)

Race Notes
Grand prix notes: The Acura Key West Regatta, set for January 16-20, is starting to come into focus. Highlights of the expected 300+ boat regatta will be IRC’s debut at this venue, the Swan 45 Gold Cup, and a 10-boat TP-52 class. Two Swan 601s (Moneypenny and Spirit of Jethou), and five custom boats over 60 feet are already entered, including Jim Madden’s new canting-keeled R/P 66 Stark Raving Mad III. Bay Area boats currently on the list at www.premiere-racing.com include the TP-52 Pegasus 52, the defending J/105 champ Masquerade, Tahoe-based Melges 24s Personal Puff and Nothing Ventured, and J/105 sailor Kristen Lane’s chartered J/80. . . The 2007 TransPac will start on July 9, 12, and 15 (two days earlier than this year’s race), and will be capped at a “rating limit similar to 2005, with a length limit of 30 meters.” The TransPac board is currently debating whether to track 2007 competitors’ positions with automatic transponders instead of daily radio reports, which would undoubtedly change the tactics of the race depending on the frequency of the updates.

Around the Bay: Jim Coggan’s sleek Schumacher 40 Auspice was recently PHRO-I winner and second overall in the Farallones Race on August 27. Auspice originally wasn’t scored, allegedly due to a failure to check in on the radio prior to the first gun. Coggan did, however, check in, and was able to prove it in his appeal. . . The inaugural Big Team Regatta on October 7, hosted by GEL and OCSC, raised $51,095 for TISC’s youth and adap-

Midwinter Series
January 21-22 & February 18-19
★ ALL BOATS WELCOME ★
Post-Race Festivities Include Saturday Night Dinner and Live Band

Corinthian Yacht Club
OF SAN FRANCISCO

Visit our website: www.cyc.org
tive sailing programs. Fathom Online, a search engine and data integration company, won the six-race regatta over nine other corporate efforts...Art Lange won the El Toro Long Distance Triple Crown (Bullship, Flight of the Bulls, and Corkscrew), while Fred Paxton won the 2005 El Toro season title.

Midwinter updates: Jeff Zarwell, an independent race manager who runs RegattaPro, has created a new midwinter one design series on the Bay for 1D-35s, J/120s, Beneteau 40.7s, and possibly others. The Winter One Design Invitational Series will take place the second Saturday of the month through February, with two races each day. Competitors are invited back to Sausalito YC after each race for videos, trophies, and free beer...South Beach YC has reinvented its recently unlucky midwinter series to now go around islands (TI, Alcatraz, and even Angel) in either direction, with motor allowances for the low wind, high current days. See www.southbeechyc.org for more about the new Island Fever Regatta.

On the road: For the first time in ages, Area G will be represented at the U.S. Sailing Offshore Championship (aka Lloyd Phoenix Trophy) at the Naval Academy in Annapolis on October 27-30. John Siegel, skipper of the all-conquering Wylie 41 Scorpio, volunteered for the mission, and will compete in the Navy 44s with wife Joy, G.W. Grigg, Geoff McDonald, Larry Peterson, Marcy Fleming, John Buchanan, and Sean McBurney. Regular tactician Bren Meyer, who Siegel presented with the 2005 Big Boat Series Rolex watch for winning IRC-C, couldn't make the trip — something about "sailing too much and not working enough." Check www.ussailing.org to see how our local heroes fared.

The envelopes please: The short list for the 2005 ISAF Rolex World Sailors of the Year was recently announced. Male nominees are Fernando Echavarri and
Anton Paz (ESP), Peter Gilmour (AUS), Fin-ian Maynard (IVB), Bruno Peyron (FRA), Vincent Riou (FRA), and Rohan Veal (AUS). The women are Claire LeRoy (FRA), Dame Ellen MacArthur (GBR), Blanca Manchon (ESP), and young Laser Radial star Paige Railey (USA). The criteria for nomination is outstanding sailing achievement between September 2004 and August 2005, and the winners will be announced during the ISAF Annual Conference in Singapore on November 8. The achievements of these 10 great sailors are listed at www.ussailing.org.

Meet the new boss: Versatile Sally Barkow (Nashotah, WI), who earlier this year won the 2005 Yngling Worlds and then dominated the Rolex International Women’s Keelboat Championship in late September, defended her title at the 2005 Virtual Spectator ISAF Women’s Match Racing World Championship in Bermuda, defeating veteran American sailor Betsy Alison 3-0 in the finals (see Box Scores for full results). Barkow, a three-time All-American at Old Dominion, sailed with longtime teammates Debbie Capozzi, Carrie Howe, and Annie Lush. We’ve lost track of how many Rolexes Barkow has won and given away now, but we suspect she’ll receive another one in February.

Slimming down: At last month’s annual general meeting in Phoenix, US Sailing voted to reduce the size of their Board of Directors from 49 to 14, a change that was months in the making. The restructuring will hopefully increase the effectiveness of the Board, which will now meet monthly. “This change demonstrates that US Sailing is trying to modernize the way we work and facilitates meeting our mission of encouraging participation and promoting excellence in sailing,” said president Janet Baxter.

At the same meeting, California YC (Marina del Rey) was presented the St. Petersburg YC Trophy, emblematic of excellence in race management, for the Keane Star NAs last August. This was the third time in 10 years that Cal YC has won this high honor, and only the third time in the 38-year history of the Trophy that any club has won three times. . . . High school sailing advocate Larry White (Niantic, CT) was awarded the Nathanael G. Herreshoff Trophy, US Sailing’s most prestigious trophy, for outstanding contribution to the sport. White is well known for his successful 15-year presidency of the Interscholastic Sailing Association (ISSA), a position he relinquished earlier this fall. . . . Gene Hinckel (St. Petersburg) received the Gay S. Lynn Trophy (contributions to disabled sailing) and Jo Mogle (Punta Gorda, FL) was honored with the Timmy Larr Award (contributions to sailing education and training).

Signing off: After 18 enjoyable years of working at Latitude 38, it’s time to finally step off the monthly merry-go-round. Thank you to publisher Richard Spindler and the fine staff of this magazine for tolerating my ramblings for all these years. Thanks also to everyone who read and contributed to this column — I couldn’t have done it without all of you.

After travelling and sailing for the next few months — including Key West Race Week and the P.V. Race — I hope to resurface in the spring in a slightly different capacity in the Bay Area sailing community. In the meantime, I can always be reached at robert_k_moore@msn.com.

See you on the starting line!

The Surf and Turf Combo Plate: Something for Everyone

"This was by far the best vacation ever," mused nephew Derek shortly after returning from the Caribbean last summer. "I never wanted it to end!"

It was no surprise that the rest of our crew made similar comments, since we'd hosted them on what we consider to be the perfect sailing vacation for a group like ours, a mix of seasoned sailors and neophytes. Our recipe for success was to spend part of our allotted getaway time ashore at a waterside resort and the rest of the time aboard a charter yacht — a 'surf and turf' charter vacation, as we like to call it. The whole thing could hardly have worked out better. Everyone came home tanned, refreshed and smiling broadly.

Like most de facto trip leaders, there have been times when this writer has had trouble getting commitments for a bareboat charter trip. But not this time. No sooner had I floated the idea of doing a Caribbean sailing getaway with my extended family, than a barrage of emails hit my in box saying: "I'm in! Save me a spot."

My brother Bear and I have been doing sailing trips together since... well, since before we actually knew what we were doing. When our kids came along — we have two boys each — we started shanghaiing them to go with us, even before they were out of diapers. Occasional trips together became a tradition. This time, though, as all the boys are now in their 20s, instead of bugging us incessantly to keep it an all-guy trip, leaving their poor moms at home, it was, "Say, Uncle, would it be cool if my girlfriend came along?"

"Wow!" I thought. "They've come a long way since the days of burping contests and Oreo gluttony."

Because my nephews' girlfriends, Katy and Amy, had never done a live-aboard sailing trip before, and barely knew the pointy end of a boat from the other end, I proposed that we spend five days aboard a top-of-the line bareboat in the British Virgin Islands, and another five at a top-notch resort. For once, no one wanted to debate the plan. Suddenly, I was a genius.

My wife Julie and I have sailed more loops through the British Virgins than we can count, yet we've never tired of doing so. And the BVI is our hands-down favorite venue for introducing newcomers to the joys of tropical sailing, due to the territory's easy sailing conditions and ample shoreside amenities. For the land portion of the trip the choice was obvious: the world-renowned Bitter End Yacht Club, with its elegant simplicity, breathtaking views and remarkable arsenal of watersports toys. When our grand plan was concocted late last spring, the availability of catamarans was nil, so we booked a beautiful, nearly-new Moorings 494 with four double cabins, four heads and a large comfortable cockpit.

By the time Bear, his wife Marta and the 'kids' arrived from the airport at The Moorings' docks in Road Town, we'd already done a thorough checkout with the company's cheerful, ever-efficient staff and were ready to throw off the docklines.

"Oh my goodness, what a beautiful boat!" exclaimed Katy as she surveyed the hardwood-paneled salon and cabins. She was the token southern belle within our California-born crew. Her boyfriend, nephew Ryan, wasted no time setting up his iPod to work in conjunction with the built-in CD player, and by the time we pulled out of the slip one of Bob Marley's reggae anthems was pulsing out through the cockpit speakers.

As our newly arrived crew were all a bit travel-weary and jet-lagged, we headed straight for Virgin Gorda's famous Baths to let them sample the rejuvenating effects of snorkeling through that
the Bitter End normally uses for their
daysails and racing. (My wife, myself
and our 'kids' had gotten a head start on
the 'turf' portion of the trip, by sneaking
in a couple of nights at the Bitter End
at the beginning of our trip. We made a
special arrangement to 'borrow' Cosmic
for several days, so the two boats could
sail in tandem.)

During our dinner ashore that night
at the Last Resort — a funky long-estab-
lished eatery perched on its own little
island within the bay — I
laid out my rough plan for
the rest of our five-day
mini-tour. The idea was to
revisit some of our favorite
haunts, while showing the
newcomers the best of the
BVI. I proposed that we
sail down the 'back side' of
Tortola the next day to Jost
Van Dyke; to Cane Garden
Bay the third night; on to
West End, Tortola; Norman
Island; then back to The
Moorings.

