Plastiki

The Plastiki is a most unusual boat. Built from 12,000 post-consumer plastic drinking bottles, she is the creation of David De Rothschild, an environmentally conscious visionary determined to draw attention to the plight of our polluted oceans. With such a unique boat come unique requirements: the team of designers, engineers, builders and sailors must appreciate and emphasize the need to keep plastics out of our oceans, recycling and reusing rather than discarding.

Such a unique boat also requires unique sails, custom tailored to the rig and the course to Sydney, Australia. The crew chose Pineapple Sails to design and construct the best sail inventory and to bring experience and imagination to the project. Premier sailcloth manufacturer Dimension Polyanth produced some custom sail fabric from recycled plastic for the boat’s mainsail. That sail plus twin headsails, a mizzen and large asymmetric spinnaker will provide the energy to propel the Plastiki and crew across the Pacific.

Every sail we make at Pineapple Sails is an original, thoughtfully designed and carefully built, right here in Alameda.

We are proud to be a part of the Plastiki team and their mission.

YOUR DEALER FOR: Musto foul weather gear, Dubarry footwear and Headfoil 2

Sails in need of repair may be dropped off at:
West Marine in Oakland, Alameda, or Richmond;
or Svendsen’s in Alameda.

Copyright 2010 Latitude 38 Publishing Co., Inc.

Latitude 38 welcomes editorial contributions in the form of stories, anecdotes, photographs – anything but poems, please; we gotta draw the line somewhere. Articles with the best chance at publication must 1) pertain to a West Coast or universal sailing audience, 2) be accompanied by a variety of pertinent, in-focus digital images (preferable) or color or black and white prints with identification of all boats, situations and people therein; and 3) be legible. These days, we prefer to receive both text and photos electronically, but if you send by mail, anything you want back must be accompanied by a self-addressed, stamped envelope. Submissions not accompanied by an SASE will not be returned. We also advise that you not send original photographs or negatives unless we specifically request them; copies will work just fine. Notification time varies with our workload, but generally runs four to six weeks. Please don’t contact us before then by phone or mail. Send all submissions to editorial@latitude38.com, or mail to Latitude 38 editorial department, 15 Locust Ave., Mill Valley, CA 94941. For more specific information, request writers’ guidelines from the above address or see www.latitude38.com/writers.html.

CALENDAR

Panda Rigging at Oakland YC, 7:30-10 p.m. Socializing starts at 7 p.m. Info, www.sfbaysss.org.

Mar. 17 — Go sailing on a green boat on St. Paddy’s Day!

Mar. 18, 1969 — Bernard Moitessier shocked the world when he announced his withdrawal from the Golden Globe Race and his intention to continue sailing. "Please do not think I am trying to break a record," he wrote. "Record’ is a very stupid word at sea. I am continuing nonstop because I am happy at sea, and perhaps because I want to save my soul."

Mar. 18 — 12-Volt Seminar by Duane Foote at San Carlos West Marine, 6-7 p.m. Free. Reservations, (650) 593-2070.

Mar. 18 — Line Splicing Class at San Jose West Marine, 6:30 p.m. Free. Reservations, (408) 246-1147.

Mar. 18 — Line Splicing Class at San Jose West Marine, 6:30 p.m. Free. Reservations, (408) 246-1147.

Mar. 19 — Vernal equinox, a.k.a. the first day of spring!

Mar. 20 — Safety Seminar by Coast Guard Auxiliary at Sausalito West Marine, 11 a.m. Info, (415) 332-0202.

Mar. 20 — Partner in Command Seminar by US Power Squadron at San Carlos West Marine, 6-7:30 p.m. $45. Reservations, (650) 593-2070.

Mar. 27 — Maritime Sketchbook with Amy Hosa at San Francisco Maritime National Historical Park’s Hyde Street Pier, $100. Half of all proceeds from adult education classes go to non-profit education programs for at-risk youth. Info, www.maritime.org/adult-classes.html or (415) 292-6664.

Mar. 29 — Howl at the full moon on a Monday night.

Apr. 3 — Marine Swap Meet at Alameda West Marine, 7 a.m.-2 p.m. Info, (510) 521-4865.

Apr. 3 — Finding & Maintaining the Right One by Guy Stevens at San Carlos West Marine, 12-3 p.m. Reservations, (650) 593-2070.

Apr. 10 — Encinal YC’s Nautical Flea Market, the largest in the East Bay, 6 a.m.-1 p.m. Breakfast, lunch and beverages available. Info, (510) 522-3272 or www.encinal.org.

Apr. 10 — Emeryville Marina’s 3rd Annual Boaters Swap Meet, 9 a.m.-2 p.m. Info, (510) 654-6437.

Apr. 11 — Marine Swap Meet & Open House at Berkeley YC, 6 a.m. John, (510) 843-9292, manager@berkeleyyc.org or www.berkeleyyc.org.

Apr. 24 — Nautical Swap Meet & Port Supply Tradeshow at Sausalito West Marine, 10 a.m.-4 p.m. BBQ gets fired up at 11 a.m. Info & space reservations, (415) 332-0202.

Racing

Mar. 4-7 — Heineken Regatta, St. Maarten, West Indies. One of the world’s great fun regattas — and some of the wildest parties. Info, www.heinekenregatta.com.

CALENDAR

April 8-11 — La Paz Bay Fest. This will be the fifth year for this descendant of the infamous La Paz Race Week. An event for cruisers that includes races, potlucks, cruising seminars and other fun activities for the family. More info on Bay Fest 2009 will soon be found at www.clubcruceros.org.

April 30-May 2 — Loreto Fest and Cruisers’ Music Festival. This classic Baja event, started to clean up Puerto Escondido, draws a very large crowd of cruisers and Baja land-travellers for a chili cook-off, dinghy races and other water activities, the Candeleros Classic race, and lots of participant-created music. The goals are to have fun and raise lots of money for Mexican charities in Puerto Escondido and Loreto. Visit www.hiddenportyachtclub.com.

June 18-20 — Tahiti-Moorea Sailing Rendezvous, hosted by Latitude 38 and Tahiti Tourism. This free event is focused on cross-cultural appreciation and includes a cocktail party, a sailing rally to Moorea, Polynesian music and dance performances, and cruiser participation in traditional Tahitian sports — the highlight of which is the six-person outrigger canoe racing. Info, www.pacificpaddlejump.com.

Please send your calendar items by the 10th of the month to calendar@latitude38.com. If you’re totally old-school, mail them to Latitude 38 (Attn: Calendar), 15 Locust Avenue, Mill Valley, CA, 94941 or fax them to us at (415) 383-5816. But please, no phone-ins! Calendar listings are for marine-related events that either are free or don’t cost much to attend. The Calendar is not meant to support commercial enterprises.

DOWN WITH THE WRCB’S DRACONIAN SCHEME

Thank you for alerting Bay Area sailors to the State Water Resources Control Board’s (WRCB) proposed permit and fee ploy that would make marina operators — including the Bay’s yacht clubs — liable for the quality of the water that flows into their marinas from outside sources beyond their control.

It is particularly egregious that WRCB would pursue such a draconian regulatory scheme given there is no evidence that recreational boats in marinas are causing a water quality problem. There is no legitimate factual basis justifying WRCB’s imposition of permits and fees that would compel marinas to individually expend hundreds of thousands of dollars each year to conduct the proposed water quality testing and monitoring, which would then have to be reported to state agencies.

Moreover, WRCB’s mandating such a major expenditure without tangible evidence of a problem caused by recreational boating and marinas is devoid of intellectual integrity, and unethical, inasmuch as it simply cannot improve coastal water quality. Simply stated, if the water flowing through a coastal — including the Bay — marina cannot be controlled by any given marina, forcing marina operators to comply with this ineffective mandate appears to make as much sense as Mrs. Madoff’s leaving the porch light on for Bernie.

The hyperbole of WRCB’s proposal is further underscored by the success of the Clean Marina Program conducted by the marina industry and recreational boaters. The Clean Marina Program has enhanced, and continues to enhance, the marine environment through voluntary participation. It has proven to be the most efficient and cost-effective approach to improving water quality in marinas. This program should be the preeminent method to address the state’s water quality goals for marinas.

Moreover, the inequity of this proposal is aggravated by the fact that public records unequivocally establish that local governments, not marinas or recreational boaters, have been among the worst gross polluters of the San Francisco and San Pablo bays, as well as the coastal waters adjoining them.

In ‘09, the Sausalito-Marin City Sanitary District’s total raw spillage out of Sausalito into the Bay was 775,000 gallons. In ‘08, there were thousands of gallons of raw flow from Sausalito’s sewers in February, and again in August. The fine for those ‘08 spills was $1.6 million. Notwithstanding that fine, during the week of January 18, 2010, the Sausalito-Marin City Sanitary District dumped another 40,000 gallons of raw sewage into the Bay.

During the storms that passed through the Bay Area in January, a total of 630,000 gallons of raw sewage spewed from the cities of Albany, Oakland, Alameda, Emeryville, Berkeley and Piedmont into the Bay at 47 spots, according to the environmental watchdog group San Francisco Baykeeper. That was miniscule however, compared with the 170 million gallons of partially processed sewage discharged from three East Bay Municipal Utility District ‘wet weather’ overflow plants on the eastern side of the Bay.

Given the lack of need for this marina permitting and fee proposal, why is the WRCB even putting such a draconian, unwanted proposal forward? Why isn’t WRCB cracking down on gross pollution by the Bay Area’s governmental entities? Is it because Sacramento bureaucrats, smarting from a 15% pay cut due to furloughs or the public’s three-to-one rejection of tax increases in last June’s plebiscite, want ‘payback’ against what they perceive to be wealthy yacht owners and their clubs?

One may never know the answer to what generated this
Teacher. Sailor. Boat builder. Skipper. Navigator. Crew. Every aspect of sailing has been Kim Desenberg’s avocation and passion. His very way of life, since he sailed as a young kid on his family’s 27’ wooden cutter in the Channel Islands.

While at Stanford, Kim sailed on the college team and was named an Intercollegiate All American sailor. Since then, he’s sailed Transpacs, crewed in the One Ton World Championships, navigated a 3-month passage from Hawaii to Sydney, and raced in countless competitions up and down the West Coast of the United States and Mexico, as well as the East Coast, Caribbean and Europe.

Over the years, Kim has come to know the ins-and-outs of boat building and repair like no other. He owned North Coast Yachts for 20 years, building custom sloops, fiberglass racer-cruisers, and a bunch of Wylie Wabbits. For the last twelve years, Kim was a Yard Manager at KKMI boatyard in Point Richmond, where many customers will remember him for his honesty, integrity and the extraordinary care and attention he gave them and their boats.

If you’re a member of the St. Francis Yacht Club, the Richmond Yacht Club or the Inverness Yacht Club, you’ve probably seen Kim on the racecourse, or advising cruisers and day-sailors how to be better sailors, improve their boat’s performance, and keep their boats in great shape.

And now, we’re proud that Kim has made Bay Marine Boatworks his new home. Give him a call at (510) 237-0140. He’ll give you and your boat the time and attention you deserve. And you’ll discover that Kim is not only the sailor’s sailor, but a heck of a nice guy as well.
superfluous WRCB proposition, but this much is certain: If this proposal is enacted, it will put a spike through the very heart of recreational sailing on San Francisco Bay, one of the world's finest sailing venues.

Tim Cronin
Ruby, Pacific Seacraft Dana 24
Alameda

Tim — According to the United States Environmental Protection Agency, "'nonpoint source pollution' (NPS) is the leading cause of water quality problems. These pollutants have harmful effects on drinking water supplies, recreation, fisheries and wildlife."

What is NPS? The EPA explains: "Unlike pollution from industrial and sewage treatment plants, NPS comes from many diffuse sources. NPS is caused by rainfall or snowmelt moving over and through the ground. As the runoff moves, it picks up and carries away natural and human-made pollutants, finally depositing them into lakes, rivers, wetlands, coastal waters and ground waters. NPS can include excess fertilizers, herbicides and insecticides from agricultural lands and residential areas. Oil, grease and toxic chemicals from urban runoff and energy production. Sediment from improperly managed construction sites, crop and forest lands, and eroding streambanks. Salt from irrigation practices and acid drainage from abandoned mines. Bacteria and nutrients from livestock, pet wastes and faulty septic systems. Atmospheric deposition and hydromodification."

So as we understand the WRCB's proposal, the downstream 'victims' of NPS, the leading cause of water pollution, will be forced to pay for the monitoring of pollution. And will no doubt be charged with ameliorating a condition they have little if anything to do with creating. We all want clean water and a clean environment. The way to do that is to go after the primary causes, not by creating ineffectual proposals that punish the wrong people and take one more step in this once-great Golden State's seemingly inevitable march toward insolvency.

The other thing we find curious is that when there is some human mistake at a sewage treatment plant that allows gazillions of gallons of untreated or partially treated sewage into our bays and oceans, the sewage district — i.e. taxpayers — gets hit with the fine. Why aren't the individuals who screwed up, and the management that supervises them, hit with fines and termination?

It reminds us of an incident we heard about in the Caribbean over the winter. The captain of a new and very expensive mega sailboat was given an excellent employment contract. Despite the fact that the weather on New Year's Eve was stormy, and the port had been cleared out for safety, the captain and the entire crew went ashore, after anchoring the boat out, to celebrate. While they were celebrating, another big yacht dragged into the new yacht, causing some damage. As the damage had happened during the captain's watch, he was promptly sacked. Shouldn't government employees be held to the same standard?
Are you happy with your sailing club?

body wrote in with examples of sailors’ starting their diesels without battery power. Many years ago, I hitched a ride from Papeete to San Diego on the schooner Nordlys. Mid-Pacific, our batteries were dead and we couldn’t start the propulsion diesel — which was the only way we could charge the engine batteries.

I was not in the engine compartment at the time, but understand that the following was the procedure used to solve the problem: after the overhead valves were pried down, pieces of hacksaw blades were slipped under the rocker arms, which kept the valves open and prevented compression in the cylinders. Then, when we were sailing in such a stiff breeze that the rail was down, the transmission was put into gear. The forward motion through the water spun the non-folding prop, which rotated the compression-less engine. Once the engine was turning over as fast as it ever was going to, the fuel was turned on and the hacksaw blades removed. The engine roared to life. Success on the first try!

Bob Drude
Mill Valley

THE WANDERER’S IDEAL AMERICA’S CUP

While we are all waiting for the America’s Cup races to actually take place, one national news commentator made the point that public interest in the event had been waning. That brings to mind that little has been said about it in recent issues of Latitude. No doubt that will change in the next few issues. Nonetheless, I will be very interested in what the publisher of Latitude has to say on the subject.

For myself, the last really great race was with Ted Turner at the helm. Of course, Dennis Conner put on a good show in Australia, too. In the future, I would like to see more attention paid to the meaning of the words in the original Deed of Trust.

Jim Hildinger
South Lake Tahoe

Jim — For the perspective of a true racer, the question would be more pertinent to Rob Grant, our Racing Editor. But if you want the publisher’s unvarnished ‘Joe Sailor’ opinion, here goes:

‘Tis never been that taken with the match racing concept, as it often results in races that are no more exciting than a nil-nil soccer match. If there was to be a pinnacle international sailing event other than around-the-world or transoceanic races, I’d vote for fleet racing among three-boat national teams, with a small boat, a medium-sized boat, and a big boat. It would be held every two years. One or two of the classes would be one-design — we always thought the ‘design-competition’ aspect of the American’s Cup was overblown and beside the point — to keep down the cost and even out the competition. There would be three inshore races, a medium distance race, and a long distance race. In other words, it would be just like the old Admiral’s Cup in England, and to a lesser extent like the Pan Am Clipper Cup and Kenwood Cup off Honolulu. And the boats would have to be fast boats, not like the relative slugs of past

America’s Cups. The event would have to be held in reasonably strong wind — which would eliminate venues like San Diego and Valencia. I know my opinion will be a minority one and it would never ‘sell’, but I believe it would have significantly more ‘winners’, personalities, nuances and texture.”

“WE'RE HONORED TO BE ON THE COVER”

We are delighted to see our Hallberg-Rassy 38 Rägeboge on the front cover of Latitude 38. My son Raphael is so proud to be on the cover that he hasn’t stopped talking about it and showing everyone. I wasn’t even aware of it until a friend of mine emailed me with a shy, “Heinz, that’s your boat on the cover of Latitude, isn’t it?”

Again, thank you, we’re very honored.

Heinz Baumann
Rägeboge, Hallberg-Rassy 38
Basilea, Switzerland

Heinz — The pleasure was ours. Good sailing in ’10!

DAN MEMBERSHIP IS A NO-BRAINER

Having ‘jumped the puddle’ to the South Pacific last year, we want to offer future cruisers and others a useful tip. Before you leave for far distant shores, look up DAN, Diver’s Alert Network, at www.diversalertnetwork.org. This organization provides emergency evacuation for members for any accident — it doesn’t have to be a diving accident — or illness. So if you need to get from the boonies to someplace that can provide first-rate medical treatment for a life-threatening illness or accident, you just call one toll-free number and DAN handles all the details. The cost is ridiculously inexpensive for the basic membership. It costs $35/year for a single, and $55/year for a family membership. You can join online and charge it to a credit card.

People talk about ‘no brainers’, but in this case it really applies. DAN membership could save you tens of thousands of dollars if you should have to shoulder the expense of emergency evacuation yourself. We know of many people who have been DAN members, and who have been very glad that they were. We also know people who didn’t have it, suffered an accident or illness, and were stuck with huge expenses trying to get to competent med care.

In the interest of full disclosure, we have no affiliation with DAN. We just think it’s a good idea, and have been members since ’03.

Philip DiNuovo & Leslie Linkkila
Carina, Mason 33
Kingston, WA / Neiafu, Tonga

Philip and Leslie — We’re going to sign up right now. Back in the mid-’80s, we were doing Sea of Cortez Sailing Week on our Olson 30 when we blew a disc at Caleta Partida. The pain was excruciating, but we tried to gut it out — and probably greatly worsened our condition — by pounding on the floor of a hotel room at the Los Arcos Hotel. We did that because there was no way we could sit upright in a commercial plane to the States, and even back then the cost of a medevac flight from La Paz to L.A. was $25,000.

Our having DAN, things eventually got so bad that friends finally dragged us to the Navy Hospital in La Paz, where we
The Finest Sails Begin
with the Best Sailcloth

Our patented woven Vectran® sailcloth performs like the laminates with the durability of Dacron®, especially in roller furling applications. In fact, Vectran® is lighter, lower stretch, and retains its shape over a longer life than any sailcloth we’ve ever offered to cruising sailors. That’s because Hood Vectran® is woven, not laminated to Mylar® film. And you can be sure that each sail we roll out is built by hand, with the same care and craftsmanship that has been the Hood hallmark for 50 years. To discuss your sailcloth needs – whether our state-of-the-art Vectran® or our soft, tight-weave Dacron® – give us a call today.

LETTERS

were given some really good drugs. They then used our credit card to buy six seats on an Aero Mexico commercial flight. The six seats were removed so we could fly north on a stretcher in a cordoned off area of the plane.

If anyone has firsthand experience with DAN, we’d love to hear about it. Email richard@latitude38.com.

THE ‘OLD BIRDS’ HAD BETTER WATCH OUT!

The accompanying photos are of the two young Beashel boys sailing on the south end of Lake Macquarie, Australia. The older of the two is 18 months old, proving that they start them young Down Under. The boys are the sons of Adam and Lanee Beashel.

The boat was built by the boys’ grandfather, Ken Beashel, a sailing legend in the Sydney area. Ken designed, built, and sailed most of the skiffs found locally, and garnered numerous championships over the years. Adam, one of Ken’s sons, is the guy you saw up the mast of Team New Zealand when they raced in the America’s Cup. Colin, Ken’s other son, was at the helm on a bunch of Australian America’s Cup challengers, and a top skiff sailor in his own right. Colin now runs the family boat shop in Elvina Bay, Pittwater.

Ken put a bowsprit on the grandkids’ little skiff because he plans to fit a different rig later, including a ballooner. Unlike the ‘real’ skiffs, the grandkids’ skiff has a keel with a bulb.

I used to race against Ken in a variety of boats in the ’60s and ’70s, so I stopped to visit when I cruised down here with my boat. The Beashel spread is on Lake Macquarie and its front door about 30 feet from the water’s edge, which has a gently shelving beach. Their Townson 38 is moored just offshore. Pretty sweet.

Father and sons were frolicking in the water when we arrived.

The rest of the day was spent at a nearby sailing club, watching a fleet of 10-footers racing for the state championships.

With a bowsprit and a bulb keel, this is one souped-up skiff. And a toddler is sailing it!

With the new kids on the water, the ‘old girls’ are going to start feeling the heat.

Call to schedule: 510.522.2886

QUOTES OF THE DAY

Sure, the British can knock you on the head as well as anyone.

No less than the Bay Area’s Stan Honey came out in Latitude last month to say, “The French world of offshore sailing is a very closed world, and it is a huge honor to have them ask me to come along.” I would expect nothing less of Honey

Tel. (329) 295.5526 • Cel (322) 205.7467 • www.marinarivieranayarit.com
for a quote like that to sum it all up.

Now to the quote of the day, from Loïck Peyron of France, who is a floater on *Alinghi 5*: “I have the chance to learn something every day. I love to jump from one boat to another. A year ago I was sailing around the world on my own, and here I am sharing with tremendous guys with a lot of different sailing areas, from the Volvo Race, from the Cup. For me, it is the first time that I have felt the acceleration of a small multihull, like I love to do on the Swiss lakes, like the D35 or the small really light ones. But *Alinghi 5* has the power of a big offshore multi, and the acceleration of a small multihull. It is the first time I have felt both these two feelings.

“It is quite interesting to be at the helm of a boat like this, having behind me Mr. Butterworth, and in front of me, Mr. Warwick [Fleury], and Simon [Daubney], stars I have seen in the papers for so many years. And I have to say, ‘OK, guys and now we have to do that...’ And so for me, that is quite interesting.”

Despite all the whining from the TV broadcast mentality crowd, I think the current America’s Cup is good for sailing.

One last quote from Honey: "Franck Cammas is an incredible athlete, but he is also a very smart engineer who thinks things through technically. He’s a very, very smart guy.”

I don’t know what these French guys have been drinking, but I want some, because they ain’t like us.

Brad Smith
Hobie 18
Santa Cruz

Brad — We don’t really understand what you’re getting at, particularly how Brits hitting you over the head has anything to do with the French offshore world being a very closed one. If your point is that the French are more passionate about offshore sailing than the people of any other country — including New Zealand — we’d have to agree with you. What many people may not realize is that almost all of the French sailing greats come from southern Brittany, where the sailing conditions are very difficult, and the often small and wiry French sailors are up to the challenge.

SO NOW PROSTITUTION IS FINE?

In explaining the many virtues of Thailand, you mentioned that one of them is: "If you’re a lonely guy, you can find an attractive young Thai ‘girlfriend’ in about 10 minutes on any night of the week. Even if you’re 80 years old.”

That might be wonderful for old, fat, unattractive men who don’t care about exploiting other people’s misery, but I’m sure that it’s not so wonderful for the people of Thailand. I am not a puritan, nor do I believe that all relations have to be between people of a similar age. But I do believe that sex should be something for the mutual enjoyment of all parties concerned, not entered into because one person is in poverty. Then it’s exploitation.

As for the age differences, there’s a reason why we have statutory rape laws in the U.S. Maybe we’re overly restrictive, but there is a place for them. Maybe you disagree and think that it’s fine for senior men in the United States to have sex with 12- or 14-year-old girls. Or maybe you just feel that it’s okay in Thailand, but not in the United States.

And please don’t try to claim that you were only reporting on the facts. From the context, it was clear that you were saying this is a positive thing.

John — Who said anything about 12-year-old girls? Since you completely missed the context, we’ll give you our two-word idea of what should be done with men who prey on underage girls and boys: Death penalty. Need any more clarification?

As for sexual and other relationships between Thai women of age and Western men, we don’t claim to begin to understand them, but we can assure you that they are much more nuanced and complicated than you think. Certainly some of it — heck, a whole lot of it — is slam-bam-never-see-you-again sex. But judging from the nearly nonstop shrieks of the five million or so bar girls we walked by in Thailand, nobody was holding a gun to their head and making them giggle. For all we know, many of them think their line of work is preferable to being married off against their will for money by their parents to some Thai boy or man they hate — particularly if there is some chance they can get their hooks into a Western male.

One of the things that surprised us on our recent trip to Thailand was learning that many Thai women — and apparently many Vietnamese and Malaysian women, too — prefer relationships with Western men. We’re told that many Thai women often view even old and fat Western men as being more romantic, courteous, and respectful and less abusive than Thai men. Apparently the latter have a reputation for liking to spend time with other men drinking, gambling and visiting prostitutes. Google around and you’ll see that we’re not making this up.

The other thing that may not be obvious from Oakland is that women in other parts of the world have very different concepts of what makes a man desirable. About 20 years ago, we sailed Big O to Fantasy Island in Costa Rica’s Gulf of Nicoya. The place was then owned by an 82-year-old retired sailor from California’s Central Valley. While we were at the bar, a gorgeous 23-year old Filipino girl with an electric smile and terrific personality introduced herself as the wife of the owner. She explained that they’d met while he was traveling in the Philippines and had fallen in love. And she was certainly enjoying her life with her husband in Costa Rica.

One last curious thing about Thailand. For all its reputation as the sex capital of the world, the Thai people avoid public displays of affection. While it’s changing in Bangkok and the cosmopolitan areas, Thai couples generally don’t hold hands, hug, kiss, or even air kiss. About as intimate they get is sniffing each other’s necks — we’re not making this up — from a distance.

ANDREA DORIA? WAS SHE ON AMERICAN IDOL?

I’d like to comment on Dave Ganapoler’s December letter regarding right of way. Not to pick on Dave, but I’m sure we’ve all heard, “Starboard!” and thought, “Huh?”

There’s a good reason why the stand-on vessel should not alter course in a crossing situation, and why the give-
Four Reasons You’ll Go Fast and Stay Fast.

STRATIS is the latest in advanced sail technology from Doyle Sailmakers.

● EASIER TO TRIM. Doyle’s 3-dimensional fiber-mapping program precisely aligns STRATIS fibers according to wind and stress loads.

● FASTER. The same sail designers that bring Olympians and World Champions their sails are behind every STRATIS design.

● LIGHTER. Doyle’s unique pre-preg fiber and film lamination process precisely controls the amount of adhesive in each STRATIS sail.

● MORE DURABLE. STRATIS precision lamination means strength; STRATIS yarn-laying precision means effective shape-holding across the wind range. The combination adds up to durability. For the full story on STRATIS custom made load-path racing and cruising sails, visit www.doylesails.com

Better Engineered Sails
way vessel should make "early and substantial changes" in
course. Let's say you're sailing on starboard, and you decide
to head up a bit to cross behind a powerboat. The conscien-
tious powerboat operator is going to alter course a bit to port,
to pass behind you, and so on, and the next thing you know
you're the Andrea Doria.

The other possibility is being the victim of a not-so-con-
scientious operator, which happened to me on Lake Erie. The
appropriately named Pirate Clipper, a 6-pack charter fishing
boat, was motoring slowly on a converging course with no-
body at the helm. I altered course to pass astern, and ended
up sailing — at 15 knots — over some bait box contraption
they were dragging, which damaged my boat. I should have
made a more radical course alteration, or sounded a horn,
but years of sailing among other experienced boaters — both
power and sail — on San Francisco Bay lulled me into think-
ning that most boaters have some idea how to operate their
vessels and at least some awareness of the Rules of the Road.
Bad assumption.

P.S. Keep up the good work. Latitude is one of the ways I
survive the snow.

Bill Quigley
Tatiana, Farrier 32
Alameda / Columbus, OH

Bill — Younger Latitude readers may not be familiar with
the Andrea Doria, so we'll fill in the blank. The Andrea Doria
was an elegant 700-ft luxury cruise ship that carried 1,200
passengers and 500 crew. She was owned by the Italian Line,
and was the pride of post-World War II Italy before transatlant-
ic jet travel took over. The Andrea Doria collided with the Swedish
American Line's 525-ft Stockholm off Nantucket Is-
land on July 25, 1956. The Andrea Doria
had been inbound for
New York, the
Stockholm had
just left New York
for Sweden. Struck on her beam, the top-heavy Andrea Doria
immediately started to list so severely that half of her lifeboats
were unusable. To make matters worse, many of the Italian
crew abandoned the passengers and rushed into the lifeboats.
Fortunately, only 46 people died, many of them as a result of
the impact and immediate flooding. The Andrea Doria sank the
next morning, the last of the great transatlantic ships to go to
the bottom.

It's hard to believe, but despite heavy coverage in the press,
no determination of the cause(s) of the accident was ever pub-
lished. This was apparently a result of an out-of-court settle-
ment between the two shipping companies.

††"IF THEY MAKE IT, YOU'LL EAT CROW"

In the February 8 'Electronic, you asked Latitude readers if
we thought you were being too harsh on Jessica Watson and
Abby Sunderland, the two 16-year-olds who are attempting
to singlehand around the world non-stop via the Southern
Ocean. I don't think Latitude has been too harsh, and if ei-
ther or both of them make it, I'm sure you'll happily lead the
celebration and eat a bit of crow.
Whether you are replacing one stanchion or upgrading your entire boat, we manufacture a complete line of stanchions, bases and gates.

- Stanchion tubes available in 3 different tip styles
- Stanchions and gates can be made removable or with fixed bases.

I don’t know of any sailors who would have taken off — like Abby did — with so little preparation and testing, and all by a volunteer and resource-challenged shore crew. Power generation and power output is pretty easy to check, so Latitude’s dig in that regard was more than fair.

I don’t mind that the kids, Jessica and Abby — God bless ‘em and keep ‘em — don’t know any better. But their parents are another story.

I don’t know anything about Jess, but it seems pretty clear to me that Abby wouldn’t get to Catalina without her family’s active support. That said, life is all about choices and, for the moment, they have been made. Abby is underway, and it would be less then charitable to wish her and her family anything less then fair winds and a following sea.

Christopher Korody
Se Vuela, J/32
Marina del Rey

Christopher — For the record, if either or both of the girls make it around as planned — and even though Watson is halfway around, we still don’t think either will — there is no way we could or would deny what they had accomplished. We’d still think it was idiotic and irresponsible on the part of their parents to have let them make the attempts.

INSULATED AND ISOLATED FROM REALITY

I think Latitude has been right on about Abby Sunderland. After reading the heartfelt daily posts from her brother Zac during his circumnavigation, I felt as if he was my son or brother or fellow sailor. Abby, on the other hand, seems to think of herself as a Hollywood starlet, insulated and isolated from reality. Her thing is all slick and glossy.

After Zac came home and rumors of Abby’s trip started to circulate, I couldn’t believe my ears. What mother/father would willingly sacrifice their 16-year-old daughter to the trials of the sea? After Zac’s hair-raising trials, I cannot imagine allowing my daughter to follow in his footsteps. It’s the gender thing! Not that there is difference in talent, but I would be concerned for her virtue. You know, pirates and so forth.

Personally, I don’t believe Abby has been “sailing all her life.” From what I can tell, the family has been without a boat for many years, and they live 30 miles inland.

Most of all, I’m concerned about Abby’s boat. We all know how many repairs Zac had to have made to his boat. Nonetheless, I wish Abby the best, and will continue to follow and root for her.

Name Withheld By Request
Planet Earth

N.W.B.R. — It’s a common misconception that Abby plans to “follow in Zac’s footsteps.” Nothing could be farther from the truth. Zac took a relatively easy route, and stopped many times for repairs. Abby, on the other hand, plans to not just sail around non-stop, but via the treacherous Southern Ocean.
Ask the Experts...

“How do I choose a bottom paint with a reduced environmental impact?”

Whether you are a boat owner applying your own paint or you’re a boat yard that applies paint for a living, we all – as individuals and companies – have an interest in keeping our boating environment healthy, prosperous, safe and simply a pleasurable experience. By considering the environment in our day to day activities, we can examine ways of reducing our overall environmental footprint. Today, the topic is bottom paint and how to choose product(s) that deliver the results that are important to you. Look for products with multiple improvement* options such as:

- **Reduced Solvent Content:** a lower solvent content in the paint will reduce the amount of organic compound emitted into the air. Normally, you would also get a thicker film and improved longevity from a ‘high solids’ bottom paint.

- **Polishing Action:** with self-smoothing characteristics an ablative paint will maximize on fuel efficiencies and the right product will help reduce green house gases by consuming less fuel.

- **Copper-free Formulation:** Copper occurs naturally in all waters around the world and while high concentration levels can be harmful to humans and the environment, copper is an essential micronutrient to life and a certain amount is essential for the well-being of animals, including humans**. The accumulation of copper in some marinas has led to the demand for products that can help boat yards reduce the overall copper content collected when hauling & pressure washing boats. A copper free product can be suitable for professionals and consumers alike.

**Pacifica Plus from Interlux may just be the paint for you.** Pacifica Plus is formulated with the latest biocide technology Econea™, which allows for a decrease in total biocidal content without compromising on performance. Even though we have added Biolux® technology to deter slime, Pacifica Plus contains approximately 80% less active biocide ingredients than other leading antifouling paints.

The product is the perfect choice for boat owners and boat yards seeking to reduce their environmental footprint.

For even greater environmental improvement, Interlux also offers Intersleek 900, a metal-free, biocide-free reduced emissions coating. Professionally applied by boat yards, Intersleek 900 is a foul release system with super low surface friction, leading to great fuel efficiencies if properly maintained.

* Compared to standard, old fashioned hard and ablative antifoulings.

** For further details see the summary provided by the National Paints and Coatings Association on the ‘Boating and the Environment’ section of Interlux www.yachtpaint.com

Find more answers at yachtpaint.com
LETTERS

This is an enormously more difficult challenge because of the much more severe weather and greater stresses on the boat's systems. Sailors like Yves Parlier have managed to effect miraculous repairs to their damaged boats on such routes, but Abby ain't no Yves.

††SHE MAY NOT BE READY BUT SHE WORKS HARD
I came down on the Ha-Ha this year, and have stayed in Cabo ever since. After Abby Sunderland pulled in with electrical problems, I saw her and her parents working on the boat.

Although I'm also a bit skeptical about a 16-year-old's ability to solo circumnavigate, Robin Lee Graham sailed his Lapworth 24 Gladiator three-quarters of the way around the world when he was that age. And his was a much more dangerous prospect as, unlike Abby's fully-equipped Open 40 Wild Eyes, Graham's boat didn't have a watermaker, AIS, radar reflectors, electronics, GPS or a reliable way to communicate with land. His trip was therefore much more dangerous.

I'm not passing judgment, but I did see Abby up the mast doing some, if not all, of the work on her boat. As she has already made her choice, we can only wish her luck and see what happens.

Tim Marsolais, Crew Marishanna, Wylie 39 San Francisco

Tim — While Robin Lee Graham's circumnavigation was much harder because his boat and systems were much more primitive, he — like Zac Sunderland — sailed a much easier course. Around-the-world, solo, non-stop, via the Southern Ocean, is a monster challenge.

††A THOUGHT ON THE TOPIC
Latitude is being too hard on Abby.

Vince Brackett Planet Earth

††ANOTHER THOUGHT
Too harsh.

Dale DeHart Camarillo

††SARCASM SUCKS!
Your points could have been made in a much better manner. I agree, 16-year-olds sailing around the world is foolish at best. But sarcasm sucks.

Daniel G. Hayes Planet Earth

††I APPRECIATED THE SARCASM
I don't believe Latitude's coverage of Abby and Jessica has been mean. Furthermore, I appreciated and enjoyed the unnecessary sarcasm. My disdain for Abby runs deeper than for Jessica, and time will tell if her lavishly sponsored joyride/publicity stunt will pay off as well for her as it did for her brother.

Having tried to put together a bluewater cruising boat and the finances necessary for cruising with my wife and four kids, then losing the boat — selling her at quite a loss — due to the economy, I will certainly think twice about using the products of the sponsors of Abby's boat. Not as if I would wear those shoes anyway. Marine products are expensive enough, and while I will never deny the attempt of a company to make as much money as they are able, I hate to see the profits of my boat gear purchases going to such a waste. And I know that

KIDS SPURRED BY PUBLICITY SEEKING PARENTS

If anything, I think Latitude has given these girls — and the other kids sailing around the world — too much attention. These kids seem to be actors in spectacles developed and managed by adults and enabled by a too-eager-to-please press.

I was in elementary school when Robin Lee Graham sailed Dove and Dove II around the world. As I recall, the only coverage of the trip was an article every few years in National Geographic. Graham later wrote a very good book about the whole adventure. The press in those days covered only what he actually accomplished, not up-to-the-minute reports of what he planned to do, wanted to do, or thought he could do.

I thought the coverage of Zac Sunderland’s circumnavigation was a bit too breathless for a kid who was met by his parents at every port with a whole support team. It left me wondering how much he did, and how much he did as he was told. What did he learn along the way? And was there a point to it other than to garner attention?

I find the whole spectacle of ‘adventurers’ seeking sponsorship so they can go do something fun for them — and of dubious value to anyone else — to be somewhat decadent. And in the case of kids, spurred on by publicity seeking parents, it’s even worse.

It seems to me that young Jessica Watson knows what she is doing, and is doing it well. Bully for her. But this Abby girl seems only to be seeking attention. If she wanted to prove she was capable of sailing around the world, she should have started with a manageable voyage on a boat she could handle. As for running short of electrical power on the way to Cabo, she could have saved a lot of energy by waving goodbye and telling us her story after she finished her voyage. I don’t think the world needs daily broadcasts.

If Abby could have proved herself with a voyage to Hawaii or Panama — or wherever — then she could have fine-tuned her boat and carried on. If she found herself too weak or too scared or too bored, she could quit and try again when she has grown up. But she can’t take any of those prudent steps because her goal is to be the youngest. For that, she must seek money now and sail now and sail now, no matter if she’s ready or not.

I’m much more impressed by people who take off and learn to live at sea, whether retirees or relatively young. Or like the surfer girl Liz Clark, who is often featured in Latitude. There is a young person who seems to be learning from life, gaining independence, and achieving various personal goals — but not waving them in front of us, asking for our money, or unduly relying on outside assistance.

I don’t see the Robin Lee Graham spirit in the two girls, so even if they get around the globe at their young age, their accomplishments will seem hollow.

Jonathan Ogle
Grumpy old fart
Serendipity, Pisces 21
Piedmont

Jonathan — While Liz Clark is engaged in a very different kind of adventure than Jessica or Abby, and has often sought to avoid rather than get publicity, it must be noted that she couldn’t be doing what she’s been doing without a large amount of finan-

ASK ABOUT OUR NEW RACING SAILBOAT PROGRAM!

It’s a Mariner’s Fact:
A whistle is one of least expensive, most effective safety items to have attached to your lifejacket for crew overboard situations.

ATTENTION CRUISERS! MEXICAN LIABILITY INSURANCE ONLINE
Getting your boat serviced shouldn’t feel like highway robbery. You shouldn’t pay for services you don’t need, or didn’t expect. And you certainly don’t need surprise add-ons when you get the bill. At Bay Marine Boatworks, we’ll quote you a price up front and we’ll stick to that price. Whether you need simple bottom painting or complex fiberglass repair work, you’ll find we can handle all your sailboat maintenance and repair needs. Call our new management team at Bay Marine today, and this time, get your money’s worth.
cial support from her parents and others. On the other hand, Liz hasn’t shied away from months and months of the lowest grunt work on her boat in the most unpleasant conditions.

‘HARSH’ DOESN’T EVEN COME CLOSE

‘Harsh’ is not a strong enough word! Your ‘holier than thou’ attitude is way over the top. In reading your magazine, I have learned to read the letters, but not the replies.

Robert Lockwood
Celebration, Gulfstar 50
Alameda

Robert — Ouch! But thank you. While we realize that there is no way we can please all our readers, it’s important to get a good slam every now and then to encourage us to review our opinions and points of view.

I LIKE THE SUBTLE HUMOR

I think your coverage of most stories is even-handed and I always like the subtle humor. So you’ve been doing just fine with regard to Jessica and Abby.

As I write this, Jessica is more than halfway around the world, and doing well managing her boat’s systems — even after some very seriously nasty weather that caused her boat to be knocked down. She’s doing it, so what else can I say, but ‘Go Aussie, Go!’

As for Abby, if she — and the adults around her — had announced that she had been doing a shakedown sea trial to Cabo, that would have made sense. But we all know she only stopped in Cabo because she had to “to repair and re-vamp some systems.” Specifically, she was using more amps per day than she was generating. Most experienced sailors I know would have cut back and managed, and repaired as they went, as opposed to going to mass storage and putting more stuff aboard.

A 7- to 14-day singlehanded voyage would have been a proper shakedown for Sunderland before attempting a non-stop circumnavigation via the Southern Ocean.

I think there was too little preparation of the skipper and the boat. As time has marched on, it looks more and more as if they are operating under the pressure of getting her around before she’s too old for the record.

Nonetheless, I wish both girls the best of luck. I also hope they stay safe, keep their harnesses on, stay with their boats, and return safely to their families with new life skills attained only on a voyage that would test any person.

Keith MacKenzie
Vancouver B.C.

WOULD YOU FEEL RESPONSIBLE?

My question is for those who have been and continue to be enthusiastic supporters of 16-year-olds Jessica and Abby. If either girl were to go permanently missing in the Southern...

⇑⇑

SHOULD THE PARENTS BE CHARGED?
I have been writing a weekly piece about Jessica Watson’s progress on her circumnavigation for Examiner.com. While I admire her sailing abilities and courage — and now that of Abby — I am nevertheless left with one nagging question. If either or both of these adolescent adventurers should meet with disaster, should their parents be charged by authorities with child endangerment?

Ray Pendleton
Honolulu

⇑⇑

LET US THINK FOR OURSELVES
Why do you have to be critical of either? Why not just report what is happening and let your readers form their own opinions? Most of them can think for themselves.

Curtis G. Smith
Planet Earth

Curtis — As arrogant as this might make us sound, most casual sailors don’t have enough knowledge about the proposed trips to “think for themselves.” Specifically, many people assume that Abby will be “following in Zac’s footsteps.” This would be like saying somebody climbing Mt. Everest is following in the footsteps of someone who climbed Mt. St. Helens and who had R&R crews every 100 yards.

Besides, we think it’s our responsibility to be critical of what we believe are pointless publicity stunts that recklessly put the lives of minors at risk. If we prevent even one stage mother or father from encouraging their 14-year-old daughter to attempt to sail solo around the world for fame or glory, we’ll feel our efforts have been worthwhile.

⇑⇑

AGED-BASED RECORDS ARE FOR THE BIRDS
Latitude hasn’t been nearly as hard on Abby as the Southern Ocean will be if she gets there. Personally, I think this whole age-based record stuff is for the birds anyway. Once we get into this challenge of being the youngest or whatever, any record will be fleeting. By the time there’s an eight-year-old circumnavigating solo, no one will remember who Abby Sunderland was because she’s not really pushing the limits of human endeavor.

Having said this, I know the risks for the girls are real, and I wish them well. I’m just not sure I understand the point.

Andy Crawford
Hope, Cal 25
Long Beach

⇑⇑

DON’T FORGET ABOUT JEANNE SOCRATES
More interesting to us than Jessica Watson and Abby Sunderland is what’s up with Jeanne Socrates. You’ve written about her and her Najad 380 Nereida before, but do you realize that she, at least to our understanding, is the ‘most senior woman’ to have done a singlehanded circumnavigation? And she’s attempting another one via the Southern Ocean!

When I was 16, as Abby and Jessica are now, I could have sailed around the world with the support systems they seem to be getting — no sweat. But Socrates, well into Social Security age, that’s something to get excited about.

Scott — You raise a good question. What would be more impressive, a heavily supported 16-year-old girl singlehanded around the world for fame and glory or a self-funded 60-something-year-old woman doing the same thing for personal satisfaction?

In case you missed it, an autopilot control unit malfunction off southern Mexico in ’08 left Socrates 60 miles short of completing a singlehanded circumnavigation — but we still consider her to have finished. Right now she’s in South Africa finalizing an engine replacement so she can continue her attempt to sail solo around via the Southern Ocean. At last word, she hopes to make it to this summer’s start of the Singlehanded TransPac.

Unlike the kids, Socrates, who prefers not to play up her age, does not have a big ‘support team’. And for the record, she’s told us that she has no way of confirming that hers would be a real record. Follow her trip at www.svnereida.com.

Greg Clausen
Wisdom, Santana 30/30
Marin County

Greg — A major breakdown or a big storm are the two biggest challenges any voyager faces, along with physical and psychological stresses. Even though Watson has been doing great and is more than halfway around, we still think her attempt is going to be done in by some kind of mechanical failure.

Let’s hope she has everything she needs

When Abby starts out for the second time, let’s hope she finally has everything she needs — like a spare fork and spoon. She must have knives. And spare pens or pencils. Windspeed and direction instruments. A charging system. She probably didn’t have time for a windvane.

I believe the coverage from Latitude has been fair and polite enough. Personally, I’d love to be able fly around on an Open 40. But at this point I think Jessica’s Pink Lady is the more capable and prepared vessel. I sincerely wish Abby the best, and Jessica has suggested that we adults shouldn’t be choosing sides.

Almar is the largest operator of saltwater marinas in the country. Almar Marinas provide a wide range of services and programs that few marinas or yacht clubs offer. Some of these programs include: monthly boating seminars, boat handling classes, navigation courses and organized outings to local anchorages. Each marina offers wireless high speed internet access, which can be used with your reciprocal privileges at any Almar Marina. To see the difference, visit one of our marinas this weekend.

almar.com
HISTORY IS FULL OF 'WHAT IFS'

Latitude probably would have been critical of the Children’s Crusade in the 12th century, when something like 30,000 children in France and Germany took it upon themselves to travel to the Holy Land and convert the Muslims to Christianity. Sure, most of the kids never made it to the Holy Land because the Med didn’t part as they expected it to. And the few who set out by boat were shipwrecked off Sardinia or sold into slavery in Tunisia. But they had good intentions. And imagine how great it would have been if they succeeded.

Jonathan Ross
Pleasanton

HOLD HER TO THE STANDARDS SHE WANTS

If Abby is old enough to go to sea, she’s old enough to be held to the same standards as anyone else. As the captain of her vessel, she’s responsible for its safety and good order at all times — without exception. Any errors in planning, preparation or performance are, by definition, her responsibility. Latitude has been paying her the respect of treating her as she has asked to be treated — as a full-fledged sailor, who, before she leaves, should be “ready in all respects for sea.”

Beyond that, I think that the ethics of responsible journalism would call upon Latitude to emphasize the need for adequate preparation for a long voyage. Let’s not encourage the naïve and excessively optimistic to throw a few cans of tuna into a locker and head for the far beyond.

If Abby is “only 16,” maybe she should stop in Puerto Vallarta and enjoy the summer. If she really is going around alone, she’s going to grow up quickly, and will no doubt return to us a young adult. Latitude, as it should, is helping to start that process by holding her to adult standards from the start.

Bob Schilling
Tuckernuck, Cherubini 44
Long Beach, CA

SHE’LL BE TREATED MUCH MORE HARSHLY SOON

Latitude hasn’t treated the girls as harshly as high latitude storms will. On a voyage such as this, Abby and her shore team should be very, very hard on themselves.

Lawrence Riley
Planet Earth

YOU’VE BEEN FAIR

Your treatment of the two sailors has been fair.

Bill Sewall
San Jose

ANGRY AS A TAILGATER IN A JACKED-UP PICK-UP

Latitude’s coverage of the kids’ attempts to circumnavigate — especially Abby’s — has indeed been churlish. But then Latitude has been getting ever-rastier for some time. Legitimate are concerns over whether the girls are mature and experienced enough. And it’s natural to hear of their ages and think of that 16-year-old girl who damn near ran you over while texting. When you consider historians’ reports of numerous square-rigger captains who were 19, however, and consider how many young women are now rising above alpha males running businesses, it seems plenty plausible for a couple of teenage girls to sail the globe in modern boats equipped with the latest labor-saving and risk-reducing devices.
A HARD, ABLATIVE, MULTISEASON, DUAL BIOCIDE ANTIFOULING BOTTOM PAINT IS TODAY’S MOST EFFECTIVE PROTECTION AGAINST THE MOST AGGRESSIVE FOULING AND SLIME. VIVID IS THE MOST PERFECT EXAMPLE OF THIS NEW BREED. NOT ONLY DOES ITS HARD SURFACE BURNISH TO A SUPER SLICK FINISH, IT GETS EVEN SMOOTHER OVER TIME, MEASURABLY INCREASING HULL SPEED AND FUEL EFFICIENCY. AND, UNLIKE ALL OTHER ANTIFOULINGS, VIVID COMES IN 24 BRIGHT COLORS PLUS A BLACK BLACK AND WHITE WHITE. VIVID IS THE FASTEST, MOST EFFECTIVE, MOST EFFICIENT, MOST COLORFUL, MOST HIGHLY EVOLVED BREED OF ANTIFOULING. IT MAY JUST BE THE PERFECT ANTIFOULING.

www.pettitpaint.com • 800-221-4466
It’s not just coverage of the girls: When Latitude was young, it seemed edited by a Miata driver. It was agile, light and fun. In recent years it’s sometimes driven by an angry tailgater in a jacked-up pick-up truck.

Brooks Townes
Weaverville, NC

Brooks — “An angry tailgater in a jacked-up pick-up truck?” You sure you got the right people? We’re the ones who are deeply bothered that our government won’t let us buy a VW diesel that gets 55 miles to the gallon and lasts for 300,000 miles — such as were available 30 years ago. They might not be good for angry tail-gating, but they are functional transportation, and would meet with our stated but unrealized national goals of reducing dependence on foreign oil and reducing the carbon impact on the planet.

It’s true that there were square-rigger captains as young as 19. But we can’t help thinking that they’d already had a lot of harsh ocean experience — maybe 10 years — before they got those positions. In any event, as we’ve written before, if somebody is 18 and wants to sail around the world in a bathtub, god bless, they are no longer minors and they can make their own decisions.

⇑⇓

A WOMAN’S POINT OF VIEW
Yes! You have been too harsh on Jessica and Abby.

Teresa Morey
Planet Earth

Teresa — For what it’s worth, the ‘Lectronic piece that sparked accusations of our being “too harsh” was written by Latitude’s LaDonna Bubak. It struck the publisher as being a wee bit harsh, but we appreciated the unvarnished opinion of our female editor.

⇑⇓

YOU SHOULD BE HARSH ON ABBY’S FATHER
I’m concerned about the kids. The one you need to be hard on is Abby’s father for sending her out before she’d even done a decent shakedown cruise. He did the same thing with Zac. Check out how many times Zac broke down.

Good luck, Abby. You’ll need it.

Humu Humu as a Morrelli/Choy 70. But as the years went on, and the Morrelli & Melvin firm became ever more famous, Morrelli & Melvin instead of Morrelli & Choy began to slip off our tongue and keyboard. Our apologies.

As for Tristan and Mindy’s invitation for readers to check out their blog, we have to advise caution. The photos of them and their boat in the South Pacific are enough to make anyone sitting at a desk in California sick with envy. And their reports, such as the one that follows, won’t make you feel much better:

“It’s been calm — virtually no wind and stifling hot! We’ve been waking up to 85-degree heat with 91% humidity. Luckily, the water is still cool and refreshing. We decided to take advantage of the calm seas and head to Maninita, the southernmost anchorage in the group. It was beautiful — a clear shallow lagoon surrounded by a vibrant reef. We spent a few days on the island with our friends Noah and Vickie from Serenus, as well as Kevin and Brandie and their kids, who are transplants from Texas now living on Eueiki Island. We, of course, spent our time snorkeling and exploring, but Noah and Kevin also went spearfishing and came back with a prize — a dog tooth tuna that must have weighed at least 150 pounds. It was a tasty BBQ that evening!”

Think you can take more?

“After Maninita, we spent a few days in Kenutu and then meandered over to Port Maurelle. All were beautiful — but hot! On a particularly sweltering day, we escaped the boat for a walk, and found a trail leading us into the bush with tons of mango trees. We were overwhelmed by the pungent smell of rotting mangoes, which was oddly comforting, and reminded us — hey, we’re in the tropics! We picked through the fruit on the ground and had a delicious snack on our walk. At the end of the trail we were greeted by two children pushing an empty wheelbarrow around. They led us into a charming village with a beautiful white sand beach.”

We’re hoping for a more detailed report from the couple on what it’s like to cruise the South Pacific aboard a small cat that’s nearly 50 years old.

⇑⇓

**LETTERS**

**DO EXTREME EVENTS HAVE TO BE DELAYED?**

In a recent ‘Lectronic, you wondered whether any sporting event has been delayed as much as the 33rd America’s Cup. The answer is yes! The Mavericks Surf Contest here at Pillar Point.

Alan Smith
Pillar Point
LEG 1 - Newport Beach to Easter Island
24 days  3800 mi.  Oct 30 - Nov 23, 2010
Fantastic open ocean sailing, an equator crossing and landfall in the world’s most remote inhabited island. $3950

LEG 2 - Easter Island - Puerto Montt, Chile
19 days  2500 mi.  Nov 24 - Dec 13, 2010
Primal Moai statues make a dramatic backdrop as Eagle sails into the southeast trades toward Chile. There will be plenty of time to practice celestial and other traditional sailing skills. $3050

LEG 3 - Puerto Montt, Ushuaia, Argentina
23 days  1400 mi.  Dec 19 - Jan 11, 2011
This area is less traveled than Antarctica with some of the world’s most spectacular scenery. Conditions are varied with literally sun and snow on the same day. Days will be spent exploring the inlets where glaciers, waterfalls and snowcapped peaks are found. $3850

LEG 4 - Ushuaia - Cape Horn - Ushuaia, Argentina
10 days  300 mi.  Jan 18 - Jan 28, 2011
Covering three hundred miles in ten days sounds easy unless the itinerary is a rounding of notorious Cape Horn. While on many sailors list, this is not a trip to be taken lightly. $3000

LEG 5 - Ushuaia - South Georgia Island - Buenos Aires, Argentina
31 days  2700 mi.  Feb 4 - March 7, 2011
Extreme sailing and an exploration of a magnificent sub-Antarctic island, followed by a grueling stretch of Southern Ocean sailing to Buenos Aires. $6900

LEG 6 - Buenos Aires - Rio de Janeiro, Brazil
14 days  1200 mi.  Mar 14 - Mar 28, 2011
Stopping in Punta del Este and Rio de Janeiro, Alaska Eagle will be returning to two of the ports that were part of her Whitbread Racing career. $1950

LEG 7 - Rio de Janeiro - English Harbor, Antigua
28 days  3500 mi.  Apr 1 - Apr 29, 2011
Southeast trades, an equator crossing, then on to the Northeast trades! Arriving in Antigua will be the culmination of nearly a month at sea and Alaska Eagle’s South American adventure. $2895

This year’s voyages are for those looking for extreme adventure. These voyages are the heart and soul of what Alaska Eagle was built to do: Sail extended offshore voyages to exotic destinations.

This year’s applicants must have a strong sailing background, be in excellent physical condition and have a highly honed sense of adventure.

www.occsailing.com
949-645-9412
1801 W. Coast Hwy,
Newport Beach, CA 92663
Readers — Mavericks is a world-renowned big wave break a half-mile off Half Moon Bay. Every winter between November and March, a handful of the world’s best surfers wait to see if the stars will align to offer the giant 50-ft breakers the spot is famous for. Some years they’re disappointed. But when conditions are deemed perfect, 24 contestants are given 24 hours’ notice to get themselves and their boards to Northern California for some of the most awe-inspiring wave-riding on earth.

THE DANGERS OF THE DIGITAL AGE

In the story about John Connolly of Modern Sailing that was in February’s Sightings, you referenced the quote “He who can, does. He who cannot, teaches.” While not the precise wording originally used, it’s close enough for government work.

However, H.L. Mencken? Not remotely close. It was George Bernard Shaw.

Lee Turner
Greenbrae

Lee — What a careless error! That’s what we get for only checking the first five Google search results.

RIGHT INCIDENT, WRONG COUNTRY

Sorry I’m so late in writing, but we just arrived in Hilo from the Marquesas, and it’s taken awhile for us to get through the backlog of Latitude’s. My little correction is on a response you made to Roger Behnken in the October ‘09 Letters.

In your response, you say that a boat was attacked on the Pacific Coast of Colombia last year, and the crew “only survived because they attracted the attention of another cruising boat that happened to be near by.”

First, we didn’t just “happen to be near by,” we were cruising together for this kind of security.

Second, the attack didn’t occur in Colombia, but rather Punta Pedernales, Ecuador. We — our crew and the crew of the other boat — anchored at Punta Pedernales that evening, even though it was a terrible anchorage and almost completely unprotected, because if we’d kept going we would have arrived at our next stop, Punta Galera, Ecuador, after dark.

The attack was pretty much as Latitude described it — armed men boarded our friends’ boat and threatened them. At one point the male member of the husband/wife crew was pinned to the cockpit settee with a gun in his mouth. This is what got the female member of the crew screaming, and it’s what woke my wife, who woke me. The noise we made — including shooting off two SOLAS grade parachute flares — scared the attackers. They fled after taking a portable GPS and about $40.

My point is that, with the exception of the coast north of Tumaco to about Cabo Corrientes, the Pacific coast of Colombia is pretty safe. At least that’s how I felt when we were there. Every port we went into had a marine base, complete with Boston Whalers fully rigged with .50-caliber machine guns.

If you don’t believe in coincidences, why did Mavericks and the America’s Cup both go off at the same time?

guns mounted at the bow. All the solders were well-trained and equipped in new uniforms with new automatic rifles. I always felt that if we were boarded, the cavalry would be there in seconds.

The attack in Ecuador caught us by surprise. We were expecting Colombia to be the problem area. I’m sure our friends felt the same way, so please help us get the correct information out about Colombia.

P.S. Please keep my name and my boat’s name out of this letter. There are a few family members of the other boat who read Latitude, and as far as I know, still do not know about the attack. Naming us might tip them off. After some time in Hawaii, we’ll be taking off to French Polynesia.

Name Withheld By Request
Hilo, Hawaii

N.W.B.R. — We can’t apologize enough to you and Colombia for the error. One of the drawbacks of getting older is that sometimes we’re so confident of some information — such as what had been written in Changes about the attack — that we don’t feel we have to reread it to get the facts straight. We’ll try to do better in the future.

⇑⇓

TELL LIZ NOT TO SWEAT IT

I just saw in the February Changes that the propeller tube on Liz Clark’s Cal 40 Swell still leaks after what she and the yard in Raiatea hoped was an adequate repair. Liz need not despair, as I had the same problem with my Cal 40 and got it fixed.

For whatever galvanic reason, the bronze tube on my boat corroded severely. We first noticed the problem when a hole about 1/16” developed, with a similar-sized stream of water nearly sinking our boat after we’d been away for two weeks. Our ‘fix’ was to slide a section of rubber hose over the exposed section under the engine, and then secure it with multiple hose clamps. It wasn’t pretty, but it was a temporary solution.

But I want to assure Liz that we were able to remove and replace the bronze propeller tube without removing the engine or the V-drive. We did this when we hauled a year later with the help of Doug Grant, a former Cal 40 owner, of Vangenster in Southern California. It was Grant who convinced us to remove the whole tube.

The first step in getting the old tube out was to disconnect the propeller shaft from the V-drive, and remove it from the tube. Grant then concocted a ‘slide hammer’ from a six-ft section of stainless rod that was threaded on each end. After the rod was inserted into the tube, a 3/8” thick end-plate — which was the same size as the outside diameter of the tube, was fitted on the inboard end of the rod. The cap is what would ultimately slam against the tube and pull it out. A second, smaller cap, was attached to the outboard end. In order to finish making the slide hammer, Grant used a 15-lb brass weight, hex in shape for no apparent reason, and about eight inches long, as the hammer part. He bored out the center so it could slide along the half-inch rod.
Strictly Sail® Pacific

As for the actual hammering, we simply started sliding the brass weight along the stainless rod, until it got to the end and slammed into the stopper nuts. The effect was to smash against the inboard end of the bronze tube and begin to knock it out. When we slid the hammer hard enough, the tube would back out about 1/8” to 1/4”. After we did it a bunch, the tube had come out a foot, leaving two feet still inside the keel.

At that point, the tube in my boat just wouldn’t back out any more. Due to some weakness in the bronze tube, the inboard end started to mushroom. Knowing that lubrication always helps, we put some liquid soap on the part of the tube that had been exposed at the aft end, and then hammered it back into its original place. We then used a Sawzall to cut two inches off the inboard end of the tube, added some liquid soap to what was exposed, and resumed hammering. Then the tube started to move more easily. With each slam on the slide hammer, the tube would come out another half inch, until half of its three-foot length was out of the boat. The last half simply slid out.

It was a very satisfying process, especially as Dennis Chote, one of our highly regarded local boatbuilders, had suggested that we “simply” cut out the entire section of the keel and rebuild it after we replaced the tube.

The new tube, made of G-10 rather than bronze, was supplied by Doug Grant. He slid it into place with a healthy slathering of West System epoxy. It should last for a very long time.

Long Beach

Mike Harker’s story in the January Changes about the successful repair on his Yanmar diesel after the failure of an anti-siphon valve brought to mind many things that I learned during my decade of cruising in Mexico.

First, as my grandfather taught me, you can learn something new every day — as long as you’re not too stupid.

Second, properly looking after your boat’s power plant and drive train is an important and rewarding activity if you want to cruise happily.

Then we can go on into all the reasons to run a boat’s engine(s) regularly — and in gear! For instance, if a prop shaft isn’t turned for a prolonged period of time, the lack of water circulation at the packing gland makes the shaft vulnerable to crevice corrosion. And shaft replacement is not cheap. It’s not just the shaft that benefits from regular use, but all moving parts, such as in the transmission, the folding props, the shifts, and throttle linkages. If anything can be moved, it should be moved regularly.

Running all boat machinery, and then checking it for leaks, loose bits, proper belt tension, fluid levels, and so forth, should be routine and regular. Nobody should underestimate the importance of proper belt tension. I’ve seen many expensive high-output alternators cook out their bearings because a loose belt slipped enough to overheat the pulley and shaft during full-output charging.

Diesels are sturdy and reliable engines, but if you overheat them enough, it will cost you a bundle to put them back into service. This being the case, it’s critical to inspect things such as impellers, water strainers, heat exchangers, hoses, thru hulls, and all the other elements that keep the coolant happily doing its job. It’s not only a good habit, but it will definitely reduce the ‘Stupid Tax’ bill.

Of course, this tax is not limited to one’s own stupidity.

Harker, for example, had to pay for the stupidity of others, too. As far as I’m concerned, if a modern cruising boat like Harker’s has a plumbing system so reliant on a single anti-siphon, it was poorly thought out. I can hear the voices out there saying that their boats have never had any trouble with their anti-siphon valves. But I’ve also heard many motorcyclists say they’ve never crashed (yet), and many cruisers who say they’ve never dumped their dinghies in the surf (yet).

I say listen to the experiences of others, for my grandfather was right when he said you can learn something new every day. And after listening, resist the urge to say, “That can’t happen to me!” Look instead to the most remotely possible events, and check to see how you might reduce your vulnerability to them.

P.S. I still enjoy Latitude after all these years.

Tim — Boats and boat systems are like human bodies: the more you use all the parts, the better they work and the longer they last.

††FRIENDS FROM THE HA-HA AND DOO DAH RALLIES
The Super Bowl wasn’t the only big event on February 7, as five couples who are veterans of the Ha-Ha and/or Doo Dah rallies crossed tacks in Roseville for an evening of telling stories and lies, and laughing out loud.

Here’s the breakdown of who was there:
- Phil & Nora McCaleb, Hunter 42 Shiraz (Ha-Ha ’05 & Doo Dah ’09)
- Paul & Marilyn Butler, Tayana 48 Renegade (Ha-Ha ’06 & Doo Dah ’09)
- Randy & Nancy Rowland, Pacific Seacraft 27 Aphrodite (Ha-Ha ’04 & ’06)
- Chris & Robyn Parker, Island Packet 35 Robyn’s Nest (Ha-Ha ’06)
- Pat & Carole McIntosh, Hunter 430 Espiritu (Ha-Ha ’06, ’08 & Doo Dah ’09)

The only ones with their boat still in Mexico are the Rowlands, who ‘commuter cruise’ out of La Paz. The year after the Parkers sailed to Mexico, they loaded Robyn’s Nest onto a Dockwise ship for the trip to the Pacific Northwest, where they have been sailing ever since. Last year they made it to Alaska and back, and their boat is now in Vancouver, B.C.

Phil and Nora McCaleb made it to Panama before returning north at the end of the ’08 sailing season, and are again sailing out of Marina Village in Alameda. They, along with Paul and Marilyn Butler, became charter members of the ‘Cedros Island Yacht Club’, when they and several other sailboats were stuck there for a time waiting for a break in the weather on the way north in ’08. The Butlers sail out of Vallejo now.

We — Pat and Carole McIntosh — brought Espiritu north after two seasons in Mexico. Right after we got back, we signed up on the Latitude 38 Crew List and got berths on Sun Baby, a San Diego-based Lagoon 41 cat, for the ’08 Ha-Ha. We now have a trawler in Alameda.

With only five boats represented, it’s fantastic to realize how many other boats and people and places and special times came to mind, and the hundreds of mutual friends we have all made from the Ha-Ha and Doo Dah. We hope to see many, many more friends from these events at the Latitude 38 Baja Ha-Ha (and Delta Doo Dah) Reunion Party on April 16 at Strictly Sail Pacific.

Pat & Carole McIntosh
Peregrine
Alameda / Sacramento

Readers — It’s been said an endless number of times that the greatest thing about the Ha-Ha — and now the Doo Dah — is the friends you make.

CREDIT TO WHOM IT’S DUE

Just before Thanksgiving, David Davids’ sloop Melody ran aground on a reef outside the harbor at Santa Rosalia and was lost. Despite his loss, David was mortified that in Latitude’s report, most of the credit went to the marina employees, when there was actually only one who helped. It was the lovely cruisers in the marina who formed a tireless ‘fireman’s line’ up the cliff to remove as much as could be removed from his doomed boat. As David said, it was “like seeing the cliff lined with angels.”

After an entire night of sitting in his boat while it was being smashed apart on the reef, David could not believe that the Mexican government provided four guards, with machine guns, to guard his boat.

David would like both groups to get a bit of credit in your fine magazine.

P.S. After seeing what he could salvage, David managed to buy a Balboa 26, so he’s up and sailing again!

Kenny Lindsay
Topaz, 36-ft Blue Sea trawler
Santa Rosalia, Baja

SUCH BLOWS ARE FEW AND FAR BETWEEN

I read the February 3 Lectronic item about the unexpected tremendous winds that hit Banderas Bay and other parts of the mainland coast of Mexico. It was interesting because such weather is so unlikely at that time of year.

But I do remember something similar. Checking my log, I found that I was caught in Careyitos [sic] in January of ’92 with two other vessels fighting similar weather. It rained so hard that there were huge waterfalls coming off the cliffs amongst all those brightly colored condos and homes. The ocean was dark brown, and the seas were six feet coming into the tiny anchorage. It flooded Rosa’s little restaurant. Playa Blanca, the old Club Med, was essentially shut down. All three of us on boats were constantly in fear of ending ashore, as there was no room for much scope on the anchors — we were all on one hook — and no one wanted to get out as we all knew the open ocean would be horrendous.

When the weather abated and we were finally able to head north, we had to dodge all kinds of flotsam. The Rio Ameca in Banderas Bay had literally washed away whole villages, and much of the residue was out in the bay. We had to dodge things like refrigerators, stoves, logs, and quite an assortment of expired animals, too.

The weather gurus at the time called it an ‘Enhanced Banana Express.’ Whatever. It was one hell of a lot of rain and wind. It also caught everyone off-guard, just like the episode in Banderas Bay.

P.S. In spite of our enjoying skiing this winter, we’re looking forward to Serendipity’s third Ha-Ha this fall.