We packed a lot of fun
into our short cruise, in-
cluding partying at Foxy's
on Jost Van Dyke, lounging
on the sugar-fine beach at
White Bay, snorkeling at
Sandy Spit and The In-
dians, and exploring the
Norman Island 'treasure
caves'. The sailing condi-
tions were predictably idyl-
llic, with gentle seas and
moderate breezes most of
the time. It was, however,
an abnormally hot week in
the islands, so one night
we old salts weakened and
agreed to spend a night
in air-conditioned bliss,
plugged in, dockside, at
Tortola's Soper's Hole Ma-
rina. (The A/C was also a godsend at the
charter base while loading and unload-
ing.)

"For me, the boat portion was the best
part of the trip," said Ryan later. "It was
my first time in the Caribbean so it felt
like I was exploring a whole new world.
Pulling into a new spot each day kept the
experience fresh and surprising."

brilliant turquoise water. Afterwards,
their childlike excitement reminded
us of just how incredible it is to swim
through a kaleidoscope of tropical flora
and fauna, especially for the first time.
For Ryan, Katy and Amy this was all a
unique experience — their first Carib-
bean cruise. Likewise, Marta hadn't
been here for 23 years,
and had nearly lost her
interest in sailing in the
interim.

By sunset that
night, we were moored
at Trellis Bay enjoying
sun-downers, having
rendezvoused with the
rest of our entourage:
our own boys, Aaron
and Zac, and their
friends, Theresa and
Jessie. They'd sailed in
aboard the Express 37
Cosmic Warlord, which

Long renowned as one of the world's top water-
sports resorts, the Bitter End has a vast arsenal
of watersports toys.
His brother’s favorite memory is: “when we hit that random squall on the back side of Tortola and everybody got soaking wet. It was pretty hilarious, and at that point we hit our fastest speed of the whole trip.”

Being a newcomer to all of this, Katy had a slightly different take on it: “The boat definitely took me out of my normal ‘comfort zone’, but it allowed a closer experience with nature and the landscape. It was so nice to wake up with the sun, being on the ocean, surrounded by islands. I just looked around and tried to take everything in, to really appreciate where I was.”

As if our little cruise hadn’t been rejuvenating enough, we capped it off with a glorious five-day stint at the Bitter End—Julie’s “favorite place in the world.” Currently celebrating its 30-year anniversary, this family-owned resort has been a sailor’s mecca since day one. Literally all of its cozy hillside rooms offer eye-popping panoramas, and several restaurants serve fine Caribbean-inspired cuisine, but the main attraction here,
of course, is watersports. With carte blanche use of Lasers, Hobies, J/24s, Hunter 216s, Rhodes 19s, Freedom 30s and windsurfers, it is truly a watersports paradise for sailors of all skill levels. And its isolation at the far end of Virgin Gorda’s North Sound makes you feel as though you are a million miles from the pressure and stress of the workaday world.

Our days there were spent bashing around neighboring Eustatia Sound in various types of sailing craft, snorkeling nearby reefs, and simply soaking up the serenity of the place in lounge chairs near the water’s edge. At night, after toasting the setting sun with a cool libation, we all dined together, catching up on the latest news of each other’s busy lives. And more than once, we danced beneath the stars to infectious steel drum melodies.

Ryan later recalled with a smile, “My favorite memory of the Bitter End is of Katy and me capsizing the Hobie Cat in the middle of the mooring zone. We were sitting there, not a breath of wind, then boom! A huge gust of wind took us right over. As soon as we got the boat upright, it was hit by another gust and went over again, knocking off my shades in the process. Katy was laughing, people on nearby boats were laughing — it was great.”

Thinking back later, Amy fondly remembered, “The rooms at the Bitter End are gorgeous and have amazing panoramic views.”

Marta agreed: “Believe it or not, my favorite part of the stay at Bitter End was walking up the many steps to my room
and collapsing into a lounge chair on the balcony, where I admired the gorgeous views of the water and islands beyond.

All in all, it had been a family vacation that would be hard to top. But then, we figured it would be, as the surf and turf concept always seems to be a winner.

As to the blend of time ashore and time afloat, Katy said, "I think it was a perfect balance; both aspects brought different perspectives. But who am I kidding to say I wouldn’t love a longer stay at a Caribbean resort! Then again, I do wish I had learned more about sailing than I did."

Amy, too, may become a repeat customer: "The entire area is more than remarkable. You will never run out of things to do and see, and you even get to experience a different culture and way of life. I've vacationed in Hawaii, but it doesn’t compare to having a boat adventure and staying in a resort cottage built into an island hillside. Doing an on-land and at-sea trip like this was adventure and luxury combined—a great mix."

Ironically, Marta, who thought she'd lost her interest in sailing, said, "My next visit to the Caribbean will be a trip afloat. I'd been concerned about the close proximity of a boatload of family members, with all those unique and lively personalities. But I was pleasantly surprised at how well everyone got along, with no flaring tempers or selfish demands. I guess the lesson is not to arrive in the Caribbean with any preconceived notions. Leave your land-based obsessions behind you."

Bear probably spoke for all of us when he said, "When people ask about our trip, I say, 'Great boat, excellent sailing conditions, everyone got along very well and had a great time — and I wish I was still there!'" — latitude/aet

Readers — Although our surf and turf trip was custom-designed, the Bitter End and The Moorings offer a "Yacht Villa Package" aimed at couples who want to ease into the realm of yacht chartering. It includes five days at the resort and five days aboard a Moorings 332 — ideal for honeymooners or empty nesters.

For families and larger groups, The Moorings and BEYC are currently laying the groundwork for an Island Cruise Package which would utilize a luxurious, crewed 45-ft catamaran. Stay tuned for an official announcement soon.

In the meantime, surf and turf packages can always be customized to meet the needs of any size group.

Learn more about The Moorings’ offerings by calling (800) 521-1198, or by visiting www.moorings.com. For Bitter End YC info and reservations, call (800) 872-2392 or see their website, www.beyc.
Charter Addicts — Talk to Us!

We don’t ask many favors from our readers, but this month we need a little help from our friends — namely, you.

We know many Latitude readers take charter trips often, both in U.S. waters and abroad. But your answers to the questions that follow will help us to write about topics that interest you most.

So please take a few minutes to fill out this form and mail it back to us. Hey, this is interactive journalism. Mail to:

Don't Sweat The Canal

Ricardo & Gloria Klenk
(Emeryville)

Veterans of last year’s Ha-Ha with our daughter Yvette, we made it all the way to Cartagena, Colombia, where we’ve really enjoyed the last five months.

However, our primary reason for writing is to talk about the Panama Canal transit, since there seems to be a lot of cruiser confusion about what’s involved and how risky it is. Those widespread concerns caused us a lot of unnecessary anxiety, because having now done it ourselves, we can assure everyone that it’s a piece of cake!

Preferring not to pay an agent — some of whom charge $500 — to do our paperwork, we did it ourselves. It took us just one day — and by the end of the day we even had our transit date. Since we didn’t hire an agent, some people told us we’d probably get stuck at the bottom of the list and have to wait a month. Well, the day after arriving in Balboa, we were informed our transit date would be in just six days.

Our advice for cruisers on a budget and/or for those who don’t like to spend $500 when they don’t need to is simple — there is absolutely no need for an agent to transit the Panama Canal. The procedure is actually quick and easy. Here’s an overview, assuming a start from the Balboa YC and doing a Pacific to Caribbean transit:

The first thing in the morning, take a $2 cab ride to the Balboa Admeasurement Office, where you will be required to sit at a computer for 15 minutes answering a bunch of questions, mostly about your boat. If you have problems or questions, the helpful girls at the office can walk you through the simple procedure. Once that’s done, the Admeasurer will visit your vessel, hopefully that same day, to inspect and measure the boat.

Once the Admeasurer is done, you are now ready to take the final step, which is to visit the nearest Citibank — another $2 cab ride — to pay for your transit. Be aware that Citibank closes at 2 pm, so if you are running late, you’ll have to wait until the next business day to complete the work. After 6 pm on the day you paid your transit fee, you can call the Marine Traffic Scheduler for your transit date.

That’s all there is to it! If you want to pay an agent $500 to do it for you, that’s your business. We think there are better ways to spend our money.

By the way, the amount of traffic in the Canal varies according to the time of year. From February through the early fall, the Canal tends to be quite busy with extra ships from China bringing consumer goods to the States for the Christmas season. But from November through about February, the Canal is usually not so busy and you can often transit a day or two after being measured. However, it also depends on the world economy, which is cooking right now.

Our total cost for doing the paperwork? Six dollars in cab fares and a few hours of our time. As our boat is under 50 feet, we paid $600 for the transit itself. It’s $850 for boats between 50 and 80 feet. No matter what length the boat, there is an $850 buffer fee — in the unlikely event your boat causes a delay or damage — that has to be paid in cash or via a Visa card cash advance. Make prior arrangements with your bank for the approval of the entire amount, as most credit and debit cards have a limit. Our limit was $750, but with a quick phone call it was automatically raised to $1000. It’s not recommended that you pay the buffer fee in cash, as the refund is made by check, and is said to take months.

If you don’t have the required four 120-foot lines, you can easily rent them from the taxi drivers at the Balboa YC for a total of $60. You’ll also want a bunch of wrapped tires to use as fenders. You can also buy these from the taxi drivers, but boats coming the other way through the Canal might give them to you to avoid having to pay a disposal fee. Similarly, when you finish your transit in Cristobal, why not just pass them on to a boat heading the other way through the Canal?

The four line-handlers that are required on each boat don’t have to be particularly strong, but at the key moments they do need to be alert and know which way a line goes around a winch. Such line-handlers are easy to come by because there are always plenty of other skippers who, like yourself, are willing to crew for free in order to have experience before taking their own boats through. If, for some reason, you can’t find anybody, or if you’d feel safer hiring ‘professional’ line-handlers, the going rate is $50 to $60 per handler. You’ll also need to provide meals for all your crew and your Advisor, who will be aboard giving you directions for the duration of your transit. If you can do the transit in one day, you’d normally only have to provide breakfast, lunch, and an afternoon snack. But it’s possible that you’ll have to spend the night in Lake Gatun, which means you’ll have to provide a different combination of meals.