Barritt Neal & Renee Blaul
Serendipity, Kelly-Peterson 44
San Diego

Readers — While we’re sure there have been other unexpected blows in Mexico, the others we remember are the Cabo Storm of December ‘82, which left 27 boats on the beach, the non-hurricane storm that hit Cabo in October of ‘93 and sent houses, overpasses, dead cattle and entire golf course fairways into the Pacific, and a nasty cell that hit the anchored fleet in Zihua sometime around ‘98. Anybody remember any others?

By the way, we’re told that Don Anderson of Summer Passage is the only person who forecast this year’s blow. A tip of the hat to him.

ANOTHER FAN BELT SPICING OPTION

If any of your other readers find themselves in the same predicament as Thomas Todd of the Hunter 54 Topaz, and need to splice a fan belt, I have a suggestion other than the butt splice, which takes some skill.

I’m talking about a simple Molly Hogan, which can be done in a few minutes. You take a piece of three-strand, and if it’s soft and limp, dip it in boiling water to make it stiffer. Cut a piece three times as long as the loop or grommet you need, then unlay one strand of it, and keep it in its original form as much as possible. Cross the single strand at one-third of the length, and relay it into a three-strand rope. Whip the loop at the ends with some sail thread.

During my last two cruises to Mexico, I switched to the plastic link belts that can be assembled to any size. These may stretch initially under heavy loads, such as with a belt-driven compressor, and need a link or two removed, but they are many times superior to any other type of belt for cruising.

GET REAL ABOUT BUFFETT AND $100 MIL A YEAR

In the February 5 ‘Lectronic, you had a caption for a photo of Liz Clark of the Santa Barbara-based Cal 40 Swell and Jimmy Buffett that said Buffett "knocked down a reported $100 million a year." Get real.

Madonna may look silly with her youth obsession, but you gotta give props to the Material Girl for her ability to make millions. This year Forbes magazine ranked her as the top earning musician, as she reportedly made $110 million from her Sticky & Sweet Tour and from Hard Candy, her 11th studio album.

According to Google, here’s the list of the Top 12 highest earning singer/musicians for the period spanning from June ‘08 to June ‘09.

1. Madonna: $110 million
2. Celine Dion: $100 million
3. Beyonce Knowles: $87 million
4. Bruce Springsteen: $70 million
5. Kenny Chesney: $65 million
6-8. Rascal Flatts: $60 million
6-8. Coldplay: $60 million
6-8. AC/DC: $60 million
9. Eagles: $55 million
10. Toby Keith: $52 million
11. Bon Jovi: $50 million
12. Dave Matthews Band: $45 million

You might notice that Buffett’s name wasn’t on the list.

Pat Moriarty
Reliant, Catalina 320
Austin, TX

Pat — The Lectronic caption didn’t say anything about limiting Buffett’s income from music. In spite of Buffett’s beach bum persona and lack of success in winning awards for his songs, he’s had tremendous success with all kinds of other artistic and business endeavors. For instance, he’s written three #1 bestsellers, two of them fiction, one non-fiction. Laugh all you want, but the only other six authors to have accomplished this are Ernest Hemingway, John Steinbeck, William Styron, Irving Wallace, Dr. Seuss and Mitch Albom. That’s pretty good company, and Buffett can surf better than any of them. He’s also been involved in children’s books and various movies and movie soundtracks.

Buffett owns or licenses the Margaritaville Cafe and Cheeseburger in Paradise restaurant chains. Before you scoff them off, the Margaritaville Cafe in Vegas alone grossed $41 million last year, making it the second highest grossing restaurant in the U.S. Buffett also owns part of two minor league baseball teams. Working with Anheuser-Busch, Buffett produced Land Shark Lager, and the Miami Dolphins’ home field was renamed Land Shark Stadium for the ‘09 season.

How about casinos? In ’07, Buffett, in partnership with Harrah’s Entertainment, announced plans to build the Margaritaville Casino & Resort in Biloxi, Mississippi. Its 758 rooms are supposed to open this year. Another Margaritaville Casino, slated for Atlantic City, has been put on hold. Buffett has also licensed Margaritaville Tequila, Margaritaville Shrimp, Margaritaville Footwear, and we’re not sure what else. He’s also got Margaritaville Radio and Sirius XM Radio. All this from a guy who looks like he’s hardly even trying. Pretty impressive.

We got the $100 million a year figure from Wikipedia. We

have no idea if it’s right or wrong. At the very least, it’s unlikely that Jimmy will ever have to go back to robbing filling stations, as he lyrically did back in ’75, scoring “$15, a can of STP, a big ol’ jar of cashew nuts and a Japanese TV.”

† A CULTURAL CANCER

I’ve been a lover of sailing since I was a kid, and a reader of Latitude 38 for almost as long. I think that if one does the former, it is beneficial to do the latter. A wealth of good sailing information, most wouldn’t argue.

Sometimes I disagree with the editor’s opinions. I get hot once in a while, particularly when they concern subjects other than sailing. "Stick to sailing!” I grumble into the magazine. A complaining email starts to form in my head, but fades, and isn’t sent.

But I am writing, finally, in reply to your specific comments about the concept of ‘snitching’, after Steve Knight used the word in his letter. Well said. Your opinions regarding this cultural cancer couldn’t have been more concise. That term was created by criminals to further their lives at the expense of society.

Who turned in Bernie Madoff? His kids. Ted Kaczynski? His brother. The world is a better place for it.

Dave King

† IT’S NOT EASY BUT WE LOVE WHAT WE DO

I wanted to thank Latitude for the recent pieces on the loss of JoJo, and the responsibilities and limitations of the Coast Guard.

I just finished my enlistment of eight years with the Coast Guard, serving as a Boatswain’s Mate at the station in Vallejo, and also aboard a 270-ft cutter out of New Hampshire.

I want to extend condolences to the Livengoods for the loss of their boat, and to thank Latitude for your treatment and understanding of the Coast Guard. In response to all of the letters saying that the Coast Guard should have done more in the JoJo case, it’s easy to armchair quarterback the entire incident by suggesting that regulations should have been bypassed, and to point fingers at anyone and everyone. I realize that the limits of the Coast Guard as an organization are sometimes frustrating, both for taxpayers and for the young men and women crewing on Coast Guard boats.

I also applaud the letters that endorsed self-reliance and personal responsibility.

My wife, Amanda, and I first became sailors when I was transferred from a ship in New Hampshire to the Small Boat Station in Vallejo. Before I even found an apartment to live in, I’d bought a Hunter 25 sailboat. We kept the boat in Oyster Cove, and sailed every chance we got. We often marveled at the contrast between the traffic on 101 and the usually lonely beauty of the Bay. Since then, we’ve moved up to a Formosa 35, which we live on in San Rafael.

I think that my life and duties as a Coastie have been much improved by my sailing experiences. After all, wearing a uniform sometimes seems to separate an individual from reality. Occasionally at work we’d be amazed at the messes folks ended up in due to their own carelessness and lack of seamanship. That’s when I’d remind my Coast Guard crew that not everyone got the training that we did, and that our

LETTERS

The recent tragedy in San Diego has brought out many negative responses to the Coast Guard. I grieve for both the family and their loss, but also for the coxswain and crew involved in that accident. In times like this, our servants need guidance, support and empathy, not anger or despair. The Coast Guard has changed in so many ways while I’ve been a part of it. It’s been given a great responsibility in securing our nation’s safety, but the goal of preserving life has never waned.

My wife and I are going cruising in August and I feel quite prepared with the seamanship experience the Coast Guard has given me and would like to thank Latitude again for continuing to inspire my dreams of sailing for life.

Christopher LaClair
Liberte, Formosa 35

GOING FROM NORM GOLDFE'S FRIEND TO HIS FOE

Last year we spent almost three months in San Blas, Mexico, and became very close friends with Norm and Jan Goldie, who have lived ashore there for years. We maintained email contact with them through our summer in the Sea of Cortez, and had a happy reunion when we returned to San Blas last December 22. So we understand how some cruisers view Norm — a controversial figure in the cruising world for decades — and Jan favorably.

But within a few days of our return, Norm started acting weird. He began to say that we were helping incoming cruisers too much. He said that we should stay quiet and let him do it. Several days later, a group of five boats — all people we knew from the Sea of Cortez — approached San Blas. I had been talking to all of them via SSB, and they knew I was anchored in the San Blas estuary. As they approached, they called me one by one, and asked for advice in crossing the sand bar. I readily gave them that information. The last boat to arrive had lost the use of its engine because a rag had been sucked into the air intake, and needed help into the estuary. I immediately launched our dinghy and helped them in, using the VHF to coordinate the effort.

I wasn’t aware of it at the time, but my helping the other boats made Norm very angry. While I was in town the following day showing other cruisers where the bakery was, Norm called me on the VHF. He told me that I shouldn’t be trying to play ‘Mayor of San Blas’. He told me that I was just a tourist and therefore shouldn’t be giving advice or showing people where things were in town.

Bewildered, I said “O.K.”

While I was in the bakery and not able to pick up anything on the radio, Norm hailed our boat, and my wife answered. When I got back to the boat an hour later, she was in tears. She told me that Norm had screamed and yelled at her, and...

was ranting about my giving help to the cruisers. I called Norm to get to the bottom of it. I didn’t have a chance to ask any questions because he immediately went into an angry, breathless rant about how I was trying to take over the job that five different governmental agencies had asked him to do. He told me that I was destroying the economy of San Blas, and that my talking up San Blas on my blog would lead to increased tourism and destroy the town. He said that I should just shut up and stop talking to cruisers.

Thinking that Norm had somehow gotten the wrong impression, I asked to come to his house the next day and meet with him and his wife. Much of the early discussion was odd, and covered everything from how Norm thinks the locals really hate American tourists, to how Mexico still resents the Spanish/American War, and how he thinks most cruisers are ignorant of seafaring skills and arrogant.

I wasn’t sure how to handle many of these remarks, so I tried to steer the conversation back to why I’d gone from being an adopted son to an apparent deadbeat cruiser. The conversation kept going into general grievances, and how he has been helping cruisers for 44 years without pay or compensation. I kept pushing back to what it had to do with me, and why I was in trouble with Norm for offering help to my cruising friends. Apparently not knowing how to express himself, Norm kept getting angrier.

Finally Jan entered the conversation, and I think I got an honest answer. Jan told me that by my giving advice and passing along information to the cruisers, I was cutting Norm and her out of the loop. I told her that I didn’t see it that way, and that I was encouraging people to talk to Norm and Jan, as they were people very knowledgeable about San Blas. She replied that by my giving out advice, Norm would then not have the chance to ask arriving cruisers for a tip or donation, and that it was belittling for someone who had only been in San Blas for four months to take the ‘job’ of someone who had been doing it for 44 years.

When I explained that cruisers all over the world help other cruisers in this way, both Norm and Jan got angry. They insisted that I was wrong, and that most cruisers they knew didn’t help people the way I did. Then they said I was only doing it to insult Norm and to take his ‘job’. Not wanting a confrontation, I told Norm that I would try not to interfere in what he obviously viewed as exclusively his job in San Blas. We parted with a handshake.

The following morning a friend came into the anchorage and called us on 22 for advice and information. During the conversation — which I knew Norm was listening to — I went out of my way to downplay my knowledge and play up Norm’s. But the damage was done.

Immediately following our VHF conversation, Norm came on the hailing channel and angrily said that I should have told the people where I had gotten all of my information. During the VHF net the following morning, he started in with rants and angry personal attacks — and included lots of profanity. Later, members of the fleet said they listened in horror as several times a day Norm would get on the radio to rant about how we were backstabbers and worse. Almost daily we were warned that if we didn’t leave San Blas, he’d talk to his friends at Immigration and other official offices about us. Norm told us to make sure we had our passports and visas ready to show the authorities. It was at this point that two other cruising family boats left San Blas, feeling it was not safe to stay.

It was scary having someone threaten to bring the Mexican government down on our family, so we decided we would
30' CATALINA, '80 $26,900
This is a rare find and a fantastic value at this price. Not only is she clean but features the extras every buyer wants.

54' CUSTOM ROBERTS KETCH, '79 $185,000
Rugged bluewater design for comfort and safety. Center-cockpit 3-cabin layout has aft master and large sea-going galley.

54' HUNTER CENTER COCKPIT, '86 $329,000
Year chance to buy an extremely well-laid out cruiser or dockominium with lots of upgrades in as-new Bristol condition.

30' CATALINA, '84 $41,995
Her cockpit is large enough to be comfortable, yet her sexy stern is slender for speed. Easy to sail and stable in the sea.

33' SOVEREL 33-2, '84 $27,500
Dyno has been raced hard but maintained well. The boat will do well in PHRF and can certainly be cruised as well.

36' CATALINA 320, '95 $62,500
She's cruised the California coast, proving her capabilities. Possible owner financing and transferable San Diego slip.

33' SOVEREL 33-2, '84 $27,500
She's cruised the California coast, proving her capabilities. Possible owner financing and transferable San Diego slip.

41' MORGAN OUT ISLAND 415 CC, '78 $83,900
She has had all the 20-year projects done and has new through-hulls, beautiful new portlights and Ultra Leather upholstery.

1997 VALIANT 42CE
One of the quintessential cruisers of all time, this boat combines comfort, strength, exquisite finish work, and performance. Built with serious cruising in mind, all hardware and systems are accessible for maintenance. Aurora has proven her cruising ability from San Francisco to Zihuatanejo and the Sea of Cortez, and back to San Diego. She is a ‘10’ in all respects, as her owners are meticulous about everything onboard. Truly a turn-key vessel beautifully equipped. Asking $349,000

38' ERICSON, '84 $59,500
Bruce King designed a winner for both racing and cruising with this boat. Enjoy respectable performance and a comfortable layout.

38' CATALINA, '84 $41,995
Her cockpit is large enough to be comfortable, yet her sexy stern is slender for speed. Easy to sail and stable in the sea.

35' ERICSON MKIII, '83 $49,900
White Star is a passionately maintained, swift, stable daysailer and cruiser that sails fast in all wind and sea conditions.

38' ERICSON, '84 $59,500
Known for sturdy construction and fine kauri interior joinery, this recently-upgraded cruiser will take you anywhere ‘con gusto’!

38' CATALINA, '84 $41,995
Her cockpit is large enough to be comfortable, yet her sexy stern is slender for speed. Easy to sail and stable in the sea.

35' ERICSON MKIII, '83 $49,900
White Star is a passionately maintained, swift, stable daysailer and cruiser that sails fast in all wind and sea conditions.

follow the other two boats. But after telling our story to our local Mexican friends while saying our goodbyes, we decided to stay and fight. Not just for us, but for the other cruisers that Norm has bullied out of San Blas.

We then had meetings with the Port Captain and other government officials. They expressed their sincere apologies for Norm’s behavior! They told us that they are constantly receiving complaints about Norm, but have little power to stop him. They currently are trying to force him to stop using his VHF radio, as he has no boat, and no reason to use a VHF radio. In the words of the San Blas Port Captain, because he is on land, Norm is using his VHF illegally.

After talking to locals, I think what’s really been going on is that Norm makes money by getting kickbacks from the businesses he recommends. And then there’s the issue of his ego and his being the big man in San Blas.

However you look at it, it’s an ugly situation indeed. But I thought the Seven Seas Cruising Association needed to know about it, because Norm often legitimizes himself by mentioning that he’s an official SSCA cruising station over the VHF.

Last week the cruisers got together and assembled a cruising guide and cruiser’s map of San Blas. We have given them to the marina and are spreading them out through the cruising community.

Rich Boren
Third Day, Pearson 365
Port San Luis

Readers — Norm Goldie has been controversial in San Blas for decades. As we’ve noted many times before, he’s been of major assistance to many cruisers, and has been a big help in several medical emergencies involving cruisers. On the other hand, countless cruisers have complained that he’s relentlessly stuck his nose in where it wasn’t wanted. And after being rejected, Goldie is well known to have become vindictive.

For as long as we can remember, Goldie has tried to give cruisers the impression that he has some kind of official standing with the Mexican government. He has none. If he tries to pull this on you, demand to see a uniform, a badge, or an official document to that effect. He has nothing.

If any cruisers want to avail themselves of Goldie’s services, that’s fine. If they want to give to his ‘charities’, that’s fine, too. And if a business gives him referral fees for bringing them business, that’s nothing unusual in the world of tourism.

On the other hand, if you want to discover things for yourself, or if you want to use the advice of cruising friends already in San Blas, that’s your business. With confidence, tell Goldie to butt out. His threats are nothing but hot air. If he bothers you enough, report him to the nearest Department of Tourism office.

There are more cruiser comments on Norm Goldie in this month’s Cruise Notes.

††SAY IT AIN’T SO

I was invited to a very pleasant gathering at Golden Gate YC last month to help celebrate the club’s recent capture of the America’s Cup. One of the principal topics, after the champagne toasts, was whether or not the club could host the 34th America’s Cup match here, or if you want to use the advice of cruising friends already in San Blas, that’s your business. With confidence, tell Goldie to butt out. His threats are nothing but hot air. If he bothers you enough, report him to the nearest Department of Tourism office.

There are more cruiser comments on Norm Goldie in this month’s Cruise Notes.

In a typical month, we receive a tremendous volume of letters. So if yours hasn’t appeared, don’t give up hope. We welcome all letters that are of interest to sailors. Please include your name, your boat’s name, hailing port, and, if possible, a way to contact you for clarifications.

By far the best way to send letters is to email them to richard@latitude38.com. You can also mail them to 15 Locust, Mill Valley, CA, 94941, or fax them to (415) 383-5816.

There is only one part of the Bay which is both open enough and deep enough for a three-mile, or anything close to it, circle. Even the middle of the Bay is not very good, since the marks would have to be set in very deep, very tidal places, and the area is sliced to bits by shipping lanes and ferry routes.

If the practical maritime concerns aren’t enough, please consider also that:

- There will be no joy from any governmental body. They may even fight the idea. San Francisco has scant need for more tourist traffic in summer, and very little appetite for an ‘elitist’ activity such as the America’s Cup, which would require municipal resources and infrastructure.
- The San Francisco Bay Yacht Racing Association has established rights to set its courses on the Bay, too.
- It’s hard to find enough real estate for a Halsey St. or Darsena-type Cup Village. If you can find it — on Treasure Island, Alameda or maybe on abandoned piers — it would be terribly expensive and hard to get the permits.
- People have floated various other ideas, such as sailing smaller boats on smaller courses, or sailing the Louis Vuitton Cup Series elsewhere, and just holding the Cup here. The first idea doesn’t do justice to the Cup, and the other falls apart for myriad reasons.

I wish it were otherwise.

Dick Enersen
Sausalito

Dick — As much as we wish we could disagree with you, we think you’re right on all counts. Holding the America’s Cup on San Francisco Bay would require both the interest and a ‘can do’ attitude from local, regional and state government. Unfortunately, we don’t think either exists — particularly the ‘can do’ attitude.

In a typical month, we receive a tremendous volume of letters. So if yours hasn’t appeared, don’t give up hope. We welcome all letters that are of interest to sailors. Please include your name, your boat’s name, hailing port, and, if possible, a way to contact you for clarifications.

LOOSE LIPS

Pulling the trigger on your dream boat.

We’ve heard lots of financial pundits theorize lately that the economy is finally beginning to rebound. That should give you a big sigh of relief. Unless, of course, you were hoping to snatch up your dream boat at a rock-bottom price. Because if consumer confidence really is on the upswing, the window for making the deal of a lifetime may come to a close sooner than you think.

Needless to say the current market for both new and used boats strongly favors buyers. Not only do many cash-strapped sailors need to liquidate their ‘floating assets’, but brand new boats are languishing on showroom floors. So well-equipped used cruising boats and daysailers are being offered at prices well below historic norms. And many new boat dealers have slashed their margins dramatically.

But is there any money out there to borrow? Local funding agencies tell us there’s plenty of it for qualified buyers, at fixed rates in the high 6s, and adjustable-rate loans under 5%. With a solid credit rating and 15 to 20% down, you could score the deal of a lifetime.

According to Mike Bryant of Trident Funding, the question on the minds of most potential buyers seems to be when to pull the trigger and make the deal. In addition to wondering if prices and loan rates have hit the bottom, buyer hesitation often also comes from insecurity about being able to make the payments.

If your own financial situation is solid, and you don’t want to miss this rare window of opportunity, here’s what you’ll typically need to qualify for a loan: a credit report, a personal financial statement, and your two most recent tax returns. You’ll usually get an answer in a few days. If you’re buying a new boat that’s been fully commissioned, or a used boat that’s been surveyed, you can often close a deal in 10 days or less — none of this 90-day escrow nonsense. As a bonus, you can usually write off the loan interest on boats of roughly 25 feet and up, because they legitimately qualify as second homes. Such a deal!

Far be it from us to give anyone financial advice, but don’t cry on our shoulders if you wait too long, the window closes, and that dream boat slips through your fingertips.

For millennia, the wind has moved people from Point A to Point B, and on San Francisco Bay, we have an abundance of it for much of the year. So it seems odd that, in an area so forward-thinking and eco-friendly, we don’t have any wind-powered public transportation. Wind+Wing Technologies hopes to change that.

Started by the same group of sailors that owns and operates Adventure Cat Sailing Charters, Wind+Wing has partnered with Orange County’s Morrelli & Melvin Design Engineering and Harbor Wing Technologies out of Honolulu and Seattle to design a catamaran ferry that uses solid wing technology.

“Morrelli & Melvin’s engineering study makes a strong argument that adding a wing sail could cause a 42% annual fuel reduction over current usage,” says Jay Gardner, co-owner of Wind+Wing. “A bus gets about 300 passenger miles per gallon (PMG), BART gets 450, but our design would get 1,700.”

While the concept is still in development, Gardner says they’ve received nothing but positive feedback from ferry operators. “After some initial skepticism, they’ve been very supportive,” he said. “We took them out on Adventure Cat and ran their routes so they could see it was possible. They’re getting excited about it.”

Gardner says production of the test ferry is slated to begin next year. They hope that after testing — which will likely take most of ’12 — ferry districts and their captains will feel comfortable ordering the boat. If so, we may see the first sailing ferry plying the waters of the Bay by ’14. Find out more about the project at www.windwingtech.com.

surviving the ‘weather bomb’

"Honestly, we never, ever, ever have rain at this time of year, let alone hurricane-strength winds!" said a longtime resident of Puerto Vallarta last month after a so-called 'weather bomb' ripped through Banderas Bay on the night of February 1. Torrential rain drenched the region and winds built from 10 knots to 70+ in a matter of minutes. The 'bomb' occurred after three days of nearly continuous rain, which alone was a bizarre anomaly, that left vacationing snowbirds wondering if they would ever get that long-anticipated winter tan.

When the big blow arrived, Banderas Bay's principal anchorage at La Cruz became a witch's cauldron of short, steep wind waves that were confused by the clocking rotation of the advancing 'super-cell'. Roughly a third of the three dozen boats anchored out dragged, at least somewhat, while a few broke free completely.

All sorts of war stories were told the next morning, but the most remarkable was that of Sarah and Elias Anderson, who've been cruising Mexico since last fall with daughters Kimberly, 16, and Savona, 5, aboard their Newport, OR-based Maple Leaf 42 Stepping Stone.

First the ketch's anchor began to drag, then her all-chain rode parted with a bang. Elias cranked up the engine, but it didn't have enough muscle to force the bow upwind against the 8-foot waves. The 28,000-lb displacement hull began sliding quickly toward the nearby shoreline. "It felt like we were aboard a Tinkertoy in the devil's bathtub," Sarah recalls. "By the time I got my daughter out of bed and into her lifejacket we were aground on a narrow strip of beach between two rock jetties, and Stepping Stone laid over on her side."

But as she and Elias prepared their children for an emergency bailout "the wind died down momentarily and a big swell suddenly refl oated us." Sarah quickly restarted the engine, Elias put the hammer down, and they roared off into the Bay where they safely circled until things calmed down.

Talk about dodging a bullet. . . The next day they even recovered their dinghy with its outboard and tank still attached. It had ripped loose during the grounding, then drifted downwind and snagged on another boat's rode.

Could this bizarre weather event be blamed on El Niño? Perhaps partly. But there's no clear consensus among weather gurus. Goes to show, the best advice for mariners remains the same: No matter what the cruising guides, pilot charts or weathermen say, always be prepared to deal with whatever Mother Nature throws at you.

— andy

'school ship'

As the 188-ft barquentine Concordia sailed down the South Atlantic mid-February, Captain Bill Curry warned his crew, and the 44 high school and college-age student sailors aboard, to prepare for unsettled weather. Little did he know, however, that an intense vertical downdraft would soon knock down his globetrotting steel-hulled vessel, sending her to the bottom within thirty minutes.

When the tragedy occurred, the Barbados-based three-masted tall ship was

eager, the pampered warhorse

When he got started in boat building 32 years ago, a 'classic' for Jeff Rutherford was, by definition, a wooden boat. But much the same way a Gen-Xer feels the advance of time when hearing the band Sublime played on an 'oldies' radio station, the latest project from Rutherford's Pt. Richmond boat shop reflects a shift in context.

The boat is a 1970 Camper & Nicholson 55 — hull #1 — a heavy...
sinks off brazil

Sailing south, roughly 300 miles off the Brazilian coast, en route from Recife, Brazil, to Montevideo, Uruguay, as part of a 10-month Class Aloat educational voyage. At about 2:30 p.m. on February 17, the ship was hit by what the captain later characterized as a “microburst” — a sudden, powerful downdraft — which apparently knocked the boat onto her beam ends, where she began to flood and never regained equilibrium.

Having drilled for emergencies as part of the 10-month voyage, the crew managed to right the heavy vessel and get her under sail, but the boat is now a total loss.

eager — cont’d

IOR design built in 1970 in fiberglass with a teak-overlaid plywood deck. British banker Rob Gray has a deep-seated love for the design, so when he found Eager — née Acclaim, née Lutine — complete with rotten decks, he bought her and shipped her to Rutherford’s shop to be reborn. Rather than rebuild the wooden deck, Rutherford and his guys used it as a plug to build a new, foam-cored, vinylester and E-glass deck with a teak overlay.

Wait a second . . . what? Jeff Rutherford, the builder responsible for the complete rebuilds of Bob McNeill’s 1911 Herreshoff P Class sloop Joyant and 1901 steamer Cangarda, was building in fiberglass? “There are fewer and fewer wooden boats out there these days,” Rutherford said. “You don’t turn down good work.”

You may associate Rutherford’s Boat Shop in Point Richmond with classic wooden yacht restorations rather than fiberglass IOR designs, but their latest project is a recently-completed and stunning restoration of the 1970 Camper & Nicholson 55 ‘Eager’, seen here sea-triaing at the end of January.
eager — cont’d

In Gray, Rutherford had an experienced client whose stable includes a 2002-vintage all-carbon race boat and the 6-Metre Scoundrel — with which he placed second in the “contemporary” class at last year’s 6-Metre Worlds. Gray wanted all the ducks in a row before the project — which included a brand new interior — got underway. “Before we even started on the interior, we went shopping for the plates, glasses and stemware so we could build the cabinets to fit,” Rutherford said.

The boat launched at the end of January with a new carbon rig and a new suit of sails by Pineapple Sails. After sea trials on the Bay, some interior details were still being sorted out dockside as we went to press, but otherwise she’s out the door. “I’m not saying she’s a classic,” Rutherford concedes. “I’ll tell you one thing, though: this is the most expensive, cherried-out IOR boat out there.”

concordia

of their onboard routine, all students and professional crew were able to evacuate safely into three large liferafts, which were lashed together as they awaited rescue. The ship’s EPIRB had been activated, but high frequency radios were rendered useless by the knockdown.

The 64 survivors drifted together for at least 40 hours before being rescued by the 662-ft merchant ship Hokuetsu Delight and the 688-ft tanker Crystal Pioneer. A later attempt to transfer the survivors to the Brazilian naval frigate Constituição had to be abandoned due to the rough conditions.

continued on outside column of next sightings page
— cont’d

All crew and students arrived in Río de Janeiro on February 19, happy to be alive, but deeply saddened by the loss of their floating home, which has served as a school ship since ’92.

“The story that is slowly emerging from our students and professional staff is of the heroic communal effort that saved all aboard,” said Nigel McCarthy, president and CEO of West Island College International, which runs Class Afloat.

“That all were saved is a testament to the training, equipment and professionalism of our shipboard community.”

— andy

**Publicity stunt or innovation? Maybe both! — (clockwise from below) Meet the gang: (l to r) Bay Area sailing legend Peter Hogg, David de Rothschild, Jo Royle, David Thomson and Project Manager Matthew Grey. 'Plastiki' is, at best, a functional boatbuilders wanted to melt down the bottles and make the boat out of that, but it would have defeated the purpose.” That purpose is to educate the world about ‘upcycling’ — the practice of reusing items, especially plastics, in new and different ways instead of throwing them out. In fact, if disaster strikes during their planned multi-leg voyage to Australia, and all the bottles spill out of the boat, the crew will have more to worry about than littering the ocean. “We’ve built a very strong cage system that runs the entire length of the boat to hold the bottles,” de Rothschild explained. “If that cage is smashing apart, it’s very likely other parts of the boat are smashing apart.” But to answer the question, the bottles provide so much of Plastiki’s flotation — 68% — that, if the boat remained intact, she would most likely lie awash, thanks only to watertight compartments at deck level.

The 150 or so bottles that can be seen lining the exterior of hulls — one of which has been lost, though gaps can be seen where none were installed — will eventually be strapped down to prevent them from washing out in heavy seas, says skipper Jo Royle. A petite blonde, Royle is no delicate flower. She’s been sailing her entire life and has put about 100,000 miles under her keel — and she’s only 30. Royle skippered Pindar’s Class 40 in the ‘07 Transat Jacques Vabre, and she’s sailed as far north as Iceland and as far south as Antarctica. This is one bad-ass sailor chick!

Some wonder if the self-reinforcing polyethylene terephthalate (srPET) — which is bonded together with heat instead of glue or epoxy — might start to degrade in the sun and heat of the South Pacific. “We tested panels of srPET on a reef in Hawaii with no problems,” Royle explained. “And we’ve run accelerated lifestyle tests on all the different parts in labs in Palo Alto.”

— rob

**a ride on the plastic fantastic**

San Francisco Bay has certainly seen its fair share of wacky boat projects (who can forget Tin Can?) but the one that’s been making global headlines for the last year is Plastiki. It’s the brainchild of 31-year-old David de Rothschild — extreme adventurer, dedicated environmentalist, and son of prominent banker Sir Evelyn de Rothschild. The 60-ft catamaran features 12,500 used soda bottles as flotation and has been the talk of the waterfront over the last few months as her crew test sails her on the Bay.

Any innovative and untested project is bound to get some skeptics but, if dock talk is any indicator, more than a fair share of sailors feel Plastiki is nuttier than most. So when *Latitude* was invited aboard for a test sail last month, we jumped at the opportunity in an effort to answer some of our readers’ questions.

First off, those bottles are not just for show. “The idea was to make the bottles visible and functional,” de Rothschild said. “Boatbuilders wanted to melt down the bottles and make the boat out of that, but it would have defeated the purpose.” That purpose is to educate the world about ‘upcycling’ — the practice of reusing items, especially plastics, in new and different ways instead of throwing them out.

In fact, if disaster strikes during their planned multi-leg voyage to Australia, and all the bottles spill out of the boat, the crew will have more to worry about than littering the ocean. “We’ve built a very strong cage system that runs the entire length of the boat to hold the bottles,” de Rothschild explained. “If that cage is smashing apart, it’s very likely other parts of the boat are smashing apart.” But to answer the question, the bottles provide so much of Plastiki’s flotation — 68% — that, if the boat remained intact, she would most likely lie awash, thanks only to watertight compartments at deck level.

The 150 or so bottles that can be seen lining the exterior of hulls — not one of which has been lost, though gaps can be seen where none were installed — will eventually be strapped down to prevent them from washing out in heavy seas, says skipper Jo Royle. A petite blonde, Royle is no delicate flower. She’s been sailing her entire life and has put about 100,000 miles under her keel — and she’s only 30. Royle skippered Pindar’s Class 40 in the ‘07 Transat Jacques Vabre, and she’s sailed as far north as Iceland and as far south as Antarctica. This is one bad-ass sailor chick!

Some wonder if the self-reinforcing polyethylene terephthalate (srPET) — which is bonded together with heat instead of glue or epoxy — might start to degrade in the sun and heat of the South Pacific. “We tested panels of srPET on a reef in Hawaii with no problems,” Royle explained. “And we’ve run accelerated lifestyle tests on all the different parts in labs in Palo Alto.”

— rob

**eager — cont’d**

Eager isn’t the only project the now bi-coastal Rutherford has been working on lately. In July of ’08, he signed on as the lead boatwright for the International Yacht Restoration School’s restoration — actually a near-complete rebuild — of the 1885 William Townsend-designed 131-ft schooner *Coronet* at the school in Newport, Rhode Island.

“We were told there was enough oak stored in a Connecticut warehouse to rebuild the entire hull,” he said. “When we sorted it, we found that half of the 25,000 board-feet had rotted, so we’ve had to track down more. Now we’re finally getting to start building boat parts.” While the delay has cost time and money, it’s allowed Rutherford to get acclimated to the environment in Newport.

“I feel like a carpetbagger coming in from California,” he said. “There’s a huge boatbuilding scene in Newport and it’s a different atmosphere; you’re front and center and everyone’s looking at you. In Richmond you’re deep in a dark industrial corner and no one even knows you’re there.”

plastiki — cont’d

“I was a little bit skeptical at the beginning, but I’m amazed by the product,” admits Royle’s co-skipper, David Thomson, 34. “It’s a lot stiffer than we ever thought it would be, and she seems to be holding together really well. She doesn’t even creak.”

Thomson, who was brought into the project a few months ago, also boasts an impressive sailing résumé, having crewed on Steve Fossett’s Playstation, sailed in America’s Cup campaigns, and circumnavigated in a Class 40 during the last Portimão Global Ocean Race.

It’s no coincidence that the addition of such well-seasoned sailors to the project has slowed its progress. When we first reported on Plastiki in last April’s issue, we noted that the team planned to be sailing over the horizon later that month. “Initial estimates were a little . . . optimistic,” Royle noted diplomatically.

Since then, a number of early ideas were dropped or reworked to make the boat more sea-kindly. “Would you attempt to cross an ocean on a boat you didn’t think would make it?” Royle asked during a discussion about Plastiki’s seaworthiness. “I sure wouldn’t! If we don’t make it to Australia, I’ll consider it a total failure.”

Though no one has committed to a departure date it’s clearly on the horizon. Royle said that, besides throwing some food aboard, they were ready for a 48-hour offshore shakedown cruise when the right weather window opened. And the official unveiling of the boat was at the end of last month, so don’t be surprised if Plastiki is on her way to Australia by the time you read this. And don’t be surprised if she makes it.

hitchin’ a ride

How do people get to crew on boats, particularly in places they don’t live? During November’s Banderas Bay Blast, we asked around, figuring we would give readers tips on how to get rides in places such as Southern California, Mexico, the Caribbean, the Med — anywhere in the world, really.

The classic, of course, is to know the owner. For instance, two-thirds of the crew on Arjan Bok’s San Francisco-based Lidgard 43 cat RotKat have sailed together for years on San Francisco Bay. Tom Friel started racing with Bok in ’82, almost immediately after the Dutchman moved to San Francisco. As for crewman Craig Liberatore, he’s Bok’s partner in a San Francisco plumbing business. The third crewmember was Sally Martin, affectionately referred to as “the new local floozy” by her fellow crewmembers. Actually, Martin is a retired lawyer from the East Bay who represented foster children, and who has moved to Mexico with her son for a year. She knows Bok from Northern California.

There’s always the bold approach to getting a crew position, such as was taken by Mary Serphos of Fairfax in Marin County. As a result of doing a bad thing, she eventually got to crew on Wayne Hendryx and Carol Baggerly’s Brisbane-based Hughes 45 Capricorn Cat. Serphos had been putting on nutrition and wellness seminars at the Mar de Jade retreat in Chacala, when she noticed some sailboats anchored a short distance off the beach. A good swimmer, she decided to swim toward the boats. “As I got near this catamaran, I just felt pulled to her,” she said with a metaphysical gleam in her eye. “Then I saw the name Capricorn Cat — I’m a
list party started

March 10 from 6-9 p.m., and will feature the usual slideshow, finger foods and full no-host bar. The cost for anyone under 25 is just $5 (with ID) and is still only $7 for the rest of us. It’s the perfect cure to the hump-day blues, and is a great way to start your sailing season off right.

New this year will be a special presentation by the Bear Boat Owners Association. Though Bears — 23-ft woodies built in the early ’30s — are an endangered species, the racing fleet has been enjoying a resurgence in the last year or two. “We are now officially in the WBRA schedule,” says Margie Seagal, Bear aficionado and continued on middle column of next sightings page

hitchin’ — cont’d

Capricorn! Even though nobody was aboard, Mary climbed aboard — that’s the naughty part — and looked around. As luck would have it, Wayne and Carol visited the Mar de Jade resort the following day to take a yoga class. While there, they met Mary. When she asked if she might sail with them sometime, they signed her up for the Blast.

It’s also common for folks to get crew positions by frequenting places where sailors hang out. In the case of Shannon Whitlow of Puerto Vallarta, it was hanging around at Philo’s Music Studio and Bar in nearby La Cruz. “I mostly work on powerboats out of Vallarta, but one night I went to Philo’s in La Cruz with some cruisers, and that’s where I met Mark Scarretta of the Lagoon 380 Younger Girl. The next thing I knew, I was crewing on his boat in the Blast.” How did Whitlow, who is from Kentucky, end up in Vallarta in the first place? “My husband and I came to Vallarta for a week about five years ago. He went home a week later as scheduled, but having fallen in love with the people, the continued on outside column of next sightings page

Hmm, could this Bear Boat be named ‘Panda’? What gave it away? These classic woodies designed for sailing on the Bay are once again a WBRA class, and some skippers need crew. There’s no better way to meet them than to come to the Spring Crew List Party at Golden Gate YC on March 10.
But then they did something about it. Lawyers, students, district attorneys and truckers decided that there really could be more to life than the daily grind.

It’s a thought we all have but they were brave enough to act. And while you read this, they are now off competing in the challenge of a lifetime as the Clipper 09-10 Round the World Yacht Race battles its way across the oceans of the world. You can read about their unfolding drama on our web site and if it inspires, we’d love you to get on board.

In 2011, the next race will depart the UK on a new 40,000-mile route and an equally inspirational group of individuals will be on board the fleet of ten 68-foot, stripped down ocean racing yachts. If you are aged 18 or over and no matter if you have some sailing experience or none at all, our comprehensive training programme will properly prepare you for the challenge. All you need to decide is whether you want to sign up to race a single leg, combine several or complete a full circumnavigation. Whatever you decide, you’ll be glad that today you didn’t turn the page and instead became one of life’s adventurers.

Call +44 (0) 2392 526000 or visit www.clipperroundtheworld.com
On 2 March the Clipper fleet of stripped out 68-foot ocean racing yachts will depart Qingdao, China, on Leg 5 of the Clipper 09-10 Round the World Yacht Race

After leaving the pomp and ceremony of a stunningly colourful visit, fog and fishing boats are in store as the yachts set out into the cold conditions blown in by the depressions rolling off the Chinese coast. Snow could make a regular appearance and the tropical sailing conditions of the previous leg will soon feel like a distant memory for those on board.

The Pacific Ocean is the largest in the world and the crews will be competing over a 6,000-mile course, taking on everything Mother Nature chooses to throw at them during the marathon crossing. Keeping a competitive focus, preserving kit and looking after crew morale will be a constant challenge before attention is turned to the variable conditions as the California coast appears over the horizon.

After more than 30 days at sea, the fleet is expected to arrive in San Francisco between 1 and 5 April and will be berthed in San Francisco Marina until 11 April.

Endorsed by Governor Schwarzenegger, California is one of the ten internationally sponsored teams taking part and the crew of the American entry will be giving it their all to try to secure a win into their home port. Waiting on the dockside and hoping to cheer in a winning team will be Californian crew member Shana Bagley, a 41-year-old Deputy Attorney General from Walnut Creek.

Shana says, “Four years ago, I was nearly run over by a city bus in San Francisco and realized that I had been seemingly too busy working behind a desk to think about my ‘Bucket List.’ One item on that list was chartering a boat in the Caribbean. Never mind that I did not know how to sail.

“After taking lessons and chartering a few boats, my love of sailing took on a life of its own. The next thing I knew, I had completed a month of ocean racing and sea survival training in the UK as crew in the Clipper Round the World Yacht Race. Last August, I began the first of two epic adventures as a proud crewmember of California. I lived on board, at a distinct angle, for two months and over 5,000 nautical miles, and shared a confined space with 18 other people from all over the world. It was too hot or too cold and always damp, bumpy, salty, and noisy. Showers, sleep, privacy, and refrigeration were relatively unheard of.

“However, we also had extreme highs: seeing the world from the top of the mast or out the spinaker pole, completing a headsail change in a squall at night with the ocean flushing up your trousers, finding that soul-filling groove of steering under spinaker, seeing the deepest of deep-blue seas and the brightest of star-filled skies, and making dear friends for life.

“I do not know of any other experience that can make one feel so insignificant and larger than life at the same time. This race has literally changed my life for the best. I have learned a lot about racing across oceans, living life on its very edge, understanding other cultures and perspectives, what is truly important, and about who I really am.

“I cannot rejoin my crew and skipper for Legs 6 and 7 soon enough. My second epic adventure awaits – as do entirely new horizons and new items for that Bucket List.”

The Clipper Race is the only event of its kind open to people from all walks of life regardless of previous sailing experience and anyone over the age of 18 is eligible to take part. Running every two years, berths are now available on the next edition of the race and presentations are being held across the San Francisco Bay area during the Californian stopover of Clipper 09-10 for those interested in finding out more. Further details will appear in April’s issue of Latitude 38 but in the meantime more information about the race can be found at www.clipperroundtheworld.com.
hitchin’ — cont’d

weather and the big fish of Vallarta, I stayed. The stupidest thing in the world is that my friends from Kentucky think it isn’t safe here!”

Meeting cruisers in anchorages is yet another way that people find crew positions on boats. There’s a social magic that seems particularly strong in Tenacatita Bay, which is about 100 miles south of Banderas Bay. It was during one of the many social activities there that Richard and Sheri Crowe of the Newport Beach-based Farr 44 Tabu met Lowell and Mary Larsen of the Anacortes, Washington-based Bavaria 38 True North, and Peter Meyer and Michelle Tornai of the Vancouver-based 58-ft trawler Incommunicado. A couple of weeks later, the latter two couples were crewing on Tabu in the Blast. Based on all the laughter coming from their post-Blast dinner table, these folks, who had been strangers just weeks before, were getting on like a boat on fire.

Love also brings crew to boats. “I was buying wine and she was

crew list party

owner of Huck Finn (#17). “Eight boats have indicated interest in racing, which means Bears need crew.” You can learn more about Bear Boats at www.bearboats.com, but your best bet for scoring a crew spot is to show up at the party.

Another new addition this year will actually happen before the party. Sal Sanchez of Sal’s Inflatables in Alameda, along with Barry Demak, who spent four hours in a liferaft last fall when J World sank off the coast of Mexico, will show participants how to inflate and enter a liferaft . . . from the water! Space is limited for the ‘get wet’ portion of the event, which will be held at
selling wine,” is Scott Case’s succinct way of describing how he met the lovely Alicia Contreras. “Actually, I was working in a wine shop at the Vallarta Marina when Scott came in,” Alicia explained, fleshing out the story. “He didn’t even realize that I’m Mexican,” laughs the Puerto Vallarta native, “but he asked me out. I said yes, then changed my mind, but he persisted.” When we asked when all this happened, Case furrowed his brow in thought. “Five years and two months ago,” Alicia interjected. Scott, who hasn’t lived in the States since leaving Scottsdale in ’04, bought the Beneteau 43 Elysium in Puerto Vallarta six years ago and, after a round trip to San Diego and back, he and Alicia cruised to Ecuador. There was so much to like down there — “It’s warm, but not humid or rainy like in Central America, the officials aren’t a problem, and it’s inexpensive” — that he bought a condo. Then, after selling Elysium in January of ’07, Case bought hull #18 of the F/P 40 catamarans. You might think you wouldn’t have to wait long to take delivery of a 40-ft cat that sells for half a million, but Case and Contreras had to wait a year before they could pick up the new boat from the factory in La Rochelle, France. The two then sailed down to the Canary Islands, from where they started a 24-day passage across the Atlantic to Guadeloupe. They eventually made it to Banderas Bay for the Blast. The two aren’t sure where they are headed next. “Maybe the South Pacific,” says Case. “Maybe Ecuador. Or maybe both.”

The internet is another common way that crew and skippers hook up. In the case of Randy and Leslie Hough, it happened in the late ’90s, when Randy was sailing his Santana 22 out of the long-departed Peninsula Marina in Redwood City and Leslie lived in Canada. Their first sailing date was the South Bay’s 54-mile Midnight Moonlight Marathon race. “It blew 35 knots the whole time,” remembers Randy, “so it wasn’t dry or comfortable aboard a little Tuna.” When Randy moved to Canada to marry Leslie in ’00, it was with Befana, a Catalina 30 that he’d already owned for five years. The couple now do ‘six-and-six’, spending half the year in Port Moody, Canada, and half a year in Banderas Bay, Mexico. Alas, Leslie didn’t crew for Randy in the Blast. It had something to do with her still having not gotten over that first sail on the Santana 22. But she could have if she’d wanted to.

As our piece shows, there are lots of ways to get on boats. You might want to employ one of them — or others — for events such as the Banderas Bay Regatta, March 16-20; Sea of Cortez Sailing Week, April 1-6; La Paz Bay Fest, April 8-11; or Loreto Fest, April 30-May 2.

**lord jim — cont’d**

battle with the yard’s owner, Luiz Prado. He filed suit in an attempt to squeeze the Americans for hundreds of thousands of dollars over and above the haulout fees. The court eventually ruled in Kreuzhage’s favor. But before he could launch the boat and sail away from this dark chapter in *Lord Jim*’s already-colorful 74-year history, Prado disassembled the tracks of his marine railway, thereby holding the schooner hostage, with no chance of making an exit unless her beleaguered owners paid him a $50,000 ‘fee’ that they’d be hard pressed to come up with. Prado has also filed an appeal which could drag on for years.

So, at this writing, the stranded schooner sits high and dry at the edge of the Reparos Naval do Mangaratiba yard, which abuts a dense jungle where blistering heat and intense humidity threaten to destroy her inch by inch. “It will not be a pretty death,” says Kreuzhage, who circumnavigated aboard *Lord Jim* three times before Tracy joined him. “There will be nothing noble about this drawn-out destruction — and that is what our enemy wants.”

Kreuzhage and Brown are deeply dejected, of course, but they have not yet given up the fight. Recently, they’ve been encouraged by the fact that several major Brazilian media outlets have exposed the extortion attempt. Citing the fact that holding a vessel ‘for ransom’ is against both Brazilian and international law — especially since *Lord Jim* is a documented U.S.-flagged vessel — the embattled couple is hopeful that prominent American politicians such as Diane Feinstein, Barbara Boxer and perhaps even Hillary Clinton might take up their cause.

If you have advice or encouragement for these stranded former-Bay Area sailors, we’re sure they’d be happy to hear from you. Email holger_kreuzhage@yahoo.com.

---

**protecting the cetacean nation**

Having been gravely threatened with extinction only a few decades ago, the resurgence of whale species along the West Coast and elsewhere is one of the greatest success stories of the modern conservation movement. An unfortunate consequence of that success, however, is that several species of cetaceans are now so prolific along the coast during their October-to-July migration season, that they are sometimes struck by commercial ships and recreational boats. A recent case in point was the sinking of the J/120 *J World* during October’s Baja Ha-Ha Rally, after the vessel made a series of contacts with a humpback during a stint of heavy weather. (See the December ’09 *Latitude.* )

In that instance there was little the crew could have done to avoid striking the 40-ft mammal. More generally, though, it’s fair to say that the more we all know about the behaviors of migrating whales, the less likely we are to injure them. With that in mind, NOAA’s National Marine Fisheries Service has asked us to help educate offshore sailors, and encourage all mariners to report strikes to authorities.

Marine Mammal Biologist Monica DeAngelis of NMFS explains, “Depending on the activity level, baleen whales (meaning filter-feeders such as humpbacks, grays and blues) breathe several times at the surface before submerging again for several minutes.” She notes that these species can sometimes be identified by the size and shape of their spouts. A gray whale’s spout, for example, is typically heart-shaped when viewed head-on; a humpback’s is rounded and “bushy;” and a blue’s is tall and columnar. “The visible spout of a whale is not actually water rising from the blowhole,” she explains, “it’s water vapor condensing as the respiratory gases expand in the open air.” (For further info, download NOAA’s informational brochure from latitude38.)

---

**do the delta**

Last summer, 30 or so Bay sailors joined in the inaugural Delta Doo Dah, a laid-back Bay-to-Delta ‘rally’ we dreamed up over a bottle of champagne at the company Christmas party. The idea was to get folks sailing in their own backyard, and it worked better than we’d hoped.

As summer approaches at lightspeed, we realized that it was time to announce the deets on this summer’s running of the event. Conflicts with a couple of Hawaii races forced us to move the dates a month later so the Delta Doo Dah Deux will be held July 31-August 6. The entry fee is just $49, and includes a burgee and...
doo dah deq

As every sailor worth his salt knows, under international law someone must always be on watch aboard any vessel that’s underway. And part of a watch-keeper’s job should be to keep an eye out for whales, in addition to other vessels. If you are unlucky enough to hit one—or observe any marine mammal that’s stranded, entangled or injured—DeAngelis and her associates ask that you report the incident as soon as possible via their toll-free hotline for marine mammals in distress: (877) SOS-WHALE (767-9425). Or hail the Coast Guard on VHF 16. Rescue attempts of entangled or injured mammals can be dangerous, so mariners are urged not to approach closer than 100 yards, unless prompted to do so by trained responders.

It’s a big ocean out there. If we’re careful, there should be plenty of room for all of us—and marine mammals too.

—andy

Spread: Now finally rebuilt, ‘Lord Jim’ is being “held hostage” in a Brazilian boatyard. Inset left: The railroad’s tracks were intentionally disabled. Insets right, top to bottom: Compared to the court battle, refloating her was easy. The harsh elements at work. When supports were maliciously removed, Kreuzhage hammered replacements right into his newly faired hull.

ronnie simpson — never say die

When Ronnie Simpson left San Diego on October 1, 2008, aboard his Rhodes Bounty II La Cenicienta bound for Hawaii, the dockside know-it-alls told him he'd never make it. After all, the 23-year-old kid had bought the boat just a few months earlier, and had never sailed a day in his life. What business did he have sailing solo to Hawaii? As it turns out, they were right. Just eight days and 800 miles out of San Diego, Hurricane Norbert — off Cabo at the time — had whipped up the seas into such a frenzy that Simpson was suffering from seasickness and exhaustion. La Cenicienta was doing well, but on October 8, Ronnie admitted on his blog that he may have idealized the supposed "tradewind run" to the islands: "I had no clue what I was getting myself into, setting off alone from California to Hawaii. I thought it was going to be an easy, pleasant run in a steady 15 knots of breeze." That night, his steering failed. "I think I hit a whale," Simpson says now of the incident which led to his rescue by a China-bound freighter. "I was below when the boat

clipper race on its

As we go to press, details were being finalized for the Clipper 'Round the World Race’s San Francisco stopover, which will bring the nine remaining boats in the fleet to the San Francisco Marina around April 1. The boats are slated to dock adjacent to Golden Gate YC after finishing the roughly 35-day Leg 5 from Qingdao — the longest leg to date of the biennial 'round the world race sailed in identical 68-ft boats.

The Bay is the only U.S. stop for this year’s race, and adding to the excitement, the Golden State’s first-ever entry, California, will be in the pack. Six Californians have already joined the crew for various legs, and those who aren’t aboard the boat for the slog across the Puddle will be on
sightings

way to the bay

hand to welcome their teammates home.

The fleet will only be here for between six and 10 days before heading out April 11 for a downwind blast in true West Coast-style to Panama for a transit of the canal. As if it weren’t gnarly enough that they have to sail upwind for 35 days to get here, the short stopover means the sailors — many of whom had little or no offshore experience before their rigorous Clipper Race training — won’t have much time in the City. So make sure you get down to the Marina, adopt a Clipper racer, and show the fleet some love! You’ll find more info, as well as updated arrival times in at www.clipperroundtheworld.com.

round up. I tried turning the wheel but nothing happened. When I checked below, I could see the worm gear turning but the rudder post didn’t move. Then I saw that the rudder to my Aries windvane was trailing the boat by its safety line.” It certainly does seem unlikely that both rudders would fail simultaneously.

In hindsight, Ronnie says he made some big mistakes, “But shit happens in life.” This coming from a guy who, at the age of 19, was blown nearly to pieces by an RPG just 13 months into his first tour of duty as a Marine stationed in Fallujah, Iraq. He survived the explosion — barely — and spent 18 days in a medically-induced coma, two months recovering in a military hospital, and several more months getting back into the swing of civilian life in Texas.

But by the end of ’07, Simpson had it all: A good job, a house, six high-end motorcycles, and a beautiful fiancée. “On December 18, my brother called from Hawaii and asked if I wanted to sail around the world,” he recalls. Having never sailed before, Ronnie dismissed the idea, but Googled ‘sailing’ out of curiosity. “I put my house on the market five days later,” he laughs. Within three months, he’d liquidated everything — including the fiancée — moved to San Diego, and bought the Bounty.

Sadly, everything he owned was aboard the uninsured La Cenicienta. With just $5,000 left to his name, Simpson couldn’t afford another boat, so he switched gears . . . literally. After arriving in Hong Kong, Ronnie bought a Cannondale bicycle and spent the next nine months riding 9,000 miles through 21 countries. “After 20 countries with no problems,” he recalls, “my bike got stolen in London within an hour!”

He bought another bike, but instead of continuing through Western Europe as planned, he flew to the Bay Area and rode home to San Diego. “I flew back to the States with $88 to my name,” he said. “When I got to San Diego, I announced I was done with biking and that I would do the 2010 Singlehanded TransPac.” It seems his desire to sail hadn’t gone down with La Cenicienta.

Though he bought a Cal 25 two weeks after getting back and was considering doing the race aboard her, Simpson soon received an offer he couldn’t refuse. Don Gray, a former Marine who had competed in the ’08 Solo TransPac aboard the Judson 30 Warriors Wish, had heard his story and emailed him with a proposal. “He said that he would loan me his boat if I made all the rest happen,” Ronnie says. “You don’t meet a lot of Dons.” Simpson and Gray spent the next few months prepping Warriors Wish in North Carolina before trucking her to Alameda, where Ronnie is completing upgrades for the race.

Warriors Wish will be the only sponsored boat in the race (to date) — and the first since ’04. Though he is receiving quite a bit of donated gear, Simpson’s main sponsor is the non-profit Hope for the Warriors, a charity that runs support programs for wounded veterans and their families. “The one that really touches me is one that helps families be at the bedside of their wounded veterans throughout their recovery.” Simpson noted. “I couldn’t have made it through if my parents hadn’t been there.” (Find out more at www.hopeforthewarriors.org.)

For all the naysayers Ronnie’s encountered, especially after his return from Europe, he’s had triple the number of supporters, but one in particular stands out. “This old guy Harry in San Diego had sailed to Hawaii and back six times on his 30-footer. When I got back and everyone was giving me shit, he said, ‘Sounds to me like you learned a lot. You don’t have a boat and you don’t have any money, but I know you’ll leave the marina before any of these guys do.’”

This time it seems Harry was right.

Follow Ronnie on his website at www.openbluehorizon.com. For more about the Singlehanded TransPac, which starts from the Bay on June 19 and ends in Kauai, go to www.sfbaysss.org. The next race seminar — which is free and open to anyone — will focus on rigging and will be held March 15 at Oakland YC. See Calendar for details.

— ladonna
Larry Ellison won the America's Cup on his third try, leaving few stones unturned in the process.
The events of the last 2.5 years have dominated the narrative of the 33rd America's Cup, but the roots of the conflict that was resolved in Valencia February 8-14 stretch back to the year 2000, and the events following the 30th America's Cup in Auckland. Back then Russell Coutts, Brad Butterworth and a whole host of Team New Zealand sailors, designers and builders jumped ship after successfully defending the oldest trophy in sports which they'd won in San Diego in '95.

They signed with a hitherto low-profile Swiss yachtsman Ernesto Bertarelli — who had founded a sailing team named for a nonsense word from his childhood. Bertarelli created the sailing machine that would come to be known not only as Alinghi, but also as the successful challenger of the 31st America's Cup some three years later. Coutts' contract with Bertarelli called for him to have complete control over the next defense, should they win. But after the glow of victory had subsided Coutts and Bertarelli had a series of contretemps over issues like where to hold the defense of the next Cup match. Before we knew it, the successful partnership had dissolved, leaving Coutts on the sidelines — hostage to a non-compete clause in his contract — while Butterworth and the rest of the boys he'd brought with him successfully defended the 32nd match, held in Valencia, Spain, in the summer of 2007.

Meanwhile, software mogul Larry Ellison, CEO of the Bay Area-based Oracle Corporation, had also challenged in 2003, with a team bearing his company's name. Ellison lost to Alinghi in the Louis Vuitton Cup finals, but he and Bertarelli had formed a friendship and agreed that what would ultimately become BMW Oracle Racing would be the Challenger of Record for the commercially successful 32nd Cup match. Despite having one of the largest budgets in Valencia, Ellison's team, led by the abrasive Chris Dickson, ended up being swept in the Louis Vuitton Cup semifinals. At the same time, relations between Ellison and Bertarelli had soured, and tension between the two began to surface during the work-up to the
event, as they established the conditions for the match.

When Alinghi successfully defended in Valencia, Bertarelli and his team decided that it would set up a paper yacht club, the Club Náutico Español de Vela or C.N.E.V., to be the next Challenger of Record. They wrote a protocol that would make even the New York YC blush, giving them complete control over aspects like the division of revenue, the jury, regatta administration and, perhaps most importantly from the sailing side, the right to sail in the challenger elimination series. While the latter point might not seem like a big deal, the one advantage the Challenger has traditionally had in the America’s Cup is that it’s boat has been battle-tested by the time it meets the defender.

Ellison, who later hired Russell Coutts to be his team’s CEO, didn’t like any of it. But given that there was already a Challenger of Record in place, there wasn’t much he or anyone else could do about it. Except... Bertarelli hadn’t dotted his i’s or crossed his t’s. The Cup’s Deed of Gift doesn’t require that a valid challenger have a clubhouse, C.N.E.V., they scheduled it for after that. But what the New York Supreme Court ultimately upheld was that “having” meant “having already had.”

Ellison’s response? Challenge. So it came to pass that the Bay Area’s own Melinda Erkelens, the team’s General Counsel, and a Swiss Process server walked right into Alinghi’s home club, the Société Nautique Geneve, and served the club’s commodore, Fred Meyer, with a challenge for the 33rd Cup.

The 2.5-year legal battle that ensued was, well, boring, so we’ll spare you the details. But the short story is that C.N.E.V. was declared an invalid challenger and the Golden Gate YC’s BMW Oracle Racing Team became the rightful one, and the rest of the time was spent deciding how the match would be.

When it was revealed, it appeared that Ellison’s team would have a fight on its hands. The cat looked much lighter than anything else. The sailing world waited to see what Bertarelli and his team would produce, given that neither team yet knew where or when the match would be.

Alinghi’s response was a 90-ft long by 80-ft wide catamaran named Alinghi 5, built in Switzerland, per the Deed of Gift’s stipulation that the yacht and components be built in her home country. When it was revealed, it appeared that Ellison’s team would have a fight on its hands. The cat looked much lighter than...
AFTER winning a coin toss and electing to start the first race from the starboard side, BMW Oracle Racing skipper James Spithill absolutely nailed the entry, accelerating to 24 knots in the 6-to-8-knot breeze while bearing away and preventing Alinghi 5 from crossing. With the pin-end favored by some 30°, Alinghi 5 was forced to enter the starting box at a much deeper angle, and as a result could only manage 14-knots of boat speed as she entered ‘the box.’ That left her as a sitting duck for the aggressive Spithill, who put to rest the widely-asserted notion that there wouldn’t be a bare-knuckles pre-start between the two multi-hulls. Did anyone really think they’d be sitting there at the start, waving each other across, saying, “You first,” “No, you go ahead,” “No, please, after you?”

As the boats approached each other for the first time, the speed difference allowed Spithill to attack and force Loïck Peyron to tack to stay clear; Alinghi was successful in the former but not the latter, and it wasn’t long before USA’s tactician — Bay Area born-and-bred John Kostecki — raised the Y-flag while USA followed suit. After 45 seconds of deliberation, the on-the-water umpires signaled a penalty against Alinghi.

Penalty in hand, Spithill and company tried to hang head-to-wind near Alinghi above the starting line, but it didn’t take long for the directional stability of those 100-ft long hulls to start working against the skipper, as the boat drifted astern with the wing stalled. Alinghi 5 was able to get clear and gybe away, re-crossing the line on time, while USA drifted backwards in irons before finally crossing the line a minute-and-a-half behind.

What no one knew at the time was that USA would sail from Alinghi 5’s lee, straight up and over the big cat, going higher and faster, and passing Bertareli-Spithill attacks aggressively at the start of the first race, setting the tone for the rest of the match.
It's boys early in the 20-mile weather leg on the windward/leeward course specified for the first race of the match by the Deed of Gift. After completely dusting Alinghi, USA rounded the top mark almost 3.5 minutes ahead. Much to everyone's surprise, down the leeward leg, USA sailed even faster. They won by a stunning 15.5 minutes after Alinghi 5 botched their 270° penalty turn at the finish and required another five minutes to figure it out.

Back at the dock, the visibly stunned Bertarelli and company were already wearing defeat on their faces. After the deeded-mandated lay-day, the teams hit the water for race two on Sunday, and were greeted with no breeze. With the 4:30 p.m. race deadline looming, and a forecast for days of inclement weather, the breeze finally filled in on the race course after Bennett had canvassed a 20- by 20-mile square area looking for the best possible pressure. Just after 4:25, Bennett made the call to start the race, but the Société Nautique Genève-appointed race committee had other ideas, and went on strike. That forced Bennett to enlist the help of BMW Oracle Racing's mutually consented observer Tom Ehman, and the R/C boat driver to hoist the flags!

To top it off, the Alinghi team — which includes a lot of people who should know better — was inexplicably inside the starting box when the sequence started, drawing a penalty right off the bat and ceding its starboard-tack advantage to James Spithill and company before the word 'go.' With Ernesto Bertarelli on the helm, Alinghi 5 looked like they were in their first — and possibly last — rodeo.

Having won the start by 24 seconds, USA headed left up the beat, while Alinghi 5 went right. The big cat hooked into a nice right shift and quickly pulled away from USA, amassing what became at one point a 550-meter lead. But USA stayed in touch, protecting the left in the process — in anticipation of a left shift, which they got. Kostecki and navigator Matteo Plazzi called a dead-nuts port-tack layline and USA was flying toward the mark. The shift had eroded Alinghi 5's lead down to 100 meters, and Loick Peyron — who'd taken over for Bertarelli during the previous tack — couldn't safely lee-bow USA or engage them in a dial-up. Had they missed, they would have been sailing the wrong way at 25 knots while USA would be accelerating through the duck, toward the mark. They were thus forced to cross, then tack for the weather mark. By the time they'd completed their painfully slow tack and made it to the weather mark, Alinghi 5 was 28 seconds behind USA.

"John made it very, very hard for them by picking that shift," Coutts said at the Golden Gate YC's reception for the team.

From there on out, it was all USA, as the black trimaran tore off at speeds in the high-20s in the 6-knot breeze, and led Alinghi 5 by 2,000 meters at the reach mark of the 39-mile, Deed-mandated triangle course which was comprised of three, 13-mile legs. USA generally sailed about 1 to 2 knots faster than Alinghi 5 upwind, and 2 to 3 knots faster on the reaching legs, as they extended their lead all the way around the course, with a margin of 2:44 at the gybe mark. In the fading light, USA had stretched out to a lead of over five minutes, thus ending a brutal, but ultimately necessary, chapter in the history of the oldest trophy in sports.

Following the racing, Bertarelli and the team lobbed up the excuse that, "The American legal system favored BMW Oracle." While we never really saw any evidence of that, we did see some things that appeared to have a serious impact on the outcome of the match. For Alinghi's part:

Choosing the catamaran over a tri — it seemed like a good idea at the time, because it's a lighter solution. But the catamaran as a platform left little room for development. The main beam, where the mast must be stepped, can't be moved fore-and-aft. Alinghi never had a chance to go bigger with their rig. If they had gone bigger, the sailplan's center of effort would have thrown the whole boat out of balance, thereby making it...
impossible to sail. With the trimaran, BMW Oracle Racing could move their rig fore-and-aft because the center hull could be modified to accommodate more structure where needed; not a simple job, but exclusive to the tri. According to Kostecki, BMW Oracle ended up moving their mast step three times as the sailplan got taller and taller.

Where Was Ed? — American Ed Baird helmed Alinghi’s successful defense in ’07. An accomplished match racer, he took to the multihull scene with fervor, racking up wins in the Extreme 40 class and putting in hours on ORMA 60s. It was rumored that he fell victim to a Kiwi antagonism perpetrated by Alinghi’s anitpodean sailors, although he would never confirm it on the record. Whether or not the reason why is true, he was the best match racer on the team, and although helmsman Loïck Peyron is one of the modern era’s masters of multihulls, he doesn’t have much of a track record in match racing. We guarantee you that Ed Baird would have made at least a passable entry in the second race.

Ernesto, get off the wheels! — Ernesto Bertarelli took the helm of Alinghi 5 for far too long. That’s like Mark Cuban suiting up for his Dallas Mavericks and starting at point guard.

Khas Al Khaimah? — The non-Deed or Court Order-compliant venue choice by Bertarelli, and his boat’s detour to the Arab Emirate put a dent in the team’s record in match racing. We guarantee you that Ed Baird would have made at least a passable entry in the second race.

BMW Oracle Racing; Alinghi design coordinator Grant Simmer did an admirable job in a short period of time, but it wasn’t enough to beat Ian ‘Fresh’ Burns’ USA.

From left — Australian multihull impresario Glenn Ashby brought his skills to BMW Oracle Racing; Alinghi design coordinator Grant Simmer did an admirable job in a short period of time, but it wasn’t enough to beat Ian ‘Fresh’ Burns’ USA.

---

**The Victorious Righteous**

Big, fast and hard to handle, both boats proved to be the most spectacular boats to contend for the Cup since the J Class — maybe of all-time.

From left — Australian multihull impresario Glenn Ashby brought his skills to BMW Oracle Racing; Alinghi design coordinator Grant Simmer did an admirable job in a short period of time, but it wasn’t enough to beat Ian ‘Fresh’ Burns’ USA.

---

**The Tri** — In addition to the reasons mentioned above, the team didn’t end up leaving anything on the table structurally. They were able to take advantage of the increased efficiency because they were capable of going larger and larger, eventually setting nine vertical elements on their wing spar to get up to that 223-footh.

For BMW Oracle Racing, which was the only team owner to publicly back Ellison’s two previous teams had very good personnel, but their chemistry was off. Coutts got an impressive result.

The Wing — Wing Trimmer Dirk De Ridder said that the mainsheet loads on the soft-sail rig were in the neighborhood of 20 tons; with the wing it was more like 2 tons. That meant that the wing, as massive as it was, could easily be controlled and quickly adjusted for changes in wind velocity and direction. Alinghi on the other hand had to resort to hydraulics to trim theirs, which meant that in the puffs they could only wind on leech tension slowly, and as soon as the puff had passed, they would be really strapped. On a sailplan of this scale, a happy medium looks desirable.

"Without the wing, the first race would have been closer," Kostecki said. "And they probably would have beaten us in the second race."