The most important thing we’re trying...
IN LATITUDES

using agent Enrique Plummer, who has historically charged just 40% of what the other agents charge, and who enjoys an excellent reputation among the cruising community.

For details on McBride’s report, see this month’s Cruise Notes.

Viva — Grand Soleil 39  
Steve & Pam Jost  
Summer In The Northern Leewards (Hermosa Beach)

We’re still sailing the same boat we bought in Italy some 20 years ago — although we haven’t been cruising her the whole time. We started our most recent adventure with the Ha-Ha in ’99, intending to spend a couple of years cruising south and east. Well, it’s been six years now and we’re still enjoying sailing around the Caribbean. Here’s a sampling of the kind of fun we had in May and June of this year.

After an exciting month of various kinds of racing in Antigua, and Steve lucking out and getting to crew on the J Class 130-footer Velsheda, we continued 100 miles north to St. Martin where we met our friends John and Jo Featherstones. As planned, we had them aboard for a week of cruising around St. Martin, and the next week we shared their timeshare located at the entrance to Simpson Bay. With Viva anchored in plain view right out in front of the timeshare, it was kind of a treat to get off the boat for a week.

John also rented a car so we could do a little land cruising. St. Martin is just 7 miles by 7 miles, so it was easy to circumnavigate by car in one day. One of our favorite stops was the little village of Grand Case — it rhymes with ‘loss’ — on the French side of the island that is half Dutch. Grand Case is on a large bay with a lot of trendy shops, and there are probably more good restaurants in the four-block area than anywhere else in the Caribbean. In addition, there are several great open-air BBQ chicken and rib joints. For $8 U.S., you could have a great plate of ribs and a terrific sunset. A ‘decent’ bottle of wine was another $10. To encourage business from Americans, who are the primary tourists, many of the shops were offering a 1:1 exchange rate between the dollar and euro, a discount of nearly 20% on the official rate. On Thursday nights during the season — which runs from December to April — they have bands from all the different islands performing on the main thoroughfare. Unfortunately, the last of these ended the week before we arrived.

We next sailed 20 miles back in the direction of Antigua to St. Barts, which has always been a fun little stop for us, what with all the chic restaurants and trendy shops. During the New Year’s holidays, you’ll see up to 100 megayachts in and around the tiny port of Gustavia, which makes it the favored spot in the islands for the wealthy ‘in crowd’. Unfortunately, with the unfavorable exchange rate last
Once more to Anguilla, a long, low island about six miles north of St. Martin. Although we've been in the Caribbean for many years, this was our first visit — and we just happened to arrive on the weekend of the Anguilla Regatta in Road Bay. There are some beautiful coves, anchorages, and small islands at Anguilla, but the government discourages cruising yachts through a cruising fee schedule that is exorbitant in comparison with those of other islands. Although there is no entry charge to Road Bay for boats less than 20 tons, we had to pay $38/day — in advance — to anchor anywhere else. And it's even more expensive than it sounds, because the one-day permits expire at midnight, so you are forced to get a two-day permit for just one night. In addition, there is a $15/day fee for moorings, which boats are required to use. Needless to say, Anguilla's anchorages are pretty quiet and uncrowded. We suppose it's one way to keep the riff-raff out!

Upon arrival in Road Bay, we bumped into Randy West of St. Barts, the skipper of the 64-ft wooden ketch *Lone Fox*. West had been one of our primary witnesses during our protest episode in Antigua, and had entered the boat in the Anguilla Regatta on behalf of owner Chris von Trampe. John and I were invited to race the next day aboard this classic yacht, which had been built in 1957 for Colonel Whitbread of the brewery fame, which was the original sponsor of the Whitbread Around the World Race. It was a nice and easy windward/leeward sail with Randy at the helm and a mixed crew of laid-back locals from St. Barts and Anguilla. *Lone Fox* was the first boat to finish, but corrected out third.

During the 'mix up' regatta, Anguillan and other West Indies sailors are invited to race aboard the modern boats, and in the afternoon, we gringos are encouraged to catch a ride on one of the traditional island sloops. I was invited to race aboard *Miss Anguilla*, one of the 30-ft open wooden boats native to Anguilla and St. Martin. They were originally used for transporting sugar cane and workers from one end of the island to the other. With huge mainsails and just a small winch to trim the jib, sailing the very heavy 30-footers is quite a workout. The rules are pretty loose. After the horn signal, there's a jackrabbit start off the beach followed by a 10-mile windward-leeward course. Nobody pays much attention to right-of-way rules. Whoever is ahead when two boats meet gets to pass.

The only mandatory rule is that every boat must finish with the same number of crew they started with. In years past, some of the crew members were dumped at the weather mark in order to lighten the boat for the downwind run, and had to swim to shore. The removable ballast is now in the form of large sandbags and rocks, which are more safely discarded. The local West Indians were a delight to sail with, as they were quite knowledgeable, very polite, laid-back — and best of all, there wasn't any screaming. Once again, I was the only white in a sea of black faces. After racing on Velsheda and then the Anguillan 30-footer, I had my racing fix for several months.

After the Featherstones left, Pam and I decided to complete our circumnavigation of St. Martin with another night anchored at Grand Case, and then some stops at some of the out-of-the-way anchorages on the north and east shores. It really is amazing how many neat anchorages there are on the backside of all these islands, but due to the numerous reefs, shoals, and other hazards, the cruising guides — aimed at an audience of primarily bareboat charters — steer you to all the ultra-safe spots. But if you want to get away from the hordes, just find the anchorages surrounded by reefs — which

---

Slow-cooked ribs are a Caribbean specialty. Some of the best can be found in the Grand Anse area on the French side of St. Martin.
IN LATITUDES

are red-lined in all the cruising guides — that require a lot of eyeball navigation, and you’ll have them all to yourself.

After another two-day stop at St. Barts to replenish our paté, brie, and croissants, we headed over to Barbuda, a remote, low-lying island about 60 miles to the southeast. Barbuda is only visible from four to five miles away and, unfortunately, there are some six-foot shoals that far off, too. There are only a few recommended anchorages, and over 200 shipwrecks can attest to the danger of the reef-strewn waters. The approach to Barbuda must be made with the sun behind your shoulders or over your head. Barbuda is also famous for its 11-mile beach, which is probably the longest unbroken beach in the Caribbean. Pam, of course, was in 7th Heaven, but it left me looking for some shade trees. I do have to admit that it was nice to have this unspoiled, uninhabited anchorage to ourselves.

Barbuda is actually part of the country of Antigua & Barbuda, and our next stop was Antigua, a much bigger and more cosmopolitan island whose southeast coast is one of the major yachting centers in the Caribbean. We started our visit by exploring the northwest anchorages of Jolly Harbor, Five Islands, Deep Bay, Dickinson Bay, and the capital of St. Johns for a few provisions and sightseeing. When you visit St. Johns, you want to make sure the cruise ships aren’t in! All of the places just mentioned are quiet in the summer, and except for St. John, are home to several aging resorts that cater to budget-minded Brits visiting a former colony.

As we continued around the north end of the island, we found it was hidden by a series of nasty reefs, so there was hardly a cruising boat — and no charterboats — in sight. This is easy to understand if you read the fine red print on the charts for this area. The surveys were made in the 19th century using “celestial methods” and “lead lines”. The small print warns that they may be off by only 500 to 1,000 yards — which is enough to leave you high on a reef if you don’t pay attention.

For a change of pace, one night we anchored off a very exclusive beach resort, one of those swanky ‘nearly dead or newlywed’ places. By law, they can’t keep visitors off the beach — but don’t you dare stray above the high-water line. With a few hours or day’s notice during the low season, it might be possible to dine at one of these places — after submitting your family tree, blood samples and photos of your evening attire (long dresses, sports coat and slacks only, please)! Without checking the wine list or menu, we decided to pass, thereby ensuring another week of affordable cruising.

The next day we took Viva through a virtual minefield of shoals, reefs, and coral heads to a pretty little anchorage at Bird Island. This is a wild, uninhabited area full of sea birds that also has a couple of delightful anchorages. One or more of the daysail catamarans may spend a couple of hours here with a crowd, plus a few of the small excursion boats from the fancy resorts. For a “nominal” fee, they bring the guests out for a Robinson Crusoe experience, which includes an afternoon BBQ beach picnic, a short hike, and a chance to rub shoulders with some of those nefarious yachties. Since Antigua is becoming somewhat environmentally sensitive, and Bird Island is now part of a marina park, visitors are asked to refrain from loud noises, music, and partying that might disturb the nesting birds. With most of the guests from the resorts, there was no danger of that!

It was now time to head down island to Trinidad and put the boat on the hard to avoid the hurricanes. Having had a relatively maintenance and repair-free season, on our last day in Antigua, our 20-year old windlass decided to break its last. So from there to Trinidad we had to up anchor by hand. But all in all it was a great season.

Antigua’s Bird Island is a wild and uninhabited area full of seabirds. Visitors are asked to refrain from making loud noises.
So many great destinations . . . so little time!

— steve 09/10/05

Update: The Josts report they missed getting hit by hurricane Emily by just one day as they crossed from Grenada to Trinidad. They are about to return to Viva for the usual annual maintenance and some new equipment installations. After that, they plan to spend the season cruising in Colombia, the San Blas Islands, Belize, Honduras, and the rest of the Western Caribbean. Next year they plan to return to the Med with Viva, either under sail or by boat transport. Having never sailed in the Eastern Med, they are looking forward to Croatia, Greece, Turkey, and the Black Sea. So many destinations.

Marylee — Nor'Sea 27
Dan Fitzpatrick, Samantha Nester
Cruising On As Little As $100/Mo.
(Muir Beach)

The author of a letter in a recent Latitude inquired how much it really cost to cruise in Mexico. It’s impossible to answer without first asking yourself some important questions: 1) Who am I now, and who will I become when I cruise? 2) How expensive is my boat? 3) What ‘luxuries’ do I really need? 4) How can I cleverly save money in Mexico?