The Tri — In addition to the reasons mentioned above, the team didn’t end up leaving anything on the table structurally. They were able to take advantage of the increased efficiency because they were capable of going larger and larger, eventually setting nine vertical elements on their wing spar to get up to that 223-foot mark. Not knowing the venue from the get-go was a challenge all the way around, but the tri was able to adapt, while the cat had to remain pretty close to its original design.

It didn’t take long before Erkelens and Mascalzone Latino team owner Vincenzo Onorato were inking a deal to make the Italian shipping magnate the next Challenger of Record. Onorato was the only team owner to publicly back Ellison from the start, and he has a long-
We feel that a mutual consent challenge from these two teams will probably produce a desirable result. We’re pretty sure we won’t see powered winches — the only truly regrettable thing we found about America’s Cup 33.

And we’ve got to say it’s about 50-50 for Monohulls or multihulls for the next match. Spithill said that the best thing about this Cup cycle was getting to sail such a sweet boat each day. That’s a mighty contrast to a typical AC campaign — what the sailors have called ‘sail jail’ for its endless weeks of mind-numbing, two-boat, straight-line speed testing. The public loved the boats. They captured as much attention as their billionaire owners, and while they may not work on that scale, we won’t rule multis out entirely.

The question of where and when the next Cup will take place is just as murky. Ellison had previously promised the mayor of Valencia that he would host the next Cup there if his team were to take AC33. Now he’s telling San Francisco he’d love to hold it here. He also mentioned at the GGYC reception that he wants to see a Formula 1-type traveling circuit with visits to Hong Kong, Auckland and Newport, Rhode Island, as a prelude to the Cup. There are just too many red herrings as of now. But one thing is for sure, bringing the Cup to the Bay would have a huge impact on both the West Coast’s sailing scene, and the ability to reach out to a more mainstream audience in the U.S. There are challenges, many of which can be overcome. Those that are likely to prove the most difficult are ones that almost every Californian faces — those that involve that sticky red tape.

For those who felt as if the 33rd America’s Cup was an exercise in ego-driven, billionaire histrionics, keep in mind that the Cup’s cache and mystique is built around names like Vanderbilt, Lipton and Turner that have kept it at the forefront of public consciousness for over one-and-a-half centuries. The Cup has survived two World Wars, and the Great Depression. While it wasn’t the best-case scenario for the commercial side of the sport, America’s Cup 33 was a momentous punctuation in the evolutionary equilibrium of the oldest trophy in sports.

Is it just us, or has this been a particularly wet, cold and nasty winter? We’ve spent so many days shut up indoors lately, itching for some fresh air and exercise while rain pelts against our window, that we’re starting to go a little stir-crazy — and we were crazy enough to begin with.

But in nature, all things ultimately balance out. So, just as the gloomy days of winter follow the sun-kissed days of fall, the glorious coming of springtime will soon chase Old Man Winter back into hibernation. And for sailors, that’ll mean it’s time to spruce up the boat, load up the cooler, and get out on the water for some carefree fun.

You needn’t wait for a special occasion like a race, raft-up, or floating office party, just follow your instincts and spend a few hours poking around the Central Bay with no particular agenda. We guarantee that your outlook on life

Spread: Laid-back sailing up Raccoon Strait. Inset left: No one to sail with? Bring along Rover. Inset right: Shakin’ loose the cobwebs.
will be a whole lot rosier by the time you return to your slip.

Go out solo or bring along a boatload of your closest friends; invite your special someone for an intimate tour of the Cityfront, or just take along your favorite house pet. Whatever. The point is, don't allow yourself to procrastinate until all your brightwork has been touched up and your stainless has been polished, just throw off the docklines and use the darned boat!

Just so you know, the first day of spring is officially March 20, but we're hoping for plenty of sunny, rain-free days before then. In the Bay Area boating scene, spring brings with it a slew of worthwhile on-the-water events. On March 6 the Spring Keel Regatta kicks off on the Cityfront. The next weekend the always-festive Big Daddy Regatta will dominate the Berkeley Circle and, while we're at it, the Rites of Spring Regatta will be held on the 20th.

April will bring the start of Beer Can racing at YCs from Stockton to Santa Cruz, while May will be ushered in by the enormous Great Vallejo Race and ushered out by the Master Mariners'. As you can imagine, the spring calendar is literally jam-packed with exhilarating events for boats of all types and sizes.

To our way of thinking, spring is the season, like no other, whose arrival will put a smile on your face. Down through the ages, hundreds of authors have waxed poetic about the coming of spring, but we think Doug Larson said it best: "Spring is when you feel like whistling even with a shoe full of slush."

SAILBOATS ONLY
Around 5:30 p.m. on February 4, a fire broke out on a boat in Sausalito’s Schoonmaker Point Marina. Hans List and Bill Burdette were outside the List Marine shop less than a block away when they saw smoke. “We were the first ones on the dock,” List recalls. “After calling 9-1-1, we started calling everyone we knew who had a boat on C Dock.” One of those people was this writer. In fact, our boat was just 50 feet from the Ocean Alexander 48 Rubicon, which, by the time my husband and I arrived at nearly 6 p.m., was fully engulfed.

The sight of a blazing fiberglass boat is enough to get any sailor’s heart racing. But when the winds are blowing smoke, flames and burning embers toward your home, your heart beats just a little faster... trust us on this.

But whether by miracle, luck or the extreme professionalism of the responding fire crews, the conflagration caused surprisingly little damage — other than to Rubicon itself, which was a total loss. The co-owner and his two dogs, who had recently been spending quite a bit of time aboard, escaped the fire unharmed. The two boats directly downwind — and just a few feet away — suffered only melted roller furling jibs and minor rigging damage. A couple of dock boxes were destroyed, and the concrete dock in front of Rubicon has seen better days, but considering the intensity of the blaze, things could have turned out much worse.

“We were very fortunate in a lot of different ways,” says Mike Rainey, harbormaster at Schoonmaker. “Rubicon was on a side-tie so the fireboat Liberty could access it easily. Plus it was raining and the wind hadn’t picked up yet, as it was forecasted to do. All of that worked in our favor.”

The owner believes the cause of the fire was electrical in nature but there’s been no official word, and there might never be. She was slated to be disposed of late last month.

According to BoatUS, 55% of all onboard fires originate from a boat’s electrical system. Surprisingly, only 8% of those are directly linked to shorepower connections or AC heaters — two sources commonly charged with being leading firestarters. Shorts and faults in the DC electrical system are the top causes of onboard electrical fires, claiming 30% of the total.

Here are some tips to help lessen the risk of a fire breaking out on your boat:

- Periodically inspect your entire electrical system. Look for chafing wires — often found near the engine, bulkheads or other sharp edges. Chafe leads to shorts which lead to fires.
- Use wire ties to secure wiring away from potential sources of chafe. Another option is to use wire conduit, which will not only protect the wire but give a finished look.
- If your wiring is old, consider updating it. Invisible corrosion in older wiring not only decreases the efficiency of the system, it can also lead to overheating.
- Corroded or improperly installed terminals also lead to power loss and fire. Ideally, properly crimped terminals would be protected by watertight heat-shrink tubing.
- Maintain your batteries as recommended by the manufacturer. If they start to boil over or bulge, it’s time to replace them. Also ensure that they’re strapped down or otherwise secure, and that the battery box is well-vented.
- Install circuit breakers or Class T fuse blocks as close to the batteries as possible. Many boaters think that the circuit breakers on the DC panel are protection enough, but those breakers are really only designed to protect the devices to which they’re connected. There is still a long run of vulnerable — and live — wire from the panel to the batteries that needs to be isolated in case of a short.
- Make sure your current DC system is correctly sized for your needs. If you’ve recently added a slew of power-sucking electronics, you need a beefier system than if you’re just running a VHF, stereo and 12-volt blender every now and again.
- Many sailors are staunch do-it-yourselfers, but onboard electrical systems will not tolerate amateurs for very long. This is definitely one area that is best left to the professionals. Even so, it’s essential to understand how your boat’s electrical system works. While there are a number of excellent reference books on the subject, the granddaddy of them has to be Nigel Calder’s Boatowner’s Mechanical & Electrical Manual. Buy it, read it, then call a pro.

Just two days before Rubicon burst into flames, a Pearson 36 berthed at Marina Bay Yacht Harbor in Richmond also caught fire. A marina tenant happened to be walking by the boat around 10 a.m. and spotted flames inside. He called out to nearby marina staffs, who immediately put out a call on the radio and set to work dousing the fire.

“When I heard the call over the radio, I looked up and saw a big cloud of smoke rising over the marina,” said Marina Bay Harbormaster Steve Orosz. “I leapt into my truck [Ed: the fire was on the other side of the 850-slip marina] and drove like a madman, but my staff had it contained by the time I got there.”

The boat owner, who was out of town at the time, told Orosz that the only thing plugged in was a dehumidifier. Though the unit itself was not burned, only melted, the wiring was fricasseeed. Orosz believes the AC plug was the culprit.

Though BoatUS claims AC fires account for only a small percentage of all boat fires, harbormasters appear united in their fear of them. “Space heaters suck
SMOKE ON THE WATER

To properly connect a shorepower plug to your boat, dab a little dielectric silicone on each prong before inserting it into the receptacle. Remember to lock the plug in place by turning it before tightening the locking ring. This should greatly reduce the risk of moisture getting into the connection, but it may not stop a fire if the system is overloaded.

We hope it goes without saying to never use a household extension cord as your shorepower connection.

There are, of course, many other ways a fire can break out on a boat — battery chargers can overheat, candles can tip over, gasoline vapors can explode, galley curtains can ignite — but the last onboard system we'll cover is propane.

Because of its explosive personality, propane is — and should be — one of the most feared substances aboard any boat. Though not common, propane explosions can tear a deck clean off a hull — let's not talk about what they can do to the people belowdecks — which is why your propane system should be checked regularly and upgraded if anything seems hinky.

Recently, a new boatowner confessed to being puzzled by how quickly her propane tank emptied. One day, a boat-savvy friend opened her anchor locker — which also serves as her propane locker — and nearly fainted at what she found.

The boat's previous owner, not knowing how to make the propane system's solenoid switch work, simply removed the safety device and connected the regulator directly to the tank with clear water tubing and hose clamps. "I wouldn't have known that was a problem if it wasn't for my friend," says the new sailor. "I couldn't sleep for a week knowing my daughter and I could have died if the propane locker didn't vent overboard."

Propane is heavier than air, so it's easy to imagine it flowing like water. The safest set-up is to store tanks on deck. If that's not feasible, store them in a dedicated locker that has an overboard drain and no access to the interior of the boat. You want to avoid gas draining into the bilge where the spark from a bilge pump could ignite it.

When checking the system, make sure the regulator, solenoid, high-pressure hoses and pressure gauge — which tells you if the system has a leak — are free of that dreaded corrosion and any defects. As an added precaution, install a gas sniffer, which sounds an alarm and trips the solenoid should it detect gas. Calder's book can help here, too.

So you've taken all these suggestions to heart and are confident that you've done everything you can to prevent a fire from breaking out on your boat. What do you do if one breaks out anyway?

"Someone should only fight a fire if they're comfortable with it and feel they can do so safely," says Orosz. "I wouldn't fault anyone for not fighting. The best thing for them to do is check to see if anyone is aboard, call 9-1-1, and then spread the word to their neighbors so
they can evacuate."

If you believe you would try to fight, the smartest course of action is to devise a plan of attack before a fire breaks out. Install smoke and carbon monoxide detectors. Tuck a fire blanket near the galley. Buy several ABC-Class USCG-approved fire extinguishers — even though they may not be required by law — and learn how to use them. Then check them annually.

Fire safety experts suggest attacking a blaze only if it’s small and confined, and only with your back to an exit. If the fire starts to grow, or fiberglass becomes involved, get off the boat immediately.

The resins used in fiberglass boats are highly flammable so it’s common for intense infernos to quickly spread to neighboring boats. All too often, the boats on an entire dock are consumed.

But the same pre-planning can be used on other boats on the dock, if a fire is caught early. Note where the fire hose cabinets are on your dock. “Tenants walk by the fire cabinets so often that they don’t even realize they’re there,” notes Rainey. Inside each you will likely find a fire extinguisher as well.

Keep in mind that the water supplied to those hoses comes from the dock’s water line, so the pressure won’t knock you off your feet. Consequently, the hose must be pulled free of the cabinet and straightened as much as possible before the water is turned on. This can take valuable seconds but it’s essential because clearing a kink in a pressurized hose can take even longer.

Consider working with marina management to coordinate a fire safety seminar for tenants. Everyone can learn safety practices — as well as practice how to pay out that tricky hose.

Just as important as knowing how to fight a fire safely is knowing when to not fight. No boat is worth a person’s life, so many experts caution against even trying. If you decide to fight, have your exit strategy in mind and quit if you don’t see quick progress. Some say if you can’t put the fire out with one extinguisher, leave it to the experts.

We had no choice but to leave the fate of our boat in the hands of professionals. We’d never felt so powerless. Our hearts pounded as we watched the fireboat and shore crews douse the inferno. But as flames were replaced by clouds of smoke and steam, we knew our little home on the water would live to sail another day. Walking down the dock the next morning, I noticed a fire hose cabinet for the first time.

Aqua Marine
Watermakers Since 1987

Sparkling Fresh Water, Power, and Refrigeration from the Seven Seas

AquaGen combines the quality, simplicity & reliability of Aqua Marine, Inc. watermakers with the durability of the Kubota 150 amp 12V diesel generators. This compact low fuel consuming AquaGen is a powerhouse, capable of producing up to 150 amps, and up to 62 GPH of fresh potable water from any water source. Make fresh water, refrigeration, and also charge your batteries at the same time! A hydraulic pump may also be added to run your dive compressor, waterless, bow thruster, or emergency bilge pump. Ideal for longterm cruisers or weekend wanderers. We custom engineer our systems to fit any size vessel or cabin site. Electric, Hydraulic, or Belt Driven Modular Kits are also available. Visit our Website for more information.

Quality at affordable prices.
Lifetime warranty on pump head and pressure vessels.

Have you been considering getting into the Moore 24 fleet by buying Scott Easom’s *Eight Ball*? You’d better make him an offer quickly, because every time he goes out, the cherried-out Pt. Richmond-based boat’s race record gets stronger. In the Singlehanded Sailing Society’s Three Bridge Fiasco on January 30, Easom and long-time crewmember Matt Siddens spanked the rest of the 291-boat doublehanded division, taking overall honors in what’s become the biggest race on the West Coast.

With stepped-up enforcement of the starting line restriction that prohibits crossing the line within 10 minutes of your start time, the duo found themselves on the east side of the line off the Golden Gate YC watching the 8- to 10-knot southerly breathe life into the course between Alcatraz and Treasure Island. Rather than risk a DSQ — a fate that befell a handful of boats — Easom and Siddens waited at the pin, made a quick buttonhook turn and a beeline for the flood in the Central Bay.

“It didn’t really cost us that much,” Easom said. “It might have been a half-boatlength, maximum.”

Leading a pack of Moores — at 38 boats, the largest one-design class — Easom and Siddens left plenty of room between them and T.I., popping a kite as they rounded it. From there, it was a pretty straightforward trip up to Red Rock for *Eight Ball* and the rest of the boats that picked the counter-clockwise route in this choose-your-own adventure pursuit race touching three of the Bay’s big spans — the Golden Gate, Bay and Richmond bridges.

Back on the Cityfront, things weren’t looking so good for about 80 boats that chose the clockwise route — heading to Blackaller first. Actually, check that. It was downright ugly. Caught in an eddy that locked the pile-up in an absolutely windless hole, that group — some of whom took up to 2.5 hours to break free — redefined the term “parking lot.” The handful of boats that went straight to Red Rock didn’t fare any better. When they reached Red Rock, Easom and Siddens made their second buttonhook of the day, counterintuitively wrapping a 270° turn around the Rock when they saw better pressure and less adverse current on the north side of the island. From there, the pair worked their way toward the Marin shore as fast as possible, picking up the beginning of the massive ebb that was powered by run-off and an 8-ft tidal swing. Approaching Raccoon Strait, they picked up the new breeze — a westerly that ultimately built into the 15- to 18-knot range — then rolled around Blackaller and into the finish for the win.

“It’s hard enough to win your division in this race,” Easom said. “But you have to be so freakin’ lucky . . . I mean so freakin’ lucky to win overall.”

Easom and Siddens may have been lucky, but they weren’t left off anyone’s pre-race shortlist, and no one was surprised to see them win. However it isn’t easy to get your name on a trophy when your uncle — who finished third in the fastest PHRF division and 30th overall on his 8-Meter *Yucca* — is in the mix too.

At the trophy presentation at Oakland YC 10 days later, Scott’s trophy was accidentally inscribed with his — arguably better-known — uncle Hank’s name.

Singlehanded division winner George Lythcott didn’t just show up, throw up some sails and race; he prepared — a lot. Picking the brains of experienced Bay Area sailors Kame Richards, J.P. Sirey du Buc de Ferret, and Rob MacFarlane, Lythcott came up with a game plan — get to Red Rock before the ebb got rolling — and he did.

Although he’d originally intended to head to Blackaller first, when he saw the southerly filling, Lythcott rejected his original idea and pointed his Estuary-based Express 27 *Taz!!* toward T.I.
"I've learned to do my planning up front," Lythcott said. "You don't have time to figure out where you're going while you're racing because you're always so busy sailing the boat. It's okay to make changes to it, but you've got to start out with a plan."

Lythcott, a purchasing manager for the Port of Oakland, worked his way up the Berkeley shore, passing boats under spinnaker. He was able to round Red Rock with his kite still up before changing to a genoa — which turned out to be a bad idea — on the way to the Strait.

"At the entrance to the Strait I was seeing 13 knots of breeze, which I could manage with the boat fully depowered," he said. "Then it built to about 17, which is outside the range of the number one headsail in an Express, even when you're fully-crewed! I was really over-powered and all the boats I'd passed downwind just walked on me."

After negotiating the tricky Gate crossing in the raging ebb, Lythcott rounded Blackaller and picked his way through a few rips before finishing to the sound of a horn . . . and a gun.

"I thought, 'Relax, you've blown this thing,'" he said. "There's no way that gun was for me."

Later that day, after buttoning up the boat, he headed over to Island YC for a crab feed where he ran into good friend and rival Ben Mewes, whose wife Lucy had been on the race deck and phoned over a finish report on the 43 single-handed starters.

"Ben said, 'You beat me,'" Lythcott recalled. "Ben has been my 'rabbit' ever since I started sailing singlehanded — I had never beat him before. He said, 'Yeah but I went the wrong way and you only beat me by 2.5 minutes.' I told him, 'Ben, I don't care if you had to sail to Cleveland first . . . I beat you!' Sailors like him are people I know and admire, so to me it just felt like I'd joined the club. I enjoyed
Lythcott will be sailing Taz!! in this year’s Singlehanded TransPac, a goal he's had in mind since buying the boat five years ago. As a tune-up, he sailed last year's LongPac.

"I approached it with the idea that if I didn’t like it, then I’d say ‘Fair enough.’ After three days, I was thinking, ‘I love this!’"

By the 7 p.m. time limit, 240 boats had finished since Eight Ball crossed the line at 2:41 p.m., plus a few more that were DSQ’d for not having running lights on or DNS’d for violating the starting prescriptions. If the level of participation is any indication, the Three Bridge Fiasco is the must-do event of the year on the Bay. Why has it become so popular? We’re not completely certain, but the SSS’s inclusive, run-what-you-brung ethos is producing increasing turnouts in all its races — not just the Three Bridge Fiasco — at a time when overall racing participation is declining. We have to believe a big factor is the dedication of SSS members and officers. Late nights crunching results and resolving scoring discrepancies — remarkably, after-the-
fact changes affected only six percent of the fleet — are part of the job, one the Bay’s racing community benefits from tremendously.

— latitude/rg

DH MULTIHULL — 1) Adrenaline, Mod. D-Class Cat, William Erkelens/na; 2) Beowulf V, D-Class Cat, Alan O’Driscoll/na; 3) Origami, Corsair 24, Ross Stein/ Henry van den Bedem. (13 boats)

DH PHRF < 105 — 1) Timber Wolf; 2) Pegasus, J/100, Philippe Kahn/Mark Christensen; 3) Yucca, 8-Meter, Hank Easom/Bob Easom. (32 boats)

DH PHRF 105-154 — 1) Arcadia, Modernized Santana 27, Gordie Nash/Ruth Suzuki; 2) Shaman, Cal 40, Steve Waterloom/Paul Sinz; 3) Harp, Catalina 38, Mike Mannix/na. (34 boats)

DH SPORTBOATS — 1) Flight Risk; 2) Outsider, Azzura 310, Greg Nelsen/Andrew Hura; 3) Flashpoint, Melges 24, Pat Brown/na. (33 boats)

DH NON-SPINNAKER PHRF < 143 — 1) Voyager, Beneteau First 345, Alan Barr/Kate Barr; 2) Windstar, Worth 40, Fred Hess/Karen Moy; 3) Escape, Sabre 402, Nicholas Sands/Doug Ford. (10 boats)

Use the Autopilotavored by Singlehanded Racers

Because for More than 30 Years ALPHA PILOTS Have Delivered the Highest Performance, Reliability and Low Power Consumption These Competitors Demand!

Why buy an Alpha Autopilot? We’ll make your boating more fun!

Singlehanded skippers have proven that the world’s best autopilot can steer almost as well as they can, save battery power, be more reliable than most crew members, and almost never break down. But, what really counts is how much more enjoyable your boating can be with an Alpha Pilot!

Please visit our web site at www.alphamarinesystems.com or call 1-800-257-4225 and let our knowledgeable staff discuss how we can put pleasure in pleasure boating.

A World Class Product Built in the USA

Alpha Marine Systems, Inc. 6809 96th Avenue SE, Mercer Island, WA 98040

Participants Wanted for Live, Saltwater Liferaft Safety Class

This is a unique opportunity to get the best possible experience with a liferaft before going offshore.

Limited space is available to join an actual liferaft deployment and boarding class immediately preceding the Latitude 38 Crew List Party.

Location: Golden Gate Yacht Club, San Francisco

Date: Wednesday, March 10  Time: 3:00-5:00 p.m.

Bring a lifejacket, swimwear (wetsuit or foulies), a towel, and dry clothing.

No cost, but reservations and a refundable $25 deposit are required.

PHONE (510) 522-1824  FAX (510) 522-1064

SAUSALITO, CA 94965

"Sausalito's Finest Marina"

160 Berth Marina in one of the most beautiful spots on the Bay

• Visitor berths  • Guest moorage able to handle yachts up to 200 ft.
• Dry storage  • Waterfront Offices  • Three-ton Hoist  • Windsurfing
• Deli  • Beach  • Rowing  • Kayaking  • Yacht clubs always welcome
SOUTH PACIFIC STAMPEDE

Just as all sorts of birds fly south for the winter in a predictable annual migration to sunnier climes, cruising sailors have always set off from the West Coast of the Americas between February and May, bound for the storied landfalls of French Polynesia.

Here at Latitude, we’ve always taken a keen interest in the folks who make that ambitious 3,000-mile crossing, especially since we coined the phrase “Pacific Puddle Jump” 15 years ago. As you will learn in these pages, the folks who are attracted to those fabled isles come from a broad range of backgrounds, and sail on a diverse fleet of boat types.

We’re told that several hundred private vessels pass through French Polynesia each year, traveling on what globe-trotting sailors like to call the “cruiser milk run” to New Zealand and Australia. In years past, 50 or 60 of them have crossed our radar, so to speak, because they attended our Kickoff Parties or participated in West Coast cruiser forums. But this year our Puddle Jump “radar” has been beeping like a Geiger counter in a Chernobie drainage ditch. It’s as if there were an unstoppable stampede toward the land of black pearls and ukuleles.

Seriously, as we go to press, 150 boats from all over the world have registered with us. Why? We’d like to think it’s because they think Latitude is the coolest sailing magazine on the planet. But it’s really because we were able to get free bond exemptions for last year’s fleet, saving them time, hassle and cash — and word of that coup spread like wildfire through the cruising community. Unfortunately, that deal was too good to last. But we did find a solution that’s almost as attractive, so more boats are registering with us every day.

We like to call this migration a “rally.” But since these passage-makers set sail independently from California, Mexico, Panama, and various points in South America, their crossing only loosely meets the traditional definition of that word. Nevertheless, many in the fleet keep in touch along the way via daily radio nets. And when they finally meet up in the anchorages of the Marquesas, Tuamotus or Tahiti, they naturally greet each other as friends.

Working closely with several Tahitian partners, we’ll help them celebrate their successful crossings by co-hosting the three-day Tahiti-Moorea Sailing Rendez-vous, June 18-20, where the focus is on traditional Polynesian music, dance, cuisine and sports.

Long before the ‘stampede to paradise’ begins, groups of west-bound cruisers gather in key locations each year to gear up, provision, and compare notes before taking that giant leap. Because Puerto Vallarta is the most popular staging area, we chose it long ago as the site for our annual Pacific Puddle Jump Kickoff Party, which is generously co-hosted annually by the Vallarta YC.

As you can tell by the photo on the right, we had a fine time getting to know one another. And as a bonus, all those who showed up were promised 15 minutes of fame in these pages. So with that introduction, let us introduce you to the Puerto Vallarta contingent of the Pacific Puddle Jump Class of 2010:

Freezing Rain — Hallberg Rassy 46
Don & Marie Irvin, Astoria, OR

The name Freezing Rain will probably leave Polynesians scratching their heads, but where Don and Marie have sailed, they’ve probably seen a lot of it.

Since learning to sail in the mid-’70s, they’ve sailed from B.C. to Alaska, twice around Vancouver Island, and all along the West Coast as far south as Ecuador. They’ve been working toward this ambitious crossing for six years, and now that they’re about to get underway, their goal for the season is typical of many in the fleet: island-hop to New Zealand and Australia, then reassess.
Canada, including the Yukon and NW Territories, explored Alaska and much of Mexico. In December 2008 they found themselves on the Mexican border again, about to set out for South America when it dawned on them that perhaps sailing would be a more comfortable way to see the planet. That same month they found Solar Planet for sale in San Francisco. After six months of refitting her, they headed south. Swen had previously done lots of sailing in the Med, but Katrin was a beginner. She now loves sailing as much as he does, and she’s equally excited about their plans to circumnavigate.

Further — Selene 48
Brian Calvert, Seattle, WA

If you work a long time in the boating industry, as Brian did, you often find yourself saying goodbye to friends and customers who take off cruising, while you’re left behind to mind the store. During the 23 years Brian worked for Selene Yachts, he had that frustrating experience more times than he can count. “But now it’s my turn,” he says with an ear-to-ear smile, and he’s doing it on a beautiful Selene motoryacht of his own.

“Something I’ve dreamed about for 30 years. I probably started thinking about doing it in a Westsail 32 with a bag of granola, and now I’m finally doing it on a Salene 48 with a gourmet galley and ice cream.”

Brian’s plan is to circle the Pacific Rim. That is, cruise the South Pacific then head north to Japan, Russia, Alaska and home again. He’ll have a rotation of crew along the way. But for this crossing he’s joined by Liz Zeiger whose sailing resume includes crewing aboard the ill-fated replica Ming war junk Princess Taiping, which was cut in half last April by 630-ft chemical tanker after successfully crossing the entire Pacific! “That’s why I brought her along,” says Brian. “She’s pre-disastered. What are the odds of that happening twice?”

Worrell Wind — Nauticat 44
Russ and Roz Worrell, San Francisco

“Having never been farther south than Ensenada, I don’t know what I thought Mexico would be like,” says Roz, “but it’s so much more beautiful than I ever imagined.” A visit by train to Copper Canyon was among the highlights of their first six months of cruising.

Their advice to future cruisers is to “Pick a departure date and stick to it.” It worked for them. Ten years ago they
vowed to set sail from San Francisco in the fall of 2009 — coinciding with their 40th wedding anniversary! — and that’s exactly what they did, despite Roz surviving a bout with breast cancer.

“The dream helped her get through it,” Russ confides. Their game plan now is to do a leisurely 7- to 10-year circumnavigation.

**Calypso — Hardin 45**
**Michael & Susanne Clarke**
**Marina del Rey, CA**

“I’ve been wanting to do it since I was a kid,” explains Michael, "but I never understood why. Not long ago one of my mother’s lifelong friends said, ‘It was your dad’s dream but he never did it.’"

Susanne was born in Turkey, but apparently didn’t live there long. “We went there on our honeymoon, though,” she explains, “and I fell in love with it.” So the couple’s game plan is to do a partial circumnavigation, ending up in the Aegean, where they hope to make Turkey their future base.

Like many in this year’s fleet Michael and Susanne will visit Ecuador and the Galapagos prior to setting off for French Polynesia.

**Fly Aweigh — Catalina 440**
**Allan & Alison Gabel**
**Channel Islands, CA**

“We were planning to transit the Panama Canal and explore the Caribbean,” explains Alison, “but after hanging out with all these Puddle Jumpers, we came to our senses.” Good idea, as it’s a 1,200-mile beat from Panama to the Eastern Caribbean islands.

They’d originally intended to wait until retirement to cruise, but when both of their employers offered them leaves of absence — and “a great boat presented itself” to them — fast tracking their plans was a no brainer.

“They’ll have extremely able crew for the crossing, Greg and Tiffany Nore are both former Coast Guard officers.”

**Windryder — Hunter 41DS**
**The Moore family**
**Channel Islands, CA**

The timing for Don and Judy Moore to set off on this epic cruise seems perfect, because their son Rob recently graduated from high school and is eager to accompany them. “Yeah, they’ll probably make me do all the hard work,” he says with a laugh.

Judy tells us that her parents went cruising about 40 years ago, with dreams of exploring the world. They only got as far as the Caribbean and Florida, though. So when Judy explains that she and Don are considering a circumnavigation, she says, “We’ve always wanted to do it, but we’re also doing it for them.”

The top of the family’s list of must-see places is the “friendly” Kingdom of Tonga.

**Sunshine Lady — Camper-Nich 33**
**Michael Nagy, Portland, OR**

“We’re not sure whether Michael is pulling our leg when he tells us that he first got interested in sailboats long ago when a friend suggested that they could get rich quick by smuggling coke from Colombia. Luckily, they never pursued that foolish idea, but Michael did eventually learn to sail, first on the Columbia River and later in Canada.

He started cruising full time a year ago, and is thrilled with the lifestyle. “Don’t be scared,” he advises. “This life is everything you have dreamed it to be.”

After island-hopping to New Zealand, he may circle back home via the Pacific Rim, or perhaps go all the way around via South Africa.

**Black Jack — Alajuela 38**
**Leon Jackson**
**Coto de Caza, CA**

You might say that Leon’s decision to make the Jump this year is the silver lining to a horrible experience last year: His wholesale hardware business collapsed last winter to the point where he finally shut it down completely.

He’s been sailing Southern California waters for 30 years, and has always wanted to do a Pacific circuit. But until the economic meltdown gave him this window of opportunity, he never could.

He began this cruise by sailing south from Dana Point with his son Hunter, but the young man declined to join him on the passage — “kids!” says Leon. “I kinda wanted to singlehand anyway.”

At this point his Plan A is to head north to the Line Islands after exploring French Polynesia, then on to Hawaii and back home again.

**Oso Blanco, Nordhavn 64**
**The Bloomquist family**
**Ashland, Wisconsin**

Lest you think that Eric and Annie are exclusively stinkpotters, we should tell you that Eric sailed and raced various keel boats and inland scows on Midwest lakes before, as he puts it, going over to the dark side, with the purchase of a previous Nordhavn.

To our way of thinking, if you’re going to go to the dark side, you may as well pick a really sweet motoryacht, and that’s exactly what Oso Blanco is: elegant and classy from stem to stern.
Eric and Annie have been practicing the liveaboard cruising lifestyle since shortly before their son Robert, aka Bear, was born — he’s now nearly 8. And we don't just mean languishing in marinas. During the past 8 years they’ve logged 25,000 miles cruising Alaska, Mexico, the Caribbean and the Eastern Seaboard, so the logical next step is to explore the South Pacific, right? It will be a comfortable trip to the Marquesas, but Eric has already arranged to have 2,500 gallons of diesel waiting for him there. Ouch! That makes voyaging under sail seem cheap.

Meet the ‘Oso Blanco’ crew. Does this kid look like a happy boater or what?

Roz and Russ strike a ‘Titanic’ pose on the bow of their trusty ‘Worrell Wind.’

Renova — Cape Dory 36
John Fremont & Naomi Tabata
Campbell River, BC

This bright-eyed couple are among the youngest boat owners in this year’s fleet. John has wanted to make such a trip since reading *Dove* as a kid, but that plan got fast-tracked after one of Naomi’s closest friends died in her mid-30s. And that was shortly after David’s mother also died prematurely. ‘Her philosophy was always, ‘Do it now; do it while you can.’’” Sometimes moms have excellent advice!

Their best guess is that they’ll be ‘out there’ for about two years, first visiting the Galapagos en route to Polynesia. After island-hopping west, they’d like to “complete a circle of the Pacific,” either via Japan or other North Pacific islands. “We’re excited about diving the historic WWII sites in the ‘Truk Lagoon, and Bikini Atoll, where relics of the Japanese fleet lie.’” Along the way they should have no trouble feeding themselves, as John has worked as a commercial fisherman and sport fishing guide.

Gratitude — Island Packet 370
The Whittemore family, San Diego

“We initially considered a sell-the-house multi-year circumnavigation plan,” write Frank and Nancy. “But that idea later evolved into a keep-the-house Pacific cruise.” Actually, we’d bet their plan has changed a few times over the years, because they say they’ve been working toward this goal since 1996 — a couple of years before their able crew-
SOUTH PACIFIC STAMPEDE

He and Gloria have been exploring the Golfo de California (aka Sea of Cortez) for the past 10 years, but as soon as they bought this boat last summer, their minds started to wander to distant horizons. “We plan to cruise the South Pacific for 2 or 3 years,” they say. Their schedule is appropriately loose, but they’ll start out by making landfall in the Marquesas, then on to the Tuamotus, the Societies and... who knows where?

Jarana — J/42
Bill Cuffel & Kathy Kelly
Seattle, WA

Both Bill and Kathy have done a whole lot of racing in the Northwest — in fact, his boat once tied for 48 North magazine’s Boat of the Year. In addition, they’ve chartered boats in the Caribbean and done pleasure cruises in various parts of the Northwest.

But with all that behind them, this will be their first real offshore voyage — and they can’t wait to get out there. Their long-range plans are anybody’s guess: “Once we get to New Zealand, we’ll decide what comes next.”

2010 PACIFIC PUDDLE JUMP FLEET
(Undoubtedly this list is incomplete, as many boats typically escape the ‘Latitude radar.”)

Kathy and Bill love racing, but the cruising lifestyle is definitely growing on them.

These days, there’s little chance that Chris and JoAnn will become couch potatoes. the grandest adventure of our lives. It’s a wonderful learning experience that should not be passed by if you can swing it.”

Their game plan? Make their way to New Zealand, then reassess.

Pincaya — Island Packet 44
Gene Dennis & Gloria Watson
San Carlos, MX

“If you don’t have a fantasy, you can’t have a dream come true!” says Gene. Nicely put. After all, sometimes it’s fantasies about exotic places that get you through the rough patches — like working at a dead-end job or slogging through mind-numbing traffic.

Gene and Gloria have no set itinerary, and they’re sticking to it. “We plan to cruise the South Pacific for 2 or 3 years,” they say. Their schedule is appropriately loose, but they’ll start out by making landfall in the Marquesas, then on to the Tuamotus, the Societies and... who knows where?

Kathy and Bill love racing, but the cruising lifestyle is definitely growing on them.

As for the wannabes back home: “A friend in Seattle advised us that you have to type a personality to
on his current path. Elisabeth, a native of Germany, learned to sail as a kid in Europe.

One memorable highlight of their Mexico cruising was helping a local woman take her heavy groceries home. They became fast friends with the family and Elisabeth ended up making tamales with the wife, while Rod brainstormed with the husband about his construction plans.

Of the cruising life, Rod says, "The rewards more than make up for the effort."

**Eagle — Cal 35 MKII**
**Dorothy Thorsing & Phileta Riley**
**BARD, ON**

For Dorothy, exploring the South Pacific islands under sail has been a lifelong dream. And she seems to have found a partner with a very similar one: "I remember being in a calm tropical place with boats and lots of palm trees, and when I awoke I said to myself, 'Now I know where I am.'"

For Dorothy, exploring the South Pacific islands under sail has been a lifelong dream. And she seems to have found a partner with a very similar one: "I remember being in a calm tropical place with boats and lots of palm trees, and when I awoke I said to myself, 'Now I know where I am.'”

**Wind Child — Beneteau First 36s7**
**Rudy Hesessels, Sequim, WA**

Rudy was alone when we met him, but he won't be singlehandedly to Polynesia. In fact, he almost always sails with an accomplished crew of serious sailors. "Even when we're cruising, we sail alone," he says, alluding to his love of racing.

---

**Dorothy and Phileta are eager to experience grand adventures beyond the horizon.**

Having paid his dues in the classroom, Michael is heading for the good life in Thailand. "We’ll be hand steering all the way; no autopilot unless the wind dies completely."

Boating has been in Rudy’s blood ever since he was a kid, growing up in The Netherlands. "I realized back then that you could go anywhere in a boat," he recalls. But it was many years later, when he did his first Vic-Maui race that he discovered open ocean sailing. "It was the best thing I’d ever done in my life, and I’ve never looked back." (He’s now done three of them and four circumnavigations of Vancouver Island.)

After competing in the Banderas Bay Regatta this month, he and his crew will head for the Polynesian archipelagos, where his wife Jean will fly in and join him for some mellow inter-island cruising.

**Aquila — Islander Freeport 36B**

Michael Rafferty, San Diego

What inspired this singlehander to escape to the South Pacific? "Having to deal with 174 14-year-olds every single day!" You guessed it, he’s a newly retired school teacher. He’s also a lifelong sailor who holds a 100-ton USCG Master’s License. We’re not sure if it’s escaping the kids or escaping the mainstream that’s driving his planning, but Michael says, "This is going to be a one-way trip." He hopes to end up at idyllic Koh Samui, Thailand and plant some roots. We hope he’ll drop us a line when he gets there and let us know how that plan turned out.

In the meantime, his advice to those who are thinking about long-term cruising is simply: "Let’s go to Fiji and drink some kava!" Hey, ya gotta have a sense of humor to make it in the cruising life.

Having now fulfilled our 15-minutes-of-fame obligations to our Vallarta YC party-goers, we’ll give our fingers a rest here. How we’ll introduce you to the rest of this year’s massive fleet is a challenge we haven’t quite figured out yet. But we can promise you that we’ll publish a recap report on this year’s crossing in the coming months — complete with alluring photos of the Tahiti-Moorea Sailing Rendezvous. Stay tuned.

— latitude/andy

“Shipping with DYT gives us peace of mind that the boat will arrive on time at our destination, mechanically intact, and with a fresh crew, so that the owners can start enjoying their boat without delays or disruption of their busy schedule.

Dockwise has held a special meaning for us since we met crossing the Atlantic on the Super Servant 4. We hope to continue exploring new places like the South Pacific, and Alaska, and DYT will be our first and only choice for transport.”

[www.yacht-transport.com] • [1-888-SHIP-DYT]
"Are these the front-strings?" Lee called up from the cabin. "They're all I could find in the pointy end. They look about the right size, but like, there's no shrapnel."

"The jewelry box is in the office," I answered, and went down the hatch to see if I could help her sort out the right shackles for the spinnaker and jib sheets.

It wasn't the sort of boat that either of us would normally sail on. Lee would rather be windsurfing, and I prefer to be out racing my own boat instead of crewing on something even less likely to be competitive. But in this case I could not resist the sheer size and newness of this very big and very expensive "fast cruiser" that had invited us on board for a local race. There was even a professional skipper in charge of maintenance and logistics. And I'd heard that they served a great lunch, which explained why Lee was in on the deal.

"Should we tee up the blade?" Lee asked after the spinnaker sheets were sorted out.

"If you mean 'bend on the number three jib,' then yes," the skipper confirmed.

"Okay, help me bump this sausage up the stairs," she responded.

The professional skipper looked as if he were in pain. "How can you people call yourselves good sailors if you don't..."
use any of the proper terminology?” he complained. “Sailors need precise communication. If you don’t use the right words, who will really know what you really mean when it really matters? “It’s this pesky living language thang,” Lee tried to explain as she wrestled with one end of a sailbag that outweighed her by a large margin. “I mean, it’s English, and that’s what English does.” “We understand each other perfectly,” I added. “New jargon is as correct as we want to make it.” “No,” the skipper insisted. “On this boat we only use the correct nautical terms. Slang is not considered correct until it’s in the dictionary. Or at the very least, not until it appears in print.” “I can fix that,” Lee whispered, and she dropped her end of the sail, then dug into her sea bag for a little pamphlet she had stapled together. “I had to, like, add a few new entries after watching that show in Valencia last month,” she remarked as she handed the document to me. “This is the latest edition.” It was a little home-brew dictionary. I passed it along to the skipper. “Dictionaries don’t lead, they follow,” I reminded him as I watched him begin to read Lee’s compilation of the modern sailing lexicon. “Unless you live in France,” Lee added.

— max ebb

**WORDS OF WISDOM**

don’t a-lay the name of the game, then. **down** and **dirty** adj. Describes condition of helm at the initiation of a tack, replacing ‘hard-a-lee’. **downwind** adj. Downwind. **downstairs** n. The cabin, or belowdeck portion of a yacht. **drift set** n. Floater set. **drop trav** v. To move the traveler car to leeward. **dude schooner** n. Large vessel, often with only vertical or decorative sails, used for group charter. **elephant ass** n. Spinnaker with a large vertical fold or crease along the centerline. **end-for-end** n. Spinnaker jibe technique in which the pole is detached from the mast so the mast-end and afterguy-end swap functions. **Everest knot** n. Any knot finished off with an excessive number of half hitches to use up the running end. **facing** v. Tacking directly on a competitor’s wind. **fat, sailing fat** adv. Sailing slightly on the low and fast side of close-hauled, with sails often closer to stalling than to luffing. **tat tack** n. A tack that intentionally positions a boat above the layline. **fire hose reach** n. A beam reach with continuous spray on deck or in faces of sailors. **flag em** v. To signal intent to protest by displaying a protest flag. **flop** v. To come about or tack.

**hump** v. any action involving significant physical effort.

**foot cleat** v. Method of temporarily securing a halyard, sheet, or control line by standing on it. **fornicatorium** n. Forepeak or aft cabin with double berths. **four-string jibe** n. Classic big-boat jibe maneuver involving two sheets and two jibes. **fraculator** n. Headsail halyard or other control used to pull forward rake into a loose rig for downwind sailing. **frontail** n. Jib. **fun meter** n. Knotmeter. **furniture boat** n. Race boat with cruising accommodations. **garbage set** n. Spinnaker set with sail rigged on wrong side, thrown into air like bag of garbage. **gas** n. Bad air downwind of another boat. **gift-wrapped** adj. Condition of forestry in which spinnaker is wrapped around it. **gnaw** n. Vang that operates from above the boom, in compression; derived from backward spelling of vang. **goose eggs** n. Multiple ze ros displayed on a knotmeter. **gravity storm** n. Dismasting. **hand sailing** v. Describing sailing maneuvers, usually during a post-race analysis, by using palms of hands to represent courses and heel angles. **hard cover** v. Giving constant bad air to trailing competitor. **high-low pass-back** n. Luffing maneuver in team racing forcing a competitor high while a trailing teammate passes the competitor to leeward. **hip** n. Windward quarter of a boat, referring to position of competitor, as in “On our hip.” **hole** n. Local region of much reduced wind. **hookup** n. Post-race date. As in, “Fourteen for dinner, not including hookups.” **hot it up** v. To sail higher and faster on a running or reaching leg. **hula** n. “Hull appendage” to extend effective hull length without measuring as part of the hull, used by Team New Zealand in ’03 America’s Cup. **hull** v. Capsize (Hawaiian). **hump** v. Any action involving significant physical effort, as in “Hump the number one up on deck.” **hunt** v. To maneuver toward another boat that has to keep clear, with the intent of causing a foul. **jewelry box** n. Container for blocks, shackles, cars, winch handles and other small expensive gear stowed below decks. **jibing simo** v. Simultaneous jibing. Used during ’03 America’s Cup. **jump, jump the halyard** v. To raise a sail quickly by rapidly and repeatedly hanging from the halyard at the point where it exits the mast. **Kiwi clip-on** n. Hull appendage that extends effective waterline length. See ‘hula’. **Kiwi douse** n. Spinnaker douse similar to ‘Mexican take-down’, but with a symmetrical spinnaker. First used in ’87 America’s Cup races by New Zealand. **knock** n. 1) Header; 2) sudden strong gust of wind. **Koch block** n. Running backstay or checkstay block positioned so that it could hit the head of the aft-most member of the afterguard when not under load. First used during the ’92 America’s Cup defense. **lead-mine** n. Heavily ballasted yacht, often applied to early IOR designs. Used by multihull sailors to refer to all ballasted yachts. **lefty** n. Wind shift to the left. **letterbox douse** n. Spinnaker douse in which the spinnaker is pulled between loose-footed mainsail and boom. **leverage** n. Separation distance at right angles to the wind or course, producing a strategic advantage in the event of favorable wind shift or current gradient. **luff pass-back** n. Luffing maneuver in team racing forcing a competitor high while a teammate passes both boats to leeward. **mad scientists’ convention** n. Post-race discussion among technically-inclined skippers and crew. **made** adj. Condition in which the spinnaker pole is re-connected to both the mast and the afterguard at the conclusion of a jibe. Usually hailed by the foredeck crew to indicate that this condition has been reached. **making trees** v. Moving sufficiently faster than another boat so that the background scenery appears to be moving forward behind them. **malarea** n. (from “more area”) Design strategy for boats not racing under a measurement rule. First applied to America’s Cup boats in ’88. **mark trap** n. Delaying competitor at mark by entering 2-length circle first and stalling while teammate gains place. **mastectomy** n. 1) The act of lowering mast for maintenance or repair; 2) dismantling. **Maui bag** n. Bag of disposable old clothing brought on ocean race. Each article of clothing is thrown overboard after being worn. “Here today,
gone to Maui."

**meat hook** n. Broken strand of wire projecting a short distance from the surface of a wire rope

**Mexican take-down** n. Method of dousing a gennaker whereby the boat jibes first and the sail falls on deck, into the jib. Coined by Buddy Melges during the '92 or '95 America's Cup campaign in San Diego, because the boat is usually pointing south towards Mexico during the maneuver. First used on television by Dennis Conner on 4-13-95.

**Mister Potato Head boat** n. Boat with a number of unusual and replaceable appendages, especially America's Cup Class. Used by Dawn Riley on OLN AC broadcast, 1-12-03.

**motor boating** v. Severe leach flutter, especially when audible.

**mowing the lawn** v. Windsurfing on alternating reaches without attempting any particularly challenging maneuvers or making any net progress towards a destination. (Bill Prinzmetle, May 2008)

**noodle** n. Exceptionally thin and flexible mast.

**office** n. Chart table or nav station.

**ooker** n. Cunningham.

**overhaul** v. Take up slack. 

**parade** n. Reaching leg with little opportunity to pass or to be passed by another competitor.

**parking lot** n. Local region of negligible wind, usually containing at least several racing yachts. Races with several parking lots might have them designated 'Lot A', 'Lot B', etc. by competitors.

**Pinocchio boat** n. Sport boat with retractable bowsprit.

**plank sailor** n. Windsurfer. 

**pointy end** n. The bow. 

**QFB adj.** Quite far back.

**rabbit** n. 1) Device for launching a spinnaker that is "faster than a turtle," 2) boat serving as a moving starting mark in the "rabbit start" system for starting a race with no committee boat or fixed starting line.

**racer chaser** n. Person, most often female, with disproportionate attraction to race crew. See 'dock bunny'.

**racing stripes** n. Fenders accidentally left out during race.

**rag the main** v. To let the mainsail luff or flail ineffectively.

**rail meat** n. Crew selected primarily for their weight.

**relax** v. Ease sail adjustments for downwind or light air. "Relax the main."

**righty** n. Wind shift to the right.

**rollies** n. Symptom of marginal control while sailing downwind in heavy weather, characterized by rhythmic rolling through large angles.

**room, the** n. Protest room, protest procedure in general. As in "Take it to The Room."

**rope monkey** n. Minimally skilled crew not heavy enough to be rail meat.

**runway** n. Available distance on present course before running out of water depth. Used on Maltese Falcon, 10-5-08.

**sacred wood** n. The tiller (even if not made of wood).

**sail my boat** v. Sail best VMG without entering bad air from competitor. As in "Can I sail my boat?" (used by Paul Cayard on 1-30-00 when behind and to windward of Italians).

**samurai douse** n. Method of lowering spinnaker involving rapid halyard cut with large rigging knife.

**sand bag** n. Crew position, usually entry level, involving little more than positioning oneself on the correct side of the boat.

**sardined** v. Caught between layline and right-of-way competitor. Used by afterguard of AmericaOne on 1-30-00.

**sausage** n. 1) Sailbag in shape of long tube; 2) windward-leeward course or windward-leeward segment of more complex course.

**send it** v. To hoist or raise, as referring to a sail being set. Usually used as a command.

**sewer** n. The belowdeck space on a large racing yacht with minimal accommodations.

**sheep on the bay** n. Whitescaps (New Zealand).

**shirtpin** n. Bits of metal hardware, like blocks and shackles, normally stored in jewelry box.

**shy kite** n. Undersize spinnaker for heavy air, usually narrow and flat. Also 'chicken chuter'.

**sit on their face** v. To closely cover a competitor, matching them tack-for-tack and keeping them in bad air.

**skirt** v. To flip the foot of the jib inboard of the lifelines or other obstructions.

**sky, sky the pole** v. To allow the spinnaker pole to rapidly swing upwards in a vertical position.

**slam-dunk** n. The act of tacking on another boat’s wind in sufficiently close proximity to prevent the other boat from tacking away. First popularized by Jim Kelly and Gary Jobson during 87 America’s Cup coverage, in their attempt to make sailing tactics comprehensible to American viewers more familiar with basketball. Usage in Australia dates to ‘83 America’s Cup coverage or earlier, however.

**sled** n. Large ultra-light racer with best performance “downhill.”

**sleep** v. 1) To heel the boat to leeward in light air, as in "Sleep the boat;" 2) To flatten the mainsail to the point where it has almost no power, but does not luff despite very high windspeed, as in "Put the main to sleep."

**smart pig** n. Cunningham

**snacktician** n. Member of crew primarily responsible for food.

**snout line** n. Tack line, line that runs from the tack of an asymmetrical spinaker to the stem or bowsprit end.

**soak** v. To sail below polars for tactical advantage, probably derived from "soaking up" extra speed and turning some of it into a positional advantage. Used in ‘03 America’s Cup.

**soft, soft trim** adj. Trimmed so that there is slight luffing, or luffing more often than stalling.

**space case** n. Plastic milk crate used for gear storage.

**spaghetti** n. Disorganized sheet and halyard tails, usually piled together in a common tangle.

**spaghetti patrol** n. The crew position responsible for, or the process of, methodically untangling and making up sheet and halyard tails.

**speed bump** n. Sailmaker’s term for unwanted wrinkle in a new sail.

**spike** v. To release a triggerlock type shackle under heavy load using a fid, marlinespike or similar tool.

**spinnaker neck** n. Sore or stiff neck suffered by spinnaker trimmer. Despite widespread epidemiology, spinnaker neck is not yet recognized by the American Council of Sports Medicine.

**spinnaker thong** n. Drawstring used to reduce the power of a spinnaker by creating a deep crease along the centerline. See ‘elephant ass’.

**spinny** n. Spinnaker.

**spitting out the back** n. In team racing, forcing a competitor into last place.

**splash** v. To launch, especially by a boat yard.

**square back** v. Bring the pole back to a dead run position, usually immediately preceding a jibe.

**square waves** n. Very steep waves or chop. (Square waves can be approximated by inputting the appropriate Fourier coefficients into a model tank wave generator, but this tends to damage the machine.)

**starfished** adj. Positioned for optimum weight placement and low wind resistance on a narrow windward hull or ama. (Cam Lewis, A-cup coverage, 2-12-10)

**steam gauge** n. 1) Knotmeter; 2) anemometer.

**steel balls** n. Pre-start maneuver involving backing down and falling off on port tack to pass below stem of starboard-tack competitor in control-
thumback v. to capsize and turn turtle so that the mast is stuck in the mud.

strapped adj. Overtrimmed.

string n. Any line or rope.

sucking up v. Working up from just ahead and to leeward of a competitor to a covering position by taking advantage of the wind lift in the "safe leeward" position.

swallow the anchor v. To give up all forms of boating.

swannabe n. Yacht that mimics the superficial styling characteristics of the Swan line by Nautor.

teabagging v. To lose control of one’s feet while trapezing from a dinghy, and drag alongside the boat on the wire.

tea surfing v. Dragging in the water behind a boat by holding on to the swim step. More commonly applied to powerboats and involves serious risk of carbon monoxide poisoning.

tee up v. To prepare a sail for hoisting, as in “Tee up the #3.”

telephone pole n. Very stiff or overbuilt mast.

thomspkin n. Anti-abrasion plate on mast at whisker pole fitting. Usage is local to Thistle and Lido 14 classes.

throw one v. To tack or jibe, as in “Let’s throw one.”

thumback v. To capsize and turn turtle so that the mast is stuck in the mud.

tomato mark n. Small red spherical racing mark.

top floor adj. All the way up, at full hoist.

tractor v. To assist the clew of an overlapping jib around the mast and rigging during a tack.

trans-nasally adv. Method of paying for marine hardware.

trip v. To release the spinnaker pole from the guy and/or the mast. Often used by the driver as a command to the foredeck crew at the beginning of a jibe.

trip reef n. Flattening reef.

tumbleweeding v. Unintentional aft displacement of crew as a result of water impact. First seen in print on 2-23-06 by Volvo Ocean Race and AC Bowman Curtis Blewett in Scuttlebutt.

twist, twanker n. Floating lead block which the spinnaker sheet is led through, used to improve the lead angle when the sheet is functioning as an afterguy, or to keep the sheet clear of the main boom.

uphill adj. Upwind.

vanity jibe n. An unnecessary jibe or modified jibe timing, done for the sole purpose of passing close to yacht club, committee boat, waterfront restaurant, or spectators on shore.

victory roll n. Tight 360˚ turn performed under sail in front of the yacht club after returning from a race, to indicate a confirmed first-place finish.

walk strings v. To shift spinnaker gear so that the sail is ready to set on the opposite tack.

wallet-based adj. Driven more by money than by expertise.

whisky tango foxtrot expletive. Expression of disbelief and/or surprise.

wind n. (long i) Progressive wind shift, usually a lift.

wind it up v. To rapidly bring in a sheet or halyard which is under sufficient load to require the use of a winch.

wing nut n. 1) Hydrodynamics expert or enthusiast; 2) crew member on a boat with a wing sail.

Happy 80th Birthday Jim!

We celebrated with cake on the special day, but keep your ears open for upcoming birthday events in Point Richmond all year!

If you’ve always wanted a commissioned painting by Jim DeWitt now may be the time!

Call us now!

We almost felt a taste of spring last month when the Bay was treated to a few consecutive days of sunny, warm weather that made the cherry trees shed their petals in a flurry of white and pink “snowflakes.” That little prelude nonetheless reminded us that spring really is just around the corner and so are a few other things: first, the imminent arrival of the Clipper ’Round the World Race to the Bay. Next — hopefully — the taking of the Jules Verne Trophy by Groupama 3. Third, the end of Midwinters series. And finally, that we’ve got some Race Notes to catch up on. Start girding yourself for Spring breeze!

California’s Movin’ On Up

When we spoke with San Francisco’s Charles Willson before he departed on Leg 4 of theClipper ’Round the World Race from Singapore to Qingdao, he told us that this would be the leg where California finally broke out of the back of the 9-boat fleet. He was right.

After being beset by a variety of gear failures, the team was doing well on the leg from Geraldton, Australia to Singapore when they were called to render assistance for competitor Cork, which had run aground off Indonesia. While they were given redress for their assistance, Willson said he felt they could have placed higher if they’d been able to race the whole leg.

“We’re a good upwind boat,” he said. “Our morale is great and that was going to be our breakthrough leg. We’ll be up there by the time we get to China.”

Willson was the only Californian aboard for what was one of the closest and most brutal legs of the race — run over a stretch of water that claimed three entries in last year’s Volvo Ocean Race.

California finished in fifth place — their best to date, while line honors went to Spirit of Australia with Jamaica Lightning Bolt, in second and hometown favorite Qingdao rounding out the podium to the delight of the crowd who that turned out by the thousands to see the fleet.

California’s skipper, South African Pete Rollason, reflected on the leg, which delivered some of the most varied sailing conditions so far and resulted in frontrunner Team Finland losing their rig.

“I have to say it’s been pretty tough although not as tough as we’d feared,” Rollason said. “The cold was a bit of an issue but the winds and seas played ball with us more than we had expected.”

If they keep knocking on the door, California just might be able to do as Qingdao did and get on the podium in the next leg — a 35-day monster that will bring the fleet to the Bay.

“The next race to San Francisco is obviously a big one for us,” said Rollason, who’s drawn rave reviews from his crew. “We’ve proved on the last couple of races that we can compete with the best of them, so now we’ve just got to up it a level. We’re really going to push hard to emulate what Qingdao has done here and get a podium into our home port.”

As we go to press, details were being finalized for the San Francisco stopover, which will bring the nine remaining boats to the San Francisco Marina around April 1. The boats are slated to dock near to Golden Gate YC. The Bay is the only U.S. stopover for this year’s race and the six Californians who have already joined the crew for various legs will be on hand to welcome their teammates home.

The fleet will only be here for between six to ten days before heading out April 11 for a downwind blast in true West Coast style to Panama and a transit of the canal.

The short stopover means the sailors won’t have much time in the City. So make sure you get down to the Marina bring all your friends, adopt a Clipper racer and show the fleet some love so they’ll come back! You’ll find more info, as well as updated arrival times in at: www.clipperroundtheworld.com

After a blistering, sub-six-day trip from Ushant to the Equator, Franck Cammas’ 105-ft trimaran Groupama 3 had a rough time of it in both the South Atlantic and the transition to the Indian Ocean. The boat’s one-time lead of 620 miles over the reference time set by Bruno Peyron’s Orange 2 in ’05 turned into a deficit of over 400 miles by Day 19 due to a massive St. Helena High in the South Atlantic and an uncooperative front at the entrance to the Indian Ocean.

But the giant tri — navigated by the Bay Area’s Stan Honey, the only American aboard — hooked into some pressure in the Indian Ocean, and converted the deficit against the reference time to a lead of 60 miles by the time they exited the Indian Ocean four days later. In doing so they set a new World Sailing Speed Record Council record for that section of the course: 8d, 17h, 39m — 17 hours faster than Orange 2. Peyron didn’t have a particularly fast transit of the Indian Ocean in ’05, but his big cat did have a nearly unbeatable transit through the Pacific Ocean. That made the Indian Ocean crossing critical for Cammas’ team
the miles they made up there will go a long way toward getting them around the world quicker than the 50d, 16h, 20m benchmark.

“We’re monitoring our progress in relation to Orange 2 and even though she’s not a direct opponent, we’re looking at her virtual wake,” said Watch Captain Fred Le Peutrec. “We knew that under Australia we were going to make up our deficit as Bruno Peyron and his crew had to put in several gybes with some slower phases. However, they traversed the Pacific very quickly; it will be difficult to maintain the same average speed as far as Cape Horn. If we have a bit of a lead at that stage that wouldn’t be bad: theoretically the climb up the Atlantic should enable us to claw back the time!”

With a northwesterly breeze driving them forward as of this writing, the sea state was subdued enough to enable the crew to make effortless pace free of stress. The situation is set to change a little after Tasmania once the breeze backs to the west or west-southwest. The giant trimaran will then have to gybe to avoid New Zealand. However there shouldn’t be any signs of a drop in pace.

Cammas and his 9-man crew can afford to be a little more relaxed, as the known ice fields in the Southern Ocean are now behind them. Follow their progress at: www.cammas-groupama.com

— the miles they made up there will go a long way toward getting them around the world quicker than the 50d, 16h, 20m benchmark.

“...the miles they made up there will go a long way toward getting them around the world quicker than the 50d, 16h, 20m benchmark.

SCYA Midwinters — There were dominating performances, some bad luck and a little heartbreak here and there, but others got going when the going got tough. That was the weekend of racing hosted by Alamitos Bay Yacht Club February 20-21. ABYC was one of 33 Southern California clubs running the Southern Cali-
Berkeley YC — Just down the East shore Freeway, the final ‘regular season’ event of the Berkeley YC’s Midwinters Saturday series had the same conditions for the 53-boat fleet. The following day’s 33 attendees weren’t so lucky.

“Sunday, February 14 was a bit ‘different,’ reported PRO Bobbi Tosse. ‘First, there was absolutely no wind at the noon start time, so we postponed. After about 30 minutes, a gentle breeze filled in from the west. Unfortunately, this gentle breeze also brought very thick fog. Since we could not see the pin, we stayed in postponement. We were coming close to just forgetting the whole thing, when the fog lifted and we were able to start at 1:30 p.m. The sweet little breeze never

a bit of a time finding the marks in the fog, we had steady breeze. By 1:30 p.m. the fog burned off and revealed a beautiful sunny day. Much to my surprise, the wind never changed. It was so steady the support boats were looking for things to do! We ran three races and nothing went wrong; it was a great way to end the series.”
increased in strength, so we shortened the course, which let all the racers to finish in time to party with their Valentine's sweeties by 4 p.m."

"The next Midwinter is the Champion of Champions and Winners Race," Tosse advised. "All the first places in division from both the Saturday and Sunday series get to go against each other to vie for the Kirt Brooks Memorial Trophy. Also, there will be a start for all of the second place finishers, and a third start for all the third and fourth place trophy winners on Sunday, February 28. When that’s all settled, the season trophies will be awarded around 5 p.m. at the club."

Corinthian — The second weekend of the Corinthian Mids wrapped-up February 20-21, just before we went to press. We didn’t have enough time to get all the details. But we received a great assessment that hits all the things we like about the Corinthian Mids from IOD and Moore 24 sailor Beau Vrolyk, who sailed his Moore Scarlett in the series. We didn’t have the space to run it in its entirety, but we thought we’d pass along an excerpt:

"It’s great to see a club put on a race with this diversity of boats, racing skill levels, and levels of seriousness. It’s this sort of regatta, with broad popular appeal, that will build sailing. Far too often we see regattas that are fine-tuned to only one narrow segment of the sailing community here on San Francisco Bay, but the club nailed it with courses that tended to match the abilities and interests of the various fleets. We saw
THE RACING

Midwinter series are entering their final throes for the 2009-'10 season, and most of them have one, maybe two races left; it won’t be long before we get into the Bay’s various beer can series. The process for getting your club’s results in the magazine is the same for both types of events. We don’t have the time or manpower to chase down all the results so please post them on your club’s website or send them directly to the Racing Editor at rob@latitude38.com. Our format is to include the name of the boat, the type and length of boat, and the first and last names of the owner(s). We’ll do our best to get that into Latitude 38 and ‘Leetronic Latitude.’

GOLDEN GATE YC MANNY FAGUNDES SEA-NETtle SOUP SERIES #4 (2/14, 1r)

PHRF 1 (PHRF ≤ 50) — 1) Wicked, Farr 36, Richard Courrier; 2) War Pony, Farr 36, Mark Howe; 3) Javelin, SC 37, Pat Nolan. (13 boats)

PHRF 2 (PHRF 51-99) — 1) Yucca, 8 Metre, Hank Easom; 2) Inspired Environments, Beneteau 40.7, Timothy Ballard; 3) Razzberries, Olson 34, Bruce Nesbit. (12 boats)

PHRF 3 (PHRF 100-129) — 1) Shamen, Cal 40, Steve Waterlooe; 2) Uno-120, Wyliecat 30, Steve Wörner; 3) El Raton, Express 27, Ray Lotto. (10 boats)

PHRF 4 (PHRF 130+) — 1) Arcadia, Modernized 30, Gordo Nash; 2) La Paloma, IDO, James Hennefer; 3) Topcat, Nonsuch 30, Sal Balleri. (8 boats)

Catalina 34 — 1) Casino, Bill Eddy; 2) Amanda, Kurt Madganz; 3) Mottey, Chris Owen. (9 boats)

FOLKBOAT — 1) Nordic Star, Richard Keldsen; 2) Thea, Chris Hermann; 3) Froja, Tom Reed. (6 boats)

ISLAND YC ISLAND DAYS MIDWINTERS #4 (2/14, 1r)

DIVISION A (PHRF ≤ 138) — 1) Outsider, Azura 310, Greg Nelsen; 2) Rascal, Wilderness 30, Rui Luis; 3) Audacious, J/29, Scott Christensen. (4 boats)

DIVISION B (PHRF 168+) — 1) Bandido, Merit 25, George Gurrolla; 2) Bewitched, Merit 25, Larraine Salmon; 3) My Tahoe Too, Capri 25, Steve Douglass. (4 boats)

DIVISION C (PHRF 139-180) — 1) Crazy Eights, Moore 24, Aaron Lee; 2) Joanna, Irwin 30, Martin Jemo; 3) Lelo Too, Tartan 30, Emile Carles. (4 boats)

DIVISION D (PHRF 181+) — 1) Magic, Merit 25, John Hansen; 2) Spitfire, Santana 22, Tom McIntyre; 3) Tinker, Wilderness 21, Matthew Beall. (5 boats)

Complete results at: www.iyc.org

BERKELEY YC MIDWINTERS SATURDAY SERIES #4 (2/13, 1r)

DIVISION A (PHRF < 78) — 1) Advantage 3, J/105, Pat Benedict; 2) Jeannette, Frers 40, Henry King; 3) Kika, FT 10M, Marc Pinckney. (9 boats)

DIVISION B (PHRF 80+) — 1) Antares, Islander 30-2, Larry Telford; 2) Latin Lass, Catalina 27, Bill Chapman; 3) London Calling, Santana 22, Megan Dwyer. (6 boats)

Complete results at: www.berkeleyyc.org

many of the PHRF fleets head off on a Bay tour around Angel Island on both days in February, and that was the last we saw of them, until we discovered they had drunk most of the free beer back and the club! The one design fleets tended to get courses that were a little more ‘race’ oriented and a little less ‘tour,’ which was perfect for us. ... Corinthian YC did it again, as they usually do for Midwinters, and succeeded in putting on a great show for an amazingly diverse group of Sailors. Thanks!

Race Notes

California’s Newest Series — Ulman Sails has started a new offshore series to complement its popular Southern California Inshore series. The championship will be comprised of three races. First, there’s a 130-mile tour around Catalina and San Clemente Islands that starts March 12 in Newport Beach and finishes at San Diego YC. Next up will be a race from Cabrillo Beach YC, around Catalina Island and finishing in Dana Point on May 29. The third is one of our favorites, the Santa Barbara to King Harbor race. For details on both series, check out: www.ullmansailsnewportbeach.com.

Woohoo — Devotees of offshore multihull racing have a yet another reason to cheer as Bruno Peyron, current holder of the Jules Verne Trophy has announced that he will be reviving The Race — the no-rules, non-stop, ‘round the world race in 2013 or ’14.

The first — and thus far only — edi-
tion of The Race started December 31, 2000 to celebrate the new millennium. It garnered worldwide media attention to what at the time were groundbreaking new giant offshore multihulls. The boats, which included the late Steve Fossett’s PlayStation and winner Grant Dalton’s Club Med were outlandish for their time, and many pro sailors who had done the Volvo Ocean Race declined to participate thinking it was a fool’s mission. While extremely successful, The Race was subverted when former Whitbread class winner Tracy Edwards’ ill-fated and financially-disastrous Oryx Cup was launched just a few years later.

Ten years down the road, both the advent of new G-class multis, plus the interest in the Volvo Cup boats has led Pey- ron to relaunch his pet project.

“We can see too that since The Race, 12 giant multihulls have been built, including four in the past three years,” Peyron said. “So today there are certainly enough boats of sufficient quality for us to propose this to their skippers and partners — without counting any new multihulls, which may be built following on from this by 2013 or 2014.”