As the smallest entry in the 2003 Baja Ha-Ha, our Marylee was dwarfed by a magnificent fleet of long-range cruisers. Although our Nor'Sea is compact, she’s also an extraordinary example of what a pocket-cruiser should be. Nimble, balanced, and seaworthy, she carried my wife Samantha and me across all the treacherous seas we encountered to places that were beyond our wildest dreams.

What we discovered in our new life floating on the blue waters of the Sea of Cortez, is that money and material things quickly become relatively unimportant when compared to the simple life in magnificent natural surroundings. Nearly alone and away from the unnatural creations of man, we embraced more of a hunter-gatherer lifestyle. In so doing, our answer to the question of how much it costs to cruise in Mexico became “as little as $100/month”.

(In order not to mislead, it needs to be understood that we only cruised on $100 a month for the three months we sailed the bountiful Sea of Cortez. When cruising the Mexican Riviera, we spent about $1,500/month. Our total for nine months of cruising was $9,500, or an average of just over $1,000/month.)

We might not have been the most typical of cruisers, as Samantha, who was taking a leave of absence from her job as a 5th-grade teacher, was only 26. And I, having recently sold my software firm to a large conglomerate, had chosen to rip off my tie and set it ablaze. At age 36, I had walked away from a business career to take my chances on the open ocean aboard a 27-ft sloop. If nothing else, I figured I’d have to deal with fewer sharks.

Although we’d planned our cruising adventure for years, I will admit that the reality of sailing away made me tremble as the departure date grew near. In retrospect, I’ll never know how Samantha and I mustered the courage to take off. We’re just glad we did. Now, for those important questions:

1) Who am I now, and who will I become when cruising? We found that adjusting to the cruiser lifestyle in Mexico is like becoming reacquainted with the summer vacations of our youth. The warm, casual days afforded us an abundance of quality time with our souls. The stresses of my American lifestyle, which I’d unwittingly carried for so many years, suddenly melted away. In fact, they ran down my leg, exited my big toe, and fell overboard with a considerable splash! For the first time in years, I felt well-rested, balanced, and young.

Once we got cruising, material things took a backseat to time — time spent with family, time napping in a hammock, time sharing a cold cerveza on a beach with the person we love the most. In this much more relaxed part of the world, we found that we needed little more than food, fuel, ice, propane, and an occasional bus or taxi ride into town. By the way, grocery stores in Mexico are well-stocked with an interesting blend of Mexican and American goods, most of them at a fraction of the stateside price. We were surprised to find that we could easily provision Marylee for several months at sea for under $200.

In addition to the low cost of living, we noticed nearly every ounce of materialism seeping out of our pores as the world slowed down around us. If you’re like us, your standards will change, your needs will diminish, and acquiring new possessions will usually be seen as more of a chore than a pleasure. First-time cruisers shouldn’t underestimate how real, frugal, and patient they will probably become. That’s even true of kids. Jamie, the four-year-old aboard Esprit had been away from commercials so long he had no idea what to ask Santa to bring him for Christmas. The previous year he’d had a list of 25 toys he wanted. After going cruising, it was down to a boogie board,
leaving for Mexico. For in paradise, you'll have better things to do than waste your precious time working down below in 100° heat.

The arduous task of refitting Marylee took an entire year, as I gutted her mechanically and electrically, and carefully rebuilt her from basically a hull. But upon completion, she was a dazzlingly updated solid cruiser. Because I'd done most of the work re-engineering, upgrading, and simplifying every system, I had a keen understanding of every part of my boat. By the time we left with the Ha-Ha, I had the proper tools and skills to be self-sufficient south of the border.

What did all the painstaking preparation give us? Flawless performance without any major breakdowns, that's what. Other than normal maintenance, Marylee was totally carefree. We pitied the cruisers who had complicated boats with chronic mechanical problems, but didn't have the knowledge or skills to operate and maintain them. For it meant they had to shell out lots of money for parts and labor and were often unable to join us for hikes, dancing, diving, and even drinking.

A smaller boat also costs less in marinas. We only paid $12/night for Marylee at Paradise Village, a beautiful resort complete with a yacht club, pools, hot-tubs, a spa, and even a zoo.

3) What luxuries will I need? Luxury items in Mexico can range from spa days, to side excursions, to trips back to the States for Christmas. Although many things are inexpensive in Mexico, some are dear. For example, airplane tickets, rental cars, bars and restaurants in tourist areas, and chandleries can suck your cruising kitty dry in a jiffy.

Although people have different tastes,
here’s our list of recommended ‘luxury’ items that even those on a tight budget could afford.

**Bocce balls.** We played beach-bocce almost every night and found it was a great way to meet new people. **Sirius or XM Radio.** It’s commercial free, and has hundreds of news, music, comedy, and sports channels. The original investment is about $120, then $12/month. A **Satellite telephone** allows you to make calls home from anywhere for as little as $1.39/minute — although there is a significant initial investment. A **laptop with WiFi and DVD drive** allows you to watch movies, play games, and, in most marinas, connect wirelessly to the internet. An **iPod** with audio-in allowed us to listen to our iPod, **DVD players**, **laptop**, **satellite radio**, **Radar**, **SSB**, and **VHF in surround sound.** **GPS chartplotter** has great features such as an anchor drag alarm, true speed, and celestial and tide information. **Radar** is an absolute must that saved our asses more than once. Our $150 **SSB receiver** only allowed us to hear weather forecasts and listen to the cruiser nets. A **killer stereo** with audio-in allowed us to listen to our iPod, DVD players, laptop, satellite radio, SSB, and VHF in surround sound. The **biggest rectangular BBQ** you can afford.

Don’t skimp by getting a cheap round one or your dinner will consistently roll off the grill and into the sea! A speargun allows you to hunt, dive, and fish at the same time. Spearguns are more reliable than line fishing and permit you to be more selective. **Pool rafts.** We spent countless hot afternoons floating behind our boat sipping cold **cervezas** and enjoying the breathtaking landscapes. **Video recorder.** It will all seem like a dream someday, so document it! A **handheld radio** allows you to stay in touch with your boat and the feet while on the beach and in town. A **tremendous selection of wine.** Inexpensive good wine is sometimes difficult to find in Mexico, so stock your liquor cabinet before you head south. We became friends with the folks on the catamaran **Melody,** whose captain told us they left San Diego with 48 cases of wine!

4) **Clever Ways To Save Money While Cruising Mexico.** Since being frugal is part of the cruising lifestyle, even the wealthiest yachtsmen enjoy playing this game. Here are some tips: 

- **Shop wisely for spares.** If you buy your expensive spares from a large marine retailer with a liberal return policy, keep them in the original box, and take back anything that doesn’t break after you’re done cruising, you’ll only have bought them if you needed them. **Attend timeshare presentations.** Destinations such as Puerto Vallarta have timeshare kiosks set up around all the resorts. Most of them will serve you a wonderful breakfast and either pay you $300 in cash or send you on an expensive excursion — just for attending a half-day presentation. When in Paradise Village, **join the Vallarta YC.** The discounts on food, internet access, telephone calls, and drinks are well worth the associate membership dues. It’s a home away from home, and a great place to catch up on business matters midway through your cruise. **Eat where the locals eat.** We always followed the crowd to the best $1 taco stands in town. **Take the ‘chicken bus’.** Leave the fancy air-conditioned buses to the powerboaters. The ratty old chicken buses are more entertaining and cost less than half as much. **Buddyboat with an avid fisherman.** They always have extra fish they want to share. **Bring along a bunch of inexpensive DVDs and books.** You’ll be able to trade them with media-starved cruisers for new releases at swap meets. You’ll never have to buy anything new. **Give yourself a haircut.** The beach is the perfect place to trim those curly locks — especially if you’re watching your boat sway in a picture-perfect tropical lagoon. And don’t worry, nobody will even notice if your ‘stylist’ makes a mistake. **Insure wisely.** Much to our surprise, we discovered that Marylee was covered under our homeowner’s policy because she’s under 35 feet and her motor is less than 55 hp. And she’s insured for anywhere in the world! **Clean your own bottom.** Why pay a diver to do it in a marina when you can do it yourself in a nice clear anchorage.

- **Reduce laundry bills and wear & tear on your clothing by sporting your birthday suit whenever possible.** Just make sure to bring along a **dental health.** You can almost eliminate dental bills by religiously caring for your teeth. In fact, take dental instruments with you and take turns cleaning each other’s teeth! **Hitchhike.** If a car is going your way in Mexico and there’s an empty seat, the driver will almost always stop and give you a ride. We met many wonderful people hitchhiking, and although we always offered, they would never accept a single peso for gas money. **Don’t be flashy.** Mexican retailers opportunistically mark prices up when flashy tourists go shopping. So dress to unimpress. **Go naked.** Reduce laundry bills and wear & tear on your clothing by sporting your birthday suit whenever possible. Just make sure to slap some sunscreen on the family jewels. **Give gifts to the locals.** Simple gestures of kindness make you feel good — and are often repaid tenfold. Once we gave a teenage...
IN LATITUDES

boy who worked in a palapa restaurant in Mantanchen Bay several pens, flashlights, and pocket knives — the leftover corporate-logo swag that I used to give my unappreciative customers. His family, who happened to own the palapa, was so impressed that they presented us with a very nice bottle of tequila before we weighed anchor.

Parting Thoughts. Samantha and I cruised economically because we wanted to, not because we had to. It was fun to stretch our money and live off the land and sea. And it's easy to do in Mexico.

From July to October we decided to take a break from cruising. So we put Marylee on the hard in San Carlos and took a plane to Europe with our tandem bicycle. We ended up riding 3,200 miles around Belgium, Holland, Luxembourg, Germany, Austria, the Slovak Republic, Italy, Switzerland, and France — before finishing our journey at Oktoberfest in Munich in late September. Although we tried to save money in Europe, it was much more costly, even though we camped most nights, didn't purchase any fuel, and didn't have slip fees. The three months on a bike in Europe cost more than nine months aboard our wonderful little boat in paradise.