Speaking of the Volvo — CEO Knut Frostad announced that the Cape Town would be the first stop in the next edition of the Volvo Ocean Race.

A South American Loop Aboard a Time-Tested Warhorse

If your life experience has been anything like ours, you’ve probably come to realize that sometimes special opportunities present themselves that you will only get one shot at. And if you miss that window of opportunity, you might regret it for the rest of your life.

Excuse us for getting philosophical on you, but over the years that’s precisely the feeling we always get when we peruse the offshore sailing schedules of the former Whitbread Round the World Race winner Alaska Eagle. For the past 25 years, this custom S&S 65 has been run as a sail training vessel by the Orange Coast College School of Sailing and Seamanship in Newport Beach. And her programs — which have included numerous South Pacific circuits and several Antarctic voyages — have introduced hundreds of eager sailors to the pleasures and challenges of long-distance offshore sailing.

That process will continue this year. But with Eagle’s longtime co-skippers Rich and Sheri Crowe set to retire from the gig after completing the 2010-2011 expedition schedule, the tentative plan is to sell the venerable Eagle. So this really might be your last chance to sail aboard her — and, realistically, your last chance to explore some of the seldom-visited spots on her schedule.

The six-month, seven-leg circuit begins October 30 with a 24-day, 3,800-

mile blast from Newport Beach to Easter Island, said to be the world’s most remote inhabited island.

Then it’s southeast across the South Pacific to Puerto Montt, Chile (2,500 miles), where roads end and a 1,000-mile maze of primeval fiords begins. Leg 3 will take you through them en route to the Strait of Magellan, then on to Ushuaia, Argentina.

The mission of Leg 4 is to round Cape Horn and return to Ushuaia. Although the distance is not great, the challenge could be substantial.

But Leg 5 will likely be the most demanding of all: a 2,700-mile, 31-day voyage to South Georgia Island — a name familiar to every student of Ernest Shackleton’s epic quest for survival — then on up the South Atlantic to festive Buenos Aires. (If you’re curious about South Georgia, check out the December ’09 National Geographic, in addition to the various Shackleton biographies.)

After a relatively mellow trip from the Argentine capital to Rio de Janeiro, the final leg will take student sailors of all ages across the equator, into the northeast trades and on to Antigua, yachting capital of the Eastern Caribbean.

No, this ‘coffee grinder’ doesn’t pulverize dried beans. It trims lines and sheets, just as it did during the Whitbread.
OF CHARTERING

exciting, but not an easy ride. Anyone who undertakes a voyage of that caliber is a true adventurer. Those experiences don’t come easily either, since the last part of the trip will be sailed in some notoriously rough waters. I expect that will be one very well-bonded group by the time they get to Buenos Aires.”

No doubt she’s right, as such shared accomplishments do tend to forge bonds and friendships that can last a lifetime. Similarly, the lessons learned during such ‘hard traveling’ are not easily forgotten. After years of interviewing cruisers, we know that dozens of them honed their seamanship skills and built their self-confidence during offshore voyages aboard this thoroughbred yacht.

Built to compete in the ’77 Whitbread, she was constructed of aluminum at The Netherlands’ Royal Huisman Shipyards—then named Flyer and rigged as a ketch. That was near the end of the era when offshore race boats actually had some creature comforts. She started out as a dark horse in the ‘round the world romp, but quickly gained the respect of the fleet, and ultimately emerged victorious in the final hours of Leg Four.

After later being donated to OCC, she became the cornerstone of the school’s ambitious offshore program. And through her 28 years of service, her maintenance has never been neglected.

In fact, she’s currently undergoing yet another refit, which will include a new engine—her fifth—a refurbishing of her mainmast and a new mainsail—at least her 10th, according to school Director Richard "Dick" McDonald.

Unlike learning at home from a book, navigation lessons really sink in when they’re practiced daily during a long-distance offshore cruise.

Spread: The carefully maintained Whitbread warhorse heads south at the start of the ’06 Baja Ha-Ha. Inset left: Sheri and Rich have logged a gazillion offshore miles aboard ‘Eagle’. Inset right: Students learn both modern and ‘old-style’ navigation.

rector Brad Avery, who’s also skipped Eagle on many adventures.

If you’d like to be part of this famous war horse’s final commercial season, we suggest you waste no time in signing up, as berths tend to get booked far in advance. (See www.occsailing.com for additional details.) You wouldn’t want the opportunity to slip away while you’re trying to make up your mind!

— latitude/Andy

The BVI Cruise That Made Believers Out of Chad & Jill

If you already own a cruising sailboat in California, why spend money to charter a boat someplace else — such as the Virgin Islands? This is something I’d never understood before, and it’s why, until last year, I’d never chartered a boat in an exotic locale.

Well, last winter I decide — to try a week of chartering in the British Virgin Islands to see what I’d been missing. If anything, We booked a boat with Footloose Sailing Charters, one of the BVI’s larger companies, and saved a few bucks by going with their older boats (compared to Moorings or Sunsail.) When my wife Jill — a skeptical sailor — and I got to Tortola, we saw that even one of Footloose’s older boats, a 3-year-old Beneteau, was still about 25 years newer than Bella Dama, the trusty old Islander ’36 we sail at home.

Before setting sail, though, we first satisfied Jill’s longing for a couple of poolside hotel days, by staying in St. Thomas at a hotel with a beautiful view of Charlotte Amalie Bay.

I was a little surprised when a charter company employee insisted that Jill sit in on all aspects of the boat briefing. He went through the procedures in case the boat was sinking, which I knew probably didn’t make Jill feel any better. By the time he told us of all the reefs we needed to avoid to prevent shipwreck, Jill was a wreck herself; scared, sick to her stomach, and didn’t want to go anymore.

We were not off to a good start! After a little hand-holding and some time to relax after the briefings, we pulled out of Wickams Cay Marina and headed for Peter Island. The wind was blowing 20-25 knots, but was from just aft of the beam, so I unrolled the jib only — no main — to have a mellow, relaxing sail across the Sir Francis Drake Channel, to regain Jill’s good mood and trust, and all the good things that come with that.

We grabbed a mooring ball just before sunset at Peter Island, and got some rest. Unlike our typically windless nights at home in Ventura, we had wind howling in the rigging at 20-30 knots all night, which took some getting used to. But we still managed a good night’s sleep.

The next day the wind stayed up, and we were planning to go east (upwind), toward Marina Cay which lies near the east end of Tortola. I double-reefed the mainsail, and even so, found the rudder momentarily overpowered until I eased the sheets to reduce whether helm. We were sailing upwind in 20-25 knots of 83° breeze over 80° water. A little spray in the face feels a lot better in the BVI!

After a couple hours of beating toward Marina Cay, I was about to motorsail the last couple of miles when the engine alarm sounded. As instructed, I used the provided cell phone to call the base mechanics, and let them know.

My immediate problem was that we would have to sail into a mooring field or anchorage, in 20-25 knots of wind, with no engine, in still very unfamiliar waters!

As I’d hoped, the mechanic said I could use the engine for 3 or 4 minutes to grab a mooring ball.

Upon our arrival, the available mooring balls were unsheltered from that day’s strong winds. We’d have just one chance to start the engine, motor up and grab the ball. And the strong wind would make it very tough for Jill to run our line through the eye splice at the end of the mooring ball’s pennant with the boat being blown backward.

As we approached the ball, after just a minute or two the engine alarm came on again, as we were approaching the mooring ball. “Dang! Missed that one!” So we went for the next one, and I knew I had to get the engine off within seconds. I powered hard toward the ball, made sure the boat would reach it, then shut off the engine, hoping that Jill had snagged the mooring pennant with our boat hook.

I ran forward to grab hold of the mooring loop in hopes of threading our 1-inch dockline through the eye before the boat was blown backward. Did I mention that a rocky lee shore lay 50 yards away?

Jill says I literally dove for it, hanging over the bow, and grabbed the loop just above water level with one hand. But the wind began to pull the boat backward, and it didn’t seem like I’d be able to hold on to the loop. My grip was slipping — I was losing a finger at a time, like Wile Coyote hanging from a lone tree branch hundreds of feet above a box canyon. But just then, a wave pushed the boat forward a foot or two,

The Caribbean’s most famous crooner, Foxy Callwood, may not be able to sing anymore, but he hasn’t lost his irreverent wit.
OF CHARTERING

By her own accounting, Jill came "full circle" during their cruise. Although initially skeptical, she ended up loving it!

and I was able to get my other hand on the mooring loop and stabilize the situation.

Jill handed me our dockline, we threaded it through, cleated it off, and we were safe. Whew! Unfortunately, the incident gave me some nasty boat bites. Both my right forearm and right breast were black and blue for the next five days. I had the bruises of someone who just had a boob job; not a good look for a man.

Things got considerably better from that moment on. The charter company sent over a chase boat mechanic. Due to an initial mis-diagnosis, we ended up virtually engineless for a day and a half, but we quickly realized there were worse places to be stranded. Between Marina Cay and neighboring Trellis Bay, there were numerous fun bars and great beach restaurants, including the Last Resort, Pusser's Landing, De Loose Mongoose, and others. We had a great dinghy and money in our pockets, and the anchorage and our boat were fabulous, if temporarily immobile.

We met a nice couple who joined us for a fabulous dinner at De Loose Mongoose, where a live band lent to the atmosphere. By the time our engine was repaired, we were happy to stay the night at Trellis Bay. We even found time for a jog up toward the airport before dinner.

With the boat fixed, the next day we sailed past the Dog Islands for Anegada. The wind was forecast to lighten to about 10-15 knots from the east, so Anegada was a beam reach of about 15 miles. I'd heard many warnings about the tricky entrance through the reef pass, but we had no problems.

We did meet some charterers who had bumped the bottom right in the mooring field, but our boat showed one whole foot of water below the keel while we were moored in front of Neptune's Treasure. (We drew 5.5 feet.)

Unlike the other mountainous, volcanic islands, Anegada is a low-lying coral reef, only a few feet high at its highest point. It can't easily be seen until you are quite close. It's less visited than the other British Virgin Islands. Restaurants throughout the BVI sell fresh Anegada lobster dinners, and they aren't cheap. As we watched many lobster fisherman unloading their catches at the rickety wooden piers at Anegada, we decided we had to eat at one of the restaurants on the beach that barbeque lobster on open flames under the stars. We chose the Anegada Reef Hotel. What a fabulous dinner, and what a large lobster! Our candlelit table was so close to the water, some of the tiny waves lapping nearby just missed our toes in the sand.

I listened to NOAA weather after dinner and heard of a small craft warning for 20-25 knots from the east, which sounded just perfect since we were going to be sailing west toward Jost Van Dyke Island the next day. The morning started with a quick taxi ride for snorkeling at Cow Wreck Beach on the open ocean side of the Anegada. Then we set sail for what turned out to be a downwind romp. We had no spinnaker but the sailing was a perfect sleigh ride, surfing 4 to 6-foot waves.

With the autopilot on, Jill and I lay down at the bow to really enjoy the ride. I noticed she was really starting to have fun now. She doesn't like long sails, though, and from Anegada to Jost Van Dyke is the longest sail possible in the British Virgins — almost 30 miles. I decided to cut it shorter by 45 minutes or so by going straight to Tortola's Cane Garden Bay — right across from Jost.

What a beautiful, green tropical cove that is! Cane Garden has several lively bars, two ATM's, one of which worked, and the steepest paved road I've ever seen to connect it to the rest of the island. We climbed the road on foot, which made for a vigorous walk, to say the least. We learned that sidewalks don't exist around the islands, so you must be careful walking the narrow lanes with cars driving on the wrong side of the road!

In the morning, I let Jill sleep in, raised anchor and motorsailed one hour over to Jost Van Dyke and anchored in Great Harbour. After breakfast we dinghied over to White Bay, the only place so far without a dinghy dock. We easily landed our hard-bottom dinghy in the small surf and secured it with the dingy anchor up on the sand. This is probably the most beautiful beach we saw the whole trip.

A highlight at Jost Van Dyke was meeting Foxy Callwood himself — the world-famous owner of Foxy's Bar. He spontaneously entertained us with a rhyming verse that managed to work in about 15 California cities. What a character. He doesn't sing anymore. He told
me he had polyps on his vocal cords and was advised to knock it off after 30+ years.

From Jost we motorsailed through the Thatch Cay cut between St. John and Tortola, and on to Norman Island. There, after a sunset hike to the top of the ridge, we had a lively dinner with dancing to reggae at Pirate’s on the beach, then stopped by the William Thornton floating restaurant (aka the Willy T) for a nightcap.

In the morning we took our dinghy from the Bight at Norman Island over to the caves around the corner, for the best snorkeling either of us had ever experienced. We had to have the boat back by noon, but we made time for some more snorkeling at The Indians (pinnacles) on the way back. As we got within about half an hour of the Road Town harbor entrance, I noticed a dinghy out in the middle of the channel, and a small person who seemed to be waving. At first I started to veer toward the dinghy, thinking maybe it was someone needing help. The dinghy quickly zoomed over just in front of us, and then all around us. It was a cute young gal from Yacht Shots BVI taking photos of our boat, heeled over nicely in 10-15 knots on a close reach — the photos came out great!

Readers may wonder if Jill ever began to enjoy the trip. Well, she grudgingly admitted mid-week that she had “come full circle” on this trip, meaning that after a horrible start, she was having a blast. By the end of the week, she asked if we could add another day on the boat! (She never asks for another day on the boat at home!) I should also note that Footloose cheerfully gave us a coupon for our lost day and a half, which is good anywhere in the world that they have a base.

I’ve got a load of frequent flyer miles, so I’m already debating the options.

— Chad Kominek
Most charter companies offer blue water & palm trees, but it takes the personalized care of people like Marisa to make your vacation a success.

Like Marisa, everyone at TMM is committed to your complete satisfaction. Our specialized three-location operation offers large company quality with small company service. A combination that is uniquely TMM.

As wonderful as the weather was, it also proved to be a very long night. When I reached Isla Isabella 17 hours after my departure from Mazatlan, I was exhausted from the constant steering, and happy to be done with the trip. Unfortunately, the anchorages at Isabella were all full. I had no choice but to push on another 45 miles to San Blas.

Ten hours later, after being awake for nearly 36 hours, I was motoring around breakers to get into Matanchen Bay. I was also hallucinating, so I ‘saw’ channel lights, rocks and small islands that were not on the charts. I would have done anything to have had radar. I finally just dropped the hook in 20 feet of calm water and went to sleep.

When I awoke the next morning, none of the obstacles I’d ‘seen’ the night before were there. I found myself anchored at the top of the bay 50 or so feet from several sets of long fishing lines. Singlehanded sailing is tough enough. Doing it without instruments — and especially without an autopilot or windvane — was no fun at all. I don’t think I’ll repeat that anytime soon.

Matanchen Bay is a big bay — about six miles long and two miles wide — located two miles to the southeast of San Blas. It’s a wonderful anchorage, with gray sandy beaches and welcoming palapas lining the shore. The village on the north shore has a number of small tiendas and restaurants, but with a very limited selection of goods. The village is somewhat famous for its banana bread, and you will find a fresh baked supply of bread, muffins and other goods displayed in glass cases in front of most of the shops. The palapas on the north end serve a variety of fresh fish and shrimp, and the beer is cheap and cold.

The only drawback to the area are the jejennes (no-see-ums), for which the bay has an international reputation. The palapa owners all burn coconut husks throughout the day to keep the no-see-ums away, and most of the time they are not a problem. But nothing keeps them away at dusk. And if the breeze dies, which it does most evenings, you need to be as far away from the shore as you can be. You also need to be behind closed hatches or screens, and covered in repellent. If you’re not, you’ll be eaten alive. The little nasties disappear again an hour or so after sunset, so you only have to be concerned about them for a short time.

There is still a shallow bar at the entrance to the San Blas Harbor, but it’s not as treacherous as some would have you believe. I brought Location through the center of the entrance channel two hours after the high tide with about 18 inches to spare under her eight-foot keel. Once past the bar, the channel is well-marked with red and green channel markers all the way up to the Singapore Marina. I took a slip there for a couple of days to provision and prep for my next leg down to Punta Mita.

— J. 12/29/09

J. Mills
San Blas, Mexico
(Neptune Beach)

A few months ago I made a 30-hour singlehanded passage from Mazatlan to San Blas without — except for a handheld GPS — electronic navigation instruments or an autopilot. I hadn’t wanted to make the passage that way, but while I was back in the States last fall, my boat was damaged by lightning in Mazatlan Marina. The strike took out all of my boat’s electronic navigation equipment.

Having been haggling with my insurance company since my return to the boat in October, I installed a new knotmeter and a depthsounder — so I could at least ‘see’ the bottom — and headed south while the details of the settlement got worked out. My original plan was to sail down the coast in daysails of 20 to 30 miles. But after a couple of quiet days in the anchorage at Isla Piedras in Mazatlan, I talked myself into what I thought was going to be an 85-mile overnight passage to Isla Isabella. I had no idea that hallucinations would be involved.

The weather for the passage was great, with steady wind and calm seas.

The channel up the estuary to the marina in San Blas is usually well-marked and is lined with palms and other tropical vegetation.
Alaska and cruising in Mexico is something we discuss all the time on our boat. The Alaskan experience is a stark contrast to Mexico. Both are highly seasonal, but that's where the similarities end.

Winter sailing in Mexico could be described as Sailing 101. With few exceptions, the weather is benign, the sailing is consistently good — meaning moderate winds and calm seas — and anchoring is a cinch, usually in water no deeper than 30 feet. While the charts are horribly inaccurate, aerial photography, numerous cruising guides and online resources, GPS waypoints and radar make entry to the bays and marinas a straightforward matter — especially if attempted during daylight.

Alaska, on the other hand, requires a Ph.D in seamanship. Mariners must battle tidal fluctuations of up to 25 feet, and usually have to anchor on bottoms in deep — 60 feet is the norm — water. More than once we had to anchor in more than 120 feet of water.

As if mariners in Alaska don’t have enough to worry about with uncharted rocks, raging currents, williwaws, deadhead logs, violent storms, crab pots, big seas, and mechanical failures — which can quickly become life-threatening in the frigid waters — there are also cruise ships in narrow channels and icebergs and bergy bits north of 50°N. One member of the Coast Guard Auxiliary in Ketchikan told us that there are approximately 104,000 uncharted rocks in Southeast Alaska alone. If they can count them, why can’t they chart them? Then there are water problems. Glacial silt plays havoc with watermakers, and potable water isn’t readily available, especially in the upper reaches of British Columbia.

The natural wonders of both Alaska and Mexico are spectacular, but hands down I’d have to give Alaska my vote for some of the most spectacular scenery on the planet. As we caught our first glimpse of Alaska in ’08, I was immediately reminded of a comment a friend had made shortly before we left. “Everything in Alaska is big.” What I saw as we crossed Dixon Entrance was majestic. There was a marked difference, as towering mountains, burdened by perennial fields of snow, came into view, and the steely blue water faded to an opaque gray that was deep and forbidding. Venturing off the beaten path, we quickly learned that Alaska has fiords rivaling those of Scandinavia.

Navigation is also complicated in Alaska, and there are no margins for error. Running the Zimovia Narrows enroute to Wrangell was a new challenge for us, and we actually had to backtrack to round some of the buoys. Given the speed of the current in the narrows, a navigation error can have dire consequences.

And all the modern navigation equipment available doesn’t necessarily assure safety. Departing Craig, where we’d been held up for four days to sit out a particularly violent summer gale, we headed to Clam Cove. It was on this leg, having to pass through Tlevak Narrows, that we had our first real problem with currents. Having checked the current at Everything seems to be oversized in Alaska — the mountains, the sky, the clouds, and even the Witness Protection Program.

A study in contrasts. Spread: the utterly calm, blue and warm waters of Agua Verde on the west coast of the Sea of Cortez. Insets: the icy waters of Glacier Bay, and the raging currents of what could be any one of a number of narrows in Alaska. America’s 49th state is big, Mexico is muy tranquilo.
the narrows on our chartplotter. I was sure our arrival at the northern entrance was well-timed to coincide with slack tide. Preoccupied with some last minute personal business before losing connectivity with the internet, I didn’t double-check the slack tide prediction against the backup navigation system I maintain on the ship’s computer.

As we approached Tlevak Narrows, it was immediately obvious that something was terribly wrong. The red entrance buoy was hardly visible, as it strained at its moorings, barely holding station against the onrushing current of rapidly rising water. The water ahead was a boiling cauldron of dangerous eddies. Motioning Sharon to take the wheel, I bolted below and pulled up the tidal data on the computer. Much to my shock, we were heading into the full force of the spring ebb — with the outgoing current running near its maximum velocity!

To make a long story short, for the next two hours we battled to inch through the two-mile-long narrows. I often had to avoid eddies, some of which looked big enough to swallow our 47-ft boat. As I drove an erratic course of a drunkard, I watched in anguish as our boat barely held on the wheel and my shoulder muscles burned for an hour. Sharon didn’t say a word as I battled for our survival, but the terrified look on her face said it all.

Sailing in Mexican waters during the winter presents no such problems. The occasional Norther is the biggest weather danger, and these are usually forecast well in advance, and there are plenty of places to take shelter.

Culturally, however, I’d have to give the nod to Mexico. A friend we met along the way summed up the Alaskan culture by saying: “Everyone in this state looks like they’re in the Witness Protection Program.” Sharon and I laughed out loud, because we’d met a number of people who, if not running from the law, were surely running from something. During our four months in Alaska, I can remember only a few engaging conversations with locals.

In Mexico, on the other hand, there is an opportunity to study and learn the history and traditions of a rich culture that is so different from our own. And having taken fabulous trips inland, we encourage cruisers not to limit their travels to the coast.

I’ve been lucky to be able to travel around much of this diverse planet, and the people of Mexico are among my favorites. For the most part, they are dirt poor, and yet they would share anything they have with you in return for a smile and a gracias. Their sense of family is unrivaled in our culture.

Which cruising venue would I choose if I could only choose one? It boils down to one thing — the weather, stupid! We chose Alaska as our first major cruising destination because we wanted to get our cold-weather sailing behind us early on. In the entire summer we spent in Alaska, we only counted five — that’s right, five! — days where it was 70° or more and sunny. The norm was grey overcast and frequent rain, punctuated by frequent gales. We’ve been enjoying the Mexican winter weather since arriving in Cabo San Lucas with the ’09 Ha-Ha in November. I don’t think we’ve had five nights when the temperature dropped below 70°. So the answer is simple: From now on, Last Resort will be following the sun. And a good part of our future cruising plans include Mexico — although we will be moving on to the Caribbean and the Med, too.

— dick 02/15/10
IN LATITUDES

There are probably more goofballs like me who think it reasonable to buy a slightly used cruising boat in Southeast Asia from a westbound cruiser who feels he/she has reached the end of easy cruising. Friends keep asking, “How long will it take to get your new boat back to California?” To which I reply, “Why? I’m going cruising.”

The Easterbrooks certainly got the better part of downwind routing. However, I got a complete and proven cruising boat conveniently positioned in one of the world’s great cruising areas. I have no desire to cruise westward across the Indian Ocean. Nor does shipping my boat to North America on a freighter appeal to me, as it’s too many dollars and too little pleasure. Besides, the islands to the east of Malaysia along the equatorial Pacific are attracting my solitude-seeking heart. From Borneo east through Micronesia and Kiribati, there are plenty of destinations to make a fine multi-year cruise. From there I may rejoin the annual Puddle Jump migration at the Marquesas, or bash through the Marshalls to Hawaii, the Pacific Northwest, then slide back to Mexico on the Ha-Ha.

Actually, I have no idea what I’m going to do. As I didn’t think that far ahead. My only goal is to be at sea aboard a Santa Cruz 50. Since my daughter still has a year in high school, I’ll be commuter cruising every month. I’m scheduling legs with friends, expect to take new friends along the way, and hope to do some legs singlehanded. The only downside I see to this adventure are those deadly transpacific flights.

Some people have wondered at my naming my new boat X. But yes, that’s her name. I’ve got some reasons for doing it, but they’re not very good ones. Maybe it’s because ‘X’ is an old hobo symbol for “Don’t knock here, unfriendly resident.” Maybe it’s because ‘X’ on a map indicates ‘You are here’, or marks where the treasure is. I really have no idea. X is just what I put on the registration form.

January update:

In the shadow of its wealthy neighbor, but better because of it, Danga Bay Marina in Johor Bahru lies just across the narrow Johor Straits from sparkling Singapore. Danga Bay is an ambitious but as yet unfinished urban development project promising all the dubious attractions of the good life. The development includes an amusement park, convention center, apartments, waterfront promenade, bandstands, restaurants — and, of course, the small marina in which I took possession of X. There’s room to anchor out in front of the marina, and a few of the 50-ft slips are available for any length stay. The price for anchoring out is nothing. Oddly enough, it also costs nothing for a slip.

The Singapore and Malacca Straits, 13 miles to the southwest, are famously busy with shipping. But because of a bridge with an 82-ft clearance along the way, and the nearby causeway to

Wild monkeys, never a menace in Mexico, can be a cruiser problem in Malaysia.
Singapore, the waters are very quiet around Danga Bay Marina. And cruisers feel safe here. A simple unlocked gate and ever-present guards keep the non-boaters off the very nice docks. There is power available for a small charge and the water is free.

The local Australian, Canadian and European cruisers seem to have the run of the place. The area is very quiet during the day, but comes alive at sunset when families and young romantics sit, stroll along the waterfront, and dine at several indoor/outdoor restaurants. The locals are friendly and helpful. And you can do just fine speaking only English, especially if you can remember what the British might have called something while they were running the place.

The marina is well-served by buses and taxis, to either downtown Johor Bahru, which is just two miles away, or the huge supermarkets that are even closer. Despite its being a lot of trouble and there being plenty of restrictions, people from Singapore flood over here to buy things at much lower cost than at home.

Needing to paint the new name on my Santa Cruz 50, I visited a nearby hardware store, which had its stock haphazardly stacked to the ceiling. A can of red enamel, two small paintbrushes, and a nice deck brush came to a total of $6. Marine items and entertainment not available near Danga Bay are certainly available in Singapore, which is about an hour’s taxi ride away. But the ride goes through Customs and Immigration for both countries, so it’s not something you want to do unless you have to.

The combination of a dirt cheap marina and low-cost flights to the many popular destinations in Southeast Asia make Danga Bay a popular base for cruisers. The social life is excellent around here, so it would be easy to stay. But I came here to sail. So after one more run to the supermarket, I’m taking off for the sailing center of Langkawi, about 400 miles to the north.

---

**Invictus — Buchanan 36**

**Jeff Graveline**

**Cruising Cheap**

(San Diego and The World)

If you find yourself on the other side of the world, in places like Langkawi, Malaysia, where the living is easy and inexpensive, you’ll meet a lot of folks with a world of cruising experience. That would include 47-year-old Jeff Graveline, who left San Diego 27 years ago.

When Graveline grew up in San Diego, he and his brothers were more into bodysurfing than sailing. Without easy access to sailing opportunities, they were pretty much limited to ‘borrowing’ Hobie Cats left on the beaches of Mission Bay. It was easy enough to do because they had their own set of Hobie Cat sails.

Joyriding Hobie Cats was one of the more sedate aspects of Graveline’s life in the late ’70s and early ’80. “The beach communities were awash in drugs back then,” he remembers. While he didn’t say anything about taking any of those drugs, he did mention something about having a parole officer. As if the drugs weren’t enough. Graveline had to endure a horrific family tragedy. During a heavy rainstorm, his three brothers decided to kayak the floodwaters. Graveline says they all died after being sucked down a drainage pipe.

“The deaths of my brothers and the amount of drugs in San Diego were too much for me,” Graveline says. “In ’86, when I was in my early 20s, I just had to get out of the States. So, I started tramping around on land. I spent some time kicking around Europe, spent a year in India, and worked in Australia.”

In ’91, Graveline thought it was time to do something different. “The natural progression from backpacking seemed to be cruising on a boat. I didn’t know shit about sailing, but I went to Florida and bought a Bristol 29 sloop for $10,000. Teaching myself how to sail involved a steep learning curve. In fact, my Scandinavian girlfriend became so frightened that she returned to Finland. But I hung with it, sailed to the Caribbean, then crossed the North Atlantic to Europe via Bermuda and the Azores. I paid $20/month to put my boat in storage at Lagos, Portugal, then hitchhiked to Finland, where I got a job on a big wooden schooner. In fact, I worked on that schooner for the next several summers.”

In ’96, Graveline sailed down the Red Sea to the Indian Ocean, hoping to make his way to Goa, India, where he had lived while backpacking. ‘I got into some rough weather, and my boat’s hull began to ‘oil can’. So I ended up going...
to the Seychelles, where I sold the boat to a guy who knew how to solve the oil canning problem. But the Bristol had done me well. After cruising her hard for five years, I sold her for $8,000 — just $2,000 less than I had paid for her. Besides, she’d helped me become a pretty competent sailor. I could do just about anything with her and her 12-hp Yanmar diesel.”

Having sold his boat, Graveline continued on to Kenya to be with his girlfriend. “She broke up with me when I got there,” he remembers glumly. “That meant I didn’t have a boat or a girlfriend.” Graveline responded by traveling around by land again, and somehow ended up in Australia with a “nice girlfriend.”

But two years without a boat was all he could take. In ’98, he returned to Florida and made offers of $10,000 on the five best boats he saw in what he calls a “boat graveyard” on some inland waterway. Three of the offers were accepted, and he decided to go through with the purchase of Invictus, a fiberglass Buchanan 36 with a wood mast and boom.

On his way to Panama, his and his Aussie crew got hit by a hurricane. Jeff was washed out of the cockpit during one knockdown, and the boat suffered quite a bit of damage. After he returned to Florida, it would be a year before he could take off again.

For the last 10 years, Graveline has been sailing his modest boat all over the world — Colombia, Panama, New Zealand, Thailand, the Philippines, Taiwan, Malaysia and countless places in between. He’s had to make money the entire time, but never found it difficult. For example, when he was based out of Cartagena, Colombia, he used to shuttle backpackers from Cartagena to Panama because there is no road. “It was good money,” he remembers. “I’d take four of them on a four-day trip, food and everything included. I’d charge them $250 each, and clear $400 in four days. That was a shitload of money for living in Colombia.”

Graveline earned money the same way in Thailand for several years, charging about $50 U.S. a day per person to go sailing. “You can live a styling life in Thailand on $100/day. I loved it! I did this in the area between Krabbe and Langkawi, Malaysia. But ever since the tsunami in ’04, things have really gone upscale. With lots of high dollar villas having been built. Fortunately, there are still great little unspoiled islands on the west coast of Thailand. But I’m not going to advertise them.”

One of the dangers of being a charter captain is falling in love with one of your passengers. Graveline so fell for a German woman that he left Thailand for the Med to be with her. After sailing halfway around the world, she broke up with him. But Graveline is philosophical about it, as her luring him to the Med meant he left Thailand two months before the Boxing Day tsunami of ’04 killed tens of thousands of people. “Thanks for saving my life, bitch!” he laughs.

Surprisingly, Graveline hasn’t been completely turned off by sailing long distances in the failed pursuit of women. Graveline’s love for a German charter guest in Thailand resulted in the Boxing Day tsunami not leaving his boat looking like this.
"I just met a gal from Alaska who was vacationing here in Langkawi with her 17-year-old daughter," he says. "We kept dumping the daughter off at guesthouses at night so we could be alone together. I’m thinking about crashing her world in Alaska, but she’s threatening to come back to Langkawi and do the same with my world. If we do get together, she’ll be my first American woman in 20 years."

Is there any chance he might return to the United States?

"I don’t see much point in returning to the States to shake the money tree — because there isn’t much fruit left," Graveline laughs. “Plus, the cost of living is so much lower in Southeast Asia. I used to be able to get by on $8,000 a year, everything included. But now that the dollar has become worthless, I need $6,000 a year. Of course, $10,000 would be better, and if I had $15,000 I could live an opulent life.”

Graveline says $300 a week is a lot of money if you have a boat in Malaysia or Thailand because, “the food hardly costs anything, you can anchor for free, and the immigration fees are reasonable. There are no problems with officials in Malaysia either, but in Thailand you don’t want to tangle with the police, as it will cost you money. There are lots of great islands and anchorages in this part of the world, and the sailing is good, too.”

As you might expect, Graveline is big on thrift. "I didn’t paint my boat’s bottom for five years. I had TBT — illegal in most places — on it, so that helped. But I just scrubbed and scrubbed the bottom. I finally careened my boat for $10, and put another coat of TBT on the bottom. It’s been good for a year.”

Graveline says there are no personal security issues in Malaysia or Thailand. "Everywhere in this part of the world is safer than in the U.S. Malaysia is the most cool of all, as there is almost no theft at all. I did lose an outboard off a dock six years ago in Thailand, but outboards are about the only thing that will tempt them. When I sailed through the Philippines last year, there was even less theft than there had been 20 years ago.”

Given the ease of living, Graveline says there are lots of expat cruisers who base out of Langkawi. “This time of year, from November to May, it’s actually better up in Thailand. But come June to October, when the southwest monsoon hits Thailand with winds up to 40 knots and black line squalls, most people head down here to Malaysia. The weather is always pretty nice here around Langkawi. It’s certainly better than over in Borneo, where I did finish woodwork on yachts. It was so hot that I had to lay varnish on in the evening, because if I did it during the day, it would bubble up."

"After more than 25 years of travelling by backpack and boat, what’s next for Graveline? ‘I’m going to keep cruising until I figure out what to do with my life,’ says the 47-year-old.”

— latitude 01/15/10

**Weird Weather Around The Cruising World**

Every year sailors say the same thing — “the weather has been really strange this year.” But this winter there seems to be some truth to such claims. California — particularly Southern California — has gotten some unusually good soakings. And there has been an uncommon number of huge swells along the California coast. Just ask the contestants in the Mavericks Surf Contest. Cruisers in Mexico were shocked first by several waterspouts on Banderas Bay, then by a sudden blow along much of the mainland coast with winds to 80 knots. Such occurrences are rare south of the border. And as Steve Lannen of the San Francisco-based Beneteau 405 First Full Quiver wrote from Barra Navidad, "During our first two years of cruising in Mexico, we never saw any rain. Not a drop. This year it’s been a whole different story. And along with all the rain has come lightning — which no mariner likes — and thunder. I guess El Niño has made such a difference in the weather patterns that many of the boats that were going to head south or do the Puddle Jump are thinking about waiting a year."