— dan 09/15/05

Readers — Those are some great tips — although we're not sure how many cruising couples are ready for the ultra-intimacy of cleaning each other's teeth.

While it would be difficult to cut a couple's day-to-day expenses to less than Dan and Samantha's during their time in the Sea of Cortez, it would have been easy to have spent less on gear. Lots of small boat cruisers there have gotten along fine without a radar, depthsounder, SSB receiver, chartplotter, laptop, Satphone, or video recorder. They're nice, but not necessary.

Learjet — N/M 55
Glenn Andert & Jody O’Callaghan
Getting Ready For A Passage (Cupertino)

With Jody's oldest son arriving in Fakarava in the Tuamotus in four days, we had to depart Nuka Hiva in the Marquesas for the three-day passage. It would be a 550-mile trip, which is long enough in a car on a freeway, but we'd only be averaging seven knots.

What did we do in the two days before we took off? While still at Baie Taiohie, Nuku Hiva, the capital of the Marquesas, we tore down the dinghy and stowed it. Until we left, we'd get around with the kayak. We pulled the sails and other gear out of the forward locker and let it air out on the foredeck. A couple of cups of water had gotten into the locker, and everything was damp from the humidity. It took the two of us an hour to get everything out and laid out, and another hour to put it all away.

We then went ashore and checked out with the gendarme, shopped at the market, and got the propane bottle refilled. For those following in our path, this is the only place before Papeete to refill U.S. propane bottles. We also transferred the diesel from our six 6-gallon jerry jugs into the main tanks, bringing us to full capacity on diesel. We then took the six jerry jugs to shore to refill them with diesel. By the time it was all said and done, that alone had taken about four hours. We probably didn't need to refill the diesel jugs or fill another bottle of propane, but it's better to be safe than sorry.

Given the high prices of everything else here in French Polynesia, I was surprised at the prices of propane and diesel. It only cost $2.50 U.S. to fill the propane

Even when headed to a great destination like the Tuamotus, it's hard to leave the colorful and haunting Marquesas behind.

Antigua’s English (foreground) and Falmouth Harbors (background) combined to be one of the world’s great naval centers in the days of sail, and now are one of the world’s great yachting centers. They are home to Antigua Sailing Week, Antigua Classic Regatta, and the Antigua Charterboat Show.
tank — about one-third of what it would have cost in the States. The diesel was $1/liter. Since there are 3.78 liters in a gallon, that’s the equivalent of slightly under $4/gallon. I expected that it would be twice that much.

While paddling the kayak, we saw a shark on the surface that looked to be 10 feet long. But we think it was a mild-mannered nurse shark. Later in the day we saw a green turtle surface near the boat.

The next morning we were at Baie Anaho, Nuku Hiva, in our second day of preparing for the voyage. Unable to sleep, Jody got up at the ungodly hour of 5:30 a.m. We paddled the kayak the half-mile from our boat to the dinghy dock. Our first job was to get some fresh tuna. We hadn’t had much luck fishing recently, so we had to break down and buy some!

The fishermen leave at 3 a.m. and return loaded with fish about 6 a.m. — and we were there to meet them. The guy we bought from had about six big tuna and three gigantic barracuda. He informed us — in French — that the barracuda weren’t good for eating because they have ciguatera. This is a toxin that grows in some corals and is eaten by progressively larger fish — right up to the big barracuda. The toxin doesn’t bother the fish, but it has some very nasty — even paralyzing — effects on humans! I already knew that we didn’t want the barracuda, but it was nice that he warned us.

After waiting our turn behind some locals, we selected a nice fat tuna and three filet half the fish for us. In the process, we learned a niftier way to filet tuna! You remove the skin before removing the filet from the fish! We put our fish in Ziploc bags, then put the bags in the bottom of the kayak to keep them cool.

Next we headed off to the market for some veggies. The vegetable lady arrives at 7:30 a.m., and by 8:30 a.m. everything is gone — so you don’t want to be late. We were a bit early, so we wandered around the mansion of some official — probably the governor of the Marquesas or something like that. And then we wandered about the impressive church, which was built in 1975. While on the church grounds, we took an uru — a soccer ball-sized sort of sweet potato that grows on trees. Then we got back to the vegetable lady just in time. After Jody shopped and Glenn visited the bank — which also opens at 7:30 — we headed back to the kayak with a big bag of goodies. During the walk we ate some quiche we’d bought from a roadside food van.

When we got back to the dock, we hoped to pick up our laundry. It costs $10 a load, but what a luxury it is to have someone else do that! They say the clothes are dry when you get them back, but you still have to hang them out because they aren’t really dry. Well, the laundry wasn’t ready. It didn’t make that much difference, because we couldn’t have fit it all in the kayak anyway. I left Jody on the boat to rest and work on food preparation, and paddled back to the dock for the laundry.

Jody spent much of the day taking food out, preparing food, cooking food, and then cleaning up. Since it would be just the two of us on a nonstop 72-to-84 hour passage, we wanted to have all the food prepared so when we were off watch, we wouldn’t have anything to but eat, rest, and sleep. Anything beyond that is too much.

While Jody cooked, I managed to break down the kayak and stow it. Somewhere in there we also managed to sail halfway around Nuku Hiva. We’d wanted to spend more time in Anaho Bay, but we ran out of time. At least we saw it.

When we stopped at Anaho Bay, we had other things to do to prepare for the passage. Jody did some more cooking while I ran the engine to top off the batteries and ran the watermaker to top off the tanks. I also jumped in the water and cleaned 120 feet of waterline. While in the process of cleaning the bottom, I noticed that there was a sizeable gash — half the size of an average baby finger — in the leading edge of the rudder. So I got out the Splash Zone, which is an amazing two-part epoxy that you can mix and apply underwater! It also has a pot life of 30 minutes, which really helps. I covered the hole in the rudder, and it should be cured by the time we leave in the morning. It better work, because the stuff cost me $150 a gallon!

By then it was time for one of Jody’s fabulous meals. We had a glass of beer, fresh tuna, a green salad with tomatoes, fresh homemade pumpkin soup, and sweet chocolate for dessert. What a feast! We were ready to leave in the morning.

Readers — Although this report is a little dated, we thought it was worth running because it gives a realistic idea of how much time and effort are required to get a boat — even one that’s already cruising — ready for even a moderately long passage.

Cruise Notes:
Guys, if you’re planning on cruising in the Sea of Cortez, and your significant other is a little wary of what might be in the water with her when she goes swimming, you’ll want to tear the following item out of the magazine before she gets a chance to read it. You see, it’s about the Humboldt Squid — better known in Mexico as the Rojo Diablo or Red Devil.
A couple of divers observe one of the tens of millions of Rojo Diablo in the Sea of Cortez. What do they need three hearts for?

Described as a “fercely cannibalistic opportunist predator”, Rojo Diablo are extremely fast and strong, travel in huge schools, and employ cooperative hunting techniques. Although they only live about two years, they grow to as much as eight feet in length and weigh up to 100 pounds. The Rojo Diablo have a large brain, stereoscopic eyes, three hearts, blue blood, and eight arms with suction cups rimmed with a bony ring of teeth. They seize their prey with two hook-laden tentacle clubs, embrace the victim into a nest of eight arms, and tear chunks from the body with a large and powerful razor-sharp beak. Even their tongues have curved teeth! You see why we didn’t want the significant other to read this? Many biologists consider the Rojo Diablos to be the most cunning and ferocious of creatures. But often times you don’t even know they are there, because they can change color back and forth from deep maroon to opalescent white several times a second.

We’d like to tell you that the Rojo Diablo are rare, but they are plentiful. It’s estimated that there are 10 million of them in just one 25-square-mile area off the coast of Santa Rosalia, Baja, in the summer. During the winter they migrate toward Guaymas. They also appear in other places in the Sea, but not in such great numbers. Fishermen pull some 100,000 tons of Rojo Diablo out a year. But just to be sure, he checked with the port captain in Cabo San Lucas, as well as with both the state (Baja) and federal (international) health department officials. Everyone says “no way!” Not in Cabo, and not in any other port in Mexico.

The Mexico Boating Guide, 2nd Edition, is going to be late,” laments Patricia Rains, who co-authored the book with her husband Capt. John Rains. “We’re still putting the finishing touches on our 300 new color charts — which are satellite-image corrected, not just GPS-corrected, so the guide won’t be printed before Thanksgiving. When we get them, we’ll make sure that they get distributed as soon as possible.”

Patricia also had the latest on two topics of interest for those cruising to Mexico this season: “Contrary to rumor, Cabo San Lucas is not requiring a health certificate from yatistas who clear in there. To be sure, we phoned Victor Barreda, the ship’s agent in Cabo. In his 40 years working there, he’d never heard of such a thing. But just to be sure, he checked with the port captain in Cabo San Lucas, as well as with both the state (Baja) and federal (international) health department officials. Everyone says ‘no way!’ Not in Cabo, and not in any other port in Mexico.” (However, Dave Wallace of the Redwood City-based Amel Maramu Air Ops remembers that in ‘02, the Cabo San Lucas port captain claimed that a law required that the crews of all boats clearing for the United States get health certificates. The solution was to just clear to Ensenada, which is just another port inside Mexico, and therefore didn’t require the certificates. “There hasn’t been a mention of it since.”)

The second topic the Rains mentioned was with regard to provisioning. “Victor asked us to remind all yatistas — and especially the Baja Ha-Ha and the Class of ’05 — that fresh (uncooked) U.S. beef, chicken, and eggs are still banned everywhere in Mexico, and will be confiscated and incinerated. This is because of Mad Cow disease, and the Avian (bird) Influenza H5N1 and H5N2 flu. They have the right to inspect your boat and your freezer. If you clear into Mexico with fresh beef — and maybe even chicken and eggs — it will be confiscated and incinerated.

Not quite in time! "The Mexico Boating Guide, 2nd
The bird virus is a serious problem for Mexico, because their entire poultry industry was wiped out 20 years ago. Ever since, they've been inoculating against NSH2, but the newest outbreak is N5H1, which the birds aren't protected against. If even one scrap of uncooked chicken or egg gets into the garbage dumps or goes overboard, it could be picked up by seagulls and pelicans, who might transport it inland via their droppings. That's how the last epidemic got going, so they are very edgy about it.

This just in! As of the middle of October, chicken and eggs have been pulled off the prohibited list. But we're going to warn you, this news may not reach officials in Cabo and other ports before you do.

Miracle passage? Sailing east from Panama's San Blas Islands or Cartagena, Colombia, toward the 'ABC Islands' and the Lesser Antilles has historically been one of the toughest passages in cruising. Thus the following report is quite a surprise:

"We arrived in Curacao on October 10 from Cartagena," write Randy and Laune Kenoffel of the San Francisco-based Beneteau 500 Pizazz. "It took us six days — including our stops — going 'the wrong way'. Our trip was actually very easy, as the wind was from behind us — yes, we had westerly winds. We stopped at four places — Punta Hermosa, Rodadero, Five Bays, Bahia Portete — and bypassed Cabo de la Vela and Monjes del Sur because they were untenable due to the unusual wind direction. Some of the people in our group — there were six other boats — stopped at Bahia Cinto and Monjes del Sur. This was our fourth trip along the coast of Colombia, and we had no problems with pirates, drug runners, or anything else. We wished we could have stayed in some places longer, but with the favorable light weather conditions, we felt we had to keep going. But in fact, we could have stayed longer, as we've been here a week now and the winds have still been light and out of the southwest."

The Kenoffels have written a Colombia Coastal Cruising Guide, which you can get by emailing them at sy_pizazz@yahoo.com. They will be updating the guide in the next month or so. They've also started the Colombia Coast Cruisers Net — a great idea — to help folks sailing east or west along that usually very rough stretch of the Caribbean. We'll have more on their recent passage with the six other boats in

Planning to travel to some far-flung destination?

If you’re planning to fly out to meet friends in Mexico, the Caribbean or the South Pacific, why not stop by the Latitude 38 office before you leave and pick up a bundle of magazines to share with cruisers?

We promise you’ll be a hero — and you’ll probably earn a few beers for your efforts.

The Latitude 38 office is open 9-5 weekdays and is located at 15 Locust Ave., Mill Valley, CA 94941 Call 415-383-8200 for directions.

Just like Latitude 38 magazine but... online, three times a week, and totally different!

For a free subscription to 'Lectronic Latitude, send an email to LectronicLatitude-on@latitude38.com with 'subscribe' in the subject line. We'll then notify you by email each time 'Lectronic Latitude' is updated!

See 'Lectronic Latitude at www.latitude38.com
IN LATITUDES

the next issue of *Latitude*.

"Panama has now passed a law requiring that all vessels hire a local agent to represent them," reports Tina McBride, a longtime ship's agent in Panama. "Gone will be the days of paying a taxi-driver $50 to handle your paperwork. I think those taxi-drivers can be a lot of fun, but if you happen to fall into the wrong hands, you could find yourself being robbed or worse — especially in Colon."

If true, this news really steams us for four reasons. First, we and many other cruisers — see the first article in this month’s *Changes* — have had no trouble doing all the Panama and Canal paperwork ourselves and/or with the help of the taxi-drivers. Second, we think that some of the agents — including McBride — charge outrageous sums for what many cruisers know from firsthand experience is very little work. Third, we don’t see how McBride is going to be of any help if we hired her and “fell into the wrong hands in Colon” — not unless she’s got a Superwoman outfit in her closet we don’t know about. And fourth, she maligns the taxi-drivers, but sources tell us that she often hires them to do her work!

"The paperwork is not the only thing that we agents do," McBride continues in an attempt to justify her fee. "We coordinate the client’s complete entry into and exit from Panama, their Canal transit, provisioning, repairs, Immigration, permits, clearances, and look out for their welfare while in the country. And if the vessel has a problem while transiting, the agent is responsible for getting their client out of this difficult situation."

All those services are wonderful for mariners who might want or need them, but what about adults such as ourselves, who actually prefer to do our own paperwork, provisioning, repairs, immigration, permits, and clearances? Why should we be forced to pay a staggering fee for something we can have fun doing in a couple of hours? McBride did a fine job with *Big O’s* paperwork when Capt. Jim Drake took her through the Canal in ’94. In that instance...
we wanted her help. But we'd done the Panama and Canal paperwork ourselves the year before without a problem, and we used a taxi-driver to help us do it again in '04, and once again didn't have a problem. We don't need an agent's services!

If we were a cruiser planning to transit the Canal anytime soon, we'd start firing off angry letters to the Canal Commission, and band together with other cruisers on the various nets to plan ways to raise hell. The Canal has a history of making moves that aren't in the best interests of cruisers, and then backing away from them when pressured. This happened just last month, for example, when they tried to eliminate most of the good anchoring sites in the Panama City vicinity. In addition, cruisers should raise a stink in the newspapers, pointing out that $500 for a couple of hours of work is obscene in a country where the annual per capita income is only $3,000. Money spent on agent fees is money that otherwise would have been spent in restaurants, stores, and markets, where many, not just a few, would benefit.

Finally, we'd encourage everyone to boycott agents who charge $500 for the basic paperwork and/or support the mandatory use of agents. When an agent charges cruisers as much for paperwork as for the Canal transit itself, it just plain stinks! You might be interested in knowing that the last time we came through the Canal, Enrique Plummer, who McBride also maligns, was charging 60% less than she was for the same service — and had earned a glowing reputation in the cruising community.

The really big deal this year in Mexico will be to see how well the new clearing procedures work out. Once a boat is cleared into the country, the skipper no longer needs to go to Immigration again until just before the boat leaves the country. In addition, when going from port to port within Mexico, the port captain only need be "notified". In some places this may be done over the radio or via a marina office, but in other places the skipper may still have to make a visit to the port captain's office. However, you cannot be charged to clear into a domestic port, and you cannot be required to use a ship's agent. If you have any problems, notify us immediately, and we'll see that Teri Grossman takes it up with the direc-

is not to say the trip has all been easy for the vet of the '82 Singlehanded TransPac. When van Ommen left Gig Harbor in February, he did so with a boat on a trailer, trucking her down to Nelson's Boatyard in Alameda for launching. Given the time of year, we think that was smart. But on his first sailing leg to Santa Barbara, he ran into a very strong southerly. After the failure of his Navik vane led to a series of other difficulties, he ultimately had to call the Coast Guard for a downwind tow north to Monterey. After replacing his old vane with a Monitor, he took off again — only to be caught in 25 to 40-ft winds. But at least they were from aft and the more rugged Monitor was up to handling them. What's more, he got to observe a multi-rocket launch from Vandenberg Air Force Base. Van Ommen took off for the Marquesas from Santa Barbara, reaching the 3,000-mile distant landfall 30 days later. He's been doing the typical South Pacific Milk Run since then, but reports he's now splitting with the rest of the pack. They're headed to New Zealand while he's on his way to Viet Nam via Vanuatu.

"It will be a return to Viet Nam for me," he says, "as I first arrived there in November of 1961 with a company strength U.S. military unit. I stayed until March of '63. For one of those years I was joined in Saigon by Joan van Ommen for what turned out to be a rich and unforgettable period of our lives."
"All paws on deck!" Barney is a vet of Bay and ocean racing, as well as cruising the coast of California. What about your dog?

Tom Fischbeck of Maxwell Marine reports that one of his customers lost a 160-lb CQR anchor attached to 600 feet of 7/16" (12mm) chain at Punta San Carlos, on the Pacific Coast of northern Baja. "The coordinates are 29°37'02N, 115°29'09W. These should get treasure hunters within a fraction of a mile of the booty."

We don’t know if it’s still there, but in September a large motoryacht lost a big anchor and a lot of chain between Big Fisherman and the east mooring field at Two Harbors, Catalina. Has anyone recovered the anchor and rode?

Kim Coleman of the Marina Square, Alameda-based Spencer 53 Cheers reports that their 15.5-year-old dog Barney has spent his entire life as a boat dog. According to Coleman, when young, Barney daysailed and raced the Bay and offshore, and cruised the California coast — the latter being why she appears in this section. "We recently caught her just getting up from her favorite spot under the nav table and about to head up to the cockpit, wearing her favorite jammies and all. It was a Kodak moment, so we snapped this shot in the hope Latitude readers might get a chuckle from a real sea-dog doing her thing."

Make a resolution for higher res! A few months ago we got a photo from Jeff and Dede Allen of the Brisbane-based Irwin 54 ketch Lazy Bones that showed them and their crew in French Polynesia holding up copies of recent Latitudes. They said they really hoped that we'd run the photo. We would have loved to, but the resolution was too low — meaning that if we ran it any larger than two inches by two inches, it would have been all jaggies. Here's our one paragraph guide to digital cameras:

These days the market is flooded with excellent digital cameras at reasonable prices. Unless you plan on being the Ansel Adams of cruising photos, you don’t need a camera with more than 3 million pixels. But if you do get one with 4 or 5 million pixels, don’t use them or you’ll plug up your memory card and computer for no good reason. Of course, the subject of the photo has to be relatively large in the viewfinder or all bets are off. To ensure that the subject fills the frame, get a camera with five to 10 times optical zoom — as opposed to bogus digital zoom.
We’re partial to the Fujifilm line of digital cameras because their colors are ‘people pleasing’, and the blues and greens are particularly vivid. P.S. Don’t even think of trying to send photo files on SailMail, they are much too big.

Two other photos tips: Always use the fill-in flash when shooting faces, particularly on bright days. Second, take a few minutes to learn the basics of composition — i.e. the main subject should never be in the center of the photo. If you do, your photos will look like photos instead of snapshots. You’ll be glad you made the effort.

Getting back to the Allens and Lazy Bones, they did last spring’s Del Rey Race to Puerto Vallarta before continuing on to Panama, Ecuador, the Galapagos, and French Polynesia. It’s our understanding they are still in French Polynesia, so apparently they have backed off from their original aggressive schedule which called for them to reach New Zealand by November. In any event, we sure hope they send us some new photos!