And while it is tropical cyclone season in the South Pacific, an unusually high number of cruising boats have been adversely affected. Most *Latitude* readers will recall that Wayne Meretsky’s Alameda-based S&S 47 *Moonduster* was claimed by tropical cyclone *Mick* in Fiji in December.

Cyclones in Fiji aren’t unusual, but they aren’t that common in French Polynesia. Yet in late January, Liz Clark was spooked enough by the approach of tropical storm *Nisha*, with winds to 50 knots, that she had her Santa Barbara-based Cal 40 *Sweet* hauled out at Raiatea. “All the other boatowners were making fun of me,” she writes, “but a
IN LATITUDES

meters before grabbing the bottom in 120 feet of water. Stern drove into the wind for seven hours to lessen the strain on his ground tackle.

How would you prepare your cruising boat for a tropical cyclone if she was a 33-ft cat that only weighed 6,000 pounds when loaded for cruising? That was the challenge faced by 29-year-olds Tristan and Mindy Nyby of Los Angeles, who flooded the forward parts of the hulls of their 46-year-old CSK Aita Pe'ape'a, and hung tires from the bows. "Apparently, we had a close call with Lite 'n Up, a derelict sloop whose owner didn’t do anything to prepare for the cyclone,” the couple wrote. "Kuay, which was moored next to us, wasn’t as lucky, and sustained some damage to her bow. However, it isn’t a structural problem, and can be fixed."

"Most of the cruisers," the Nybys continue, "including us, opted to stay ashore for the storm. Most of the buildings and homes stood up well, although a few houses were demolished. We were lucky enough to be house and dog-sitting for a local restaurant owner, and had a safe place to stay during the storm. The house was equipped with a generator, so we played Wii and watched movies throughout the night! Living in a village has shown us firsthand the sense of community on this island. In our neighborhood, everyone is working together to help repair damage to their neighbors' homes. The happiest group on the island is the pigs, as they'll be able to feast on fallen mangoes and breadfruit for weeks!"

The Nybys — a go-for-it couple who bought an old cat "dirt cheap" and modified her for cruising — have

Spread; Unusual but idyllic light-air sailing conditions in the Eastern Caribbean. Inset; ‘Lite 'n Up’ temporary on the rocks courtesy of Rene.

week later they were all begging to be hauled out as tropical cyclone Oli, with winds to 115 knots, took aim at us. Swell and I survived, but I was damn glad to be on land for that. It was scary! Fortunately, none of the other boats around here were severely damaged."

Then there is the Eastern Caribbean, where the above spread photo was taken in January, and where the winter sailing conditions have been ultra mellow. Instead of the usual 18 to 25 knots of 'reinforced trades' from the northeast to the southeast, with big seas and lots of squalls, most days from Christmas through the end of February featured 5 to 12 knots of wind, pancake flat seas, and winds out of the south-southeast — or even the west! There wasn’t a drop of rain or a squall in the first three weeks of February, which is unheard of. Yet there have been epic north swells for surfing. There were three exceptions to the placid, summer-like conditions this winter, and they were when large north swells closed the port at Gustavia, St. Barth on Christmas, on New Year’s Eve, and then again just before Carnaval in February.

And just as we were to close Changes for this month, we got the news from many cruisers in Tonga that Neiafu had been nailed by tropical cyclone Rene. It hit in mid-February with a reported steady 90-knot winds and some gusts over 140 knots. It was a huge storm, almost 600 miles wide. The boats in Neiafu were in the eye for about 90 minutes, which gave owners time to check on lines and chafe gear. But when the wind came back, it had shifted from the east to the north. Many boats dragged. In the case of Joel Stern’s Paradise Bound, she dragged for 400 miles before grabbing the bottom in 120 feet of water. Stern drove into the wind for seven hours to lessen the strain on his ground tackle. How would you prepare your cruising boat for a tropical cyclone if she was a 33-ft cat that only weighed 6,000 pounds when loaded for cruising? "Kuay, which was moored next to us, wasn’t as lucky, and sustained some damage to her bow. However, it isn’t a structural problem, and can be fixed."

"Most of the cruisers," the Nybys continue, "including us, opted to stay ashore for the storm. Most of the buildings and homes stood up well, although a few houses were demolished. We were lucky enough to be house and dog-sitting for a local restaurant owner, and had a safe place to stay during the storm. The house was equipped with a generator, so we played Wii and watched movies throughout the night! Living in a village has shown us firsthand the sense of community on this island. In our neighborhood, everyone is working together to help repair damage to their neighbors’ homes. The happiest group on the island is the pigs, as they’ll be able to feast on fallen mangoes and breadfruit for weeks!"

The Nybys — a go-for-it couple who bought an old cat "dirt cheap" and modified her for cruising — have

Aita Pe'ape'a; lower right, rides out the 80-knot winds of Rene at Neiafu with the cats ‘Mariah’, a Catana 582, and ‘Cyber’, a Mumbly 48.
been having a ball crossing the Pacific on $500 a month. We’ll have their fascinating story in the April issue.

As we write this, another tropical cyclone is headed toward Tonga. We wish everyone the best of luck. No matter if it swerves away or not, we can only imagine that many more boats will flee the South Pacific next tropical cyclone season to the safety of New Zealand, Australia or Micronesia. — latitude 02/17/10

Zihua SailFest
Pamela Bendall
Smaller, But Still Successful
(Zihuatanejo, Mexico)

Never underestimate the impact that a fleet of 18 registered cruising boats can have on a community like Zihuatanejo. For not only did each and every participant have a terrific time enjoying a host of activities throughout Sail Fest week, but more importantly, 46,000 pesos — $3,500 U.S. — was raised directly by the cruising boats for the education of impoverished Mexican children. Through matching grants from various agencies, this amount will be doubled. As a result, another school will be built, and the lives of hundreds of Mexican children and their families will be enhanced forever.

Over 3,000,000 pesos — or $250,000 U.S. — have been raised during the nine-year history of SailFest, and that money has gone to the education of the children in the surrounding region. Four schools have already been constructed, and more than 1,100 young children who would otherwise not have been able to attend school were educated. It’s the most impressive project of its kind in Mexico.

The event is unique in that it’s put on by whichever cruisers happen to show up each winter. Within a week of most boats’ arrival, the spirit of the event took over, and everyone began to work smoothly together. Thanks to the help of many volunteers and boatowners, Friday’s Sail Parade attracted 138 paying guests. Also popular was the Pursuit Race, with 13 boats participating and finishing in the required time — despite the typically light Zihua winds. Singlehander Bob Smith with his Victoria, B.C.-based custom 44 cat Pantera, finished first, followed by singlehander Bernard Slabeck on his San Francisco-based Freedom 36 Simple Pleasures, with renowned SailFest contributor and racer Pete Boyce of the Tiburon-based Sabre 42 Edelweiss III taking third. Taking honors in the cruising division were Tom and Bobbi Hoffman on the Peterson 44 Persistence and John and Barb Van Tongerson aboard their Passport 40 Naida.

In addition to the cruising events, attendance at concerts, merchandise sales, chili cook-off, bake sale and a variety of other fund raising activities all combined to make SailFest 2010 a terrific success for everyone involved — and a wonderful legacy for our Mexican children.

— Pamela 02/07/10

Cruise Notes:
"I can’t believe that I’m in the process of planning my third straight summer of sailing the Med aboard my boat Geja, the San Francisco-based ’76 Islander 36 that was posted as a distress sale in Lectronic while in the Med a few years ago," writes Andrew Vik. "I’ve logged over 3,300 miles on her in the ‘Central’ Med over the past two summers, and there is more to come. For ’10, I’ll head south from Croatia to Montenegro, Albania (gas!), and finally the Ionian islands of Greece before looping back to Croatia via the ‘Achilles tendon’ of Italy. Of the 20 one- and two-week legs I’ve planned so far, friends and acquaintances have filled my crew needs for 19 of them. Only once last year did I recruit unfamiliar crew, and he turned out to be a great local sailor named Andrew Wood, whom I met at Latitude’s

'09 Crew List Party at the Golden Gate YC. So I’ll be back at the Latitude Crew List Party at the Golden Gate YC — the new ‘home’ of the America’s Cup — on March 10, again looking for young-ish, independent traveler types, in case my usual crewmates can’t join."

“We launched Flamingo, our beautiful 48-ft Knysna catamaran, on February 2, rigged her the next morning, then sailed her out through the notorious Knysna Heads for sea trials that afternoon!” write an enthusiastic Tim and Susan Mahoney of Marin County. "We are back in the marina, where workers are finishing the trim and — now that the boat is in the water and the rig tuned — installing the doors. We are also fine tuning all of the systems, provisioning, and getting ready to leave for Cape Town the last week of February. We hope to set sail for the Caribbean in the first week of March. Despite the long-distance building process, it has been a successful experience, and we are very happy with the results. If anyone is interested, we’d be happy to share some of the safeguards..."
we put into place during the process to ensure a positive outcome.”

As we understand it, the “safeguards” refer to being protected in the event you fly halfway around the world to pick up your new boat and discover that she’s behind a padlocked gate. Anyway, we’re thrilled for the Mahoneys. As for their trip across the Atlantic, friends like David Wegman of the St. John-based Block Island schooner Afrigan Queen suggest they stop at St. Helena and play a round of golf at the one-hole course up on the hill near Napoleon’s old digs. And, he highly recommends using Rosalind as ‘the looper’. She was 92-years-old when she toted the two-club bag for Wegman’s friends all day back in the late ‘90s, so if she’s still alive, she’ll still know the course better than anyone.

“We left San Francisco Bay in ’03 and did the ’03 Ha-Ha,” write Glenys Taylor and Henry Mellegers of the San Francisco-based Cal 46 Dreamcatcher. “We then crossed the Pacific, and for the last three years have been happily ensconced in our new home of Singapore. We keep our boat at Keppel Bay Marina, and therefore had a box seat when California, the entry in the Clipper Round the World Race, came in.”

The organizers of the Atlantic Rally for Cruisers (ARC) report that interest in the 25th edition of their November rally from the Canary Islands to St. Lucia has already attracted 150 paid entries. Among them is one boat that also did the inaugural event — the Deerfoot 62 Moonshadow. She’s now owned by George Backhus of Sausalito/Auckland, who is now in the 16th year of his circumnavigation.

The Don Quixote Girls — Jaime, 14; Mera, 11; and Aeron, 9 — who befriended and entertained so many cruisers on the Ha-Ha and in Mexico over the last two years, are going to be Puddle Jumping the easy way, on an Airbus 770," writes their mother Toast Conger of the Seattle-based Lagoon 380 Don Quixote. “After cruising from Vancouver to Zihua, running the nets for months along the Riviera, fishing, swimming, snorkeling, and playing with cruisers of all ages and styles, not to mention dancing on the roof of Profligate during Sea of Cortez Sailing Week. I didn’t think Dean and my daughters would settle easily back into the ‘real world’ of the States. So while we ran our cruising kitty down to fumes, we decided to sell our cat and look for a lifestyle and location where we can work, but still let the girls explore the world.

As a result, we’re packing everything into suitcases and moving to New Zealand. But as Jaime says, our family isn’t done with sailing. ‘Almost all the schools in Auckland have sailing clubs,’ she notes. ‘Did you know that Auckland is known as the City of Sails?’ Mera adds. Daddy Dean is also enthusiastic about our family’s cruising future. While we loved our Lagoon 380, after sailing on Jim and Kent Milski’s Colorado-based Schionning 49 cat Sea Level, and Steve May’s Gualala-based Corsair 41 cat Endless Summer a few times, we know we’re ready for a higher performance cruising cat.’ Aeron wants all her cruising friends to know that she’s going to have a car in Auckland, and that she’s ready to take Puddle Jumpers when they arrive. That is if the nine-year-old can get a license and see over the steering wheel!”

Other than the unexpected little glitches in things like billing, I have to say we’ve been absolutely amazed at the With Mera changing hemispheres, we’ll probably never know all the secret contents of the little case she always carried with her.
internet coverage we’ve gotten from our TelCel Aircard and Wilson amplifier,” report Richard and Sharon Drechsler of the Long Beach-based Catalina 470 Last Resort. “Other than a stretch from Manzanillo to Caleta de Campos, where we had intermittent service, we’ve been able to get internet access everywhere along the coast of mainland Mexico. We keep checking, but sure enough, there is a complete network of cell towers in place. As for the billing problem, when I tried to renew our service for another month, I was told that I needed to pay 100 pesos to activate it — even though I still had 2,300 pesos in my account from having prepaid for seven months. Anyway, it was quickly straightened out when I visited the TelCel office in Manzanillo.

“The following is part of an email I received from a German woman who has been singlehanding the Caribbean for the last 18 years,” writes Jerry Blakeslee, who, after long stints of selling boats for Bay Island Yachts in Alameda and St. Martin, is now cruising the Caribbean aboard his NAB Islomania:

“Barmina came back into the water after a three-month overhaul in Puerto Cortez, Honduras. We had three wonderful days at Punta Sal, and a sunny week at Utila. On Sunday afternoon, I was sitting inside the new hard dinghy we’d built in Puerto Cortez, and I was screwing in the last screw to get the new dinghy ready for her maiden voyage. That’s when I saw a speedboat, with two 250-hp outboards screaming, moving extremely fast along the shore. Suddenly, the boat made a little evasive maneuver to avoid something. But at such a high rate of speed, it threw everybody off the boat. The speedboat continued at full speed in a big circle, and I thought it might hit me and my dinghy. As it got closer, I knew I’d have to jump into the water to survive, so I jumped. The unmanned speedboat sliced my dinghy in half, then rose up and hit my boat’s cockpit and dodger, slid up on the deck, cut through the shrouds, and broke the mast in two pieces. After coming to a halt, it slid backward into the water. That was three days ago, and we’re still busy securing our boat. We dove on the mast and secured the stay. Maybe we’ll be able to lift it in a few days. The mast is broken two meters above the deck, but it’s still straight. The smash-up would
have been something you’d laugh at in a James Bond movie, but it’s been a real nightmare. In fact, I’m not laughing at all, as I’m going to have to work hard for at least a year to get Barmina back to being a sailboat and my home again.”

“It’s the Caribbean, so I don’t know if the woman will get any money from the people who caused the damage or owned the boat,” says Blakeslee. “Strangely enough, I was also hit while in my dinghy by a similar boat, but at Placencia, Belize. The boat that hit me still had people aboard, and they didn’t stop, so I never found out who they were.”

“I’ve enjoyed Latitude for more years than I recall,” writes Tim Leachman of the Eagle Roost Marina in Golfito, Costa Rica. “I think it was the magazine that gave me, in ’89, the lead to buy Caribbee, a ’70 Islander 34. My mate Katie and I sailed her south from Santa Barbara around Christmas of ’91, and spent two years in Mexico. I met the publisher of Latitude in Zihua in ’93, after he offered a free beer to anyone who would meet him on the beach and offer a critique of his dinghy-outboard combination. It was a good thing that I arrived first, because he ran out of beer in a hurry. Latitude’s Ocean 71 Big O was anchored near us in front of Playa Ropa, and we made friends with the Casey and the rest of the crew. Big O later showed up at the Jungle Club in Costa Rica when we were in the area, but you left too soon for us to reciprocate on the beer. Anyway, 15 years too soon for us to re-ciprocate on the beer. Anyway, 15 years ago, Katie and I started Land and Sea, a small cruiser’s club with moorings next to the old Eagle Roost Marina, and have been lucky to meet sailors from all over the world. As the publisher no doubt remembers, back then Golfito had a very well-deserved reputation for dinghies being stolen and officials being corrupt.

Golfito has always been green. What’s new and much better is that rampant dinghy thefts and the notorious ‘Rambo’ are things of the past. Remember ‘Rambo’ from Immigration? We are still a generation behind Mexico when it comes to helpful officials, but things are mostly getting better. And there hasn’t been a dinghy stolen in years. In fact, the reason I’m writing is to happily report that John from the French boat L’or de Tempts got his dinghy back to

March, 2010 • Latitude 38 • Page 151
back after losing it while towing it to Jimenez in the dark. A fisherman found it, towed it back to Golfito, and notified the Coast Guard that he’d found it. All around Golfito there are more services, and the stores have more of what sailors need, so I encourage cruisers to visit us.”

Thanks for the tour down good-memory lane! Sure we remember Rambo, who no doubt belongs in the Latitude’s Hall of Shame. We’re glad things are looking up in the Golfito area, and would love to get some reports from cruisers.

God knows we make plenty of mistakes, so we try not to be critical of other publications, but Peter Swanson’s story about the Sea of Cortez in the February ’10 issue of Yachting magazine had some ridiculously out-of-date information. For example, “Ultimately the government plans to spend $1.9 billion to develop 27 marinas on both the peninsula and mainland sides of the gulf, spaced like rungs on a ladder, and never more than 100 miles apart.” While the overall ‘Nautical Stairway’ concept was DOA, funding was cut off at the end of the Vincente Fox administration way back in ’06, leaving went by the wayside even before the Nautical Stairway did.

From time to time we’ve reported on medical costs in Mexico. Thanks to a painful left thumb, we’ve now got similar information on medical costs in St. Barth, French West Indies — which would usually come in last in any competition for the least expensive island in the Caribbean. The consultation with the emergency room doctor at DuBruyn Hospital — the French leave out the ‘s’ in hospital — before and after the X-rays came to just under 25 euros — or about $34 U.S. The X-rays — using snazzy three-year-old equipment — came to about 23 euros — or about $30 U.S. So the total hospital bill — there were no additional fees — for this foreigner came to 47 euros or about $63 U.S. Care to guess what it would have cost in the U.S.? We were also prescribed some “really good” pain pills. Twenty of them at the local pharmacy came to just under $5 U.S. — or about the price of one Viagra on many U.S. health insurance plans.

We’ve never understood why there hasn’t been more term chartering on 11 Fonatur/Singlar marinas in place. They’ve long been up for sale. Swanson also mentions the proposed ‘land bridge’ for trucking boats from Bahia de Los Angeles and Santa Rosalita, a plan that

**At Latitude 38, we are often asked:**

**Do your classifieds really work?**

*We’ll let the following speak for itself…*

“Dear Latitude 38 folks,

“We were greatly entertained by the ad in the 9/15 edition of ‘Lectronic Latitude, featuring the Hunter Vision 36 for sale — right across from it, on the same page in the May 2008 issue, is an ad for an S&S 1983 Catalina 38 sloop, which we bought almost as soon as it was listed!

“We saw the ad, contacted the seller, took a look, made an offer, had the boat surveyed, and closed on the deal by the 18th of May, and we’re convinced we got a great deal on a beautifully cared for older boat. We can testify to Latitude’s Classy Classifieds as a terrific resource for boat buyers as well as boat sellers!"

“We thoroughly enjoy the magazine and the e-mag, and we know we’ll enjoy the Baja Ha-Ha when we do it — maybe 2009 will see us on your list!"

— Peggy Droesch and Rory Hansen

**in Nicaragua**

Located in a beautiful sheltered lagoon on the north Pacific coast of Nicaragua, Marina Puesta del Sol is your premier cruising destination in Central America.

**Marina Puesta del Sol Resort**

Aseradores, Nicaragua • 011 (from US and Canada) 505-880-00 9

mpuestadelsoyl@yahoo.com • www.marinauestaodelsol.com • USA 408-388-0017
Banderas Bay, Mexico, as it is so much closer to the west coast than is the Caribbean, and it has so much going for it. For example, the air and water are warm on Banderas Bay, the afternoon breezes are reliable but die to nothing at night, and it’s always flatwater sailing. Further, there are great destinations — Punta Mita, La Cruz, P.V. itself, the Tres Marietas Islands and Yelapa — and non-sailing activities such as hiking in the jungle, surfing, diving and hitting P.V. at night. What’s it take to charter legally? According to one boatowner who is pursuing chartering as a way to keep cruising, you need: 1) FM3 status from Immigration in order to be the captain of your own boat; 2) A Contrato de Fletamento, which proves that a local resort is your sponsor; 3) A Contrato de Deposito with the Federal Tax Authority to set up a business; and 4) Operating permits from the local port captains, the Mexican Navy, and the Department of Tourism. Somehow we think this might be a lot more time-consuming and expensive than it might seem at first glance, but we’ll be interested to hear how it goes.

“Having had a great time at Zihua SailFest, I’ll soon be heading farther south,” writes Pamela Bendall of the Port Hardy, B.C.-based Kristen 46 Precious Metal. “My plan is to go to the Galapagos and then Peru,” advises the vet of the ’08 Ha-Ha. “I’ll be taking crew on ocean passages, but otherwise singlehanding. My plan is to sail westward around the world over the next four years and write a book about my experiences. This dream started five years ago when I turned 50, went through a divorce, and ‘got the boat’ in the settlement.”

While at Langkawi YC in Malaysia, we came across a 19-year-old, 50-ft Alex Simonis-designed catamaran, Planet Surf, which had a large and complicated aluminum structure behind the main traveler. The aluminum structure on the catamaran Planet Surf sort of looked like a giant cheese grater with solar panels on the top.

The Kiwi skipper, when we asked what it was, he said it was a surfboard rack for when he and his Asian wife and young child did surf charters among the Mentawai Islands off the coast of West Sumatra. “It holds 25 surfboards,” he laughed. The only thing we saw on the docks of the yacht club that was funnier than the Kiwi skipper was the 19-year-old catamaran Planet Surf, which looked like a giant cheese grater with solar panels on the top.
than that was a bunch of chain in a . . . suitcase!

For better or worse, we’ve run out of room in this issue for reviews of the controversial Norm Goldie of San Blas. About the nicest one came from Mark and Gail Strong of the Pollock Pines-based Dallimore 40 cutter Mangareva: “We met Norm a month ago after another cruiser had already assisted us and our boat — temporarily without an engine — into the estuary. We asked Norm where we could find a diesel mechanic. He wasn’t able to come up with one, so we found one through the Singlar Marina, and passed the information to him. He was very appreciative. Our only other encounter was when we dropped off some school supplies at his house. We didn’t donate any cash to any of his charities, although it was hinted that it would have been the proper thing to do. We think Norm is ‘getting the message.’ Although he is a bit overbearing and loves to talk on the radio, we think he’s a nice guy who just needs to be ignored when he gets out of line. Norm does have a lot of knowledge to share with cruisers. We appreciate your opinion — but you can’t help but wonder how current Goldie’s local knowledge is when he doesn’t even know there’s a diesel mechanic at the marina in tiny San Blas. In any event, a group of cruisers who had gotten completely fed up with Goldie, particularly when he became vindictive, have put together a free Cruiser’s Guide to San Blas. It’s comprehensive in that it lists 49 spots of interest to cruisers, and is said to have the most current information. While all of the credit for compiling the guide goes to the cruisers, who don’t seem very interested in getting credit for it, you can download it at www.latitude38.com/features/sanblasguide.html.

We’ll have more reader reports on the controversial figure in San Blas in the next issue, but in the meantime we have this advice. If you want to use his information and/or contribute to his ‘charities’, no problem. If you don’t feel like doing either, that should be no problem either. But if Goldie tries to intimidate you into not helping others, and seems to be well thought of among the local population. We would hate to see the crusing community cut off from that source of knowledge and/or avoid San Blas because of the situation.”

“"I'm sorry sir, but we're going to have to charge you an extra $7,853 for excess baggage weight. Next time try three-strand rope for your rode."
ignore him. Remember, no matter what he tries to claim or imply, he has no official standing in the Mexican government. If he becomes vindictive, both the port captain’s office in San Blas and the Governor’s Office of Nayarit ask that you file an official complaint. Do it by going to: www.nayarit.gob.mx/contacto/escribe.asp. Once a comment is left, you will receive an email back. You must click on the blue link provided to prove your message is not spam. Your complaint can be in English, because the governor of Nayarit and the aides who would read your complaint are fluent in English. Tourism is extremely important to Mexico, so officials want to be aware of anyone who may be damaging to it.

On a more lighthearted subject, if you’re cruising the Caribbean and are wondering what week would be best to visit St. Barth, we recommend that you schedule it for Carnaval week. And if you do, dress over-the-top for the event instead of showing up in civilian clothes like someone off a cruise ship. We did Carnaval on the island again this year, and had a fine time. In addition to all the normal Carnaval fun, what makes it so unusual on St. Barth is that you get a total of about 5,000 white and West Indian locals, ‘metropoles’ from France, Americans and others; you also get stone broke people and billionaries; and you also get lots of drinking and ganja smoking. But what you never have are any bad vibes or fights, even though there’s never a gendarme in sight. Where else does that happen?

In the French Islands only, the night after Fat Tuesday they celebrate the burning of Vaval — who is an only slightly disguised effigy of a plantation owner. At the end of the night, he gets burned at the stake to the sound of pounding drums before a large crowd at Shell Beach. As we understand it, the lighting of the pallets is run by the local fire department. Inexplicably, they bungle it every year, seemingly having no idea how to light a bonfire. Every time they make the same mistake of trying to light the highest pallet on the leeward side of wood pile. How they don’t know they need to start on the bottom of the windward side is beyond us. Anyway, one of the incendiary crew became so frustrated this year,...
CHANGES

that he grabbed a two-gallon jug of accelerator, and foolishly shook it over the struggling flames. In a matter of seconds, the clothes on the front of his body were in flames and he tumbled onto the sand. Instead of rolling in the sand, as everyone knows you should if you’re on fire, he got up and tried to run. Fortunately, he was put back down in the sand by the crowd, and the flames quickly extinguished. Vaval eventually went up in a glorious conflagration to the sound of cheers and pounding drums. If didn’t hurt the atmosphere a bit that some girls swam topless in the nearby surf. Yeah, you shoulda been there.

It will be March by the time you read this, but if you think the cruising season is over in Mexico, you couldn’t be more wrong. March 16-20 will be the 18th annual Banderas Bay Regatta put on by the Vallarta YC at the Paradise Village Resort and Marina. This is ‘cruiser racing’ in ideal conditions with big discounts on berthing, so we highly recommend it. About 30 boats participate. April 1-6 is the super casual Sea of Cortez Sailing Week, which is for cruisers who really love to sail. It starts and ends in La Paz, but most of the time is spent at Caleta Partida and Isla San Francisco. About 30 boats participate. The Club Cruceros de La Paz holds its La Paz Bay Fest, April 8-11, which is heavy on social events with one day of sailing near the end. Hundreds of people attend. And then there’s the big daddy of organized events in the Sea, the Hidden Port YC’s always popular Loreto Fest from April 30-May 2. You’ll see hundreds of folks at this fundraiser. And after all these events, there’s spring and early summer cruising in the Sea of Cortez. Many folks who have gone around the world have said that the Sea was as good — in its own way — as anywhere they went.

But no matter where you cruise or on what, we’d love to hear from you and publish your photos. Direct them to richard@latitude38.com. Happy sailing!

We are always looking out for you!

Biz ads will not appear on website.

‘Trying to Locate’ Ads are for those searching for lost boats/people – not shopping – and cost $10 for 20 words max.

FREE Online Ads are for a private party setting a boat for less than $1,000 – or gear totalling under $1,000. (One per person; must list prices in ad.)

All ads will be set to fit Latitude 38 standard • Re-Run Ads: Same price, same deadline

WHAT’S IN A DEADLINE? Our Classified Deadline has always been the 18th of the month, and it’s still pretty much a brick wall if you want to get your ad into the magazine. But it’s not so important anymore when it comes to getting exposure for your ad. With our new system, your ad gets posted to our website within a day or so of submission. Then it appears in the next issue of the magazine. So you’re much better off if you submit or renew your ad early in the month. That way your ad begins to work for you immediately. There’s no reason to wait for the last minute.

DINGHIES, LIFERAFTS AND ROWBOATS

27-FT NOR’SEA, SAUSALITO. $36,000. Legendary bluewater pocket cruiser, well-equipped in excellent condition. Mexico and Baja Ha-Ha vet ready to go again. Best of all, she’s legally trailerable, like a ski boat! Cross oceans and sail lakes with this stout Lyle Hess masterpiece that’s perfect for cruising couples and liveaboards. Loaded with upgrades after $60K refit in ‘04. Never thought I’d sell her, moving to East Coast and need larger boat for growing family. East Coast trades considered. http://sites.google.com/site/svmarylee. (415) 383-7088 or saifydogtit@yahoo.com.

28-FT ISLANDER, 1977. San Rafael. $15,000/obo. Solid, comfortable Bay boat. One-year-old bottom paint and Ullman main. Five jibs (including self-tending) spanner/voile. Volvo diesel, wheel steering, lines aft, teak and holly sole. Good condition. (707) 829-7744 or (707) 478-7296 or bni07@comcast.net.

26-FT YAMAHA, 1984. Alameda, $14,000. 1 of 2 Y26 on the Bay. Very good condition with $4k of recently replaced sheets, upholstery, equipment and instruments, since purchase in June ‘09. Great singlehander, racer/cruiser, very good sails, diesel, generator, refrigerator, autopilot, GPS. (415) 810-2030.

29 TO 31 FEET

30-FT CAPO. Schumacher design/West-early built. 1984. San Diego. $34,000. Rare find. BIG 30 footer. Well maintained. Full sail inventory, new main, full headroom, full electronics - 5 displays, Yanmar diesel. Great race record. Email for more photos/ info. (650) 450-3496 or david_vieregg@intuit.com.

33-FT STEEL SLOOP, 2006. Lowrie, San Rafael. $52,000. Custom designed and built. 28hp Beta diesel, Monitor vane, Hogan full batten main and genoa, Lavac head, Rayhoo radar/GPS, extensive ground tackle, stainless steel galley, ship- mate stove/oven. Lines plan, pics, survey on request. (707) 895-2135 or dewrinski@pacific.net.

34-FT SAN JUAN, 1984. $39,000. Price reduced. Fast comfortable, blue water cruiser, excellent condition, 6 headroom, galley, sleeps six, rod rigging, Roller furling headsail, 150% genoa, main, working jib, in good condition. 3GM Yanmar, Achilles dinghy, large bimini. (510) 420-8956 or nino@access-print.com.

Legs are 4-6 weeks, Sept 2010 to Feb 2011. Must participate fully and share expenses. Call Mike Johnson (505) 466-6326 or email Claire at clairenham@comcast.net.

**SEEKING EXPERIENCED CREW.** Fort Pierce, FL. Seeking experienced crew to sail the Bahamas in the summer of 2010. Well founded 52-ft ketch. Share expenses. (530) 562-1553 or helekakau@hotmail.com.

**CREW FOR HEINEKEN ST. MARTIN.** Farr 40. St. Martin. Looking for crew to sail on Farr 40 during the Heineken Regatta at St. Martin. Limited accommodations on the boat and you will need to get there. www.heinekenregatta.com. Call: (650) 534-6742 or marcvayn@gmail.com.

**DEPUTY HARBORMASTER.** & Harbor Worker B. San Mateo County Harbor. District: Applications being accepted to establish a certified list for Deputy Harbormaster $22,948 - $25,293 and Harbor Worker B $12,766 - $19,248. Deadline for application is by Thursday, March 19, 2010 at 4:00 p.m. Contact: (650) 583-4400 or www.sanmateo.gov.

**OCSC SAILING.** Fleet Service Technician & Detailer/ Berkeley, OCSC SAILING’S Service Department has two FT positions available for our fleet of 50 boats. One is for a marine tech with sail- ing experience as well as repair skills in one or more of the following areas: diesel mechanics, fiberglass repair, rigging, electrical/plumbing systems. Second position is for an entry-level boat detailer/cleaner. Pay negotiable depending on experience. Email resume to Russ: russ@ocsc.com. www.OCSC.com.

**SAILS, SAILS, SAILS!** California sales territory for major sailmaker. Complete turnkey office, in Alameda. Well established money maker. Ideal for semi-retired sailor or sailorette, who wants to work part time only. Owner will train. Please email for details. salty1938@yahoo.com.

**INCOME OPPORTUNITY:** Entrepreneurs looking for a new profit opportunity - Sunstream is a leading dealership in Southern California. Dealers in 42 countries profit from a proven business model with high-performance products and full support. Seize a great income opportunity. www.sunstreamboatlifts.com. (206) 755-6391 or scostello@sunstreamcorp.com.

**WANT TO MAKE SOME EXTRA CASH...** $25/hr plus gratuities/medical. ...while you aren’t cruising? Do you love to be in front of an audience? Do your friends think you are funny? If you answered YES! to all these questions, come be a Duck Captain! Ride the Ducks is looking for drivers/tour guides to safely entertain tourists and locals this summer on the Ducks! Full-time and part-time seasonal positions available. Candidates must have a minimum 25 Ton USCG Masters License (or enough sea time to obtain) and will be required to obtain a CDL (Commercial Drivers License) with a P (Passenger) en- dorsement. We’re looking for an excellent safety record and a fun & positive attitude. www.ridetheducks.com/jobs/application.aspx?employment@sanfranciscoducks.com.
FEEL LIKE YOU’RE MISSING SOMETHING?

Don’t miss the Latitude 38 Crew List Party on March 10 from 6-9 p.m. at the Golden Gate YC. There’ll be skippers looking for crew and crew looking for rides. Put faces to the names on our comprehensive crew list. You’ll find more info on the list and party at our website: www.latitude38.com/crewlist/Crew.html.

Attention offshore sailors!
Have you ever wondered what it’s like to actually have to get in a liferaft? After years of inflating a liferaft inside at the Crew List Party, we’ve decided to get more realistic. Thanks to Sal’s Inflatables, we’ll be hosting an actual salt-water liferaft deployment and boarding class at the club prior to the party. For more details visit the webpage listed above.

KKMI Boatyards to serve Bay Area boaters. For updates about the opening of KKMI Sausalito this spring, visit kkmi.com or email us at clipperssubscribe@kkmi.com.

I bought "Ganesha" brand new from KKMI when I retired and they have been taking care of her since. She looks great and is almost as good as new, even if I am not. KKMI even manages to keep my bills low enough for the "social security eligible".

Tom Bauch
Sabra 36 "Ganesha"