Finally found in our computer — the long lost reply from Humberto Garza Ochoa, General Manager of the Acapulco YC:

“...In the February edition Changes in Latitudes, Bill and Cynthia Noonan of the Half Moon Bay-based Island Packet 380 Crème Brûlée reported they weren’t very happy with their experience of trying to get a slip at the Acapulco YC. Unfortunately, we weren’t aware of their unhappiness at the time. We would like to apologize for their inconvenience. In the future, cruisers should contact us in advance by mail, letter, or phone for a reservation. Many cruisers inform us in advance of their arrival, and we’re able to confirm a slip and services on that date. All cruisers are important to us and our members. I hope I have the opportunity to welcome all visitors coming to Acapulco.”

In fairness to the Noonans, they reported they had tried to contact the Acapulco YC for two days in advance, and then again by VHF while anchored off the club. So we don’t know what the story is. However, everyone needs to be aware that...
the Acapulco YC — which is actually a private club as opposed to an American-style yacht club such as the Vallarta YC — is extremely busy in the winter and there are far more boats — many of them owned by prominent citizens and members — than there are slips. As such, in the times we’ve visited, we’ve always assumed that they wouldn’t be able to accommodate us and have been very patient. In the end, it’s always worked out for us. The management of the Acapulco YC — many of whom have been there for almost 40 years — are true gentleman in the classic sense of the term. We’ve always liked the club and the city. We hope this puts things in perspective and that all visitors have a great time there.

Nobeltec Charts & Software has announced that it is getting ready to market electronic charts for the inshore waters of Cuba. In fact, the sample chart they show is of the lovely little harbor of Baracoa on the far east coast, which just happened to be where we made our Cuban landfall nearly 10 years ago. The irony is that Americans won’t be able to make use of these charts because the Bush Administration has made the ‘workers paradise’ off-limits to American mariners. This is just plain dumb, because a visit by Americans would make 99% of them more anti-tyrant and pro-capitalist than they might now be.

A case in point is travel writer Christopher Baker, the author of Mi Moto Fidel, Motorcycling Through Castro’s Cuba. When Baker arrived on the island with the help and encouragement of Castro brown-nosers Global Exchange, he was sympathetic to the Cuban model. After living under it for a few months, he was transformed. You would be to. So we say, tear down that legal barrier to visiting Cuba, President Bush, tear it down now!

No doubt realizing that Castro isn’t going to be tugging at his beard all that much longer, some folks have cranked up the Cuba Cruising Net at www.cubacruising.net. There’s not a whole lot on it yet, but Peter Swanson had an interesting report on the side effect the Bush crackdown has had on Canadian mariners:

“The Bush Administration’s crackdown on cruising to Cuba has been far more successful than it deserves to be, thanks to the Administration’s well-played bluff. To be sure, it has stopped the trickle of American boats that used to visit the

IN LATITUDES

island under a system of ‘hint, wink and nod’. But now Canadian cruisers, as well as Europeans, have been skipping their usual stops in Cuba for fear of retribution if they should subsequently enter some United States port. They need not be so timid, however. Unbeknownst to the cruising community, United States law specifically exempts them from sanctions enacted in the Bush crackdown.”

It’s indeed amazing the affect the administration’s actions have had on some people. Two Latitude readers tell us that they plan to cruise to the Baltic countries four years from now, and hope to visit Cuba on the way. But they asked us not to mention the Cuba part out of fear of retribution.

“While cleaning out my desk in anticipation of doing the Ha-Ha and continuing cruising in Mexico and points south, I found my old Professional Engineer embossing seal,” writes Sam Crabtree of the Benicia-based Cal 39 Catch The Wind. “I was about to throw it out when I remembered that I once read in Latitude that having a seal on a document makes it appear more official to some customs and immigration officials in Mexico. Would it be a good idea to take that embossing seal on the Baja Ha-Ha and beyond?”

Not anymore. In the late ’70s and early ’80s, clearing was often an adventure that seemed to drag for no apparent reason. We always carried a variety of rubber stamps — First Class, For Deposit Only, Special Delivery, Past Due — knowing that a lot of officials really did seem to get pleasure from banging them on documents. So if the clearing process bogged down, we’d find some pretext by which to bring the rubber stamps out into the open, and intimate that it would fine with us if the port captain did some heavy pounding. It didn’t always work, but god’s honest truth, sometimes it did. The cool thing was that each official seemed to have his own unique style of stamping, sort of like cable car operators have with ringing their bells. Alas, officials are much more professional these days and usually bilingual to boot, so we’d leave the rubber stamps at home.

CHANGES

tor Morales of Singlar gave a presentation at the Hidden Harbor YC meeting on October 7, and showed artist’s renditions of the new building under construction next to the new Pemex station,” reports Connie McWilliam Schultz of Sunlover. “They said the new building will house a convenience store, laundromat, showers, bathrooms, commercial space, an office for the marina manager, and a mariner’s lounge. There will also be a 50-ton Travel-Lift and a dry storage yard. No completion date was given.”

There is a new ‘gateway’ for Globalstar Satphone coverage in Florida which, according to the company, will provide coverage for all of the Caribbean. Unfortunately, we’re not sure we believe them. When we took Profligate to the Caribbean and back for the winter of ’03-’04, their system didn’t come anywhere close to covering the areas they claimed. No matter what their coverage map claimed, the phone was useless from south of Acapulco to the Canal, and from there to the Eastern Caribbean. Coverage in the St. Martin area was poor — maybe one call in five went through and/or wasn’t dropped. We hope it’s better now. According to Globalstar, their rates for all of the United States and the Caribbean islands are “down to 14 cents/minutes” — whatever that means. This is not the case in Mexico, however, where for some reason expensive roaming charges apply.

We own a Globalstar phone and have been pleased with the service where there is coverage — but just because they say they offer coverage doesn’t mean your calls will go through.

Thanksgiving and Christmas are always major events for cruisers in the larger ports and anchorages of Mexico, but here are some other important dates and events for cruisers in Mexico:

February 1-5, Zihua Sail Fest, Zihuatanejo. For five days, sailors and locals come together in one of the favorite cruiser towns in Mexico for a great cause — to raise money for the area’s schools for indigenous children and for other community projects. Activities include a dressed ship boat parade around the bay with local dignitaries, a pursuit sailboat race, a beach party, a chili cook-off and street fair, a wrap-up BBQ, and much more. This has been one of the most successful and fun cruiser events ever in Mexico, so try not to miss it. For details, visit www.zihuafest.com.

February 27 — Pacific Puddle Jump Party Kick-Off. Paradise Marina, the Vallarta YC, and Latitude 38 combine to host a final get-together for folks before they head out on that big jump across the Pacific. It also gives us at Latitude a chance to meet you so we can feature you in the magazine.

March 28 — Pirates For Pupils Spinnaker Run for Charity, Punta Mita, Banderas Bay. This spinnaker run is one of the most mellow in the world — 12 miles of flatwater, downwind sailing in bikini weather from Punta Mita to Paradise Marina. Latitude and others host the event to raise money for the schools at Punta Mita and for other educational projects in Banderas Bay. Sail your own boat or give a donation to sail with others. Make sure to release your inner pirate by coming in

costume. Great people, great cause, great fun — but watch out for all the whales!

March 30-April 2 — The 14th Banderas Bay Regatta is three days of “friendly racing for cruising boats” and four days of fun. The sailing conditions and facilities couldn’t be better or more convenient. This is the perfect time and place to have friends fly down from the States to join you for the fun, and to see friends from earlier in the season who are about to head off in different directions. There is no entry fee, but there are big discounts on berthing, so you need to have your head examined if you miss this one.

The Banderas Bay Regatta is actually the culmination of a month of sailing activities in the bay called Festivo Nautico, which includes the end of the San Diego to P.V. Race, the Governor’s Big Boat Parade, the Governor’s Cup Race, the WesMex Optimist Dinghy Regatta with sailors from all over the world, and the MEXORC for serious racing boats, the ‘Big Cat Dinghy Raft-Up’ to set a world record, the Sailors’ Jazz Fest, Seminar Days, the St. Paddy’s cruise to Punta Mita, the Pirates for Pupilis Charity Run, and ending with the Banderas Bay Regatta. We can’t imagine anyone wanting to participate in all the events, but there’s surely something for everyone. We’ll have more details in upcoming issues, but for now, visit www.banderasbayregatta.com.

April 6—10 — Sea of Cortez Island Clean-Up. This one isn’t etched in stone yet, but our plan is to sweep through the cruising anchorages of the islands between La Paz and Loreto with Profigate, and clean up and take out as much cruiser trash as possible. Any boats want to join us for even part of the effort? Remember, just because you’re doing something fun doesn’t mean you can’t have a blast.

May 4-7 — Loreto Fest. This classic Baja event is actually held in nearby Puerto Escondido, and draws a very large number of participants. There are all kinds of cruiser-type events with an emphasis on cruiser-performed music. New this year will be the Candeleros Classic Race. Proceeds go to the local charities and really make a difference.

Say, whatever happened to the $1,700 donated by last year’s Ha-Ha fleet after the Turtle Bay Clinic saved Wild Rose crewmember Phil Hendrix’s life? It’s been donated to Los Medicos Voladores aka The Flying Doctors. This is a group of Northern California doctors, dentists, and other volunteers, who pay to fly to places such as Turtle Bay, Cedros Island, and Isla Natividad. We’ll have more on them in a future issue.

We’ve mentioned it before, but it’s worth repeating. Before heading to new cruising areas, we recommend that you preview them using Google’s satellite photographs. Just go to ‘Google’, ‘more’, ‘maps’, and ‘satellite’. From there you can roam the world in seconds, zooming in close. It’s brilliant and free. Try it for places you’ll be going to in Mexico, the Caribbean, or anywhere else. In some places the resolution is better than ever, but it can be very helpful.

Yahoo! The cruising season is here!

The Wincher

The wincher changes your regular winch into a self-tailing one. Four sizes are available. It is a product that, by means of one, single hand movement, renders your conventional winch sheeting and self-locking. The Wincher is made of a specially designed rubber body that fits down on top of the winch. As the sheet is being winched home and is put under increasing load, the coils ‘climb’ up the winch drum and fasten against the ribs in the underside of the rubber body.

OWN YOUR OWN ISLAND IN THE DELTA

Own your own private island in the Sacramento Delta $3.100,000 with $250,000 NNN income. Terrific upside potential. For additional details contact: Agent, George Lyons • (415) 307-5060 • gelyons@yahoo.com

Let us post a for-sale flyer on the Web for you! See examples at www.YachtFlyers.com or call toll-free (888) 862-8501.
**FOAM FLOATION BLOCKS** incased in black vinyl. 4’ x 8’ x 3’. Ideal for docks or work floats. Half price. (415) 332-3910.

**NEWLAND 368 HULL AND DECK** molds for sale. Build your own 5,000 semi-custom rocket with 6 berths/full galley. Winner many races. Easy to sail at 15+ knots. Molds in Alameda, $4,000. Call Dan (510) 521-7172. Materials available, too.

**1981 PERKINS 4-108**. Always starts, runs well, doesn’t leak. Needs accessories and painting. I am replacing fuel tank, else it would leave in the boat. $1,500/obo. (608) 678-0784.

**1981 PERKINS 4-108**. Always starts, runs well, doesn’t leak. Needs accessories and painting. I am replacing fuel tank, else it would leave in the boat. $1,500/obo. (608) 678-0784.

**NEED LIVEABOARD SLIP** to rent in LA, LB, San Pedro, Ventura areas. Professional, good tenant, active sailor, Newport 41, ASAP. thanks. Call (310) 903-3066 or email: vickirsma@msn.com. (global.net)

**36-FT SLIP AT PIER 39 FOR RENT.** $269/month plus electric. Berth C-15. Close in and in the wind shadow of the Pier. Call Vince at (650) 948-7932 or email: slip@zunino.net.

**MARRIAGE-MINDED PROFESSIONAL** sailor, a widower with no kids and still young and fit at 63, is looking for a lady cruising companion. You will be somewhere between a wise 50 and a young 60, smart, adventurous, in good shape, mentally and physically, independent, and either retired or close to it. Why not spend that retirement cruising with me on a 57-ft trawler? Call me at (510) 219-1463. If no answer, I might be away at sea, so please leave a message and I’ll get back to you as soon as I can.

**SOUTHERN PACIFIC.** 55-year-old, experienced sailor/cruiser, licensed captain, scuba-diver, snowboarder, good cook, great sense of humor, mechanical wizard, non-smoker, fit, happy, mentally/physically/emotionally and spiritually healthy. Levi, t-shirt type likeable, guy, nice, well-equipped boat. Returning to South Pacific for 3+7 year adventure, seeks female co-captain/accompli/playmate/soulmate with an adventurous spirit, sense of humor, playfully positive attitude and spiritual awareness, with hopefully, no more than carry-on baggage. Please email: downwind13@earthlink.net.

**FIRST MATE / GIRL FRIDAY.** Some experience necessary. Elysium, 72-ft racing hull, 4 owners, cruise Mexico. Exciting boat, crew quarters, salary. Call anytime, David (808) 989-1436 or Ernie (707) 322-9995.

**MAGICAL MERMAID SEEKS MERMAN** to cruise warm waters. Looking for big splashes with fit 45-57, 5’9”-6’2”, financially secure man who has time to play with petite, slim and very attractive scuba diving/sailing mermaid. Let’s go. Email: oceansailingmermaid@yahoo.com.

**SEEKING CRUISING LADY.** Duration of voyage: as long as it’s fun. Requirements: she loves life and the sea, appreciates his buoys, food and music, she’s open to the possibilities. Life is short. Start with a simple phone call. Joe (310) 823-6609.

**CAPTAIN/MAINTENANCE:** The greatest part-time job on the Bay. We are looking for a skipper to operate and maintain our new 30’ power yacht. The boat will be based at Jack London Square and used to transport our customers and other VIPs. Qualified applicants will have an operator’s license and a commitment to aim for excellence in all areas of operation. Please fax resumes to: (510) 522-0641.

**MECHANICAL ASSEMBLY.** Scanmar International manufactures the Monitor windvane and other stainless steel products in our pleasant facility in Point Richmond. We are seeking a full-time assembly person who is a quality-minded and motivated self-starter with the ability to work with little or no supervision. Must be familiar with basic shop tools and have a critical eye for details. The right person might get a future opportunity to handle the entire production responsibility, including purchasing. Email your resume to: oscar@jessifer.com or fax to: (510) 215-5005.

**CALIFORNIA YACHT DEALER** seeking service technicians for installations and warranty work. General knowledge of electrical systems, waste systems, water systems, rigging and mechanical systems required. Capable of small fiberglass repairs a plus. Fax resumed: (510) 614-1799 or email: lorraine@lhyacht.com.

**YACHT MAINTENANCE PEOPLE NEEDED.** Rapidly growing, full-service yacht maintenance company has 2 openings primarily in Peninsula Area. Boat Washer, willing to work hard, may also need to polish and wax, experience in painting/varnishing would be a plus. Boat Mechanic, this individual will need good problem assessment abilities to diagnose engine problems. Both positions require own transportation as travel between marinas required. Fax resume to: (510) 521-0968 or call office: (510) 521-0967 for application.

**RIGGER.** We are looking for an experienced rigger to take over the management of our rigging shop. Located at Channel Islands Harbor, CA. Please call and send resume. Email: Michael@amboatyard.com or call: (805) 985-1818 or fax: (805) 985-5357.

**SEAMSTRESS WANTED.** Excellent pay and benefits. Full-time position in Alameda. Call John or Bill at Pacific Coast Canvas. (510) 521-1829.

**BOAT WORKERS, YACHT SALES, OFFICE assistance, organizational help.** Unique opportunity in Sausalito. (415) 331-5251.

Your generosity will give your boat a new home and give you a nice tax break and great satisfaction...

Our growing Scout program needs your support:

• Any serviceable vessel can be used.
• We’ll make the transfer quick and easy.
• Tax benefits from donating can meet and sometimes even exceed the amount realized from selling your vessel.
• You can eliminate the bills associated with the cost of owning your boat.

Donate Your Boat to the Sea Scouts
San Francisco Bay Area Council,
Boy Scouts of America

Donations Are Tax Deductible
42’ Bénéteau First 42s7, 1999  The last 42s7 launched, she embodies all the improvements Bénéteau made in building her 150+ sisterships! Two cabin owner’s version. An unusual combination of short rig and deep keel makes her perfect for conditions here. New $185,000

43’ Hans Christian, 1987  Rare Hans Christian 43 Traditional cutter with a custom Mark II interior with the Pullman berth and two heads. In very nice shape, she underwent a $40,000 refit in 1998 for an extended cruise that was never taken. $185,000

40’ Jeanneau Sun Odyssey, 1999  Vessel combines a sleek Euro-style exterior with twin wheels for comfort and accessibility with a well-fit-out interior combining fine teak woodwork and satin varnish with a full 6’3” headroom for beauty and functionality. Note that this particular example is one of the few 40’ boats w/3 stms. $169,000

40’ Valiant Cutter, 1975  Equipped for cruising and in nice shape overall. Recent Quantum genoa (’04) on ProFurl roller furler (’94), substantial dodger (’03), engine and transmission rebuilt (’96), etc. Most importantly: NO BLISTERS! SIGNIFICANT PRICE REDUCTION. VERY COMPETITIVELY PRICED $99,500

34’ Catalina, 1987  The Catalina 34, launched in 1986 and still being built, is one of Catalina’s most popular boats. She offers the space of a typical 36 footer at a very affordable price. This particular example is very clean and sports the deep keel as well as a keel-stepped mast, RF and dodger, more. $54,500

42’ Chris Craft Comanche, 1969  This lovely fiberglass classic, designed by Sparkman & Stephens and built in the U.S. during Chris Craft’s heyday, is in outstanding shape and, with almost $54,000 in improvements over the last 3 years, shows much newer than her age. Transferable Sausalito Yacht Harbor slip. $68,000

34’ C&C, 1978  Canadian-built racer/cruiser spent half her life in fresh water where she was lightly used & hauled every winter. Not surprising, today she’s in fantastic condition inside & out – Interior shows practically new. Current owner (her 3rd) Awlgripped hull, epoxied bottom, installed Harken RE, new (’05) jibs, heavy duty dodger, more. $44,950

33’ WaQUALeZ Hood, 1982  Exceptional performance cruiser, the French equivalent of a Swan. This one is bristol – the interior shows as new. Beautiful teak decks in fine shape. The retractable centerboard allows access to areas inaccessible to most sailboats this size. Transferable Sausalito Yacht Harbor slip. $95,000

38’ Sabre MAH, 1990  This East Coast gem is nice both above and below, is well equipped and the only Sabre 38 available on West Coast at present, very competitively priced and lying in a transferable Sausalito Yacht Harbor slip. $154,000

33’ Waqualiz GlAriaToeU, 1984  Classic European sloop in fantastic condition above and below, shows much newer than actual. Major refit ’97 including transom, electronics, windvane, sails, dodger, etc. Interior shows as new, no teak decks but teak in cockpit looks new. Transferable Sausalito Yacht Harbor slip. $64,900

38’ Waqualiz Hood, 1982  Exceptional performance cruiser, the French equivalent of a Swan. This one is bristol – the interior shows as new. Beautiful teak decks in fine shape. The retractable centerboard allows access to areas inaccessible to most sailboats this size. Transferable Sausalito Yacht Harbor slip. $95,000

34’ Catalina, 1987  The Catalina 34, launched in 1986 and still being built, is one of Catalina’s most popular boats. She offers the space of a typical 36 footer at a very affordable price. This particular example is very clean and sports the deep keel as well as a keel-stepped mast, RF and dodger, more. $54,500

28’ Pacific Seacraft, 1976 and 28’ Islander, 1978  Two diesel powered “classic plastics” in very nice shape and with transferable Sausalito slips. Competitively priced at $19,500 and $10,500 respectively.
NEWER ENGINE, BRAND NEW DODGER, 3 STATEROoms.

PERKINS 85HP 4236M REBUILT. 3 STATEROoms.

ALSO:

CENTER COCKPIT, TWO NICE STATEROoms FORE AND AFT.
